Flower shop blooms

Quaint little flower shops line the streets of Paris. But when you stroll along a strip of bumpy road on campus which is lined with cows and horses and see a flower shop. This is unusual.

The Ornamental Horticulture Flower Shop is operated by the faculty of Floral Design and Horticulture students in types of western floral designs.

It is a learning experience for the students and gives them insight about the cost, operation and cost of an actual business.

Campus prices on plants are a little lower than city prices due to the risk of having a student comply a job. Yet each student is carefully guided.

The A.I.P.D. student chapter hires a manager and other members are asked to volunteer time to keep the shop in order. The members are asked to donate two hours of their time a week, since there are 16 members in this particular chapter; the shop is well cared for and well supervised.

Most of the plants are supplied to the shop by students. The students in turn receive funds for the maintenance of the flowers from the Student Enterprises, a foundation on campus. Some flowers are purchased from San Francisco and Los Angeles.

When the flowers are sold the money is given to the school to pay for supplies for the classes as well as to provide extra funds for the school.

The 35 students of the shop will be working in the shop. Seasonal flowers provide the shop with the most selection.

Carnation prices begin at $2, depending on the type and number of flowers used. Buyers may either call in their order or come in and wait for it to be made.

Rose prices start at $8 a dozen. There is an extra charge for special wrappings.

Since this is the first year that the shop has been in existence, a large dried flower campaign was staged for the grand opening. Most of the dried arrangements have been sold but others will be created throughout the year.

"Last year at the Spring fair the school raised $5,000 in two days," said Bob Gordon, the floral design instructor.

Gordon also stated that anyone connected with the school may hire the Ornamental Horticulture Flower Shop to decorate for any special occasion.

Last year the A.I.P.D. was hired by a company to decorate a float. The money was then used to sponsor a trip for the club members.

At Christmastime the chapter sponsors a decoration project. Door swags, pine cone arrangements and "do-it-yourself" kits are featured. They will also have a large selection of poinsettias.

The Ornamental Horticulture Flower Shop is open from 1-5 p.m. Monday through Friday and from 9 to 4 on Saturday. It is located on campus walkway opposite the Horse Unit.

The Ad Hoc Registration Committee will recommend to President Kennedy that there be no change in the present registration procedure for the Fall Quarter if it was reported to the Student Affairs Council Tuesday night.

Tony Turkovich, who represented the committee before SAC, said that there were several basic reasons why the committee had decided to counsel the President against changing the registration procedure at this time.

"Pre-registration for fall will require students already attending to pay fees twice during the Spring Quarter," Turkovich said.

"Also," continued Turkovich, "students would not have a chance to register for Summer Quarter before registering for fall, and in some cases scholarship money would not be available."

Turkovich stated, however, that the committee would continue to look into ways to better the registration system and not abandon the search for an alternative to registration as it presently exists.

SAC postponed consideration of code changes concerning the Student Judiciary until after the matter had been brought before the A.H.O. Committee on Monday.

Government Review

Dick Barrett, SAC chairman, said that the subject may not come before the Government Committee until the end of the academic year and that the code changes were scheduled for consideration at Tuesday's meeting.

Members of SAC criticised what they considered over formalisation of the student court and questioned its role in student government.

Rob Timone, advisor to the Student Judiciary, replied to the questions by saying that the organisation is still in a developmental stage and that it was moving away from formalisation.

"Student Judiciary is evolving into an organisational sensitive to the student," Timone said, "We are moving from a penal court to a role as a hearing board."

Ronald Pederson, Chief Justice of the student court, defended the addition of a provost to the court as necessary to help students called before the court and defending themselves.

Pederson also denied the charge that the Student Judiciary was a "fall guy" for the Dean of Students, which had been brought up by a SAC representative.

Marat de Sade reveals society's imprisonment

Every play has a setting that presents reality—a display in which a true-to-life scene is constructed by the stagecraft crew. Not so with Marat de Sade, the winter play to be presented by the Drama Department on Feb. 12, 13, 14, 20 and 21.

This season the technical crew is faced with a different kind of problem. With lumber and canvas they must build an impression, a feeling rather than a scene. According to Robert Knowles, technical director for the play, the stagecraft and technical crew are creators in their own right.

This class, under the direction of Murray Smith of the Speech Department, is busy constructing a bath house of the Charenton asylum. As part of some of the most unique technical layouts within the Drama Department.

The use of prison bars surrounding the entire platform lends a feeling of great confinement to the scene while keeping in the bounds of stark reality. Another technical first for this play is the "real" projection. Pillars of such sign as dripping blood will add to the macabre flavor of the play.

Smith, who plays the lead role as Marat de Sade, describes the feeling of the play in one word, "Stark." "The most difficult problem with this play was to translate the abstract idea to something you can build and put on canvas," said Smith. "It is a real shock in terms of effect."

Marat de Sade is more than a play. It is an experience in total theater. Admission is $1 for students and $1.50 general. Curtain time is 8:30 p.m.
Skiling’s where the action is; get ready to make scene

by DALE KERN
Staff Writer

When the winter white falls, so do the grades of the skiing student, unless, of course, the student is prepared to stay in week days.

Skiling is one of the most popular sports with college students these days. Our campus people are no exception.

Several items of apparel are needed to achieve the desired effect and image. The following list will suffice, but really, how very effective are they. The following list may be enjoyed, unless, of course, the student is not interested.

When buying a ski sweater, it is necessary to buy one that matches your pants and parka. Skiing is a definite part of the ski scene when it becomes necessary to take it off. If you have nothing else to put on your after-ski boots. Some ski poles and skis.

After-ski boots are also functional when crawling from pub to pub. Now that we’ve covered all the most important items on the skiers’ list; ski poles and ski boots.

Ski boots have the reputation of being uncomfortable to the skier who is new to skiing. They will hopefully give the ski patrol something else to cut away when you break your ankle.

Skis are the most important item. You can never spend too much on your skis. Get the most expensive ones you can find. Be sure to have your named stamped on them. This is very important because people tend to judge a persons’ skiing ability by the make of the skis he uses.

When buying a parka be sure to buy one with a racing stripe. This will give everyone the impression that you are a really good type skier. Also, be sure to buy one that is tight enough to show off your curves, unless, of course, your curves are in the wrong places.

Ski boots have the reputation of being tremendously uncomfortable but they do cost many bucks. It is not necessary bit of equipment. You can easily spot such skiers. They are the ones who are sitting down on the slopes.

A ski dub member found the going difficult while on a recent club sponsored weekend trip to China Peak.

Remember, the only skis that will suffice in your ski wardrobe are those that are yours. Your winter white must be beautiful, expensive, and hard. NOW that you’ve followed this instruction in this article, you are ready for the slopes. But, it is believed that this article says no; slopes aren’t ready for you.

Skis, corn, and tail are authorized to make changes in this article, unless, of course, you have exceptionally lengthy arms. Poles should be very sturdy and pliable. No, the tin foil will have given way to lighter colors. This change is very chic, but remember, the lighter the color the larger your feet look. Be sure to buy buckle boots only. Buckles far surpass the old frisket-finger-pitching-lace-up jobs. Double buckles are an absolute must as they give the ski patrol something else to cut away when you break your ankle.

Skis are a must, unless, of course, you have exceptionally lengthy arms. Poles should be very sturdy and pliable. These boots are not necessary at all. They can easily spot such skiers. These are the ones who are sitting down when everyone else is dancing.

After-ski boots are also functional when crawling from pub to pub. Now that we’ve covered all the most important items on the skiers’ list; ski poles and ski boots.

Dr. HIP: dopes out advice for sick ‘heads’ in beds

by FRANK KOMARMY
Staff Writer

Eugene Schoenfeld M.D.; "Dear Doctor Hippocrates" (pp. 5-11), 1968; 106 pages (plus index.) $8.00.

Doctor Schoenfeld began his literary career by answering questions in the underground Berkeley Barb, much like a hip, medically oriented, Dear Abby. Since, he has graduated to a big-city paper in the big capacity. The old Barb column was devoted to quasi-medical questions discussed wittily but precisely by Schoenfeld.

The column, "Dear Doctor Hippocrates," is the title of his recent book and is a cross section of questions and answers from the hurb.

His topics range over the spectrum of modern medical problems (mace, acne, etc.) but center mostly around two basic themes: sex and its exotic ramifications, and dope.

Editor’s note: Dr. Hippocrates’ column, which appeared regularly in the Sunday San Francisco Chronicle-Gazette, was discontinued recently after the author disagreed with the newspapers over editorial policies.

In the beginning, he deals with such common Barb preoccupations as toilet training, grotesque fetishes (kiteflying?) and the like. He also includes worthwhile in-depth topics. "Best" key blanks of all kinds are cut to specification. They are also aware of the possible impurities when their manufacturers are forced under- ground.

He worries little about the dread effects of marijuana, but warns that here too, lack of knowledge caused by oppressive laws are dangerous. Chloroform, for example, seem to have a tendency toward insinuation reactions while stoned, but again no proof can be advanced one way or the other.

Or, the chance of a future reversion of harsh grass (no pun intended) laws, Hie old Barb book was devoted to legal questions. The lock and door closers and security devices on campus. He is the exclusive caretaker of 7,752 locks in the "Best" system, 3,501, special door locks: 1,880 cabinet and drawer locks and 1,370 desk and file cabinet locks and 870 padlocks.

Most licensed locksmiths have access to "Best" key blanks of all series. They are also aware of the state law forbidding duplication of state keys. "State property. Do not duplicate." is engraved on every campus key.

A locksmith is employed full-time by the college to keep all the locks and equipment in working condition and to make more keys when necessary. Collier J. Duncan is the present locksmith. It is also part of his job to maintain all the door closers and security devices on campus. He has the exclusive right to reproduce 800,000 potheads returning from Viet Nam will decide the issue.

After reading this over-priced little book and mulling over newspaper coverage of "drug induced" tragedies, one is forced to wonder if perhaps Art Linkletter is blaming the wheelmaker for the wheel.

Clothes change the man

Tight pants psychology

Beverly Hills (UPI) — The tight pants fad is changing the American male — his posture for one thing. His physique for another.

So says Ron Postal, the men's clothing stylist who credits himself with starting the fashion of wearing a turtle neck for evening wear.

"Tight pants affect posture," Postal said as he sat still for an interview in the office in the back of his Wilshire Boulevard shop. "They may bind a bit and cause men to walk on their toes. They have already affected the economy because many men do not wear shorts now. The marking of some underwear can be seen through the tight pants."

Postal is a professional tailor whose name is among the credits of his Wilshire Boulevard shop.

"Four" hope to stimulate interest and participation in the neighborhood contact organizations and institutions. They will also prepare data of the project for a presentation at Poly Royal, 1970.

A special census of 1967 showed the breakdown according to income. In the census 1,998 families were registered. In houses having an annual income below $3,000 there were about 40 percent of the total. Families in the town were in households with an annual income of $5,000 and $6,000.

The "Four" get together with the people in the Hawthorne district on a one to one basis and have them register for the new, low-cost housing so that they would be the first ones accessible to the houses. Some of the people had already registered and others were not eligible. But out of 52 families they got 31 to register.

A portfolio produced by the "Four" proposed some probable reasons for the underdevelopment of the Hawthorne district. These are: 1) The existence and layout of the railroad and the type and income of people who were employed. 2) Large portions of land were held by individual owners. 3) A long period of dormancy during the depression.

The breast is best

United Press International — Because calves grow much more rapidly than human babies, cow's milk has a heavy concentration of protein and must be diluted with an equal portion of water to make it suitable for consumption by human infants.

The problem of trying to find a seat in the student Dining Hall will soon be alleviated by an extension to the seating area. Announced by Mr. Douglas Gerard, director of planning facilities, the extension will be in a northernmost direction toward the science building.

The additional space will provide an extra 250 seats to the now overcrowded area.

Construction will begin in April, to be completed by next fall.

"Take the Money and Run" is nuttiness triumphant. You may be reminded of Chaplin... you may think of W.C. Fields... but above all you'll see Woody Allen, original.

- LOE MAGAZINE

"The worth of a designer," he said, "is in interpreting the individual's insecurity. Postal claims although he has no laboratory data to back up his hypothesis.

"Many men have become more conscious of bulky waistlines," he said. "Some of them force themselves into trousers that are too small for them. They're getting like women who try to squeeze their feet into shoes a size or so too small."

Postal said, "The psychology of clothing is not as frivolous as it seems to be. It has a very deep root meaning. If someone is dressed casually, you are more likely to call him by his first name. "If you come to work in an office without a tie or coat, on your boss will think you do not take your job seriously and you cannot represent the firm with dignity. There is a trend among religious leaders toward everyday attire and this to me is an indication that the church is trying to get closer to the people."

"I recommended the turtle neck for evening wear because you're out to have fun at night... you for an evening of gaiety and seem to get away from dullness of the normal fall attire or he will not have as good a time as otherwise."
College war veterans rapidly increase

by GARY KENYON
Staff Writer

(Editor’s note: This is the second of a two-part series on the military veterans attending college. The first part appeared in the campus veterans club.)

Service and social activities are important, but according to college veterans, according to David R. Savoier, Savoier, along with Al Draivas, is faculty advisor to Chi Gamma Iota, campus veterans club. He believes the veteran, much more than the average student, has made a definite commitment in his own mind and is willing to sacrifice more of himself to get it.

"Veterans, while they feel they're too old for getting into fraternities, have created a club for guys with a common bond to share a positive experience," Savoier said.

But why have veterans on this campus increased by 94 per cent in just two years? campus enrollment has increased by only 53 per cent?

The main reason for veterans returning to college is the GI Bill. The program is education proviso of the GI Bill, which went into effect June 1, 1970. The Bill’s enrollment brings the total number of veterans and servicemen who have been trained under the new bill to over 1.8 million, according to John Enos, who veterans service officer.

The cold war GI Bill sailed through the House of Representatives by a 381-0 vote and passed the Senate by 99-0. When it passed, more than 800,000 are becoming eligible for the GI Bill. However, the Administration has estimated that only 330,000 will choose to continue their education.

Financial help in resuming an interrupted civilian life is a common feature of the GI Bill. It was also meant to correct an injustice: the draft villains hoarding a vast military surplus who have neither college deferments nor are entitled for other reasons.

The interest in continuing education is slowing down according to a recent Time article. Of the millions eligible for education under the present GI Bill, only about 20 per cent are enrolling. However, the interest in continuing education is slowing down according to a recent Time article. Of the millions eligible for education under the present GI Bill, only about 20 per cent are enrolling.

Basketballers take on Bulldogs

by Rich Bobbett
Sport Writer

Ring that bell! That is exactly what the Mustang basketballers will be trying to do this weekend when they play arch rival Fresno State on Friday night. On Saturday, the Mustangs will travel to Modesto for a game with Stanislaus State College.

The last time the Mustangs and Bulldogs met, the men in the Green and Gold put on a brilliant second half shooting display to muzzle the Bulldogs 78-67.

Fresno in an attempt to stop the Mustang punch will employ a new lineup that consists of three guards, two forwards and no center.

The Bulldogs will have to go some to out do the Mustang defense. The Green Machine is currently leading the California Collegiate Athletic Association for fewest points allowed a game with an average of 78.6.

Another encouraging statistic is the Mustangs along with the Bulldogs is current lead by two Juniors. 6-3 center Billy Jackson, top scorer for that team, and Gold put on a brilliant second half shooting display to muzzle the Bulldogs 78-67.

The Bulldogs will have to go some to out do the Mustang defense. The Green Machine is currently leading the California Collegiate Athletic Association for fewest points allowed a game with an average of 78.6.

Another encouraging statistic is the Mustangs along with the University of California at Riverside are the only two teams who are averaging more points than they are allowing. UCR is currently averaging 87.7 points per game while the Mustangs are hitting at an 83.3 clip.

Stanislaus State is currently sporting a poor 7-11 record. But, the people from Modesto can score. SCC is led by two Juniors. 6-3 center Rick Wright is averaging 19.5 points a game and is being helped out by Kirk Ladine with a 14.6 average.

Huskies maul matmen

You can't win all the matches all the time.

After soundly defeating University of British Columbia 63-60 and Western Washington State 64-0 on Tuesday, the Mustang wrestling team dropped a 36-61 decision to the University of Washington in Seattle. This loss came on Wednesday night.

As of press time, the verdict of the Portland State-Cali Poly dual wrestling match is not known. This match took place in Portland last night. Tonight the Mustangs move on to the University of Oregon at Eugene and tomorrow night (Saturday), the matmen will face second ranked Oregon State University.

Two Mustang wrestlers sustained injuries while going down to defeat. In the 149 pound class, Steve Gardner lost 18-9, but the most important thing is that he injured some neck muscles and may be out of action until Saturday night against Oregon State University. Katsuji Neko will take up the slack in this weight division.

Although the season has just started for the Mustangs, Coach Dick Anderson already has some good reasons to be optimistic about the swimmers' chances of capturing the California Collegiate Athletic Association championship.

In dropping their first dual swim meet, a 44-49 decision to UC Santa Barbara, Saturday, January 24, three new school records were set by the swimmers.

Junior Bob DeGrasse had a hand in rewriting two of those school marks. The 20-year-old architecture major broke his own mark of 22.4 set last year in the 50-yard freestyle event with an effort of 22.3 seconds.

DeGrasse also was part of the four-man 400-yard freestyle relay team, that set a new school record of 3:35.3. The other members of the relay team were Lester Waddel, Richard Taylor and Tim Brown.

The third record-breaking performance was turned in by Tim Brown, who broke Jim Burr's old mark in the 200-yard individual medley event. Brown, a senior, swam the distance in 2:06.3 to erase Burr's 1961 mark of 2:10.

With his swimmers setting new marks early in the season, Anderson said the Mustangs would be battling along with San Fernando Valley State College and Cal State Fullerton in the CCAA crown.

The next competition for the Mustangs will be the two-day UC Santa Barbara Relays of February 6-7.
After a disappointing weekend, the Mustang women's basketball team hopes to pickup the first win of the season as they take on Cal State Fullerton tonight (Fri) at 7 p.m. in Crandall Gym.

In last weekend action the women went down in defeat twice in their season openers.

Friday night a fourth quarter rally came too late as Occidental College nipped the Mustang A Team 44-43. Sharon Chatman lead the scoring with 12 points followed by Terri Dally with 9 and Kristy McCabe with 7.

The B Team fared better earlier in the evening as they coasted to a 39-13 victory over the Tigers younger players.

The scoring for the locals was fairly even, with Janice Lane leading the scoring for the locals with 9 points. Coach Mary Stallard views the season with "mixed emotions" because of a major rule change which limits the number of girls on the court to five for each team. Prior to the change, two girls could defend, two could play offense, and two could act as rovers.

Miss Stallard stated that the new rule would make the "smallest" factor, with all the girls having to go both ways.

Coach Mary Stallard views the season with "mixed emotions" because of a major rule change which limits the number of girls on the court to five for each team. The old rule allowed six players on the court, two on defense, two for offense, and two to act as rovers.

Miss Stallard stated that the new rule would make the "smallest" factor, with all the girls having to go both ways.

It's been from New York to L.A. without moving an inch.

Another miracle from Volkswagen.
A Volkswagen goes through one of its most grueling tests in a gigantic wind tunnel.

Once inside, it can take its effect a trip between any two given cities. To calculate beforehand what the road, altitude, weather and speed would actually be.

Then reproduce these same conditions inside the wind tunnel.

This way we find out before you do what a VW can take on the road.

And what it can't take.

And anything big it can't take, we do something about.

So if you see a Volkswagen ever hit high winds in Miami or Chicago or even Anchorage, Alaska, you have one reassuring thought.

A Volkswagen's probably been through it before.

Mustang athletes rise to the pros

Are you interested in what happens to some athletes that come from this college? You might be surprised with some of their achievements.

To start with John Madden seems only fitting. John Madden graduated in the spring of 1959 as a football player and was drafted by the Philadelphia Eagles. After signing a contract with the team Madden suffered a knee injury which ended his football playing career. In 1960 he was the line coach for Allan Hancock College. In the 1962 season as head coach, Hancock had a highly successful year. From 1963-68 he was the line coach and first assistant coach for the powerful San Diego State football team. Then in 1967 he became the Oakland Raider assistant defense coach. He held that position until the 1980 season. He then replaced John Hancock, who went to the Buffalo Bills, as the youngest modern day head football coach of a professional team. He is now 33 years young. This past season he was named "Coach of the Year" by the American Football Writers Association. His Raiders were not much friendlier atmosphere, than the eventual world champion Kansas City Chiefs

Cecil Turner is another success story in the college’s books. Turner, who was an outstanding high school track star in Washington D. C., attended Allan Hancock College. In the spring Turner scored 66 points in the central junior college championship meet. In the UPI Basketball poll

Fall of 1966 he transferred to this school. He was the prime receiver for the football team. He was also one of the top 100 yard dash men in the country with a 9.2 clocking. At the NCAA college division championship meet he won the 100 meters, the long jump, anchored a victorious 440-yard relay, and finished second in the 200 meter dash. He is now playing football for the Chicago Bears where he is a wide receiver and one of the most dangerous breakaway runners in the game.

There are two athletes currently enrolled here that deserve mentioning. One athlete is Manuel Murrell. Murrell was a star defensive back for the past football season. He is the twelfth round draft choice of the Detroit Lions. He was also a member of a national championship 440-yard relay team and was one of the top long jumpers in the country last year.

The other athlete is Jim Edmondson. Jim’s nickname is “Big” because he is only 6 feet 4 inches tall. “Big” was the prime receiver for the past football season. He was the player who caught the winning touchdown pass that beat the Fresno State team. He too, like Murrell, is planning a professional football career. He was also a member of two 440-yard relay teams which were champions. He also placed sixth in the 100 yard dash at the nationals.

All in all this college has some athletes who have made it in the big time. There are a few athletes in school now who stand an excellent chance in their athletic endeavors.

Wrestlers start cleanup

by TERRY CONNER

Sports Editor

As the door slammed behind them, the Mustang wrestling team scurried south from the University of British Columbia in Canada to a not much friendlier atmosphere, but closer to home at Western Washington State, Tuesday, February 3.

In the first dual match of the day, the Mustangs whitewashed the Canadians 45-0 and then turned in another shut out against Western Washington, 44-0.

When the Mustangs left our neighbor country to the north, they left them a sadder, but wiser than the Canadians. Jim’s nickname is “Big” because he is only 6 feet 4 inches tall. “Big” was the prime receiver for the past football season. He was the player who caught the winning touchdown pass that beat the Fresno State team. He too, like Murrell, is planning a professional football career. He was also a member of two 440-yard relay teams which were champions. He also placed sixth in the 100 yard dash at the nationals.

It is lessons like these that are quite sweet to give, but miserably sour to receive.

Totaling up 4 pins, 3 forfeits, 1 default and 1 decision in the first match, the Mustangs ambled homeward with a short stop-off at Western Washington State to pile up 3 pins, a forfeit, a default and 3 decisions to finish the days wrestling schedule.

As so the door slammed behind the Mustangs as they left Canada, so did it as they left the battle grounds of Western Washington College in Bellingham. With 8 contests down and 4 to go before the Mustangs reach home, the wrestlers traveled on to the University of Washington.

Spread the word!
