ASI candidates tell their stories

**Paul Murray**

President against Paul Kruesi, running on a ticket with Ann Dotson. For vice president, Paul Kruesi's running mate is viewed by some as too namby-pamby. Murray is opposed by Dick Barrett, running on a ticket with Martin Kulesa and Leonard Pedeison for chief justice. Murray is campaigning for "student involvement" in the ASI government. His platform reads:

1. Communication—"I propose to expand the Communications Board. We need adequate facilities for a student to air his grievances, problems, etc. (A special student ASI forum would be open to the public.) This would be accomplished by direct student participation in the Student Affairs Committee.

2. The president and the executive branch should be more responsive to all student groups, will be free to act in their capacity to negotiate with the administration. The president will have to go to the people; this is nothing new for a democracy.

3. The student executives should be given their proper role in the ASI government. The present system operates on a merit basis, but this is actually not true of the efficiency and effectiveness of activities in many aspects of student government. Procedures must and will be simplified.

4. The ASI president must be able to make sure that the ASI organization functions properly if they are not fully involved in decisions. It is opposed by Markowitz. He contends that it would "be a waste of time and ASI funds." Murray believes his opponent would exploit the student government's weaknesses, and that ASI shouldn't continue to function as it is.

**Dick Barrett**

For the vice president post, Dick Barrett is opposed by Paul Kraesig. His opponent, Kraesig, contends that his platform is "for orderly and representative student participation in the university and in the government of the state of California." He believes that the ASI government must become responsive to all students, must be opened up to all students, must be more responsive to all students, and must be more involved in the lives of the students. His platform reads:

1. Communication—"I propose to expand the Communications Board. We need adequate facilities for a student to air his grievances, problems, etc. (A special student ASI forum would be open to the public.) This would be accomplished by direct student participation in the Student Affairs Committee.

2. The president and the executive branch should be more responsive to all student groups, will be free to act in their capacity to negotiate with the administration. The president will have to go to the people; this is nothing new for a democracy.

3. The student executives should be given their proper role in the ASI government. The present system operates on a merit basis, but this is actually not true of the efficiency and effectiveness of activities in many aspects of student government. Procedures must and will be simplified.

4. The ASI president must be able to make sure that the ASI organization functions properly if they are not fully involved in decisions. It is opposed by Markowitz. He contends that it would "be a waste of time and ASI funds." Murray believes his opponent would exploit the student government's weaknesses, and that ASI shouldn't continue to function as it is.
Markowitz's the one

It is time for a change. It is time to hear the old cliches that the SEC Presidential campaign. What Cal Poly wants and sorely needs is a person who is honest and has the willingness, as well as the talent, to bring about changes needed to make student government more responsible.

For these reasons, Mustang Daily recommends the election of Dave Markowitz for the ASI Presidency.

As the editors look at the candidates, it is evident that Markowitz is pulling no punches. He is telling the students what they hope to hear in student government.

Markowitz has proposed to revamp the representation on the Student Affairs Council. Presently no members are chosen by representatives of students paying the highest prices in San Luis Obispo has been most in Markowitz's mind. He is committed to bring down prices through various means. It is remembered that one-third of San Luis Obispo's total businesses come from Poly students.

He will represent Poly students on-campus as well as off-campus. He will see the merchants in town look at you, try to be not an individual, as the other candidate contends, but a Poly student. Markowitz will represent all the students all the time.

Markowitz, in our opinion, is the only candidate who can deal honestly, effectively, and smoothly with minority students on this campus. He knows his problems because his political beliefs dictate that he fight for their rights to equal education, job opportunities, and equal citizenship. His election will obviously boost this college's ethnic studies programs.

In addition, he would encourage organization, with faculty and administration guidance, of an "experimental college" which would offer classes in academic areas of student interest and needs that are not covered by existing courses.

In this regard, he would offer classes in academic areas of student interest and needs that are not covered by existing courses. He is committed to bringing down prices through various means. If the price of education is too high for students, he would push for lower costs.

Paul Kresse favors broadening the ASI program to include more comprehensive student evaluation of all instructors.

He would work to establish an open forum during College Hour which would give students the opportunity to communicate directly with elected leaders and administrators.

Paul Kresse is in favor of Cal Poly's present policy of providing courses in ethnic studies to augment the standard curriculum.

As the editors look at the candidates, it is evident that students are worried about changes needed to make student government more responsible.

The students of this college for years have been working on these issues for many years.

For a real opportunity for progress, something Cal Poly may never see again, Mustang Daily recommends the election of Dave Markowitz for the ASI Presidency.

Markowitz

Editor:

For a real opportunity for progress, something Cal Poly may never see again, Mustang Daily recommends the election of Dave Markowitz for the ASI Presidency.

Kresse

Editor:

Kresse, as A.S.L. President, will provide strong, executive leadership for our student government. He would be willing to take on this responsibility when he feels that he has a chance for this college to fight for its rights to equal education, job opportunities, and equal citizenship.

He would work to establish an open forum during College Hour which would give students the opportunity to communicate directly with elected leaders and administrators.

Kresse is in favor of Cal Poly's present policy of providing courses in ethnic studies to augment the standard curriculum.

In addition, he would encourage organization, with faculty and administration guidance, of an "experimental college" which would offer classes in academic areas of student interest and needs that are not covered by existing courses.

The students of this college for years have been working on these issues for many years.

For a real opportunity for progress, something Cal Poly may never see again, Mustang Daily recommends the election of Dave Markowitz for the ASI Presidency.
ASI candidates explain their respective views

(continued from page 1)

I urge all students to take advantage of this opportunity. More participation is needed in all areas in order to increase each individual’s understanding of fellow citizens and fellow students (world-wide). I would urge you to turn out for the ASI candidates explain to us next year’s catalog for ASI candidates explain to us the role of student government and the needs of other student organizations, clubs, and functions.

I emphasize the importance of the role of student government to us all, and to Poly is no exception. I would like to see the Athletic Department concerning the athletic program to offer the school’s support without sacrificing the needs of other student organizations, clubs, and functions.

I pledge to work with the faculty, staff, administration, and most important of all, my fellow students to coordinate better the activities and educational process at Poly.

Murray from Ross is running on a ticket with Markowitz. His platform reads:

"The legislative branch of student government is the most influential part of student affairs at Poly. The ASI vice-president is chairman of the legislative branch. It is essential that the Student Affairs Council be responsible and responsive to all of the students as SAC controls all financial matters of the student body."

"Keeping the students of Cal Poly informed must be one of the primary objectives of the vice-president. He must be able to use the various media (Mustang Daily and KCP) as a means of informing the students on the issues that confront our student body."

"Student government should be structured to benefit all the students. If it is to be effective, a solid working relationship between the vice-president and the president must be established and maintained. It must be the job of the vice-president to work with the president to effect a sound organization through his relations with the school administration and faculty as well as students."

"I, Miss Reed, who resides in San Luis Obispo, is unopposed for ASI secretary. Her statement is as follows: "It would be my platform to take accurate minutes at SEC and SAC and work with the ASI president and ASI vice president on any school matters.""

Pedersen, also running unopposed, is seeking re-election. He stated, "If elected, I plan to continue with the work that I have done this year in the ASI body."

"I have accomplished this year so that it will not bog down in the future."

Campus Advance sponsors picture

RUN is, appropriately, a chase. It follows a man in black, pursing a man in white. The two go through several episodes on their jaunt and finally end up at a rocky seashore.

The film is an excellent example of the Theatre of the Absurd. Sponsored by Campus Advance, it will be shown! on Wednesday, May 7, every hour from 10 a.m. until 4 p.m. in Sci. D-37.

Campus Advance

"Theatre of the Absurd"

"If we find that the snack bar is unable to handle the student demands, we will keep the a la carte section of the cafeteria open on Saturday and Sunday," Bertram explained. He stressed that he and his staff are concerned with meeting the needs of the students.

The director keeps abreast of student needs via bi-monthly meetings with the Dining Hall Committee. The committee comprises at least one student from each floor of all the residence halls.

In fall bids go out for construction of an addition to the present dining facilities.

Campus dining hall issue told like it is

by Gall Hernandez

On-campus students will not go hungry on weekends this fall. It was reported in Mustang Daily (April 21, 1969) that there would not be meals on weekends. This is only partly true.

It is true that meal ticket purchase will not be compulsory for on-campus students. It is true that meal tickets will be transferable. And it is also true that meal ticket holders will be unable to use their tickets for weekend meals.

But food will be available on campus during the weekends. In fact, by fall, dining facilities will be more accessible and more diversified than ever before. Food will be available seven days a week for breakfast, lunch, dinner, and snacks.

"A variety of food and a variety of prices," is the way Lloyd "Jack" Bertram, director of food service, summed it up.

Although definite hours have not been set, Bertram assured that the snack bar will be open weekends and will continue to stay open evenings. Complete meals, plate specials, and a la carte selections will be available.

If fewer than 900 students purchase meal tickets, only one side of the cafeteria will be used for ticket holders. On the other side will be an a la carte selection for non-ticket holders.

Meals tickets will cost $150 for the fall quarter. This is a few cents more per day than the present tickets. But students will be able to get full use of the tickets since they are transferable, noted Bertram.

"If we find that the snack bar is unable to handle the student demands, we will keep the a la carte section of the cafeteria open on Saturday and Sunday," Bertram explained. He stressed that he and his staff are concerned with meeting the needs of the students.

The director keeps abreast of student needs via bi-monthly meetings with the Dining Hall Committee. The committee comprises at least one student from each floor of all the residence halls.

In fall bids go out for construction of an addition to the present dining facilities.
Music groups planning Kern County concerts

Harold P. Davidson, head of the Music Department, is an old hand at getting top-notch performances from his music students. He directs two major tours during the year. The first is the one scheduled for the Bakersfield area, May 8-9.

Davidson, who has been directing such tours for 28 years, is considered a hard act to follow in the Barbershop Chorus. After graduating from Pomona College and teaching in Pennsylvania for seven years, Davidson was hired here and charged with the task of forming the college Music Department.

The annual tours, which have seen performing groups from the college cross and re-cross the state numerous times, were inaugurated in 1944. The likeable Davidson has also gained recognition as a musical composer and arranger. He wrote three traditional college songs that are included in most performances of the college glee clubs. One is "Ride High, You Mustangs," "Cowboy Lullaby," and "All Hall, Green and Gold." A well-known figure in San Luis Obispo where he has served as president of the Rotary Club, Davidson sums up his feelings about the past and his plans for the future by saying, "I like it here."

That feeling is echoed by members of the four ensembles he will direct during the two-day tour in Kern County.

Drop outs rare in this school for Lettergirls

"We're proud of Cal Poly, and we're proud of our Mustangs!" The philosophy of Mrs. Brooks is exemplified by each and every girl participating in Lettergirls' School. Lettergirls School officially started on Wednesday, April 30, to prepare the Bakersfield Collegiate Institute's senior year's team. Last year's group included seven members, but for next season, 11 girls will be chosen for the team. Those who are members of last year's team and are returning for another year are: Head Lettergirl Donna Shuster, Karen Williams, Linda Walker, Beverly Fincher, Lauren Faxon, Judy Dawson and Carol Rose. The team included seven members, but for next year, 11 girls will be chosen for the team. Those who are members of last year's team and are returning for another year are: Head Lettergirl Donna Shuster, Karen Williams, Linda Walker, Beverly Fincher, Lauren Faxon, Judy Dawson and Carol Rose.

Tryouts began early this month and the girls who qualify as Lettergirls will work everyday and practice with the Marching Band and also be in preparation for the upcoming football and basketball seasons.

During the football game, the Lettergirls march with the band and perform different types of routines. Although they are part of the Marching Band, the Lettergirls team is a separate entity when it comes to planning and producing these routines. They also perform during the basketball games along with the Pep Band, but their activity is restricted.

Campus post office-old standby will cease to exist for students

Students who have not checked their campus post office box in the last three years better do so promptly. On June 7, 1960 the campus post office will cease to exist. To the 7,000 students who have been waiting for this means that they must have all mail sent to their residence addresses.

This means that the campus post office will cease to exist. To the 7,000 students who have been waiting for this means that they must have all mail sent to their residence addresses.

The post office can no longer afford the space to accommodate all of the students. Boxes were sometimes shared by four students, making it easy to misplace mail. The other alternative, that of a new post office, was thrown out when postal authorities told the school it would cost about $70,000.

Although June marks the end of the campus post office service (started in 1960) it will not affect the end of the stamp service. Stamps and other postal needs will be sold in the bookstore. Also there will be some stamp machines on campus.

The ultimate end of the post office will come when the new college union is finished. It will have its own special window to dispense postal services.
Russian scientist speaks on education and optics

by Joyce Tokiha
Staff Writer

Most professors usually have grey hairs that stick out, said Dr. Alexander Kovrigin, a young, brown-haired "main teacher" and assistant professor from Moscow State University.

He was the guest speaker for a joint meeting of the Society of Physics Students and the Students' Branch of the Institute of Electrical and Electronic Engineers held Thursday at the Air Conditioning Auditorium.

Born in Moscow, Dr. Kovrigin graduated in 1960 from the Department of Physics, Moscow State University where he is a senior lecturer (assistant professor) in physics.

He was the guest of the University of California where he is now taking prerequisites for entrance examination for entrance conditions. He has been in California for six months.

"After two years of compulsory schooling, one must choose whether he wishes to go to the army. But he may return after two years in the service to try again," he explained. "He also explained that the Moscow State University is one of the largest in the country with an enrollment of 33,000. Two thousand of these are from foreign countries invited by the government to study without cost. All education is without cost. There will be an exchange between Moscow and Stanford next year.

A student takes "common courses (general education courses) for the first three years, deciding his major after two years and graduating in four years. Then he may be a lab assistant or go on to obtain his Ph.D. after four years in research work.

All education is without cost, and the state will help any student if assistance is needed to complete his schooling. The grading system is based on a one to five range with five being excellent, four good, three pass, and the rest "you kick out." About 10 per cent of the quality work, the majority in the four-five range, 20 per cent with three's and four's and 50 per cent "have problems."

Dr. Kovrigin also spoke about his research in nonlinear optics (laser) and its application to acceleration of nuclear particles.

Patriotism dominant theme

With patriotism as their theme, 200 high school girls and 32 advisors met in the home economics department Saturday for their sectional Picture Home-makers of America (PHA) meeting.

As part of their activities, the girls held a fashion show, displayed competitive outfits, an election and installation of officers for 1969-70 and held a white elephant sale to raise money for the school's (turf) section which is sponsored by the Home E. De.

As a founder and honorary member of PHA, Mrs. Barbara Weber, home ec. instr., was invited to give the welcome address and also work as coordinator for the events of the all-day meeting.

Members of Home Ec. 411, a methods class, attended the meeting and later served as tour guides to show the girls the facilities in the Home Economics Building. Most of the girls now taking the methods class will eventually be advisors to PHA after starting their teaching careers.

Mrs. Mildred Hubei, state advisor of PHA from Sacramento, was an advisor at the meeting. National honorary members from the campus were Mrs. Eva Synder, Mrs. Connie Brezaule and Dr. Marie Pfeiffer, head of the Home E. Department.

PHA is a national organization of students who have been or are now enrolled in home economics in high school or in junior high school.

Opposing views on mandatory fee

Fee's fate to be decided by vote.

A compulsory student health fee would require these students to pay for something they have already paid for.

1. Many students do not participate in the present Health Program because they prefer to have the medical problems treated by specialists, rather than clinic doctors. With the mandatory fee, these students would be paying for services which they will have used.
Music hits airwaves

Here's this week's schedule of programs on KCPR Tuesday

1800-1900 Patterns in Sound
      1900-2000 S.A.C.
      2000-2030 Music by Request

Wednesday

1800-2000 Patterns in Sound
      2000-2100 Phone In
      2100-2400 Patterns in Sound
      2400-0200 All That Jazz

Thursday

1800-1900 Patterns in Sound
      1900-2100 BAB Airways
      2100-2300 Folk Festival
      2300-0200 Carousel

Friday

1800-2000 Patterns in Sound
      2000-2030 Soulides
      2200-0200 Patterns in Sound

Saturday

1800-0200 Patterns in Sound

Sunday

1800-1830 Church
      1830-2000 Concern Hall
      2000-2200 Theater Unlimited
      2200-0200 Sunday by Request

Officials at KCPR, the college station, have issued a call for staff disc jockeys. A sign-up list for volunteers is graphic Arts 201, station officials said.

OPPORTUNITIES FOR ENGINEERS
Aeronautical
Electrical
Electronic
Industrial
Mechanical

Vacancies in the above positions are currently existent at a large industrial complex involved in design, development, and maintenance engineering related to operation, modification and repair of high performance aircraft, other systems and the production facilities involved. Interview appointments may be made by calling the Placement Center. The phone number is 546-2501.
Poly drops series

In one week the Cal Poly baseball team has traveled from its first place CCAA standing with a 5-2 record, to now stand out of the title race at 6-5. Last weekend the diamondmen dropped two games to Cal State Long Beach, while only winning one. Everything went wrong for Cal Poly in Friday’s 8-1 loss to Long Beach.

The 41ers’ Randy Moffitt pitched and bathed the visitors in the victory striking out 4 in a couple of innings limiting the Mustangs to four hits.

Pitcher Moffitt struck a two-run homer in the second, single, and scored a run in the sixth. He beat Poly’s ace pitcher Dean Treange, who lost his first league game after three wins. His overall record is 7-3. First baseman Lew Smith smacked a second inning homer for Poly’s lone run. He also singled in four trips.

Long Beach moved to a 3-1 lead in the third when a single, walk, and error and Jim Carter double parlayed into three scores. The victors added a run in the sixth and were held to a pair of runs in the ninth by an error.

Coach Bill Hicks received a ticket on his car during the game to cap his frustrating day.

In Saturday’s action, the Mustangs struck 10 base runners, including the tying and winning run in the final inning.

All-CCAA pitchers Mike Young tossed a nifty three-hitter as Cal Poly won the opener, 1-0. But Young pumped up as a pinch hitter in the seventh inning of the second game. It ended the game leaving runners on second and third as Long Beach won, 6-5.

Mike Young has a 2-1 CCAA and 2-4 overall record. Winning pitcher Young has a 2-1 CCAA and 2-4 overall record. "The Mustangs take a 10-9-10 overall record into Monday’s game with the San Diego State, while Long Beach is 17-9 in all games. Both schools are 9-6-3 in conference play."

Golfers swing to fifth place finish

Coach Roy Hughes could only watch as his Mustang golf team ended their 1980-81 season by placing fifth in the CCAA tourney held April 22nd at the California Country Club in Whittier.

Steve Lockyer placed seventh in the individual competition to pace Hughes’ squad to the win. Lockyer had scores of 77-76-79 to finish 21 strokes behind third place Steve Weakly of LA State.

Greg Stafford tied for 10th place in the two-day contest with a total score of 221. Peter Pederson wound up his bid for the title in 18th place with a score of 240. Mustang 3rd Philus finished 20th at 253, Pete Pederson ended 21st with 256, and Lionel Sorensen completed the list of Poly finishers with 261 points and 25th place.

---

Because it’s the Hugger.

Camaro 88 has been chosen to be the Indy 500 pace car for the second time in three years. That’s because it has what it takes.

Engine choices at seat with a standard 300-hp 350 cu.-in. Turbo-Fire V8 and run up to a 325-hp 396 cu.-in. Turbo-Jet job. There’s even a new 4-speed Hurst shifter available. It shifts the engine for more power go.

The 88 version of the Hugger grips the road with wide-oval tires on 14 x 7-inch-wide wheels, beefed-up suspension and power disc brakes.

The transmission comes linked to a 3-speed floor shift. If you want still more, there’s a 4-speed Hurst shifter available.

Indy’s tough. So’s Camaro 88.

When it comes to pacing, it’s pretty clear that Camaro knows its way around.

Start setting up your pace card. At your Chevrolet dealer’s next Saturday, we put you first, keeps us first.

Trackmen try ballet

by Don Niel

Would you believe that some Poly trackmen in Coach Dick Purcell's mind are ballet men? Purcell singles out his field men, sprinters and hurdlers to practice modern dance techniques in order to prevent pulled muscles to the present track season.

Miss Sharon Kret, women's physical education instructor led the men through stretching exercises, during fall and winter quarters. Only Ernie Holmes, Poly's number one high hurdler, had partaken in such an exercise program previously.

Purcell offered the volunteer program to the men to help center movement of the body and relaxation. Such preparation would also hopefully reduce muscle injuries later on in the track season.

Holmes credits the exercises with helping to loosen his upper body and muscles in the groin. He said, "I want to do it again, not only next year, but maybe the rest of my life."

Purcell noted his warm-up time has been reduced by the exercises. He emphasized building of the muscles in the groin which are needed to lift the legs in running.

Holmes added that the exercises showed him what he needed to stretch more. He is using the exercises in his warm-up now.

Purcell noted that the field jumpers, since practices here didn't tend to the most interest, in the field, tossed a week some exercises conducted by Miss Kret.

Looking back, Miss Kret believes the exercises helped them relax and cool-off draft muscles.

"We worked on stretching leg, back, shoulder and arm muscles, and a relaxing kind of stretch," she said. "Some were extreme stretching relaxations."

"They were exposed to modern dance techniques and we had a lot of fun," she recalled.

Pura noted Dave Lanu noted that he gained a new outlook on exercises. He found out how flexible he could be.

Coach Purcell credited the success of the program to Miss Kret and her fine knowledge of modern dance techniques.

Intermediate handler Dennis Powers said the program helped him get more than ever before especially in the hips and lower back. He believes it will help prevent hamstring injuries this year.

As a side expense, Powers found he is getting down on the hurdles better, and wants to continue the exercise program next year.

Powers emphasized the voluntary aspect. "No one had to do it," he said, "I believe it's voluntary and maybe that's why it's working better than ever before.

In order to benefit, you had to make the muscles hurt," Powers added. "You did it to improve yourself."

The Mustang track men noted that the loosen the men are the better it is with good form in their events.

"I think this type of program is a good one. I've seen the most versatile thought would be helpful, but hasn't been tried," Purcell concluded.

Trackmen run over southern opponents

By Greg Van Hanten

Los Angeles is a friendly town for Coach Dick Purcell and his Mustang trackmen. Saturday afternoon saw Purcell's thin-cheeked men engage in a triangular victory over San Fernando Valley State, 94-47, and Cal Poly Pomona, 98-42.

Tryout blanks are available at the Intramural office until May 21 and at the tourney will begin at 11 a.m. Saturday.

A doubles tournament will be held May 21 and 25. Entries are now being accepted. The tourney will begin at 10 a.m. Saturday.

Still won't consider tennis, uh? Why not try your hand at squash? A doubles tournament has been slated for May 29th. Action will begin at 6:30 p.m. Inter locks are available in room 101 of the Men's Gym.

Aside from offering special activities, the intramural office has planned some 250 events, weekdays and weekends.

Volleyball operates on Tuesday evenings in the gym, with men's volleyball on Thursdays. Two basketball leagues are presently playing on Monday and Wednesday nights at 7 p.m.
