College AH pioneer co-hosts festivities

The man-animal human bond was a building block of Alpha Phi Omega, which held its semiannual convention at the University of California Extension Building on April 25. The convention featured many events, including a banquet, a dance, and a concert.

The convention was attended by members of the Alpha Phi Omega fraternity, who gathered to discuss the organization's goals and future plans. The event was co-hosted by the University of California Extension and the Alpha Phi Omega fraternity. The convention was supported by the local community and was well-attended.

Student Judiciary serves as mediator in college spat

Jeff Randall

One facet of this campus which never fails to interest you, is the Student Judiciary. This organization is responsible for handling student disputes and ensuring fair treatment for all.

Recently, there was a dispute between two students who were accused of violating the campus rules. The Student Judiciary was called upon to resolve the issue, and after a thorough investigation, they found in favor of the accused students.

The Student Judiciary serves as a mediator in college disputes, ensuring that all students are treated fairly. They work hard to resolve conflicts and maintain a peaceful campus environment. Their dedication to fairness and justice is commendable.
Enjoy the real story

Welcome to "The Country Fair on a College Campus!" Things have changed since Poly Royal took place some 40 years ago. As you tour the campus, change is evident. During the last decade advancement in technology college students are using and learning. In the realm of radio, Poly Royal is just one example of changes that are happening. Students are better informed today. Their ideas are to be taken seriously. They want to be treated as equals. They demand facilities that are well maintained and clean. They want to be treated with respect. They want a voice in the decision-making processes of the university. This year, Poly Royal was a response to those demands. Poly Royal was a way for students to show the world that Poly is growing pains from that student realization screams Royal.

The advance in technology college students are using and evident. Display in printing, science, and agriculture show students behind them. They are the real story behind Poly Royal. Blown out of proportion.

Across the newspapers' front pages and the networks' place some 87 years ago. As you tour the campus, change is evident. Students are better informed today. Their voices are to be taken seriously. They demand facilities that are well maintained and clean. They want to be treated with respect. They want a voice in the decision-making processes of the university. This year, Poly Royal was a response to those demands. Poly Royal was a way for students to show the world that Poly is growing pains from that student realization screams Royal.

**Greenhouse growing room extended**

by Ray Casey

The need was stated in the annual report of the Horticultural Fraternity. A Growing Room was needed for the study of Ornamental Horticulture. In the final report the officers of the fraternity stated, "We cannot overstate the importance of this room in the development of the Horticultural program and the success of the students in the program."

The room is being built on the north side of the campus and will be ready for use in the fall of 1959. The room will contain a large greenhouse, a laboratory, and a classroom. The greenhouse will be used for the study of ornamental horticulture and the laboratory will be used for the study of the physiology of plants. The classroom will be used for lectures and discussions.

The room will be a valuable addition to the Horticultural program and will help to prepare the students for future careers in the field of ornamental horticulture.

**Architecture continues tradition of prize winning displays, events**

Clarebelle Cow, heroine of Roses will reign over Poly Royal parade

The Dragon Inn on Sather Lane is a quaint cafe - the Powerhouse Cafe. During Poly Royal, it will be the site of a show and auction. In the true atmosphere of the rose parade, (and now she's a resident at the Kellogg campus), the Powerhouse Cafe will be the site of a show and auction.

The Dragon Inn is a story of power and hunger for knowledge. The Inn is a place where students can come to relax and study. The Inn is a place where students can come to learn and grow. The Inn is a place where students can come to be.

Growth seen in completion of Computer Science Building

The one million dollar project is due to be completed by July. It will house both the computer center and mathematics classrooms.

by Mary Heff
Staff Writer

Program is far more interesting

Growth seen in completion of Computer Science Building.

The building, designed by a new in Bank Building, will be the first new building at Poly Royal. It will be the first time you will be able to take a class in the new Computer Science Building.

Although the building is far more interesting, the students are not sure if they will be able to take a class in the new Computer Science Building.

The trials and tribulations, the fear and anxiety associated with this class. The smart ones got into groups, the others just followed their leader. Some of the kids tried to push from behind, others pulled, but all they got was sore backs and an unfriendly atmosphere.

The one million dollar project is due to be completed by July. It will house both the computer center and mathematics classrooms.

The one million dollar project is due to be completed by July. It will house both the computer center and mathematics classrooms.

College Union Building

The College Union Building near, under construction, is expected to be completed by late next spring. The construction is now about 20 per cent complete. The construction costs are expected to be about $3,000,000, which does not include architect's fees.

Campus club meeting codes revised through directive

Chair of this recent directive, which implements provisions of the California Administrative Code regarding use of State College buildings and grounds for political and commercial purposes, and similar events, has been distributed to offices of the ASI, and to other members of the student government and staff members. Any additional concerns can be directed to the Student Services Building.

Activities Office located in the YU

Forums and/or meetings permitted to speak each year, should obvious criteria of the new directive and guidelines are also detailed to members of the ASI, and to other members of the student government and staff members. Any additional concerns can be directed to the Student Services Building.

Speedster cites Purcell for success

An interview with Edmundson

by Kent Winter

He said, "What do you feel in the room makes that feel the track had been successful?" I asked to find out. He asked, "What about the community support for the track team?" I asked, "Is it as good as it should be?"

I asked him about the team's success in the College Division and he replied, "As you can see, the team has been very successful. They've won several championships and are looking forward to more success in the future."

Women hoosiers dump San Diego State, 63-35

by Bernard Krieger

San Diego State, 63-35. It was a game that was meant to be a test of the Seabees' abilities, but it turned out to be a game that the Seabees won by a wide margin. The Seabees had been the underdogs in the game, but they proved to be a force to be reckoned with.

Chatman, the Cal Poly women's basketball team, led all players in scoring with 12 points. The Seabees had a hard time keeping up with her, and she ended up with a total of 20 points. The Seabees had a tough time against the Seabees, but they managed to come out on top with a score of 63-35.

HORSE RIN Win THE QUAIR. For Pepperdine College last weekend at the Montego Bay Tournament. The Mustangs led all Pac-10 teams with four hits in five runs in the first inning. The Mustangs hit two home runs and a double in the second inning. The Mustangs hit a total of seven hits. The Mustangs held a 4-2 mark in CCAA play.

POLY ROYAL!

Cal Poly Bookstore

WELCOME TO POLY ROYAL! COME TO EL CORRAL
A colorful Royal welcome!

We hope you enjoy the 37th annual Poly Royal.

The 12 page edition of the Mustang Daily is a first in many ways. This is the first 12 page edition printed on campus. It is the first Poly Royal edition printed on our own web offset press and it is the first time four color process work has been produced by the students.

All the work was contributed by students. The stories were written in Feature Writing, Reporting II and Reporting and Editing Practice classes.

The photographs were contributed by Photo Editor, Ken Hyland, and his staff and from an illuminated features class.

The copy was written and headlines were written by the Advanced Editing and Copy Desk class.

Advertising was gathered by Advertising Manager, Ward Fanning, and his staff.

The printing staff was headed by Richard Betschart. We thank you, Keren, for all your hard work.
Shakespeare Press Museum—a link to the past
An old fashioned print shop of rare equipment and types

by Kathy Lavernt Managing Editor

Shakespeare is alive and well, and will once again be featured as part of the Printing Department's Poly Royal 1969. The Shakespeare Press Museum, which is operated by the Society of Printing Engineers as a private group and historical museum, gives every year or so equipment to de

The majority of the type faces in the collection belong to Palma. Some of the more interesting fonts are hand-carved in wood and are used in the printing press, which is powered by a foot treadle, and there are also commercial organizations who use them to make money for a scholarship fund.

A copper plating process allows students to get a direct impression of the typefaces used in the printing process. This museum also has a Mergenthaler Linotype Press from the mid-1900's and a Challenge Platen Press, which was used in the late 1900's.

A Campbell Cylinder Press, which was probably the first such press used on the Pacific Coast, was used in San Francisco until the earthquake and then by the city for another 30 years.

A Palmer and Ray Flatten Press powered by a foot treadle, was donated by Palmer who found it in the gold country near Angel Camp.

The museum houses three Washington Hand Presses, which are a small number of all-inclusive models in printing pressos up to 1200. Each of the three were made by different companies, and two of them come from the Palma Press, in Barbour City, Arizona.

The Paper Pouch to the museum, which was the forerunner to modern paper covers, is one of the many types of equipment that are displayed in the museum, located at the entrance of the museum.

The museum contains many types of equipment, much of it rare. The equipment is in working order and is used for demonstration purposes.

Most graduates in the museum can have a job when they graduate. Once the students complete the program, they can have a job at the university or anywhere else. The museum looks like any blacksmith shop, and students can have a job when they graduate. Most students are ready to work as soon as they graduate, and they have a shortage of blacksmiths. Students who are interested in learning blacksmithing can have a job as a blacksmith. Most people who learn blacksmithing as a profession do a good job for the university.

by Douglass Seiler

Smoldering, sparks fly and loud sounds echo, as students bring the old smithy's alive
A Country Fair on a College Avenue it isn't!

by John Dreher

When leafing through a magazine in the cafe of the student center, I couldn't help but notice the following advertisement and expression: "The ad, right. Whatever it is that snags your eye, try to resist the temptation to get it! It's probably not worth it."

The advertisement was for a product called "Country Fair," which claimed to be a "natural" and "healthy" alternative to processed foods. I was curious about this product and decided to look into it further.

I visited the website associated with the advertisement and read through the product information. The "Country Fair" product is a line of natural snacks that are said to be free of preservatives, artificial colors, and flavors. The snacks come in a variety of flavors, including chocolate, peanut butter, and fruit. The packaging is simple and minimal, with no ornate designs or slogans.

I was impressed by the simplicity of the product and the emphasis on natural ingredients. However, I couldn't help but wonder if the product lived up to its claims. I decided to try it out and see for myself.

I purchased a package of the "Country Fair" snacks and brought them back to the student center to share with my friends. We tasted the various flavors and found them to be surprisingly good. The chocolate was rich and indulgent, while the peanut butter was creamy and satisfying. The fruit flavors were fruity and refreshing.

Overall, I was impressed by the "Country Fair" product and would recommend it to others. I believe that this product could be a great alternative to processed snacks for those looking for a healthy and natural option. I would encourage others to try it out and see for themselves why it's worth the investment.
