Students help save rain soaked SLO

Nearly 200 student and faculty volunteers joined together Tuesday, Jan. 21, to lend a helping hand in the clean-up force at the university town of San Luis Obispo.

"It's a bond between students and university, our neighbors," said Dr. Elliot Anderson, assistant professor of psychology and one of the organizers of the event.

The volunteers worked at several different sites around the city, including the college's Journalism Department, which was flooded by heavy rains last week.

They filled sandbags and helped evacuate homes and businesses. Some students even stayed overnight at the university to ensure that no one was left stranded.

"We're here to help our community," said one student volunteer. "Our university is made up of more than just students, it's a community, and we need to take care of each other in times like this."

The university community was grateful for the help and support from the volunteers, and many students stayed after the event to continue the clean-up effort.

Peaceful use of space

aim of NASA program

"The primary objective of NASA is to peacefully explore and understand the universe," said Dr. John Lamm, lecturer for the University of California, Berkeley.

"This is not about the use of space as a military weapon," said Dr. Lamm. "It's about using space for the benefit of humanity.""

Dr. Lamm explained that NASA's goals include sending astronauts to the moon, developing new technologies, and conducting scientific research.

In order to achieve these goals, NASA has a team of scientists and engineers who work together to design and build spacecraft and instruments.

"Space travel is not only about exploring new worlds," said Dr. Lamm. "It's also about advancing our understanding of the universe and how it works."

Housing facilities make living pleasant
The loss to the Bulldogs set the Mustangs back to third place in the CCAA conference with a 1-1-1 record. Lee Rogers led the Mustangs in scoring with 10 points while Alan Spencer got 14, leaving Fantale just through 16 points. The Mustangs shot 48 percent from the court, while the Bulldogs were up to 47 percent at the end of the game. The Bulldogs wild second half was mainly due to 68 percent shooting from the floor.

In the rebound department, the Mustangs held fust the first half, with the score tied at 38-38. Dirk Stone had already grabbed 15 rebounds and Royers and Hill Ponjiani 8 rebounds. The Mustang crowd had hoped, as the Mustangs buck to Bulldogs led in rebounds 47-40. The defense seemed to be the prime reason for the first half, as the Bulldogs shot better percentages from the floor than the Mustangs.

There are many first in writing basketball. There are first games won, first losses, first athletic event of the double-headers, first win for a athlete, u First pin und even a first loss. Mustangs back to third place in while Royers and Hill Ponjiani 8 rebounds. The defense seemed to be the prime reason for the first half, as the Bulldogs shot better percentages from the floor than the Mustangs.

EXPRESSIONS . . . Coach the Cheerman once again took two of the opening single* matches, 3-0, 0-2, 0-4.

The set was staged first the opening weekend. It looked like it could be the Fontaine put through 15 points. forward Larry Henricksen lwith 6-2, in last month's Mustang
