Decal, I'm stuck on you

There is a mania particular to college campuses which is running rampant on our campus. It is the art or process of transferring one's name, club names, and other decals with the college name, club name, and fraternal organizations. New to our campus is a more modern version of the old alma mater label, this time in OUR school colors.

If the student is unable to find a particular decal to suit the fancy he can always improvise. And improvise hardly describes what some students have done with decals.

Once bitten by the bug, many students find that they are unable to see out of either the front or rear windows of their cars.

One such student is Ned Nouget, sixth-year Industrial Technology major. Ned drives a 1964 compact model car which he received as a gift in high school graduation present.

It was in 1964 that Ned entered the college. "I was an Architecture major. The day after graduation I ventured into the bookstore and behold he beheld the nefarious decal rack! A look of sheer madness flashed in Ned's eyes and he broke out in a cold sweat. He felt an overpowering urge to grab up all the decals he could.

Ned grabbed a four-inch, black letter, school-name decal for his rear window, and an architecture decal to put above it. He also grabbed a few small decals and brought them home to the folks so that they could put them on the cars.

Ned is due to graduate in June and he can hardly wait. But for the moment, till he gets his diploma, he is keeping in shape and being exempt from the draft, won an all-expenses-paid trip to the United States. The contest was the winner being chosen at random from the group of students who entered. Ned dreams of being such places as the souvenir shops in Yosemite Park, Niagara Falls, the Grand Tetons...

Petition out to drop voter age

Mrs. Constance Brown, social science major, is interested in helping the younger generation, more specifically young people in the 18-year-old category. She is part of the INVOLVE movement to help 18-year-olds obtain the right to vote. As a registered voter, she will begin circulating a petition on Feb. 3. This petition cannot be circulated before that date to comply with ballot regulations.

The petition's purpose is to obtain enough signatures to ensure the addition of a new initiative amendment to the general election ballot in November.

There are about 1,000 people in San Luis Obispo that are not registered voters. Mrs. Brown believes that all 18-year-olds should be able to vote.

By that time, most patients would have recovered. For this reason the Health Center does not send any blood samples to Berkeley, Mounts said.

He describes influenza as a highly contagious, infectious virus disease characterised by a sudden onset of fever, prostration, aches and pains. Sometimes it is complicated by a secondary infection.

Dr. Mounts said an accurate diagnosis of flu would demand sending a sample of the patient's blood to the University of California at Berkeley for analysis.

"We need to know the virus is circulating," Mounts said about the epidemic.

Instead, the center makes a clinical diagnosis of the symptoms and tries to treat these. Dr. Mounts said that any doctor would diagnose the symptoms as the flu.

He also noted that they do not treat the patients for the flu, but for the symptoms of the flu. That is all they can do until the patient begins to feel better.

"I want to help kids change the world," explained Mrs. Brown. "I work with buttons and banners."

She was wearing two buttons. One had a peace symbol on it, and the other was from the peace movement in San Francisco.

"My husband and I are both part of the peace movement," stated Mrs. Brown. "We both feel it is important to help the youngsters get what they want.

Intersted students may write to INVOLVE, 1257 Market Street, San Francisco, 94101 for further information.

One of the reasons that Mounts gave for referring to it as an "epidemic" was the rise in the average number of patients of the center handles per week. The usual number is about 10, but during the epidemic the average has risen to 18.

Mounts added that the flu symptoms are showing up in the "out" patients as well as the "in" patients. He noted that as the epidemic continues, the cases get worse.

"There are flu shots, and there are flu shots," Mounts said about one of the measures that could be taken to prevent the disease. He explained that the shots provide adequate protection, but only for the specific strain for which they were prepared. They will not protect the person for any of the other strains, and Mounts said that the virus changes all the time.

New Home Ec head likes student attitude

Taking the reins as acting head of the Home Economics Department is Mrs. Eva Scully, small, slight woman with boundless enthusiasm about her new position. Mrs. Scully receives Mrs. Marie Pfeiffer, who will head the newly created Child Development Department.

"I think the atmosphere on this campus is so much better than on some of the other campuses on which I have taught," Mrs. Scully said. "And the attitude of the students makes it pleasant to work here.

"The majority of youth are great," she said. "We hear and read a great deal about the militant minority of young people, as well as seeing them on television."

"Not so much is said or written about the honest, dependable majority of the almost 30 million youths and young adults, and seldom are they many worthwhile activities shown on television."

Mrs. Scully taught English during the 1968-69 academic year as a substitute teacher in Kentucky, as well as a leave replacement. A graduate of the University of Kentucky with a bachelor's degree in home economics, she received her master's degree at Colorado State University.

Mrs. Scully believes that the understanding between adults and youth can be increased if adults would increase responsibility as youth are able to assume it, have open minds and listen to the youth, let them know that they are heard and include them in the planning and doing at home, in school and in the community.

Mrs. Scully's interest in youth stems from her many years of working with them. She was state supervisor of home economics for Arizona from 1941 until her retirement in 1968, as well as one-time national president of the American Vocational Association.

"Since my retirement I am going to different colleges where a teacher is needed because of sickness or sabatical leave," Mrs. Scully explained.

Mrs. Scully taught history during the 1968-69 academic year as a leave replacement, following a one-semester position at Berea College in Kentucky, also as a leave replacement. A graduate of the University of Kentucky with a bachelor's degree in home economics, she received her master's degree at Colorado State University.
Anti-pollution need

Environmental control and environmental rights have been topics of much concern to various people in this country for the past few years.

An Environmental Rights Day, set in Santa Barbara for Jan. 28, is only part of the action that is moving more and more people towards conservation of the natural resources and beauties of the world.

According to information from the January 28 Committee, "figures of national consequence will gather in Santa Barbara Jan. 28, one year to the black day after the great oil blowout, to work on a battle plan to fight against environmental blight."

At the center of the Santa Barbara movement is a "Declaration of Environmental Rights," written by Dr. Roderick Nash, an associate professor of history at the University of California, Santa Barbara.

The declaration refers to the nationally known Santa Barbara oil spillage, but it does not concentrate on that incident. It discusses pollution of all kinds, pollution that is spreading over the globe at an ever-increasing rate.

Stewart Udall, former Secretary of the Interior and Dr. Paul Ehrlich of Stanford University, along with other men in the field, will speak on the many types of pollution that affect us today.

The committee contacted several cities in the Santa Barbara area, seeking endorsements of the declaration. The city of Santa Barbara passed a resolution supporting the declaration, and the city of Santa Maria, although not supporting the declaration itself, passed a resolution in support of the Environmental Rights Day, according to Ed Zuchelli, Santa Maria city councilman.

According to Zuchelli some public bodies feel that the declaration is too severe and that "some areas (covered in the statement) are not the proper political field for city council or district involvement."

The State Assembly recently passed a bill sponsored by Don McGillivray (R-Santa Barbara) and Jess Unruh (D-Ingleswood). The legislation asked for cessation of drilling in Santa Barbara and Ventura counties and state control of the oil operations, Zuchelli added.

Neither the city nor the county of San Luis Obiapo have been contacted in regard to support of the declaration, according to the city clerk and the county administrator. However, City Clerk Jean Fitzpatrick said she thought the San Luis Obiapo City Council would be interested in supporting such a program.

President Richard Nixon will receive a faculty petition from this college, asking him to remove American troops and weapons from Vietnam.

Signed by nearly 100 faculty and students here, the petition affirms to Nixon:

"... That it is in the national interest of the United States for the president to announce and initiate a clearly stated, swiftly phased withdrawal of the American armed forces and weapons from Vietnam so that the Vietnamese themselves may make their own decisions about the future of Vietnam without foreign military interference and intervention."

Dr. Fred Rizzo, English instructor, draft counselor, advisor to Alternative magazine, says the petition—which he helped to author—received "very limited circulation" on the campus.

Rizzo says he began the petition because he wanted to show that people opposing the war included members of the establishment as well as young people outside of it.

Active in last fall's moratorium demonstrations here, Rizzo believes the alleged atrocities at My Lai have given new support to the peace movement.

My Lai, he says, shows that Americans are "just as capable of committing atrocities as people of any other nation, communist or otherwise."

"We've got to get rid of the simple-minded notion that whatever we do on the world scene is right, and whatever the communists do is wrong. Senator J. William Fulbright, in his book, The Arrogance of Power, saw the foolishness behind these stereotypes of the 'Free World' and communists, when he said:"

Letter to the Editor

'Strudel in his noodle'

Editor:

I am writing this rebuttal in response to an article in the Jan. 20 issue of the Mustang Daily by Gary Williams. It was entitled "Just Like Apple Pie."

I hope that you print my comments as I feel that they represent the feelings of quite a few of the more aware students at Cal Poly.

If you were near a TV Jan. 15 you shouldn't have been. Bob Hope presented his usual red white and blue Christmas show. He must eat so much apple pie that his brain has turned to apple butter and his stomach to apple sauce. I'm not against entertaining troops but what we need is more of the beautiful girls, war stories, service jokes, and political-geographical jokes when they are intrinsically funny and morally inferior. I felt that Hope's routine was out of context as far as the Christmas season was the reason for his visit. Gary Williams states in the Jan. 20 issue of the Mustang Daily said that Hope is a hero and the whole country should be an acclamation. This believes in Bob Hope. To me, Bob country does indeed believe in hope, but the hope of today is for not the inaudious lifestyle of yester-years, So admire Bob Hope if you want to and do love your country, but beware of the true American.

John Scoble
Baba Ram Dass set for campus talk

A M O N O

by MARY HURFF

A man who once turned on with LSD, but has since abandoned the drug scene in favor of Far Eastern mysticism to explore his inner consciousness, will give a talk here at 8 p.m. this Saturday in the Men's Gym.

The man is Baba Ram Dass, formerly Dr. Richard Alpert. His talk, "Journey into Consciousness," is an odyssey through a man who once turned on with LSD, but has since abandoned the Men's Gym. In an interview with "Playboy" magazine, which appears in the February issue, Ram Dass says he has given up pot and LSD not because he thinks they are bad, but because they do not fulfill spiritual needs. They can only serve as an intermediate step according to Ram Dass. He continues to say it was aids that allowed him to see that there are areas of the human mind that Western psychology has never realized. He believes the oriental myths offer a total exploration of the mind.

After Alpert received his doctorate in psychology from Stanford University in 1957, he taught until 1963 at Stanford, the University of California in Berkeley, and Harvard University. At Harvard, Alpert taught and researched the fields of human motivation, Freudian theories of early social development and clinical pathology.

In March of 1961 Alpert took psilocybin, a consciousness-altering chemical. He then joined Timothy Leary and others in research involving altered states of consciousness brought about through the use of psychodelic drugs such as LSD. Due to the controversial nature of their studies, Leary and Alpert left Harvard and set up the Castalia Foundation to study the mystic aspects of drug experience.

In 1967, Alpert started for India in search of men he said might retain the keys to enlightenment. After many months of searching, he found what he was looking for. He then settled at a tiny temple in the Himalayas for a winter of study. Upon his return to the U.S. as Baba Ram Dass, which means "servant of God," he committed himself to helping others find peace and meaning in life, according to an article in the April 21 issue of Newsweek magazine.

A question and answer period will follow the Saturday night talk by Baba Ram Dass. Tickets are 50 cents and may be purchased at the temporary College Union.

Discrimination group helps minority students on campus

Dr. J. Dan Lawson, director of student activities and acting dean of students, will chair the campus Committee on Discrimination for the remainder of the academic year. The committee was formed by the college to aid those persons of certain minority groups who feel they are being discriminated against on campus. In this way, the students, can air their complaints to the committee instead of taking action themselves and possibly causing campus trouble.

According to Lawson, the committee meets at the beginning of the year with the purpose of acquainting the new and old members, but does not have regular set meetings after that. When a discrimination case does arise, the committee is informed and proceeds to determine whether discrimination took place and if the college should take action.

Next quarter jump into the ocean engineering class

Revealing the limitless treasures of the ocean will be an area covered by Introduction to Ocean Engineering, an experimental class offered next quarter.

This class is primarily designed for majors in engineering, science, agriculture, and architecture, who will be needed in the future to tap the ocean's wealth. The course will be concerned with descriptions of the ocean environment, man's ability to operate in this environment and personnel problems. Also included in the course, will be studies on measurements, communications, materials, installations, vehicles, and equipment used in underwater exploration.

According to Dr. Charles Russell, assistant dean of engineering, in charge of the program, plans are underway to expand by next year. This program will be offered into several related classes.

The requirements for this class include the student be of sophomore or above standing, and has taken chemistry 121, Physics 113, and math 115. The course numbers is engineering 276 and is worth three units.

Math society sponsors speaker

Dr. Richard Tornheim, senior research associate in mathematics at Chevron Research Company, Richmond, California will address Math groups Friday, Jan. 30.

Tornheim will be speaking to two campus groups and will be available for student and faculty consultation from 2 p.m. to 4 p.m. in Room 115 of the Math building. His first talk, which is open to the public without charge, is entitled "Linear Programming," and is scheduled for 4:30 p.m. in Ag. Eng. 123.

Tornheim will address the annual banquet of the student chapter of Kappa Mu Epsilon, national mathematics honor society, at 6 p.m. in Cal Poly Staff Dining Hall. Attendance at this event will be by advance reservation only. Tickets at $2.75 each may be obtained by contacting Dr. Ray Warten in the Mathematics Department.

Dr. Tornheim received his B.S., M.S. and Ph. D. from the University of Chicago. He is in the Ballistics Research Laboratory of Aberdeen Proving Grounds and has taught at Princeton, Michigan and University of California, Berkeley.
John R. Healey, head of the Journalism Department here, has been named a recipient of the Excellence in Journalism Award by the California Newspaper Publishers Association (CNPA).

Awards are given annually by CNPA to one journalism instructor from a four-year college, one from a junior college and one from a high school.

Nominated by Dick Blankenburg of the Arroyo Grande Times-Press-Recorder, Healey's name was picked by a secret committee of nominations of CNPA.

A permanent plaque—will be awarded to him by Thomas R. Hemion, editor of the Tulare Advance Register, Hemion also is chairman of the CNPA newspaper personnel, retirement, education and scholastic committees. The award will be made at the CNPA luncheon Feb. 7.

Healey received his bachelor of arts degree from San Jose State College in 1941. He earned his master of science degree at University of California at Los Angeles.

Healey, who joined the faculty here in 1947 to teach agricultural journalism and handle sports information, was named head of the department in 1967.

Before joining the journalism faculty, he was employed as a reporter and editor on the staffs of the San Jose News, the Sacramento Union, and the Modesto Bee, and as a public information specialist at McClellan Field, Sacramento.

"I always wanted to be in journalism," Healey said. "In fact, I started as a part-time printer in high school." He was an editor of the San Jose State Spartan Daily.

In 1967 Healey was named Faculty Advisor of the Year. He was chosen as acting head of the Department was in the first floor of the Business Administration and Education Building, Monday morning, April 1, the students cleaned out the photo room, even taking the pins out of the door to make it look like a theft.

When I came in I said, 'My God! We've been cleaned out!' I was on the phone to Security when the students burst into my office shouting April fool!"
Test set for business master’s program

Thirty-five applications had been received as of Jan. 16 to fill the 32 candidate slots for the new Masters of Business Administration program at the University of Southern California. Applications will be reviewed and students will be informed of their acceptance by May 31. A detailed description of the program is contained in the document “MBA Proposal, 1970-71” on file in the Reference Room of the Diesel Memorial Library. Members of the Business Administration Department studied more than 50 masters programs in the United States before formulating the program for this college.

Civil Engineers

Get the hull truth

Fiberglass maintenance of hulls will be demonstrated at the meeting of the campus sailing club, Poly Corinthians, tomorrow night. The meeting, which will be held in Agriculture Shop 3, will begin at 7:30 p.m. instead of the usual 7. All interested students are invited to attend the meetings of the club which are held on the second and fourth Wednesdays of every month.

During the Fall Quarter, members of the club made a cruise to the Channel Islands. On Jan. 17, they traveled to Lopez Lake, and more outings are scheduled for this quarter.

Labor editor to speak

“Labor Problems on the Pacific Coast,” the scheduled topic for tomorrow evening’s speech by Los Angeles Times labor editor Harry Bernstein. The dinner speech is scheduled for 7:30 p.m. at the Madonna Inn.

The Mayor of the Minors, a campus musical group will entertain during the social hour preceding the meeting. Refreshments are $3.00 per person and may be obtained at the door or by returning the Dr. Overmyer of the Business Administration Department.

Sponsored by the Central Coast Chapter of the Industrial Relations Association, the speech will explain the state and future trends of labor versus management relations in collective bargaining. It is both the public and private sectors of the economy.

Your abilities and knowledge are important to Southern California Edison.

We need new ideas, new techniques and sound planning for projects necessary to serve the enormous electrical power requirements of Central and Southern California.

These projects will cost approximately $1 billion during the next three years. During this period we will build or participate with other utilities in the development and construction of approximately 3,300,000 kilowatts of generating capacity. That’s a lot of kilowatts — about one-third as much, in fact, as our total capacity now.

Some may say this is a “technical impossibility.” We don’t.

Just look at our record:

Two new units with a total capacity of 1,590,000 kilowatts are being completed at the Four Corners Generating Plant in New Mexico.

A new 500,000-volt A.C. transmission line from Four Corners to Southern California was completed early in 1969. Spanning 650 miles, it makes a mighty leap over the Colorado River.

The Mohave Generating Station in Clark County, Nevada will have two 700,000 kilowatt units. A 275-mile slurry pipeline will deliver coal fuel to the plant from Arizona.

Edison is also active in the advanced technologies of EHV transmission, both A.C. and D.C. We’re looking even further ahead to such direct conversion methods as fuel cells, thermionics, thermoelectrics and magneto-hydrodynamics.

It takes plenty of talent to make this kind of progress, but we have it — and we’re prepared to sharing it with you.

And we’re prepared to offer you the same opportunities we offer to anyone qualified who can meet our high standards of performance and integrity.

Your placement office has more information.

Or write: Lerold W. Blaskey, Personnel Administrator, Southern California Edison Co., P.O. Box 351, Los Angeles, California 90053. Or call collect: (213) 624-7111.

CAMPUS INTERVIEWS FEBRUARY 2, 1970

Southern California Edison
An equal opportunity employer
Instructors travel worldwide during leaves

Editors Note:
This is the second in a three-part series of articles on faculty sabbatical leaves by staff writer Nina Zacuto. Part three will appear in another issue of Mustang Daily.

Instructors will be on leave from their teaching duties during this year. Thirty-eight of the instructors will remain in various parts of the United States, while 15 will travel to foreign countries. The plans of the other seven could not be determined.

The School of Applied Science will have 33 instructors on leave throughout the year. They are—

- Biological sciences: John Applegarth taking an advanced quarter off in the spring for personal reasons.
- Chemistry: James Peters is on a sabbatical this year studying for his doctorate at the University of Kansas.
- R. L. Graves is on sabbatical this year in Denmark completing independent research on the development of industrial components for the building industry.
- Donald Kohberg is studying for his master’s this year at the University of Washington while on sabbatical.
- Ralph Vrana will take a research leave this spring to work on a geological survey and analysis of the San Luis Obispo area.
- Psychology: William Cruickshank will also be on leave in the spring taking a sabbatical to travel through California and England studying group psychology and group therapy at various behavioral science institutes.
- Social sciences: Charles Oldham will study for his doctorate in political science this spring at Washington University while on a leave without pay.
- Michael O’Leary is on sabbatical in Ireland this year studying sociology.
- Joseph Weatherby is taking a research leave in the spring to do post-doctoral research in Russia.
- The School of Architecture will have the least amount of absent instructors with four on leave this year.

Part III—Schools of Applied Science, Engineering and Agriculture.

When are they going to legalize Pot?

A lot of people these days are going around saying it’s only a matter of months until Acanulco Gold is available over the counter in menthol and long-nose lengths.
Which is an indication of how little people know about marijuana. The real fact of the matter is that marijuana is a drug. Like all drugs, it affects the human body and the human brain. Like all drugs, it has side effects.

Today, research scientists are studying marijuana’s effects on the brain, the nervous system, and on various organs of the body. They’re trying to find out why different people have different reactions to it.

They’re studying its effects after one or two cigarettes, and they’re trying to find out what happens with long term use.

Maybe it will turn out that there’s no reason for it to be illegal. But nobody can be sure until all the facts are in. And until they all are, it’s a pretty bum risk.

For more facts about drugs, write for free drug booklets to National Institute of Mental Health.

James Olsen is studying for his master’s degree this year while on leave without pay at Pennsylvania State University.

Gary's Column

We own the Valley

by GARY WILLIAMS
Sports Writer

Before I start into my article I should say we not only are the champions on the central coast, we now own the San Joaquin valley for whatever it may be worth. We not only humiliated the Fresno State basset hounds, we made their basketball team look more like basset hounds.

Lew Jackson was described in my early article as poised and determined, he is also a fantastic basketball player. Jackson was in the game two minutes and he scored, stole the ball and scored, and then scored again from the field. Floyd Quartman was so quick he left Fresno looking between their legs, which left them looking ridiculous.

Something should be said about the half-time show. Fresno would have stood a better chance in the Mini league half-time basketball game, which included ages six to ten. One Fresno player fell and couldn't, not even for an earthquake, get up again. But, that's okay, Fresno was pretty shook when Jackson started proving his superiority. Jackson scored 13 of the 78 total points which ended Fresno's vacation in the lovely city of San Luis Obispo.

This is not only a feather in Coach Neale Stoner's hat, it's a new helmet. But as the saying goes, "those who laugh last laugh best." We are not only laughing now, but we are laughing very loud at the Fresno basset hounds. We have the bell, and we plan to keep it. Not only does Fresno have to run the 78 total points which ended Fresno's vacation in the lovely city of San Luis Obispo.

Not only does Fresno have to run the 78 total points which ended Fresno's vacation in the lovely city of San Luis Obispo.

The Mens Gym was the scene of the Cal Poly High School Invitational Wrestling Tournament all day Saturday.

Some 30 schools and 300 participants spent the day on this campus vying for individual and team honors.

First place team honors went to Madera High School as they racked up 149 points. Second place went to Miramonte High School of Orinda. Third and fourth place honors went to two schools from Salinas. Third place was captured by Salinas High School and fourth place by Alisal High School.

Second, third and fourth place teams scored 96, 61 and 57 points respectively.

Carrying away the outstanding wrestler award was little Alex Hernandez of Corcoran High School. He was the champion in the 101 pound class.

Mustangs beat another state wrestling squad

by TERRY CONNER
Sports Editor

When any California college dares to invade upon the wrestling mat of the Mustangs, or any of these colleges are sensible enough to invite the Mustangs to their own mat, they are sure to come out a winner, but wiser wrestling team.

The Mustangs have not lost to a California collegiate wrestling team in 60 encounters with Mustang wrestling teams. It is the feeling of the Mustang Daily Sports Staff that any California team able to beat the Mustangs will most definitely have to have a full staff of angels on their team.

Last Thursday evening, an unexpected Chico Wildcat team stumbled into the Mesa Gym and left as a statistic. They, the Wildcats, as Coach Vaughn Hitchcock expresses it, "are improved from years past, but they are less experienced and younger."

The score did not indicate the true story of the match. The Mustangs handled won 3-3, but faltered in the usually strong 118 pound class. The Wildcat won the opener as Armand Brett of Chico decisioned Guy Greene 5-4. It was a victory in itself as it was the first time in quite awhile that a Mustang team had been behind a California team.

But it wasn't long before the horses started kicking the Wildcat. Terry Hall of Poly showed Dave Tamori of Chico what wrestling is all about as the bout score ended at 16-4. The Mustangs added six more team points as their heavy weight wrestler, Doug Desrelayer defeated Hank Drabin 7-1.

Hitchcock summed the event, "Chico State is a good example of what is happening to California wrestling schools. This state is definitely turning out better wrestlers than ever before and I think Chico gave us some good competition."

The Mustangs won the next four bouts without hardly rapping a muscle. At 138 Allyn Cooke decisioned Bruce Cameron of hico 6-0, in the 167 pound class John Finch shotted Joe Hall of Chico 9-0, decisioned Bruce Cameron of Chico 9-6, then in the 175 pound class John Finch shotted Joe Hall of Chico 9-0.

In the 177 pound class the famous gum-chewing pinner Rick Arnol decisioned another opponent in 6 minutes and 22 seconds. The next home match is on January 38. I urge everyone to go see the way Rick masters his gum and opponent. It's fantastic.

Chico State added 3 more team points in the match as their heavyweight wrestler, Doug Desrelayer defeated Hank Drabin 7-1.

Chico State added 3 more team points in the match as their heavyweight wrestler, Doug Desrelayer defeated Hank Drabin 7-1.

Another encouraging thing is that we are getting good play from Chico and Cal Poly. We are getting good play from everyone right down the line."

"Another encouraging thing is that we are getting good play from our guards again. All drew the same. About two weeks ago I was in a bit of a slump."

Next week the wrestling room league action against Cal Fullerton will be on Friday night, then travel to the University of California Irvine for a conference battle, Saturday night.

With Saturdays victory under their belt, the Mustangs now stands at 10 wins and 6 losses.

Mustangs visit
at Fresno-Pacific

The Mustang basketball team made it a clean sweep weekend and stretched their once old winning streak to two games by topping all over Fresno Pacific Saturday 75-63.

It was no contest from the beginning and at halftime Neale Stoners troops led the field 36-26. As a matter of the Mustang shareleaders lost 20 points throughout most of the game.

In the second half Stoner in the Green Machine, as he refers to his reserves, play the rest of the game.

Asked how it felt to win this weekend Stoner replied with chuckle, "It's always nice to win...We played real well, it seems to be getting momentum going. We're real good together as a team. We're offensively and defensively as were getting good play but everyone right down the line."

Next week the Mustangs room league action against Cal Fullerton will be on Friday night, then travel to the University of California Irvine for a conference battle, Saturday night.

With Saturdays victory under their belt, the Mustangs now stands at 10 wins and 6 losses.

Gauchos hand Mustangs first loss in swim meet

The Mustang swimmers, coached by Richard Anderson, dropped a 64-49 decision to the University of California at Santa Barbara Gauchos here Saturday morning.

Though the Mustangs lost as a team, there were some individual victories won and records set along the way. In the 50 yard freestyle, DeGrasse set a new school record of 22.2 seconds. In the 100 yard Individual medley, Brown set another school record by swimming the distance in 2:05.5. The Mustang 400 yd. freestyle relay team combination of DeGrasse, VWR and FOREIGN CAR

BRAKES

- Rebuild your wheel cylinders
- Turn drums and arc linings
- Use waterproof linings and ventilated rivets for cooler and longer lasting brakes
