Players perfect the rarely performed

This school has only once presented a performing ensemble in the summer season.

Friday night's 8:00 p.m. concert in the Campus Theater—performed by the Cal Poly Chamber Players—will be the second.

The Chamber Players, conducted by Ronald V. Ratcliffe, will perform on the featured soloist during the Cal Poly Chamber Players' evening concert Friday night.

Comedy speaker shows Laser

As any science fiction buff knows, a deadly Laser Beam is employed by Flash Gordon to mete out justice to a vast array of space monsters and assorted future baddies.

The Bell Telephone Company, however, is experimenting with this power in hopes of harnessing the Laser to serve the peaceful uses of mankind, according to Heather Sanders, last Wednesday's noon speaker in the Architecture-Palace. Her topic was "Light for Communication—The Laser Beam."

Miss Sanders, probably the most attractive speaker in the summer series, highlighted her lecture with a demonstration of a model Laser. The contraption, consisting of two miniature milk bottles, was pointed through a lens at a receiver, which looked like a microscope.

An ordinary record player, connected to the Laser, was turned on. The impulses traveled through the beam of light to the receiver where, wunder of wonders, it came out circa, 1945 mode.

The mayor was (and is) on campus

by Verena Tritikha

Staff Writer

In the terms of political pundit Mayor Kenneth Schwartz, "Innovations for Drop-Out Prevention", is proving to be something of a corner by reaching his first 100 days in office.

It's unusual when one can ask the mayor of a city whether he is sitting in the offices of the Mayor of San Luis Obispo merely by knocking at the door.

As Mayor, Kenneth Schwartz tells us, "No, not exactly. I was chairman of the Planning Commission for eight years, as I have worked closely with leaders of local government. This is my first elected office, however."

Schwartz said there are seven advisory committees within the city government, which would eagerly like to have new talent join their ranks.

"On Monday (July 14) the city council approved a $4,143,000 budget of which $860,000 has been earmarked for the Mission Plaza program," he said. "Preliminary drawings are now being done over by the Mission Advisory Committee. This design will be worked on until it meets with approval of the planning commission. The final plans will be submitted and visible construction will get underway.

The mayor also spoke of the Youth Corp here. It consists of about 15 high school students who are employed by the city to help, primarily, in clean-up programs such as that in Bricktown and San Luis Obispo Creeks. When asked about student-needs, he said that some students come from large cities and are used to a lower price scale. It means they will have to do more shopping around for those items they want and then patrons accordingly."

Mayor Schwartz spoke with the experience of one who has lived here since 1932 when he said, "San Luis Obispo offers a friendly atmosphere, a character of a smaller city that will be a great influence on the student living here. There are many areas in which a student can participate with the community in constructive action. It only has to show a willingness."

Education workshop given high praise

by Dave Rangel

Staff Writer

Heavily high school principal, vice-principals and counselors were on campus recently for a workshop in work experience education. This program was aimed at providing the participants with an overall view of the educational opportunities available to students having problems in the regular educational programs.

The program consisted of many talks by educators and panel discussions by the individual members of the conference.

Dwayne Brubaker, supervisor of work experience and continuation education for the Los Angeles City Schools, took the opportunity to be a speaker in the noon session: "As an advisor and counselor, the program was talked to by Mr. Brubaker on the programs financed by the federal government to aid the prospective drop-out. The title of his talk was "Innovations for the Disenchanted Youth."

One of the programs, called "Drop-out Prevention," is provided for the potential drop-out. It consists of full-time counselors that advise students of the potential drop-outs. The title of his talk was "Innovations for the Disenchanted Youth."

The featured soloist, who has performed frequently here as well as throughout Central and Southern California, received a M.M. from the University of Southern California.

The select ensemble consists of two first violins, two second violins, two violas, two violoncellos, one double bass, and four French horns.

The program begins with a piece by Henry Cowell, "A Mask of Fuguing" themed No. B. Cowell, said It was one of America's most unusual and innovative composers. He began composing at an early age, and incorporated unusual ideas such as playing inside the piano by plucking or strumming the strings.

The well-known Mozart piece appears second on the program, followed by Ratcliffe's harpsichord solo, "Concerto in D major." It is an early age, and incorpated unusual ideas such as playing inside the piano by plucking or strumming the strings.

Each school in the program has a certain concentration in which it is especially equipped. Such as a course in computer training and the school will have a computer complex. Some of the other fields of concentration are science, home economics and business.

The students enrolled in this program take their usual high school courses in the morning and are bussed to the high school of their concentration for the afternoon courses.

Brubaker also spoke of a summer college program for the underprivileged students. Prospective college students live on a campus during a summer and take a few courses. This enables them to get the feel of college life and better prepare them for the future.

Dr. Walter Schroeder, head of the Education Department on this campus and coordinator of the workshop, said "The workshop in education was a success and participants are already asking about having one next summer."

The workshop was sponsored jointly by the California State Department of Education, California Association of Work Experience Educators, California State Polytechnic College and the Los Angeles City Schools.
A universal nationalism

"Why don't we just forget the last nineteen hundred and sixty-nine years," a handsome European youth suggested, "and begin over now with the year one.

His epochal thoughts represented one brand of nationalism—a universal kind of nationalism—American astronauts had aroused with their dusty lunar steps.

There were other expressions of pride—in the form of demagoguery and ill-timed provincialism—but inspired reporters for the most part ignored political sadism.

With two men "dancing on the moon," CBS newsmen Eric Sevareid put it, "everyone felt young.

Men truly did dance on the moon; and jog, bounce, leap, work and speak. This discovery meant perhaps a thousand times more than previous revelations because the cool antics of Armstrong and Aldrin were witnessed by nearly all cultures of human society.

The intrepid beauty of those men on the moon enchanted earth spokesmen, but few were mesmerized to the point of silence. "This event will make us see," said author Ray Bradbury, "that we really are three billion lonely people.

Rev. Ralph Abernathy, Martin Luther King's SCLC successor, was visibly moved as Neil Armstrong stepped down from Eagle's pad.

"I know now," he spoke religiously, as if leading a familiar Negro Spiritual, "I know there's going to be increased pressure on the power structure...to make a better day. There's a better day comin'...because we landed men on the moon.

42 years before Apollo 11—with its splendid crew, Bald Eagle symbol (olive branches in both claws), and celestial television—Charles Lindberg flew. F. Scott FitzGerald was a public spokesman then. He wrote:

"People put down their drinks in country clubs and speakeasies and relived forgotten dreams."

Help un-junk the creek

The San Luis Obispo County Telegram-Tribune has an exclusive editorial section each Saturday. The section consists of a series of short comments, each signed by "SAM LUJ.

Last Saturday, July 19, "SAM LUJ." wrote: "To Obispans:

"The student body, or whatever they have at the Free University, is inviting all fellow citizens to come out and help clean up San Luis Creek on Aug. 2. The response will be interesting. Some think the Free U is full of Bolsheviks and hippies but we lean toward the theory that it is sort of an underground Rotary Club."

Early August play

"Years Ago," Ruth Gordon's autobiographical play, will be produced by the Speech Department August 1 and 2 in the Little Theatre. The comedy, first played on Broadway in 1946, portrays Boston family life in 1913.

Mrs. Gordon, an actress, who's most recent success was her Academy Award-winning performance as the midwife in "Rosemary's Baby.

"Years Ago" revolves around a conflict between a girl who yearns to become an actress and her father, who wants her to become a physical education teacher. Robert Knowles and Diana Thornton are cast as father and daughter. Sandy Morley plays the mother. Murray Smith of the Speech Department directs the play.

- store hours: Mon.-Fri. 7:45 a.m.-4:30 a.m. Sat. 8: a.m.-12 noon

- Fall Quarter class schedules also on sale
Grass can't grow without dough

The winter is gone and with it Mother Nature's life-giving substance—water. Yet, how often does a student stop to take notice of how green and blanket soft the lawn around are, while the surrounding hills remain burnt brown and dry from the sweltering rays of the summer sun.

Who keeps these lawns green and growing?

The school water bill for the summer months—mid-May to July—will reach $10,000, an increase over the $4,600 water bill for the winter months—mid-November to mid-January.

Arthur Young, chief engineer at the campus power plant, explained that the increased usage is due to the season. March to May 1968, when there was heavy rain, the water bill was $3,961.80. But for the period from May to the present billing it will run close to $10,000.

The amount of water that is poured onto the lawn depends upon the type of land being nurtured. The number of inches that a lawn needs to survive a year is calculated and the lawns are watered accordingly. The ability to hold moisture determines how much it will need to be watered. Rockland must be watered repeatedly; other types may only need watering two or three times a week.

Water usage on campus is registered on two meters. One, an eight-inch main, serves the dormitories, grounds, and most facilities. The other registers water usage for part of the dairy and poultry unit.

In addition to this big water bill, the campus also has a number of lesser bills. Bills for the second meter run about $400 for the summer months and $125 for winter months.

The small water main uses three times as much water in the summer months, the eight inch main only uses twice as much water in the summer.

Girls throw feast on floor

Goldfish—published in a pool, brightly colored flowers abound— and couples of the opposite sex were heard by Mayor Kenneth Silvers, city council members, Kenneth Blake, Myron Graham, and their wives, as they were guests of the girls in the Home Management Department recently.

A Polynesian Festival was the theme for the evening and each of the girls was attired in Polynesian dress. The evening was planned as a luau with tossing of dishes in the Islands for dinner. The evening’s guests were invited to the special dinner in true Polynesian fashion.

This summer, due to the large number of seniors, Home Economics majors, the department has set up living arrangements in two apartments along with the regular Home Management House on campus. In one apartment six girls are fulfilling their requirements for the course and in another there are four.

Miss EveAnn Spradling is the advisor for all of the groups taking the class this summer. She keeps herself busy by visiting the groups daily.

This summer was a time of surprises as the Mayor and the city council found themselves among the guests of the girls.

The purpose of the Home Management living experience is to be able to relate the laboratory and classroom knowledge into a real life situation.

The mayor and the city council were invited to the special dinner in order to give the girls an opportunity to entertain a large group.

HOWARD JOHNSON’S

At the junction of Highway 101 & Lee Osses Valley Road
NFL's Colts, top coaches to come

The final plan for the twenty-second annual California Workshop for Physical Education and Athletic Coaching to be held August 4-15 at this campus are nearing completion. The primary goal of the workshop will be to improve the caliber of athletic coaching and the teaching of PE in the secondary schools in this state. The program will consist of 16 courses and several seminars. Almost every facet of Physical Education will be discussed during these two weeks.

As in previous years, many nationally known sports figures will be among the staff of the workshop. Among the sports figures to appear are Jerry Kramer, as everyone knows, is one of the greatest personalities in the history of tennis. During his hey-day as a player, he was ranked number one in the nation for several years. Currently he is an international tennis promoter.

The base-ball course will be handled by Al Capers and Ben Wade, both presently working for the L.A. Dodgers. Campagna, who is General Manager of the "Bums," got his start in the organisation as a scout. Among his biggest catches are Sandy Koufax, Roberto Clemente, and Tommy Davis. His book, How to Play Baseball, is generally considered as "the" book on baseball fundamentals. Wade has a long history of being in professional baseball, both as a player and a scout. Along with his scouting duties today, you can also find him throwing batting practice during the Dodger home games.

Chuck Coker will handle the Weight Training division. Coker has completed a record that includes 14 championship track teams, four world record holders, seven NCAA records and nine Olympic medals. He now coaches the powerful Southern California Tracksters.

The Mustang's own Vaughn Hitchcock, probably the foremost authority on the West Coast when it comes to wrestling, will handle his specialty.

An added bonus will also be given to the participants of the workshop, and they will be able to observe the workouts of the Baltimore Colts, who will be training at Cal Poly during the same period of time.
