Campus clothes know no style

by DALE KEIN
Staff Writer

Boys are a bit more fickle but stand our campus style known to both be and still to be a candidate for the hot faddish list. If the student happens to be one of the "with it now" group, his outfit might consist of the following apparel: one pair of denim pants (preferably bell-bottomed) with browned moccasins (one shoe); a pair of crinkled-creased Wranglers, the lighter the better, is the next item of attire. A custom-made, hand-rolled belt, complete with a set of brass buttons, will close the outfit. A pair of loosely creased jeans, a beaded or bobby hat with high crown and short brim, will complete the outfit. The next fashion has no label. It consists of students of many ranks. Their outfits consist of old, bleach-stained pants, tattered jeans, shoes, and a little headband functional for the drum major, and a little headband functional for the marching band, and a little headband functional for the student who walks to class.

City wants college money to construct new stadium

by KEN HYLAND
Staff Writer

A San Luis Obispo city councilman has unveiled a plan for annexing the Cal Poly campus which he claims may make it feasible for the college and the city to jointly build a multimillion dollar football stadium.

Councilman Emmas Blake feels that if the state and college administration go along with the plan, college residents may benefit from added fire and police protection, perhaps better water systems, and even public telecommunication facilities.

Lutcher Macdonald, director of Information services at the college, refused to comment upon the annexation proposal saying, "Any comment at this time would be premature."

Blake's annexation plan, as it was outlined in this Mustang Daily reporter in an exclusive interview last week, is based on the premise that adding the population of the college campus would bring in extra revenues of almost $90,000 per year to the city.

This money would come to the city in the form of reduced allotment of about $13 per person on campus, Blake said. This would include residents of all dormitories, the athletic housing, job housing on campus, the Home Management House and the President's House. The cost is based on the assumption that each person pays more than $6 a year in gasoline tax, at eight cents on each gallon purchased. "It is my goal," said Blake, "to use this income from the state in the development of a stadium."

There would be a joint-powers agreement.

"A joint powers agreement allows separate government agencies to go together and build something. In this case it would be the State of California furnishing the land, the Cal Poly Foundation joining with the city in the construction of a stadium."

"We would ask participation from the Cuesta College Board of Trustees, we would ask participation from the San Luis Obispo Unified School District. All of these agencies use, as they do now, the Cal Poly Stadium, and we would ask that they continue to do so. Right now they pay rent."

Blake explained that the streets on campus, though they would be in essence city streets, would remain private property. The campus security force would continue to patrol them.

"We would not send our police cars cruising through Cal Poly to see if they could discover a crime. There would be no increased surveillance by police. Right now they go through college property to get from one spot to another, and that is about the way it would remain."

Blake then pointed to the water system as being the most thing that might be a major disadvantage to the city.

"As it is now, the college supplies the pipes that cross its property and the city then connects these pipes to the source. This way the college doesn't have to pay the double water rates that others do who are not in the city limits.

"But if the college is annexed by the city, and then in some future date it decides that because of its growth that it needs more water, the city would have to pay for the extra pipes to be laid."

Homecoming's end: coronation ball

The Homecoming Queen's Coronation Ball Saturday night will give students, faculty and alumni the last opportunity to turn out during the four-day celebration. At the Men's Gym, the 7 p.m. to 1 a.m. affair will feature the Collegians.

Special guests for the ball—sponsored by the Agricultural Business Management Club—will be President and Mrs. Robert F. Kennedy, Dr. and Mrs. Dale W. Anderson, Mr. and Mrs. Donald Wilson, Mr. and Mrs. George Gomes and Mr. and Mrs. Luke Mayor and Mrs. Ken Schwartz.

Bola for the Coronation Ball is on sale in the TCI at 75 cents a couple, according to the sponsors.
Letters to the editor

Manager looks for perfect campaign

Editor:

It must be true that the time of
year where the leaves are chang­
ing color and Homecoming is ap­
parent. The campaign is in full
swing with the posters cov­
ing the campus supporting the
various finalists. However every­
thing is not as good as it should
be due to the pride, spirit, or
whatever of a few select indivi­
duals. Our campus is truly unique. It
is probably due to the people who
like to destroy property. Cam­
paign managers put in long hours
and try to get their candidates
known. Every manager expects
that a certain number of his
electoral votes will be included in
the course of a campaign from
where he put them to somebody's
home (bedroom wall or what­
ever). Yet, it is extremely poor
ager from a few year's back I
his banners torn, stakes, hri
home (bedroom wall or what­
small posters wilt be'TocatetfTn
work of other people, yet the few
and old enough to reekpect the
when a manager walks around
the campus to see if there is any
sneak previews to the campaign's
' figured out, and the manger will
see daily and often take lightly.

The Fickle Finger

Jubilation sets in...we're No. 1...we beat Fresno...alright!

by TIM DOLAN

We beat Fresno. It was sudden. It was unexpected. It was the greatest emotional release for this college since it discovered that there are other places in the world besides the Central Valley.

Beating Fresno was like getting a straight answer out of your advisor. It was like Paul Kruger doing something. It was like SAC actually considering the facts before making a decision. It was like getting a photograph from Photo Bureau. It was like finding glue in the Ad Department.

The Fresno win even had biblical overtones. It was David and Goliath. It was the Resurrection.

We beat Fresno. It was Hudden. It was one of our Fresno's I'd rather have in my pocket than a large sum of money. It was the Mustang's eleven times in a row.

The last time that this beloved institution lost to Fresno, Mustangs were horses, not cars. The win was the college's first over Fresno since 1951. Think of it. This columnist was 11-years-old.

The Fresno game was unique in other ways, too.

- A group of distillers is considering giving many of their $20,000 Mustang Stadium plaques for their consumption of alcohol above and beyond the call of nature. The place smelled like the proverbial brewery—and that was before the game started.

Several library-eyed fans are still staggering home.

No, Mr. Cockrell, the crowd wasn't drinking moonshine.

The Mustang Band is slated to receive an award for the clearest—regrouping in smoke screen that enveloped the field after the game.

The smoke was air-thick, that had something actually been burning. It would have been an all-time fire.

Maybe that smoke, and the crowd, and the yelling, and the ... and the spirit and the team can light a fire under our academic administration. Our student government in absentia, or whatever your particular bugaboo about this campus is; it was only a football game. But it was nice to see this college agree on something... Just once.

Merchants honor alumni as green and gold flags fly

San Luis Obispo merchants will join in the spirit of Homecoming by displaying green and gold flags (inscribed with "Welcome to Cal Poly") near their stores. The project is the result of a contribution by the Retail Merchants Division of the Chamber of Commerce, according to Les Disker, chamber manager. Under the leadership of Hal Hiler, the merchants volunteered to purchase sufficient flags for the fabrication of the flags. Directed by Kathy Jett and Bob Gillingham, Alpha Phi Omega and Gamma Sigma are working together in the construction of the flags.

Mounted on poles eight and ten feet in length, the flags will be displayed in the downtown area during Homecoming Week.

Special assistance in the project was given by Tim Harrah and James Rice, Gillingham said.

Local editor condemns waste in government spending

by KEN RYLAND

Staff writer for the Daily, Robert Finch, introduced George Brand, editor of Telegraph-Times, as his director of information.

Brand spoke to about 60 members of the faculty and staff last Thursday noon from a weekly meeting of the Staff Club in the Staff Dining Hall. He spoke on his experiences with bureaucracy in Washington during the six months that he had to make up his mind whether or not to accept the New Post.

Brand went on to give examples of the government’s monetary wastes in motion pictures, print and television media.

Brand learned that the department put out movies and film strips for use by PTAs, Kiwanis clubs, television, schools and for training nurses and interns in medical schools. He went out a birding to find out how much was being spent. This birding then came back with a report that in the first six months of the fiscal year, 22 million dollars worth of films had either been paid for or contracted to be paid for.

"Well I know that with nine channels of television in San Luis Obispo," Brand said, "I had never seen an HWE filmstrip on television. Granted, that a lot of films were being used for instruction in medical schools, a lot of moviemaking was going on and then the films were being stored somewhere.

"After some investigation Brand found a place in Atlanta where the films were being stored in a television motion picture complex that rivalled anything in the United States. strip making all paid for by HWE, all staffed with civil service technicians, and all told about seven months out of the year. All because of this attitude that some one on the outside can do the job better than we can."

When I left, I left a very large recommendation that those people be allowed to do the job that they were hired to do. I thought that this might save a little money too."}

Brand then went on to relate that when Wilber Cohn was the secretary, someone suggested that too much of his time was being taken up with television interviews. When Finch heard about this he got rather upset because he thought it was a great waste.

Brand said that Finch then told him to use the studio for all of the interviews. During the first interview, just as Dan Shorin of CBS was about to ask his questions, one of his technicians discovered some interference that made television interviews impossible. Nobody could hear it but it registered on the technician’s instruments, and after half an hour of investigation it was found that the studio had been built over the building transformer room.

An outside firm was brought in for consultation and they advised that if the floor was passed with copper, the room would be sufficiently insulated for television purposes.

"So we bought the copper and passed the floor, and that cost about $40,000."

When I was back there last week, Brand added, he found out that the studio does indeed work properly and it is now used the way it should have been used all along.

Brand then concluded his talk by saying, "I’m really concerned about this because tax money, whether it’s sales tax, property tax, or income tax is still coming out of your pocket and mine. It bothers me to see so much of it being wasted back there, when so much of it is needed here."

"But I certainly don’t see any solution about it. If anybody asked me about it, I’d give a very favorable answer. I’d wipe off the whole establishment and put it all over again. That is about the only solution I see."

George Brand

Would you recognize a Bechtel Engineer if you saw one?

Probably not.

They don’t really look that different from any other engineers. Maybe one or two even lives in your hometown.

It’s what Bechtel Engineers DO that sets them apart. Working for the company that is internationally known as a pioneer, . . . the one that tackles the tough, the interesting, the “can’t-be-done?” jobs, . . . The Bechtel Engineer is the one who is there.

Bechtel Engineers perform uniquely professional services from planning, design, construction, and pre-operational plant testing and start-up.

Bechtel has offices in New York City, Washington, D.C., Los Angeles, and Houston with world headquarters in San Francisco.

Are You A Bechtel Engineer?

Find out about a career in Project Design, Estimating, or Construction for MECHANICAL, ELECTRICAL, CIVIL, CHEMICAL or NUCLEAR engineering.

Find out by contacting your college placement officer or write to:

Guidance Relations Department 20.

Middle-of-road fan finds he's crowded from both sides

by VERNON TRITCHKA

"Let us not dream that reason shall ever be popular. Passion may be more popular, but reason remains over the property of the few."

Johann von Goethe

With October I fall behind us, we have to remember that the season is changing and that the temperature is dropping. It is so infinitely nice, to speak kindly, to presume that by interrupting the labor of others we can force the hand of our country's highest office. Whether we must intern a typhoon in front of the train or just solemnly and mutely pursue about with your black arm band and long face you still are existing in various degrees of street politics; and, in doing so, it is in the street where the final showdown of strength for such a system must manifest itself.

The concert is the met of the Men's Union, and is to be held at 8 p.m. in the Union. Tickets for the concert are available at Premier Music, 8th and Main, Ogden's Music, Ogden's Station, and the Associated Press office on campus and at the door.

Wesley brings speaker on nonviolent changes

Rex Boll, an active member of the Vietnam Moratorium Movement, will speak tonight at 8 in Science E-27.

Boll will discourse about the availability of nonviolent changes in the world, and the Nov. 14-15 Vietnam Moratorium. Boll is also a member of the newly appointed Associated Peace Education Committee for the Pacific Southwest Region of the American Friends Service Committee.

He will also discuss the present status of the Moratorium in the United States: the fault, draft refusal, pacifism, and defeat. Tickets bought in advance of the concert are $2 for students, and $3 for the general public. Tickets bought at the door are $2.50 for students and $3.50 for general admission.

Harper's Bizarre joins Bigfoot for concert

The annual Homecoming Concert will present two popular groups. The Harper's Bizarre will be joined by Bigfoot. The concert is for the benefit of the Associated Press. Tickets for the concert are available at Premier Music, 8th and Main, Ogden's Music, Ogden's Station, and the Associated Press office on campus and at the door.

Bigfoot performs on campus about a year ago. Among the hits recorded by the group are "Feeling Sorry," "Another Face," and "Chattanooga Choo-Choo." The group has concentrated exclusively, and critics say that their sounds are much easier on the ears than many other pop groups.

The Harper's Bizarre is the group that has appeared at Los Angeles' Whiskey-A-Go-Go. It specializes in writing and recording songs.

The concert is jointly sponsored by the Associated Press, the Student Government, and the Associated Press. Both student government organization.

Tickets bought in advance of the concert are $2 for students, and $3 for the general public. Tickets bought at the door are $2.50 for students and $3.50 for general admission.

Pedalers prep for gigantic trike race

Pedalers are preparing for the 1st Annual Homecoming Trans-Am Trike Race set for Thursday. Starting time for the autonomous race—putting a premium on maneuverability rather than speed—is 11 a.m.

According to spokesmen for the sponsoring CP Recreation and Touring Committee, a handcrafted perpetual trophy will be awarded to the top cyclist. Medals will be awarded to second and third place winners. The victors also will ride their trikes in the Congo Parade.

Developed by RAT Committee in conjunction with Homecoming planners, the trike race is expected to attract representatives from various news media. KAWY radio will serve as race director. Ticket stubs, the source of authenticity that is completely lacking in the Fall Offensive Moratorium Movement. Many that have been identified with the Moratorium are rightfully dissatisfied with this, our longest war, and think that the Moratorium honestly seeks peace. These people are disillusioned by our country's apparent inability to win this little brush-fire war and are we in the wind blown by the way of the navigators of the Pan Offensiva. It is these people who suffer greatly by such false proclamations as the Moratorium, for it gives them false hope and then, knowing they have done this, the organizers of the Moratorium turn these people into the streets, as they have already said they will do next month, to demonstrate in any way they choose until they get their demands fulfilled.

Let us, and the war, but let it be done by stepping the Communist aggression.
Campus-government communication deemed vital

by MASON SACKS

Since I began working for Senator Alan Cranston, one of my major concerns has been the lack of means for any real communication between students on the campus and government officials. In Washington, D.C., I have spoken with over 30 editors of college newspapers, as well as many other campus leaders throughout the state. What has been the result of all this talk? First of all, it has become clear to me that if true communication is to be obtained, it must be two-way. It is not enough to have a government official state his position and a student to state his. There must be a true exchange of ideas; when one party expresses a view, the other party should respond. If this does not occur, people can talk “past” each other endlessly.

The question, obviously, is how can these goals be achieved? Ideally, each student who wishes to express concern of any nature, with public policy should have the opportunity to speak personally with his Representative Senator or any other government official he feels appropriate. Yet, practical reasons, however, this is not possible.

As a substitute, I submit the following idea: Each week this column will appear in your school paper. As the end of each column a request will be made of readers to write to Washington and express a viewpoint or ask a question. The Senator Cranston, or any other government official he feels appropriate, will reply individually to as many of these students as views as possible. In practice, this would work something as follows: This week I am extending an invitation to all of you to write to me in Washington and express what you feel you should be done about the draft. After receiving your letters (which may be from either individuals or groups), I will approach Senator Cranston or any other official you might designate and ask him to respond to your observation. Then, in the paper that comes out a week from now, this column will reprinted in the column. I look forward to hearing from all of you in the near future. Perhaps together we can begin to have columns of communication for your group’s needs. This column will help us to know, better, the problems of our country’s future.

UGLY MEN ON CAMPUS: ...These contestents for the Homecoming Ugly Man contest will be "begging" on campus this week. Contestents are, from left to right, Subash Bhatia, Greg Lievan, Al Anderson, Craig Jackson, Jess McChesney and Bill Glenninkel. Not pictured are Herby Herbelin and Ron Chesnlove. New Degree

Science of measures to be here

The first four-year program of its kind in the nation, according to Dr. Donald Morgan, head of the Industrial Engineering Department, is being offered this fall to major in measurement science. The major will be open in the next school year.

"We feel this major will interest those who are ready to meet that demand," Morgan said. "Not only will it provide industry profit from the science Program, but it will locate the measurement personnel needed by governmental agencies and other businesses." Morgan said the course of study is being planned so that the student will be prepared to go into a calibration center upon graduation. He added he hopes the new program will make it possible to interest the college administration in eventually making the major a degree program.

"The Apollo landing on the moon recently showed the importance of precision demanded every day by manufacturing processes in industries of all kinds," Morgan said. "We are approaching the age of measurement so fine that ten thousandths of an inch will be measured." Morgan said the college istered many men to the field of measurement who will never be imagin. We must not fail, however, to train the necessary number of qualified to interpret the results they will bring in.

Scholarships offered students for university study abroad

The Institute for American Universities is offering five scholarships of $1,000 each to students applying for an academic year at Aix-en-Provence in Southern France.

The Institute, chartered by the University of New York, is intended to attract students from the University of Aix-Marseille. Founded in 1499, the university is now designed for American undergraduates who wish to wage a degree of advanced study and have transferred to their home universities.

The scholarships are divided among majors in French, literature, fine arts, history, social sciences and Mediterranean areas.

In addition, there will be a tuition grant and a French government scholarship of over $1,000.

Aix-en-Provence is located 17 miles north of Marseille within easy reach of the French Riviera, ski resorts in the French Alps, the Roman cities of Arles, Nimes and Orange, and is only a few hours by train or plane.

Applications may be made by air-mail directly to:

The Department of Study Abroad, 18-Aix-en-Provence

Program enables students to seek education abroad

In the coming academic year, 1970-71, 425 students from all nineteen state college campuses will be studying abroad as participants in the California International Program. As the official academic year study abroad activity of the State College System, the California State International Programs have sent more than 1,000 State College students to campuses in Europe and the Far East during its first six years of operation.

Students in the International Programs may study at the University of Aix-Marseille, The Free University of Berlin, the University of Heidelberg, the Hebrew University of Jerusalem, the University of Tel Aviv, the University of Florence, the University of Granada, the University of Madrid, the National University of Taiwan, the University of Uppsala, the University of Houston, American University in Beirut, Lebanon, Darmouth, Maine, University and the Universities of Leicester and Kent in England as well as in Greece (Athens), Columbia, Peru, Portugal and the Netherlands.

To qualify for this unique Study Abroad Opportunity, students must have upper division or graduate standing by September 1970 and must have a good academic record. Participation in the French, German, Spanish, South American and Portuguese programs requires proficiency in the language of instruction. The programs in England, Israel, Ghana, Italy, Japan, Lebanon, the Netherlands, Sweden and Taiwan do not require previous study in the language of the country. All International Programs include two semesters of academic work which is fully accredited and designed, whenever possible, to meet the degree requirements of the student's home campus.

In addition to the academic year of study at the host university, students have extensive travel opportunities.

Details on financial aid for Study Abroad Opportunities with the California State International Programs may be obtained from Dr. F. H. Telegar, Education, or by writing to the office of International Programs, California State Colleges, 1000 Holloway Avenue, San Francisco, California 94132.

Mustangs still in running, 28-19

by GEORGE RAMOS
Sports Editor

ENCINO—Tailback Joe Acosta kept his team in contention for a possible bid in Sacramento's Camellia Bowl here Saturday night.

The Mustangs, now 5-1, on the season, kicked, screamed, and bumbled, but finally—with Joe's help—downed San Fernando Valley, along with five other Pacific Coast schools, is being considered for the Dec. 18 game which will probably feature North Dakota State, ranked No. 1, and one of Poly's future opponents.

Poly, along with five other Pacific Coast schools, is being considered for the Dec. 18 game which will probably feature North Dakota State, ranked No. 1, and one of Poly's future opponents.

The Mustangs put five of their eight laps of the half-time and midway through the third quarter scored another TD on a pass from Smith to split end Mike Anuvj. The pass was good for 60 yards. Donaldson missed the conversion attempt.

The yearling running backs scored again in the fourth quarter on a four-yard plunge by Thomas. Donaldson kicked the extra point.

The senior tailback from Madera Catholic indicated Poly would be invited if the Mustangs remained undefeated for the rest of the season. That would have to include a must-win victory over unbeaten Montana.

Without Acosta's outstanding performance, the Mustangs were just an average opponent against the Matadors.

With 9:30 left in the third quarter, Acosta galloped 55 yards for the tally. Overall, Acosta gained 183 yards in 17 carries. It nearly equaled his superb showing in Poly's opening 71-7 win over San Francisco State. That day, he turned in a 130 yard game.

Colt snap losing streak; defeat Bullpups, 41-8

BY TERRY CONNER
Sports Writer

The Colts snapped a three-game losing streak by downing the Fresno State Bullpups, 41-8, Friday afternoon in Fresno.

Clarence Smith, the fourth quarterback to be tried, cocked.

This was the first time that the Coyotes lost three quarters in a row. The Colts lost their way into the finals with little effort.

The yearling running backs scored again in the fourth quarter on a four-yard plunge by Thomas. Donaldson missed the conversion attempt.

The yearling running backs scored again in the fourth quarter on a four-yard plunge by Thomas. Donaldson missed the conversion attempt.

ThePoly yearlings scored again in the fourth quarter on a four-yard plunge by Thomas. Donaldson missed the conversion attempt.

The Colts will face the San Francisco State Freshmen team this Friday at 2:00 p.m. in Mustan Stadium.

Poly fencers battle

to northern finals

By KURT FRANK

With all round good fencing and physical endurance, two Mustang fencers battled their way into the final round of an individual meet this past weekend. Pancho Guzman and Doug Skilling finished the day long competition in fifth and sixth place, respectively.

In the preliminary rounds, Skilling found the going easy as he finished with a 4-0 record. Guzman was almost eliminated at this point as he tied 3-2 with Perez of Stanford, but moved on to the semi-finals having received the loss tech touch from Perez.

The Mustangs put 5 of their 8 laps of the day in the semi-finals.

The other fencers were; Dave Oster 4-1, Andy Perbach 4-1 and one of the team's four girls, Donna Carter 3-2.

Pancho Guzman and Doug Skilling were able to battle their way into the finals with identical records of 4-2.

Final meet standings for the Mustangs were first Leedon, San Jose State, second Montana, City College of San Francisco, and third Littoway, San Jose State.

Top fencers for the men were; first Stratton, City College of San Francisco, second Solomon, Berkeley; and third Beckwith, San Francisco State.

The next competition for the Mustangs is Nov. 8, when they travel to Sonoma State for the first team meet of the year.

camellia bowl bid possible

The Mustang Daily learned that the Mustangs were being considered for the Dec. 18 game which will probably feature North Dakota State, ranked No. 1, and one of Poly's future opponents.

The selections, are also figuring strongly in the selections. Coleman indicated Poly would be invited if the Mustangs remained undefeated for the rest of the season. That would have to include a must-win victory over unbeaten Montana.

Without Acosta's outstanding performance, the Mustangs were just an average opponent against the Matadors.

With 9:30 left in the third quarter, Acosta galloped 55 yards for the tally. Overall, Acosta gained 183 yards in 17 carries. It nearly equaled his superb showing in Poly's opening 71-7 win over San Francisco State. That day, he turned in a 130 yard game.

Other than that, the Mustangs showed was just above stereotypes, just barely.

After running out a 28-19 advantage, the Mustangs defense lost its touch. The Matadors, behind quarterback Hary Hartman, quickly lost their respect for the usually-rugged Poly defense.

After Bobby Flandt returned a kickoff 84 yards, Hartman hurled a 3-yard scoring pass to Handy. Onatsiu chose to close the gap to 28-19. Hartman later threw another touchdown aerial. This time, tight end Paul Goodwin hauled in Hartman's 15-yard effort to bring Valley State within 9 points, 28-19.

After that, the Mustangs showed up the clock by marking 45 yards before they turned it over on a fumble on the Vale State 2-yard line. It was the fifth fumble the Green and Gold lost in the contest.

Behind Acosta, the Mustangs drew first blood. They drove 75 yards in 13 plays, with Abate going over for six on 4 yards. The Mustangs, now 5-1 on the season, kicked, screamed, and bumbled, but finally—with Joe's help—bested San Fernando Valley State, 28-19.
