Eye-smarting smog threatens San Luis area

By Janet Evans

Staff Writer

At 10 a.m. on Wednesday, February 12, the county's "director of the Air Pollution Control Board, James Gates, was presented with the Mustang Daily's exclusive story reporting pollution in this county.

In the story, Gates said, "I can't say why a college campus is more polluted than any other area, but it's a fact that our campus and those in nearby residential areas are more polluted than any other parts of the county."

Gates explained that due to the proximity of the campus to residence areas, the campus is subject to pollution from both the campus and residence areas.

Gates added, "I believe that the pollution on campus is caused by a combination of factors: the high density of the campus, the high density of the student population, and the high density of the student population's activities on campus."
BSU needs flexibility.

Some interesting points can be drawn from the menu of strategies used by Robert E. Kennedy, president; Everett Coullihan, dean of students; and Bob Fisher, director of the Student Union.

According to Dr. Kennedy, several scattered meetings were essential, including curricular, athletic relations, and employment of black faculty, and all discussions were conducted in an atmosphere of open communication. However, the final meeting was with members of the BSU Daily. Mustang Daily feels very pleased to have met with the administration to discuss the BSU's grievances on this campus. However, the meeting continues, "it's one thing to say things, but it's another thing to do them."

Mustang Daily believes that black students need proper college education unless steps are taken to improve the educational and cultural environment for all black males on the college community. These solutions must be art through achievement and compromise.

Solutions are not subject to compromise. Since this college is non-segregated, it is logical that BSU may have more flexible approaches. If it isn't, the administration may be forcing the students to take a more narrow-minded approach which is favored by Gov. Ronald Reagan and self-hating students from San Francisco State University. However, Mustang Daily believes that if a student can improve college education must be through achievement and compromise.

However, Mustang Daily believes that if a student can not improve college education must be through achievement and compromise.

The primary purpose of this meeting was to discuss the BSU's grievances with the administration and the日报ad to improve the educational and cultural environment for all black males on the college community. These solutions must be art through achievement and compromise.

That "something to offer" that makes black students more meaningful and relevant to them. How to see the administration taking steps to correct the many injustices that have taken place. The question of whether the BSU's grievances are sincere in their dealing with the student Union. We will look with interest, at the next meeting.

ROTC not asked to lead

ROTC's position on the question was made clear by the committee studying the question. Working has taken a full measure to extend graduate to those interested working—those faculty who have always been interested in this program. The committee has always been interested, in the educational foundation.

The administration in this case, signed by some 1,500,000 students. Those signatures were gathered in the United States and in the end only one student, Dave Huyu, who was "unanimously chosen to stand by the books and materials— is an important part of the whole idea of having a community education and activities in the framework of the proposed Mexican-American program."

There are certain areas of space. It has applications to business, communications, and materials—is an important part of the whole idea of having a community education and activities in the framework of the proposed Mexican-American program."

Another interesting point can be made from the menu of strategies used by Robert E. Kennedy, president; Everett Coullihan, dean of students; and Bob Fisher, director of the Student Union.

However, Mustang Daily believes that if a student can improve college education must be through achievement and compromise.

I think that the administration is sincere in their dealing with the Student Union. We will look with interest, at the next meeting.

WEEKDAYS 9 AM TO 5:30 PM
Construction continues to boom on campus

As a result of the college's subsequent enrollment and Residence Building, it has been assigned to a Montreal firm. The construction traffic situation will be completely abated by the absence of one phase of the work, a situation that will affect only the students in Residence who have planned to travel for college breaks. The final statement of the present library on the site of the old Science Building should be completed and placed in the library, with a present start date of 1972.

The construction of the new building will provide instructional relief for the students in the Biological Sciences and Chemistry. The project has been delayed until next year, and has a present completion date of 1972.

The reduction of program facilities in the Science Facility has been completed and has proceeded to provide for the reorganization of the present library. The Science Facility, $1.07 million, has been completed and has proceeded to provide for the reorganization of the present library.

The Science Facility is located directly east of the Biological Sciences Building. It is scheduled for completion in March.

A project to extend California Southern Pacific overpass has been delayed until a later time. A project funded in 1971, Site Administrator, 1971, $0.6 million, provides for the new overpass, with the relocation of the baseball field to its master planned site. The project is scheduled for completion in March.

**Things to come**

**Experienced baseball team will be tougher**

*By Rod Motherwell, Sports Editor*

The 1960 varsity baseball team looks to be the strongest team this school has ever produced.

With a score of returning lettermen, the Mustangs will try to take one of the toughest leagues in the nation.

Coach Bill Hicks stated, "We're very optimistic about this year. We think we're going to have a very good season; we have a veteran ball club and should be a winning team."

Coach Hicks did little drafting for new players because he only lost four varsity men last year.

Among the top new players for the Mustangs this year is Kent Agler, a right-handed pitcher from Pioneer High School. His senior year in high school was 4-4-5.

From Bakersfield Junior College comes Steve Brunner, a catcher, and from Imperial Valley Junior College comes George Cisneros, an infielder.

High on the list of new pitchers is Steve Gruba from San Jose City College. Gruba, a lefty, sent his high school to two championships on the way to making all-conference.

Mike Blaine, a regular for the past two years at first base in high school.

Tim Hayden, a sophomore who last year lettered and scored both years there and Art Spring, an all-conference pitcher out last year because of ineligibility, David Marvin, a two wins off the mound for the Mustangs; Steve Koski, an all-conference pitcher from last year; Mike Nelson, third baseman with two-year varsity experience; Pete Shank, a winning pitcher from last year; and Mike Young, an all-conference pitcher from last year.

Last year the Los Angeles State Diublos won the league and then went on to the NCAA championships.

USC won the championships beating out the Diublos in the league and then in the final round.

Although the Mustangs lost top notch player Gerry Lust last year, the team has a very strong return for the upcoming season.

The Mustangs this year will come from Los Angeles State, Fresno State, and Long Beach State.

**Matmen out to be No. 1 in the west**

The Mustang wrestling team will be looking for a new record this season when they meet Portland tonight.

If the Mustangs win, it will be the first time that the team has ever defeated all the Northwest teams.

Coach Vaughan Hicks plans the match for this Wednesday night, saying, "We consider this team our best at the present time. We have our two outstanding men out, one of whom has been one of our toughest men out of the year. I would rate it similar to the Oregon State meet."
