Dumke edict: no political cuts

Many students to receive federal aid

During the academic year just beginning, at least 1.6 million college students throughout the nation will receive financial help from Federally-supported programs. This announcement came from Dr. Howard J. Kreitzer, Director of Higher Education, Region IX, of the U.S. Department of Health, Education, and Welfare. Region IX includes Alaska, American Samoa, Arizona, California, Guam, Hawaii, Nevada, Oregon, and Washington.

In California, the College Work-Study Program will provide employment for 4,000 student workers. The Federal Work-Study Program will make loans for educational expenses to 37,926 students. Some students, depending upon their need, may benefit from one or all three programs in a financial aid "package" arrangement made by their colleges.

Survey states important facts about students

Men continue to outnumber women by a margin of about 8 to 3 in among students at California State Polytechnic College, according to a statistical summary of students who enrolled last year for the college's fall quarter.

Statusing a record-breaking total of 11,281 students, the summary released by F. Gerald Holles, Cal Poly's Director of Admissions and Records, reports that 7,005 men and 4,256 women signed up for classes during the summer pre-registration period and the regular registration period Sept. 20.

The total of 11,281 students reported by Holley is 16.2 percent higher than that recorded at the same date during the 1968 fall quarter. At that time, the 9,711 students who had registered was the largest ever reported at Cal Poly.

Divided among the five major instructional units at the college, the summary includes 2,414 students in the School of Architecture, 2,914 in the School of Applied Arts, 2,559 in the School of Applied Sciences, 2,279 in the School of Engineering, and 1,401 in the School of Agriculture.

Among the five classes determined by the number of units a student has remaining for completion before graduation, Cal Poly's freshman class is the largest, with 2,014 enrolled. Close behind in this grouping are the seniors with 2,781, sophomores with 2,414, and juniors with 2,279. Three hundred and eighty-one freshmen have made professional appointments in the Summer, and another 265 students are registered for limited programs of six units or less.

The Student Body is made up of 1,024, and Junior with 2,279.

students. Among the five classes determined by the number of units a student has remaining for completion before graduation, Cal Poly's freshman class is the largest, with 2,014 enrolled. Alpha Phi Omega holds open meeting

Alpha Phi Omega, the National Service Fraternity for college and university men, will hold an open meeting in Poly Grove tonight at 7:30 pm to acquaint interested students with its role in service to the campus and community.

At Cal Poly the Alpha Phi Omega Chapter has been active for 22 years. Among its many service projects to the campus has been the development and maintenance of Poly Grove. The funds for this work come from its annual Ugly Man On Campus (UMOC) contest which is part of Homecoming activities.

In conjunction with the Boy Scouts of America, Alpha Phi Omega men provide management of concession stands at Sports-O-Rama and their "great" talent for campfires. They are also active with other local service groups.

LOUIS ANGELES—Chancellor Glenn E. Dumke of the California State Colleges has issued an Executive Order reaffirming a policy that dismissal of classes in support of social or political causes is a violation of professional ethics.

The order, dated Sept. 26, 1969, was issued to Presidents of the 19 campuses to clarify and define specific the existing academic obligations of the faculty to protect rights of the college's estimated 227,000 students, the chancellor said.

"Effective immediately and after this date (September 26), each college president will assure him­self that his faculty members know the academic obligations of the institution. They must be made aware of the duties of the position, and Presidents will institute formal disciplinary proceedings in such cases," Dr. Dumke continued.

"The faculty member must, in such circumstances, assure himself that such activity furthers his own professional growth and contributes to the academic goals of the institution. He must be prepared to justify such dismissal if verified upon request or complaint.

"Dismissal of classes as a demonstration in support of political or social causes does not fall in this category. Such dismissal constitutes un¬ warranted and unprofessional interference with the academic freedom of the student, depriving him of his expected academic situation and forcing him to support political or social goals with which he may not sympathize." Dr. Dumke's remarks include a quotation from a statement on professional duties issued by one of the State Colleges.

"The students have the right to substantial presentations appropriate to the course. Unjustified interference with the instructor to meet his classes or repeated lack of preparation which results in inconsistent performance by the professor is legitimate ground for student complaint."

MEN'S GLEE GROWS TO 50

During the first week of the Fall grade the 1969 Cal Poly Men's Glee welcomed 80 new men into its 82 year old tradition. The men were chosen on their singing ability, poise and personality by 84 "old men" from past years. Professor Harold Davidson, Music Dept. Head, recalled when the Glee Club was formed in 1925 with only 16 members. Of these members 6 men also comprised the Collegians and the Collegiate Quartet.

This year the Men's Glee is proud to announce the new officers: Bob Olson, President; Andy Parhach, Librarian, and Steve Rasmussen, Manager.

This weekend! Special Dinners at Special Price for Meal Ticket Holders!

Tickets must be sold in advance of Saturday, Oct. 11. No cash sales on day meal is served. Buy today. Save this weekend.

DINNER-SATURDAY, OCT. 11-SERVED 4-7 P.M.-East Dining Room

Pre-Game Gourmet Smorgasbord—$1.65 with meal ticket
$2.00 without meal ticket

FEATURING:
- Roast ship's round of choice beef carved by one of our master chefs
- Assorted cold cheeses
- Potato salad, macaroni salad
- Fruited jello molds
- Vegetable jello molds
- Piled green bean salad
- Kidney bean salad
- Garbonza bean salad
- Cottage cheese and fruit bowl
- Sliced tomatoes, fresh cucumbers & white asparagus
- Assorted relish tray
- Hot rolls & butter
- Dessert
- Choice of beverage

One spare ribs

- Delicious Sliced Tomato Garnish
- Baked Beans
- Homemade French Rolls & Butter
- Tossed Green Salad
- Homemade Apple Pie
- Relish Dish
- Choice of Beverage

Sims slates intro to Indian meditation

Monday night, Oct. 13, at 7 p.m., in Science North 301, Walter Koch, an aeronautical engineer from Santa Barbara will give an introductory lecture on the practice of transcendental meditation for the benefit of all interested students.

The lecture, sponsored by the campus chapter of SIMS, Students International Meditation Society, will introduce students to meditation practice as taught in the state schools in India. University attention to meditation recently was brought about by a three-day seminar at Michigan State College last summer which was attended by 75 deans of education from as many U.S. universities.

It doesn't make everyday headlines, like demonstrations and drugs, but it's the big new movement among the young, and if everything about it is as true as its advocates will tell you, it could move mountains, if not the world according to spokesmen for its campus organizations.

PROUD PAINTINGS HANG... their first night's work, an exercise that ends up being one of the main points of the conference.

W.O.W. held for leaders

Story and Photo by Ken Ryland

Earlier this quarter the A.B.I. held a leadership conference for people who are active in student government this fall. It lasted for three days and was held at the Lake Cachuma Church Camp. Conferences of this type were designed by the National Leadership Institute to aid in communications between employees and employers in large corporations when such problems cause a breakdown in the efficiency of the company.

After the conference was over each person who attended received a card verifying that he had completed the course in basic leadership. This card also entitles the person to give one of these conferences on his own. If one of the campus groups wants to put on one of these conferences for their own benefit they are urged to contact the A.B.I. office, for they will help out all they can and will supply the use of the instruction books.

PAUL KRESGE REIGNS... over leaders by telling them that they will get sterile if they look ahead in their instruction books.

Here's what your first year or two at IBM could be like.

You'll become involved fast. You'll find we delegate responsibility—to the limit of your ability.

At IBM, you'll work individually or on a small team. And be encouraged to contribute your own ideas. You'll advance just as fast and far as your talents can take you.

Here's what three recent graduates are doing.

Soon after his IBM programmer training, John Klayman, B.S. Math '68, began writing programs used by a computer system to schedule every event in the Apollo tracking stations. And when the finished programs were turned over to NASA Goddard Space Flight Center, he was responsible for making them work.

Within three months after her IBM programmer training, Mardi Joyner, B.S. Math '68, found a way to streamline a key part of our Management Information System—a computer complex designed to give decision-makers constantly updated data.

Visit your placement office and sign up for an interview with IBM.

Tjaden tells students to live "authentically"

At this school there is a "persuading notion that there are answers to problems; if you only look at your slide rule one more time, you're sure you'll get it," according to the Rev. Bruce Tjaden. He cast doubt on this belief when he spoke in the Amphitheater at 3 Sunday afternoon, October 5, and offered suggestions on living "authentically" while reframing from preaching what the content of this authentic life should be.

He suggested that most of us use one of the following three roles for "survival, not growth": Agree-er, the person who destroys himself in a constant flood of affability which prevents any true personality from emerging; Blamer-Attacker, who, however gently and subtly, says the other person to destroy any chance of a real relationship developing; and Subject-Change who avoids not only controversy, but communication too, by never allowing a real conversation to start.

These people all "excruciate" devices which destroy either themselves or others, for in general they have no sense of personal worth and have learned to be fraudulently modest about the talents they do have.

The authentic person is definitely the most fun to be, for he may choose to use techniques of the other three, and choose when and how to report on what he's thinking or feeling at a given moment. This is not the "open-faucet" technique of some sensitivity training, or a cover for the Blamer-Attacker who says, "I was just being honest," to cover his acts. This is the person who listens to himself, and tries to build a "circuit-breaker" against those platitudes himself begin to say. He knows where he is, and tries never to pretend otherwise.

This talk on "Authenticity" was satisfying: there were 20 of us in the Amphitheater on a beautiful Sunday afternoon, and there was a casual intimate atmosphere that would have been given moment. This is not the "open-faucet" technique of some sensitivity training, or a cover for the Blamer-Attacker who says, "I was just being honest," to cover his acts. This is the person who listens to himself, and tries to build a "circuit-breaker" against those platitudes himself begin to say. He knows where he is, and tries never to pretend otherwise.

This talk on "Authenticity" was satisfying: there were 20 of us in the Amphitheater on a beautiful Sunday afternoon, and there was a casual intimate atmosphere that would have been missing with a microphone and a crowd.

WORSHIP MEETING
Meeting for worship according to the tenets of the religious society of Friends (Quakers) 10 a.m. Sundays, Campus Christian Center. All Welcome.

Schubert, Poly alumnus, working on Ph.D. degree at Purdue University

Richard M. Schubert, an alumnus of California State Polytechnic College, is in the midst of work connected with a predoctoral fellowship at Purdue University.

A native of San Carlos, where his parents, Mr. and Mrs. Walter R. Schubert, still reside, young Schubert is studying the physical organic area of noble gases under the guidance of Dr. H. C. Brown. The graduate study fellowship is being made possible by the National Institutes of Health.

Schubert, who received his Bachelor of Science Degree in Chemistry in 1967, believes that the problem of carbonium ions, their structure and stability, and many of the factors which govern their stability and structure, may be studied in the norbornyl system.

He told Dr. Bruce Kennedy,
Gov't grant supports degree programs

Materials to support recently initiated bachelor and master's degree programs are being secured by the Dexter Memorial Library as a result of two grants totaling $22,901 received by the college through the U.S. Department of Health, Education, and Welfare.

Included, according to Dr. Robert F. Hoover, president of Cal Poly, for a quarter of a century have been named professor emeriti for the college's faculty.

Two men who served students of Cal Poly for a quarter of a century have been named professor emeriti in a convocation for the college's faculty.

Dr. Robert E. Kennedy, president of Cal Poly, presented certificates symbolizing the honor to Dr. Robert F. Hoover, former member of the college's faculty, and Torleif M. Ricknasrud, who was a member of the Physics Department faculty.

The convocation held in Mustang amphitheater before some 1,400 members of the college faculty and staff and guests, was part of the annual Fall Conference at Cal Poly.

A member of the Biological Sciences faculty, Dr. Hoover had been on the Cal Poly faculty since 1946. He began teaching at the college in a classroom in the oldest building on campus, the former Agriculture Education laboratory facility.

Dr. Hoover, who retired earlier this year, witnessed the growth of biology instruction from one providing service to agriculture students at Cal Poly to one which last year had 549 degree major students and still offered support courses for other instructional programs on the campus.

The now-retired member of Cal Poly's Biological Sciences faculty, and his wife Betty live in San Luis Obispo.

After coming to Cal Poly in 1940 as an instructor in the U.S. Navy post-war training program then conducted on the college campus, Ricknasrud joined the college teaching faculty in 1944. He has been active in community affairs in San Luis Obispo as a member of the San Luis Obispo County Fair Board for eight years, as an active participant in Boy Scouts of America programs, and as choir director for three different churches at different times.

Dean Fisher said $5,000 grants were received in both 1966 and 1967, and a total grant of $23,170 was received last year for purchase of special educational materials in the past four years.

Dr. Fisher, dean of the School of Applied Sciences who announced receipt of the funds, were a $5,000 basic grant and a $17,901 supplemental grant.

They bring to more than $20,000 the amount received by Dexter Memorial Library for purchase of special educational materials in the past four years.

Sources of the two grants, according to the librarian, is Title II-A of the Higher Education Act of 1965.

"In a period characterized by curtailment of federal funds for such uses, Dexter Memorial Library is indeed fortunate to receive such a significant grant," Strauss concluded.

With a book collection of some 250,000 volumes and more than 2,500 periodicals received regularly, the library is among the largest such units in Central California.

Bauer named top player

Rene Bauer, defensive back, was named Poly's Player of the Week for his play against Boise State.

Bauer, despite his work against the Broncos, may think the honor is a small culmination after last Saturday's loss. Bauer suffered an injured knee and a broken hand. The extent of the injuries isn't known at present, but coaches say he may be out for the rest of the season.

Linebackers Lee Troxel and Dick Kimmich are listed as doubtful starters against Simon Fraser this Saturday night. Both men have suffered shoulder injuries and their absence should put the pressure on the remaining linebacking corps.

Quarterback Gary Abate, leading the Mustangs in total offense, suffered a muscle pull and may see limited action against Simon Fraser. Junior John Marlin is slated to start for Abate, who has 510 yards this season.

Reports indicate Simon Fraser isn't better off either. The team, off a 2-week practice period, has been bitten by the flu bug. Starting lineups haven't been firm yet and jokes quipped, "The coaches may have to play."

"Some of Poly's opponents were victimized over the weekend," said the Mustangs' new coach.

Fresno State, previously unbeaten, received a convincing 40-21 thumping from the University of the Pacific, now 2-1. Cal State Long Beach, despite its bruised end, Billy Parks, was surprised by Valley State, 32-21. Poly plays both squads later on in the season.

UC Santa Barbara scored a close 21-19 win over weakening Whittier College. Poly's own win over Whittier College, 21-10, was a golden opportunity to win.

UC Santa Barbara beat the Mustangs, 21-10, in the week's first game. Poly, however, won its first game in 13 starts, stopping Cal State, 21-10, and making the Mustangs' fans proud.

Meanwhile, Montana, ranked by UPI and AP 10-13, ended in a 2-17 victory over the Mustangs. Poly traveled to Missoula, Mont. For an encounter in a beautiful city.

Reports circulating say the Mustangs' players are due back to their normal schedule.
