Registration hassle confuses many

Cancer battle launched with national collegians

It costs just 42 cents to launch a personal fight against cancer.

To aid a national student drive to stamp out cancer, the Student Affairs Council authorized ASI Vice President Dick Barrett to send seven letters to the White House on behalf of this campus, it was disclosed Tuesday.

Barrett will write seven letters and have seven friends sign them. The address will read: President Richard M. Nixon, in care of the U.S. If each student sends seven letters there would be about fifty million college students in the U.S. Most of them could take over the activity outlined in detail so another person could take over the activity as well and a national student organized a complete program of intensive research aimed at the conquest of cancer, according to Dr. Alvin Silverstein, chairman of NCACC.

The NCACC plans to instigate action from Washington primarily through the medium of letters to Nixon and all Congressmen. Silverstein said he hoped that all college campuses would form a local chapter. Each local chapter would consist of a faculty group and an independent student group.

Students interested in joining the crusade against cancer can obtain needed information from Dick Barrett in the TCU.

Library hours are lengthened

The Reserve Book Room (Room 210) now is remaining open until midnight, Sunday through Thursday. All other areas of the Library will close promptly at 10 p.m. and students will be requested to move to the Reserve Book Room to continue their studies.

Books, periodicals and other materials from the Circulation, Reference, Periodicals, Curriculum, Special Collections and Stacks areas may be taken to the Reserve Book Room for use after 10 p.m. Materials may be checked out for room use or overnight loan from the Reserve Collection. Two assistants will staff the Reserve Room after 10, one to be stationed at the Reserve Desk and the other stationed at the exit door.

The only entrance to the Reserve Book Room after 10 will be through the door leading from the Reserve Room to the outside stairway (facing east and across from the Library's main entrance).

For 16,657 college students the end of Christmas vacation was the bitter reality of registration for Winter Quarter classes.

Once again the simple procedure of registration turned into a big hassle for some while for others it was just a five minute walk through the gym. The less fortunate students were forced to scurry from station to station over the tear-sealed, sawdust-covered floor, gathering what few precious cards remained. "...there was some disappointment, but nobody was contemplating suicide." That was how Registrar Jerald Holley summed up what he considered one of this college's "better" registrations.

Registration was down about 650 students from Fall Quarter, but added this was the last day of enrollment ever. The drop in enrollment is normal and Holley was quick to point out that it was not due to any new "get tough" policy on the administration's part. The rules governing students on probation have not been changed.

Exact numbers concerning male-female ratios were not available, but it still looks like it's a women's world. Slightly less than 7,000 men registered with women registering just over 9,000, making the ratio about 2 to 1.

Applied Arts once again was the largest school with 3,291 students. The School of Engineering was second with 2,137 followed by the College of Science, 1,885, Agriculture 1,389, and Architecture at 1,355. For 10,657 college students the largest single department is Business Administration with 7,509 students.

There is some speculation that this could have been the last registration under this system. Holley declined to make any statement at this time saying he would have to wait for an announcement from the President's Council on Jan. 12.

Admission fee hike

Students seeking to enroll at this campus after Feb. 2, 1970, will have to pay an application fee of $20, according to P. Gerald Holley, director of admissions, records and evaluations.

An increase of $10 over the present fee was approved by Trustees of the California State Colleges at their Nov. 25 meeting. The new fee becomes effective Feb. 3 at all 10 state colleges.

Holley said that all applicants for admission for the Fall Quarter, 1970-71, and succeeding quarters, will be required to pay the $20 application fee if their applications are submitted after Feb. 2. Applicants filed on or before Feb. 2, 1970, will be received with the $10 fee.

Not included in the quarters covered by the increased fee, according to Holley, are applications for admission to Spring, 1970, and Summer, 1970 Quarters.

They will also be received with the $10 fee.

Outdoor class to aid mentally retarded

It's got possibilities... That was what Miss Evelyn Pollaton said about the recent acquisition of a county schools' camping program. Miss Pollaton's Camping and Outdoor Education class is helping plan the placement of facilities for the new campsite. They are also preparing an entire camping program for the mentally retarded children in the county schools. The camp will be held at San Luis Obispo for approximately 60 children. Located off Highway 101 across from Cuesta College, the campsite has kitchen, dining and auditorium facilities. Future plans include moving about 30 more barracks from Camp San Luis Obispo to go along with the 30 that are already there. The 50 students in the camping class will plan meals, dining room procedures, swimming, horseback riding, nature crafts and other special activities.

Howard Drucker, head of Chris- 

Telescope, previously planned the camping program. This year Cal Poly students were asked to participate.

A student in the camping class chose a particular activity of the camp. The student organized a complete program for this activity. It was outlined in detail so another person could take over the activity smoothly and easily without any outside research or work.

Students in the Spring Quarter camping class may teach their own activity. The camping program for retarded children is designed as an extension of the outdoor science classes taught in the schools.
Two-Poly float garners Pasadena fete garlands

Cal Poly College’s 21st entry in Pasadena’s Tournament of Roses Parade won for the college their fifth major trophy in as many years.

The float captured the college’s third consecutive Princess Trophy for best use of animation. About 15,000 man-hours of work done by over 160 students went into the construction of the float, which was a joint effort of the two colleges, Pomona and San Luis Obispo.

Marines to recruit

Marine Corps representatives will be in the Union Block today to talk with students interested in a career as a Marine officer.

Major Edward O. Lathey and Pilot Lieutenant Robin R. Bowen will be on hand to explain both the aviation and line officer programs. Programs for students from all levels, from freshmen to senior, are available, including Officer Candidate scholarship programs.

Did you know that the campus library has exclusive holdings including volumes, microforms, pamphlets, maps, documents and other types of material now approximating 600,000 items?

A comprehensive report of operations was prepared in November 1968 for use by the college in seeking renewed accreditation by the Western Association of Schools and Colleges. This report, which used the American Library Association’s Standards for College Libraries as a guide, indicated that this library is providing effective services for its patrons.

Over the past year, in an effort to improve the library, a special emphasis was placed on securing resources materials needed to strengthen the emerging graduate and ethnic studies program.

The library has been growing in several ways besides in its resource department.

In the past year the staff of the Library increased from 87.9 budgeted positions in 1967-68 to 81.0 positions in 1968-69, and this growth was largely restricted to clerical and student positions assigned to library processing.

Seven professional and three clerical positions were reclassified to clerical and student positions.

Another increase in the Library is that of circulation, which increased by 47 percent. While the total of library use registered a 28 percent gain, reference questions answered as one indica of library service. This category of use showed a 27 percent increase over 1967-68, and 42 percent of the questions being moderate to extensive research.

Only 150,000 flower blossoms and other plants covered the float. Pink, bronze and white chrysanthemums; orange Iceland poppies; pink orange gladolus; bachelor buttons; leaves; ferns; bark; red cockleburs; and sed culture were used in decorating the float. Some of the flowers for the float were grown on this campus, with the bulk being grown at Pomona. Full-time construction began after finals and continued on the Pomona campus with December 29 when the float was driven to Pasadena to be completed in Pasadena’s Rose Palace. Flowering began on Sunday, December 28 and was completed on Wednesday, New Year’s Eve.

Library shows increase

“Excellence is never granted to man but as the reward of labor”

Sir J. Reynolds

At Ampex, where the standard is excellence, the rewards, both current and potential, have never been greater. We are doing some interesting things which require imagination and perseverance, therefore we need action-oriented people who are eager to utilize their talents in this kind of atmosphere.

Participate in our spectacular growth and catapult yourself into a dynamic future. We have current openings at both our corporate headquarters in the San Francisco Peninsula and at other locations throughout the United States.

Library Building, Room 115
Kennedy explains naming policy, computers

Editor: I recently received from a student a letter expressing concern about the naming policy at Cal Poly. The student was interested in knowing why our college does not follow the procedure used by other universities in naming buildings.

I usually respond directly to students who write, but because the student in this case the student preferred to remain anonymous, I am happy to reply in this manner.

It is true that many colleges and universities, particularly private ones, refer to their buildings by the names of individuals they believe were significant aboard the building. This is not a practice that many public institutions have adopted. It is a recent tradition at Cal Poly that in naming residences halls 11. Engineering and history teach- v. are president, and for a brief period (February-August, 1924) acting president of Cal Poly. Jee. Chases Hall was named after Major Charles L. Dexter, who served in the college in a number of capacities ranging from Professor of Military Science and Tactics to Director of all college-owned housing. Julian A. Keefe, in whose memory the College Union building was named after Major Joseph Dues, a lifelong Cal Poly employee who served as president in 1950.

1. Collins pioneered many of today's data techniques and recently announced a computer-controlled design and manufacturing service for customers.

2. The company ranks as the largest independent producer of microwave systems.

3. More than 75% of the commercial airlines use navigation/communication equipment supplied by Collins.

4. The company designs and installs computer systems for the military and for railroads, airlines and many other industrial organizations.

5. Collins serves as the prime contractor on NASA's worldwide Apollo tracking network.

6. The company is recognized as one of the world's leading manufacturers of commercial broadcast equipment.

7. Collins received the first contract awarded to a single company to design, equip and build an earth station for satellite communications.

Beef-between-the-bun replaces apple pie

by JOHN HUBBAR
Staff Writer

God, country, motherhood and hamburgers may be the American way. Apple pie has succumbed to beef-between-the-bun.

Hamburgers have not only become a national pastime, but hamburger stands have proven prosperous as franchise investments. For instance, McDonald's hamburger stands have become historical American landmarks and have sold over five billion burgers to boot.

Similiar chain-stands also boast fantastic sales of hamburgers from the 20 cent catsup burger to the famous "Birthday Berger" at San Francisco's "Hippies." The "Birthday Berger" comes complete with chocolate icing and candle, and sells for about $3.

Although the hamburger is called 100 percent American, its genesis is foreign.

The broiled or fried hamburger sandwich in a bun made its first appearance at the Louisiana Purchase Exposition (St. Louis Fair) in 1903 to 1904. The hot dog and ice cream were also introduced.

Shredded red meat was eaten raw, by the rugged individuals of Estonia, Finland, during Napoleon's reign. This custom migrated to Hamburg, hence the name Germany, the largest seaport in Europe at the time.

Prior to the turn of the century, German sailors docking in New York city patronized the eating stands along the piers. They insisted that beef be chopped up and placed between buns so they could take it back aboard ship in hags.

Regular ground beef (which must not contain more than 25 per cent fat for a good hamburger) is the most inexpensive type of beef. Hamburger recipes need not be bland. From the hamburger to the broiler there are at least 395 ways of preparing hamburgers using anything from chilli to caviar.

The poverty-stricken college student or similar connoisseur of beef-between-the-bun should take careful note of the relatively "cheap" ways of making hamburgers using anything from chilli to caviar.

1) Lean ground beef must not contain more than 12 per cent fat.
2) Ground beef should be stored in refrigerator. It should not be kept for more than two days once it has been refrigerated.
3) Do not re-freeze hamburger once it has been thawed.
4) Hamburger should be handled thoroughly; do not keep it juicy and tender.
5) Pat hamburgers loosely into shape. Do not squeeze the juice out of them with a spatula while they are cooking.
6) The more times hamburger is ground, the more compact it becomes.
7) A pound of hamburger makes four servings.

Hamburger entrees run the international gamut. Pizza hamburger, hamburger ala eggplant (or broccoli and lasagna type) in the Italian vein. If Oriental aromas are sought, beef-stuffed Chinese cabbages or sukiyaki hamburgers or hamburger cheeseburger can be easily made. If calories are counted, dietetic hamburgers are suggested (just add salt on the patties). And if wine is appreciated the patties can be liberally marinated in anything from Vinoce to Red Mountain.

South of the border favorites include: Mexican chili, rice, potato or guisado. A tamale burger (or Mexican version of the taco) is another savory example of Yankee ingenuity.

If tastes your the kistos or "unusual" appetites, variations comprise: Hamburger Creole. Hamburger smothered in noodles with sour cream. Hamburger spaghetti, hamburger mushrooms, sliders, cheeseburgers, hamburgers with raisins, hamburger ala Testa, etc. By now you are convinced that the possibilities are endless.

Perhaps the Polaroid Camera or Betty Crocker people could invent the instant (just add water to miniaturize package and shake vigorously) hamburger for students on the run between classes. If the student is not particular about the type of beef, German burger made for dogs can be easily substituted. Hamburger buns can be instantly warmed by sticking them under the armpits and pressing gently.

If drugs (ie--dietary, vitamins, aspirin, birth control and heart malfunction) are to be a part of tomorrow's scene, the ever present and popular hamburger could be tastily nauseated, thus eliminating medical hangups resulting from reading the latest Federal Drug Administration reports.

One last note. If the student's cooking leaves something to be desired, rejected hamburgers make great sandwiches or snacks.
Army scholarships

old ROTC cadets

The Reserve Officers Training Corps unit at this school stands to lose from one of the 2,200 scholarship programs for ROTC cadets that the U.S. Army will grant to ROTC students this year, according to Col. William L. Hastie, head of the college's Military Science Department and commander of its ROTC unit.

The new scholarships for students enrolled in the ROTC program that is the number of scholarships offered by the Army this year.

Offered on a competitive basis, the scholarships will help those students who receive them by paying for books, tuition and lab fees, and provide a $50 per month subsistence allowance.

The scholarships available to ROTC students are:

- A three-year scholarship for cadets who have completed one year of ROTC training.
- A two-year scholarship for students who have completed two years of ROTC training.
- A four-year scholarship for students entering college from high school.

To receive a scholarship, an applicant must be a United States citizen, meet the prescribed physical standards.

Applicants for the four-year scholarship can be accepted by the ROTC unit, says Col. Hastie. Applicants for the two- and three-year scholarships will be accepted by Jan. 18 and April 18, 1970, respectively.

Applicants for the two-year scholarships are being accepted now until Jan. 18. All inquiries should be directed to the Military Science Department.

Alternative

Do you write poetry, short stories, or screen plays? Can you draw? Or is photography your favorite pastime? If your answer is yes, you may be able to have your work published and help out the student magazine.

Up until now, student art work of any sort has been adaptable to the printed page but was greatly needed for the Winter edition of the college publication. Art work submitted will be given equal consideration for publication, so if you've ever doubted about something you've done, don't be afraid to turn in your work.

If you have something to contribute, or want more information, contact Bill Ganter or Stan Brown.

Publicity code set

A new procedure for the Mustang Daily is beginning with the following program designed to increase the school's visibility.

No written complaints will be taken regarding publicity for the following groups that have been set by the Mustang Daily staff:

- Majors of meetings and other activities will be delivered to the Mustang Daily office by 4 o'clock the day before the event.

The following information must be submitted by 3:30 p.m. for publication in the Mustang Daily.

- Majors of meetings and other activities will be delivered to the Mustang Daily office by 4 o'clock the day before the event.

USE YOUR RILEYS CONVENIENT CHARGE CARD—BANKAMERICANCARD—MASTER CHARGE
Operations on the job; keeps campus in order

"Hello, maintenance? Yes, I have a problem. You see this cord that closes the blinds? I can't close the blinds. I'm showing a movie tomorrow... you'll send somebody over before tomorrow? Good. Thanks a lot." The Plant Operations crew is on the job.

This division keeps the campus running smoothly. Its purpose is to maintain the buildings, the dining and the cafeteria, those buildings are maintained by the foundation department, an independent organization.

Listed under the Business Management Department on campus, Plant Operations includes the maintenance, electrical, carpentry, and the cupboard shop.

The full-time painting crew of five does all painting on campus with the exception of streets. These are taken care of by Security. The crew tries to paint all buildings every five years plus painting signs and doing other jobs around the campus. Does some furniture need moving or is a desk broken? Most likely an employee of the maintenance shop will fix it. Carpenters make all repairs from a broken blind to a bulletin board that has lost a screw. It is maintained by 15 full-time men plus student help.

Did a light bulb burn out in class? The electricians will fix it. Their duty is to fix all minor electrical repairs or difficulties.

Included under the Plant Operations Department, but not a separate division is the locksmith. He is responsible for all the locks on campus doors plus locks on computer doors. Also under his supervision is the issuing of keys to the maintenance office and the upkeep of all keys on campus.

The department is headed by Richard Tartalgia, a graduate of this school. He worked for maintenance during his college career, entered the army for two years and then returned to this campus to work in maintenance full-time. What does it cost for the Plant Operations Department to run? For the 1969-70 school year, we received $87,965 for operations and expenses, $60,305 for salary and wages; and an undetermined amount for the minor construction programs. Tartalgia said.

The minor construction program includes such special repairs as a parking lot, installation of boiler for the meat animal labors and street light replacement.

"We must have a signed contract for this repair. I first fill out a program justification form in which I state the reasons for the repair and also the estimated cost. It is sent to the division head to make any alterations he wants. The division head then sends it to the College Administration Board. They make the cuts they want and send it to the Chancellor. The Chancellor then makes the alterations he wants and sends it back to me," Tartalgia continued.

Tartalgia arranges for bids to be posted and then signs the contract with the company having the lowest bid. In case of an emergency, such as the power short that caused three years ago, Tartalgia calls in the repair service and later sets up the contract.

"No two days are alike," Tartalgia said. "In a typical day we may move furniture for some department, change a bulletin board location, install a gutter, or set up the gym for a concert such as Harper's Bizarre."

Dean Chandler plans studies at Michigan

Dean of students Everett M. Chandler has been granted leave without pay from his duties at this college from Jan. 1 to Sept., for the purpose of pursuing study in the Department of Higher Education at Michigan State University.

Dr. Robert E. Kennedy, who announced the leave for Dean Chandler, said that Dr. J. Dan Lawson, director of student activities at the college, will assume the duties of dean of students during Chandler's absence.

Chandler, who joined the professional staff in 1951, will do advanced work in the student personnel program at Michigan State. He will be joined in June by his wife, Arline, a member of the faculty at Queens College.

Lawson, who also joined the staff in 1951, has moved from his office in the Temporary College Union Building to the Dean of Students Office located in Room 109 of the Administration Building.

During the time Lawson is serving as acting dean of students, John J. Lucin, a member of the staff since 1966, has been designated as assistant director of student activities and will occupy Lawson's office in the Temporary College Union Building.

Should a College Graduate Consider SALES?
We think so!

There are hundreds of exciting careers. Marketing is one, a dynamic one, and probably the major stepping stone to civic and business leadership.

At Xerox, our people are more than sellers of graphic communications equipment. They have knowledge of marketing strategy and insight as to how Xerox copiers, copier/duplicators and related equipment can meet the needs of modern business. They have a healthy regard for the importance of document flow and its implementation in every size and type company. They are able to advise businessmen at all levels on their present needs and to reasonably forecast future developments. Their thinking is business systems oriented; for this is the wave of the future. That's why we require a college degree. We have openings at various locations throughout the Western United States.

After comprehensive product and sales training, you'll become part of the dynamic picture at Xerox, where operating revenues have increased from $40 million in 1960 to over $695 million in 1968, and employment has grown from approximately 3,000 people in 1960 to over 50,000 currently.

Excellent salary and incentive compensation in addition to comprehensive benefits including profit sharing.

The Xerox Representative is coming to campus

Monday, January 19

See your Placement Director for details and to arrange an appointment. Or, you may write directly to Employment Manager, Xerox Corporation, 2200 E. McDavitt Avenue, Santa Ana, California 92705.
Registration discussion

Rumors concerning the handling of Spring Quarter registration procedures are flying all over campus.

The largest and most often heard rumor is that a system of pre-registration will be used to register students for the coming quarter. There are two methods by which this registration may take place. Some are speculating that the registration will take place with the aid of computers. Others say that students will fill out the registration booklet and bring it to the Administration Building, where a staff of registration assistants will pull class cards.

There is also much speculation as to which students will have priority under the proposed system. Some sources say that the students with the most units at the end of Fall Quarter will be the ones to register first, while others say that the standard alphabetical rotation will be employed.

If a new system of pre-registration is put into effect, the fact that it is by computer or registration booklet will not make much difference to the students involved. However, Mustang Daily believes that seniors slated to graduate in June should have the first chance to register under a new system such as the one proposed. After those seniors students set to graduate in August should be next to register. After the above groups of students register, the standard alphabetical rotation should be used to register the remaining seniors and graduate students.

There are several advantages to using a system such as the one proposed. First of all, classes could be adjusted to student needs by adding more sections of classes that close out first or closing those that don’t fill and using the instructors to better advantage. Secondly, there wouldn’t be as much pressure on the students because they would have a chance to check closed-out courses and add courses in advance. Students would then be able to revise their schedules before the last minute.

There are disadvantages to such a system also. The present registration system allows students to juggle classes and times so that schedules are convenient to the individual student. If a pre-registration system is introduced, choice of class times will be greatly reduced. The college would also need to hire assistants to help with the registration instead of being able to rely on monitors.

A final decision concerning the advent of pre-registration on this campus will probably not be made until Monday, but Spring Quarter 1970 could very possibly see an experiment in registration.

Members sought by sports car club

An unprejudiced club on campus is the Sports Car Club. How so? Because it is not choosy about its members. You don’t have to own a sports car to belong to the club. As a matter of fact, the president owns a Chevry. The club meets on the first and third Wednesday of every month at 7:30 in E 47.

Membership for the year is $5 which entitles the club member to discounts on car parts. Picnics, tours, and auto-crosses are also among the club activities entitled to a member.

Refreshments are served at each meeting and after the business of the day is finished a film is usually shown. All films deal with some aspect of cars and car racing.

Two auto crosses have been scheduled for this quarter.

Why engineering students graduate to Lockheed.

Progress is a matter of degrees. But, that’s only the beginning. At Lockheed Missiles and Space Company, we’re working on worldwide...otherworld...upperworld... and subworld projects. We’re pretty high on space...we’ve got Agenas and other extremely advanced programs to prove it. And, when it comes to ballistic missiles, Polaris and Poseidon show an arc of triumph. We think deeply, too...consider our deep submergence vehicles, for example. And, just to show you our feet are solidly on the ground, we’re working on advanced land vehicles. Information? Business, government and industry get it out of our systems.

LMSC has been in the sea...on land... in the air... in space... and now, we’re coming to your campus. We’d like to talk to you about coming to LMSC. Contact your placement office for an appointment. Our interview team will be on campus January 9. Move up to Lockheed... or move over for those who do. If an interview is inconvenient at this time, write to: College Relations Coordinator, P.O. Box 504, Sunnyvale, California 94086. LMSC is an equal opportunity employer.
Eighth ranked Mustang wrestlers face fourth ranked Michigan State University

Poly sets sights on MSU

by TERRY CONNER

Saturday night's contest will cap the end of a two-day long tournament here on campus and should be one of the best dual wrestling matches for the hometown team.

Coach Vaughn Hitchcock has this to say about the contest: "Cal Poly is every bit as good as our team as MSU and it's up to our guys to prove it. We will face four of our national place winners from last year in the lineup and third place finisher Dennis Petracek."

Petracek will be making his 1969-70 heavyweight debut for this match. He was unable to participate earlier this season. Hitchcock continued, "We have somewhat, inexperienced in our weights, but we anticipate the battle in every weight class to be a very powerful issue as we're going to give it our all."

MSU will be sending out university division national place winners against the Mustangs tonight against the University of Oklahoma in the second round, followed by the University of Northern Iowa tomorrow morning at 10:00 with consolation matches and continue until 5:00 p.m. when the finals will start.

Competition will be against Bush School, Davis and San Bernardino College.

Also bringing his team to the tournament will be Ran Hoefer, an ex-Cal Poly wrestler from the early 60's. He is now coach for San Jose City College.

Admission prices for the two day event will be adults $1.50 per day and students 50 cents per day.

Prewitt and Ford will be sending representatives.

Weigh-ins are scheduled for this morning and wrestling to begin at 6:00 p.m. and continue until 10:00 p.m. Action will begin again tomorrow morning at 10:00 with consolation matches and continue until 5:00 p.m. when the finals will start.

This weekend. MSU will be sending out University Division National place winners against the Mustangs tonight and tomorrow morning at 10:00 with consolation matches and continue until 5:00 p.m. when the finals will start.

Earned and student staffed radio station at 91.3 on the FM dial, will be digging deep into the sports scene in the Winter and Spring Quarter. During the Fall Quarter the radio sports staff covered all freshman football games that were held at home and taped for delayed broadcast all varsity games held here.

This quarter the station will be quite active as they will have live coverage of all the freshman basketball home games, starting Jan. 18.

Beginning Feb. 18, all varsity home basketball games will be covered live. This coverage will run into the Spring Quarter as well. Plans in match-by-match wrestling reports will be given from the men's gym.

KCPR will also be taping swimming and track events to be broadcast on the 8:00 p.m. news cast.

With these plans and many others KCPR wishes to extend the invitation to all students who would like to actively participate in working and producing a fine sports program of which our campus and community can be proud.

The Mustangs opened the second half with a tenacious man-to-man press that did not allow Redlands six score for seven minutes. In the meantime, the Green Machine poured it on and increased its lead to 22 points before the final buzzer sounded.

The Mustangs open league play tonight against the University of California at Riverside, who Stone feels has the best personnel in the league. "We have a chance for the league championship, but we feel the team to beat will be San Fernando Valley State."

The win for the Mustangs leaves them with a 7-4 slate. The seven wins surpasses their total for the entire 1968-69 season.

The 15th Annual Junior College Wrestling Tournament will take place on campus this weekend with more than 40 teams sending representatives.

Weigh-ins are scheduled for this morning and wrestling to begin at 6:00 p.m. and continue until 10:00 p.m. Action will begin again tomorrow morning at 10:00 with consolation matches and continue until 5:00 p.m. when the finals will start.

Pre-tournament favorites are Bakersfield College and San Bernardino College.

Poly roundballers open league action tonight

by RICH BOSCHETTI
SPORTS WRITER

In their final tune-up before their league play opener, Coach Neal Stoner's basketball team纪律ed the University of Redlands 86-67 last Saturday in Mustang gym.

The Mustangs, in the words of Stoner, "planted a very average first half. We let them control the tempo of the game and we didn't have much enthusiasm."

But even with their lethargic play, the Mustangs managed to leave the floor at the end of the first half with a five point lead. What the Mustangs lacked in enthusiasm in the first half, they more than made up for in the second.
