Trustees approve bond; student group disbands

The Trustees of the California State Colleges approved the issuance of a $3 million bond at a meeting in the state capital Wednesday, according to Dick Barrett, All vice-president. The bond will be issued under a loan agreement executed in 1967 with the Department of Housing and Urban Development. The California State College Student President’s Association (CSCSPA) officially dissolved as an organization at the Wednesday meeting, but according to Barrett, each president will continue to attend the Trustees meetings and present his campus’s views on an individual basis.

The Trustees made no decision on the question of mandatory fees but did establish a task force to study the concept of removing athletics and instructionally related activities from student fees and finding other ways to support them from the services and materials fees. Barrett seems to think that the changeover would result in more money for other activities.

The Trustees affirmed an interest in the year 'round quarter system so there is still a possibility that Summer Quarter will not be thrown out entirely. According to Barrett, Cal State Los Angeles made a study that indicates that a year 'round system saves money.

Although this campus was informed last month of the raise in application fees, the Trustees made it official that the fees will be raised from their present level from $10 to $20.

Foreign student fees have been raised from $235 to $350 per year for the 1970-71 school year. After the period of one year Chancellor Glen Dumke was asked to check if the effects of the minimum tuition and then recommend a raise or reduction of the fees for the following year, he said.

The Trustees also decided that they will resume holding meetings on various State College campuses, he said.

They reaffirmed a policy as to the need and value of married student housing on the State College campuses and asked the Chancellor to proceed with plans and present the development at a future meeting, Barrett added.

He also indicated that he approved several ideas concerning this college’s Economic Opportunity Program when speaking with representatives of colleges that have similar programs.

SAC adopts resolution concerning fraternities

by Ken Hyland

A resolution—which some Student Affairs Council members say is a demand for immediate action by Pres. Robert Kennedy—on the issue of recognizing college fraternities and sororities was unanimously adopted by SAC Tuesday night.

The resolution was brought to the council by Pam Billington, for the Delta Chi Omega Sorority. It involves the college policy of not recognizing any of the Greek organizations.

Although this campus was informed last month of the raise in application fees, the Trustees made it official that the fees will be raised from their present level from $10 to $20.

Foreign student fees have been raised from $235 to $350 per year for the 1970-71 school year. After the period of one year Chancellor Glen Dumke was asked to check if the effects of the minimum tuition and then recommend a raise or reduction of the fees for the following year, he said.

The Trustees also decided that they will resume holding meetings on various State College campuses, he said.

He also indicated that he approved several ideas concerning this college’s Economic Opportunity Program when speaking with representatives of colleges that have similar programs.

Dean cites opportunity

The great opportunity of summer sessions is that you can complete a full quarter—academic work in four weeks," said Don M. Morris. Morris is Associate Dean of Continuing Education, which includes coordinating the summer sessions. "There will be 127 courses and 14 workshops, offered during the two summer sessions," said Morris. "The main concentration of these is planned for education, mathematics, physical education, English and French. Other departments of the college will be offering additional curriculum." The first session is scheduled for June 21—July 17, while the second session will run from July 20—Aug. 14. Sessions are open to any college student and will cost $18 per quarter unit. The maximum load is 12 units for the summer. However, with special permission from the student’s department head, a student can take 14 units. Morris went on to explain that within each session there are three different terms offered. A term is an even more concentrated study period. Some departments offer these terms in periods of one, two or four weeks. However, the most a student can take in a week term is one and one half units, or six units per four week session. A complete listing of courses and instructors is scheduled to be released during the Spring Quarter.
Make up your mind

There has been much talk lately about Governor Ronald Reagan's proposed tuition plans for the University of California and—by inference—the California State Colleges. Although nothing definite has been decided, people seem to be convinced that a bill supporting tuition of some kind will pass the Legislature and be signed into law by Reagan.

AB1 Pres. Paul Kresge has come out in opposition to tuition of any kind. According to him, "tuition would reduce the number of qualified students who desire to go to college. It would place a greater burden on the students and wouldn't increase revenue for State Colleges."

True, tuition would place a greater burden on the students who desire to get into the State College system, but California is one of the few places where a student can get a relatively inexpensive college education.

It is also true that tuition would not increase the revenue to the State Colleges but it is not designed to do that.

Many students are already paying for their own education and an additional charge could possibly hurt them. However, one of the tuition proposals was based on a dollar income per year. Students making under a certain amount would pay no tuition at all. Married students would need an even higher income to come up to the range where tuition starts.

There is also a learn-pay-later plan for tuition. Such a plan would enable students to go to school and pay the same registration fees they are paying now. Then, when they graduate, they would be required to pay a certain amount against the college education they have already received.

The basic idea behind the tuition issue is that the burden for education should be on the persons who directly benefit from that education.

Think about it. Realize that tuition will mean a larger money expenditure, but decide for yourself if it is worth it. Is a college education, at any cost, worth your time and money?

God's love calls Xitian to work

by JOHN FITZRANDOLPH
Staff Writer

Dunstan, the young Xitian farmer, had earned his land through vigorous cooperation with his father. Now he worked in absolute solitude.

He strained against the silent forces of his titan land, his strong body was but a brown speck in a world of heat, space and clay.

It was God's love, God's handiwork, God's generosity that called Dunstan to the special stretch of clay each morning. His field was made only by the darkness of tilled earth. Dunstan's full hands pushed the plow because his pony was not strong enough to do all the pulling.

Dunstan walked in his field, unbent beneath the heat of God's Spring sun. When the earth had absorbed its limit of sun, it sent reciprocal patterns of heat back to the Creator.

His young legs muscled tirelessly through the down and up patterns of God's heat, his calves, naked feet impervious to the sting of the clay.

Two clouds, which had arched upward together throughout the torrid afternoon, joined ultimately as hands above a victor's head.

Dunstan did not understand victory or ultimate but he stopped his pony with a hard tug on the reins and laid his wooden plow aside. He walked a few paces, planted his feet in the hot clay and looked up at the fused clouds. Soon, he was thinking, the towering white clouds will change to gold, then to rust, then to pale gold, and finally blackness will cover the clouds.

God will bring rain to his land in time to plant, he told himself. God will make Dunstan worthy of his own sweat. God will make Dunstan worthy of his pony's nostril froth.

Dunstan's life was like his father's life and the lives of Xitian fathers from many generations hence. He must plow, plant, cultivate and harvest.

God was good to him, he was thinking, as he stood in his sanguine soil—which looked like all soil for thousands of miles, except for the darker color churned by his little plow.

The clouds were now fully fused and the sun was creeping into the haze caused by the crossing of heat waves from sky to earth and back again. The evening wind loosened his long black hair from its matted posture on the sweat of his shoulders.

With bare back dust-blown by the wind, Dunstan unhitched the plow from his pony's ropes and started back to his little home. It was an hour's walk; the young Xitian stepped as briskly as he had earlier in the day when he came to the field to plow.

The clouds were now fully fused and the sun was creeping into the haze caused by the crossing of heat waves from sky to earth and back again. The evening wind loosened his long black hair from its matted posture on the sweat of his shoulders.

With bare back dust-blown by the wind, Dunstan unhitched the plow from his pony's ropes and started back to his little home. It was an hour's walk; the young Xitian stepped as briskly as he had earlier in the day when he came to the field to plow.

Night was all around him now. Thoughts of his past and his father filled him with kind visions of the God has always cared for the Xitian, he believed. God has always provided the strength and the one to keep the Xitian alive.

When he reached his little day house he started a fire and booths God for food to eat.

High overhead, the giant stars moved eastward. Far above the cloud, gliding westward, a large airplane—like a colossal, silver, stiff-winged eagle—blissful colored lights that Dunstan could not see.

Dunstan did not know the airplane was heading for America with a cargo of moon rocks at Spira Agnew.

(Next week, read part two of this story, as: the big airplane lands down on Dunstan's land.)

Graduate seminars discuss pollution

The Biological Science Department has announced its Graduate Seminar schedule for the Winter Quarter. According to Dr. Aryan Haddad, seminar coordinator, the group meets each Thursday evening at 7:30 p.m. in Science North 206 and 208 and visitors are welcome.

On Feb. 3, Keith Andrews will discuss "Pollution of Water by Human Waste," and Ramona Marques will speak about "Industrial Pollution of Water."

"Air Pollution" and "Soil Pollution" will be the topics on Feb. 10, led by Brent Lathrop and Kay Ketcham, respectively.

Feb. 17 Jane Dei will present "Pollution of the Ocean," and Robert Tannen's subject is "Radioactive Pollution."

"Sound Pollution," led by Justin Marquez, will be held on the March 3 seminar meeting and will be led by Robert Haines.

His topic: "Positive Values of Westerns."

Journalism organization proposes new objectives

Ken Hyland, president of the campus chapter of Sigma Delta Chi, has outlined the chapter's proposed objectives for the remainder of the academic year.

The professional journalistic society's plans include sponsoring a Poly Royal Queen candidate, making a film to be shown at Poly Royal on how a newspaper is put together, the formation of an internship bureau to help journalism students locate jobs to fulfill their internship requirements and inviting Hank Reiger, news correspondent with Bob Hope's Overseas Tour, to speak on campus.

Seniors plan activities

Seniors are invited to the next meeting of the Senior Week Committee at 7:30 p.m. on Monday, Feb. 10, in Room 109, Science North. The committee is led by Don Neel, Neel is publicity chairman for the committee.

He says that more seniors are needed for all committees and planning senior activities including barbecue, gift ideas, tree planting, a barbecue, brunch and ball.

From Special 26 meeting report the election of new officers and chairmen. Senior Week Committee Chairman is Don Blase and Vice-chairman is Alan Fisher. Secretary and treasurer are Mary Cansier and Mike Philips, respectively.

We Develop

Our Own Managers

at Continental Can

Continental Can has 19 decentralized divisions. Our packaging product line is the most diversified in the world. At present our sales are $1.7 billion with business changing and broadening at an unprecedented rate.

This is Big business, yes. But don't let that worry you. Our decentralization and Management Development Program keeps you in the spotlight. As a key member of a small management team, you will be promoted on merit, not by seniority.

CAMPUS INTERVIEWS

Our recruiter can tell you how you can help make things happen as a professional manager in one of the following career areas:

- Accounting
- Electrical Engineering
- General Engineering
- Industrial Engineering
- Industrial Relations
- Industrial Sales
- Marketing
- Mechanical Engineering
- Printing
- Production Planning
- Quality Control

See the placement office now for more information and sign up. If an interview is not convenient for you this time, please mail your letter of application to Mr. Jack Crawford, Supervisor of Management Development, Continental Can Company, 235 Montgomery Street, San Francisco, California 94104.

We start with an accelerated Management Development Program. It is tailored to the individual but at the same time gives a solid foundation in Materials, Machines and Methods of the Container Industry. Our goal is a six to eight month program using combinations of classroom and individual special assignments which will prepare you for your initial managerial responsibility. Your development continues throughout your entire career.

Can Company, New York, New York
An Equal Opportunity Employer
If you happen to pass Springfield Baptist Church some Saturday morning between 10 a.m. and noon you will hear the shouts of happy children and smell fresh eggs and sausage cooking. The People’s Breakfast Program is underway for another weekend.

The People’s Breakfast Program is under the direction of Darryl Bandy, a senior social science major. Members of the program are a loosely knit group of students, teachers, housewives and working men who have decided to do something more than talk about service to the community.

According to Bandy, “The idea for the People’s Breakfast Program first started in July 1990, when Father Moore, formerly the priest at Newman Center, suggested such a program to the Free University. The Free U selected not to adopt the program. So myself, Steve Schulte, another Poly student, and Mrs. Maxine Lewis, aide to the Grass Row Society in San Luis, began setting up the program ourselves.”

Most of last summer was spent formulating plans for the People’s Breakfast Program and securing the support of the local business community. The program was opened during the first week of school in September at the parish house of St. Stephen’s Episcopal Church.

The fact that there is poverty and wretchedness in this apparent thriving community comes as a shock to some people. With the campus located on the northern side of town, not many students have any reason to venture further south than the central business district. As San Luis has grown up, it has grown away from its original beginnings, leaving the rundown buildings and ramshackle town to the poverty-stricken.

The Hawthorne district, or East Side as it is known, exists out of poverty next to the most affluent and largely uncrowded suburban San Luis Obispo. “Most of the housing is substandard and a poor repair,” says Bandy, “the area is liberally spaced with vacant lots accumulating junk. And aside from two small community parks, this is where the children must play.

“When we first began the Breakfast Program we had to go out and talk to the people, let them know about the project. In one town, relates Bandy, “we found a woman supporting nine children. She lived in a tiny two bedroom house what she can earn with part-time jobs and welfare checks.

“It’s not uncommon to find housewives living in a three and a half room apartment, supporting three or five children on welfare,” says Bandy. “Mrs. Maxine Lewis has raised 13 kids, not all of them her own. She lives in a place with no one bedroom.”

The idea of the Breakfast Program is to take some of the pressure off the parents and make things a little easier for the children. “Basically we try to give the kids one really substantial breakfast a week, anyway,” Bandy said. “We try to give them as much of our time as possible.

Along with the excellent breakfast (usually eggs, sausage, toast, fresh rolls, donuts, milk and orange juice) the People’s Breakfast Program provides entertainment and recreation for the children during the day.

According to Donna Peterson, a sophomore at Cuesta College and Program kitchen assistant, “

Sunday Coffeehouse

Do you study hard all weekend and feel you can’t face studying one more second by the time Sunday evening rolls around? Whether you study or not, the Special Events Committee has the solution to the Study Sunday Slump, the Coffeehouse.

The first and third Sunday of every month, the Coffeehouse provides an atmosphere to relax, unwind, drink some hot apple cider and listen to student singing groups perform.

This Sunday, the Coffeehouse welcomes back Nooky Boone, a folk singing group from Tenaya Hall. Last weekend, Rich Fessler and Gary Giovette placed fifth in a “Battle of the Bands” at Chabot College in the Bay Area.

Glen Cook, first introduced at the Coffeehouse, will take time from his present employment at the New College in the Bay Area.

Gowgani cites an example. “Herbicide injections, such as Ineictolodes and herbicides, in relation to pollution of the air is a problem that is residues. He said research has been done on herbicide 245T to injure caused to the tested animals. Gowgani said that another big problem is residues. He said the solution to this problem is for farmers to grow crops that will not be affected by certain residues, and to use herbicides at the stated application rates. Gowgani thinks herbicides will be attacked next. He said research has been done on herbicide 245T to show that there has been some injury caused to the tested animals.

“We, as people interested in agricultural chemicals, should contact and talk to people that don’t know about chemicals and feel the only answer to pollution is to ban them. The United States uses more chemicals than any other country; disease rates are lower; life expectancy is higher; there are fewer farmers actually farming; and we still grow the food-stuffs cheaper. We would not be able to produce food at the same price and quantity if it were not for the use of chemicals,” he concluded.

“We, as people interested in agricultural chemicals, should contact and talk to people that don’t know about chemicals and feel the only answer to pollution is to ban them. The United States uses more chemicals than any other country; disease rates are lower; life expectancy is higher; there are fewer farmers actually farming; and we still grow the food-stuffs cheaper. We would not be able to produce food at the same price and quantity if it were not for the use of chemicals,” he concluded.

Alternative

Turkey war tool defended

“I think that there has been an unjustifiable attack on chemicals, such as insecticides and herbicides, in relation to pollution of the air. More pollution is caused by autos, industry, and their by-products,” said George Gowgani, a weed control instructor in the Crops Department.

Gowgani, newly elected chairman of the Collegiate Participation Committee, along with Howard Rhodes, newly elected secretary of the conference, have just returned from the 22nd annual weed conference at Anaheim, Calif. This marked the first time any state college people have been elected officers, explained Gowgani.

“The purpose of the conference was to talk about the problems of weed control in California, to explain new developments in techniques and equipment, and to inform those interested in weed control,” said Gowgani.

Gowgani thinks herbicides will be attacked next. He said research has been done on herbicide 245T to show that there has been some injury caused to the tested animals.

Gowgani said that another big problem is residues. He said the solution to this problem is for farmers to grow crops that will not be affected by certain residues, and to use herbicides at the stated application rates.

 principals.

Student W-2 forms showing student employee’s 1987 wages and taxes withheld will be available in the Payroll Service Office, Administration B Building, noon today. According to Art Brown, payroll services director, forms which have not been picked up this noon today will be mailed to address the student listed on job application.
Coach with a good habit

Despite a continual busy schedule, Coach Vaughan Hitchcock is a man who finds time to keep in touch personally. He feels this personal contact is necessary if a coach is to fully identify with his athletes. So successful is he with this method of coaching, he was selected as Year of the Year in wrestling.

"Students don't believe in coaching personally, and I feel it helps me better understand their problems," said Hitchcock. "Only with this full understanding do I feel I can add value to my coaching." This habit of finding time for individuals may be the reason he has teams that have established such phenomenal fame. Now in his eighth season of coaching at this college, Hitchcock established himself as one of the outstanding young coaches in the nation.

Last season he coached the Mustangs to a fourth place national title. It was the third such title in the past four years. Recently, he had this to say: "I feel it important to know my athletes. To do this, I have to be in contact with them. "Wrestlers are very dedicated type of individuals." He is in contact with them. "They must train hard if they are to be successful against the opponents. One year out on the mat, they're on their own."

When asked if he himself had a favorite coach he respects, he was quick to answer, "William Tomaras." Tomaras was his wrestling coach at Washington State University.

Hitchcock says, "He was a man whom I strongly interested in coaching. He took a personal interest in everyone under him. Even my college college days of competition, he kept a close relationship. We corresponded regularly."

Hitchcock believes in working with athletes. "The engine is the coaching attitude. Once they're out on the mat, they're on their own." Hitchcock believes in conditioning for peaks. It's important for a coach to know when to let the athletes go and when to push them. We try to hit two peaks of performance during the early and midseason. We then strive for a top peak at the climax of the year for the conference and national titles."

"Select a top rich program to participate in," is his advice to students hoping to enter a coaching career. Being a member of a fine team is a tremendous benefit to a future coach. True, not all coaches have previous experience in athletic competition, but it certainly is an advantage to them. Coaches who have not had experience in actual competition often feel inadequately.

In closing, before he had to talk with writers and photo reporters from Sports Illustrated, he said, "We're proud to be an all-California team. We have very little recruiting funds, therefore, we recruit only in the state."

Sign up now for the weight lifting meet

Weight lifters come forward and let your muscles be shown! The intramural weight lifting, hosted Feb. 7, in the men's gym. Sign up sheets and entry blanks are available in the intramural office. Awards will be presented to the winners of the seven different weight classes. A special award will be presented to the most outstanding individual weight lifter.

Basketballs top list

Los Angeles (UP)-Low Alienor, Don Hennon, Charles Nash and Chester Walker were named to the Helms Athletic Foundation's College Basketball Hall of Fame.

Fiesta des frijoles

The Chris Jasperses Memorial Society for Handicapped Children will hold its annual Bean Dinner, Monday, Feb. 3, at the Chris Jasper School. Awards will be presented to the outstanding individual weight lifter.

Basketball goes south

This weekend will find the Mustang basketball team traveling to Orange County for a pair of games against Cal State Fullerton and the University of California, Irvine. Friday night's contest will be a home coming for head coach Neale Stoner, who graduated from Cal State Fullerton in 1962. In fact, Stoner at one time played for Alex Ormahi, who currently coaches the Fullerton team.

The Titans attack is spearheaded by 6-1 guard Tony Rodrigues who is averaging 13 points a game. On Saturday night, Stoner's troops will need a superb effort to stave off the offensive push of the University of California, Irvine. The S-J. Cunningham has scored 1,326 points in his three-year career and is currently averaging 19.8 points a game. Babies is close behind with a 18.9 norm. It is clear the Mustangs will have their hands full.

On the other hand the Mustangs have three people in full time.
This campus tops teams

Have you ever thought about how successful the Athletic Department at this college is? I'll tell you just how good our teams and their coaches are.

In football this year, the Mustangs beat a favored Fresno State team 21-17. The football team just how good our teams and their coaches are at this college is? I'll tell you just how good our teams and their coaches are.

The basketball team, lead by Dirk Stone and Dennis D'Autremont, holds a 16-4 record. The two loses were to Fresno Pacific then. Coach Neale for the outdoor season. With the conclusion of the indoor season Feb. 13, the team is looking forward to a better performance. The schedule runs into such schools at USC, UCLA, Stanford, and small college national champion Chapman. The entire schedule is that tough. Coach Neale is very confident of his team's future. They have the strong athletic program, of which our teams and coaches have every reason to be proud.

Can Colts win again?

Will the bubble burst? The Colts have successfully engaged a six game winning streak of ten games, but will the streak continue against Cal State Fullerton, Friday, and the University of California, Irvine on Saturday? Coach Garrido said his freshmen played excellent ausrfills basketball to continue their winning ways. The Colts are one of the best freshman teams in the school's history. For the two games this weekend, which Wheeler believes to be crucial, the team will be without the services of INF John D'Auria, who is looking forward to a better season next fall.

The track team, defending national champions, is preparing for the outdoor season. With the conclusion of the indoor season Feb. 13, the team is looking forward to a better season next fall.

The track team, defending national champions, is preparing for the outdoor season. With the conclusion of the indoor season Feb. 13, the team is looking forward to a better season next fall.

The baseball team is the strongest in the school's history. Coach Augie Garrido is confident of his team's success. Coach Garrido said his freshmen played excellent ausrfills basketball to continue their winning ways. The Colts are one of the best freshman teams in the school's history.

For the two games this weekend, which Wheeler believes to be crucial, the team will be without the services of INF John D'Auria, who is looking forward to a better season next fall.

Garrido's hopes

When Augie Garrido talks about his team, he's not talking about the National League all-star team. No, his team is the best in the school's history. We are successful. We do have a strong athletic program, of which our teams and coaches have every reason to be proud.
