Tuition may be inevitable

by VAL HOUDYBRELL
Staff Writer

Tuition for the California State Colleges has become increasingly important to state legislators and they may soon be faced with the decision of whether or not to charge tuition at the state college level.

Interviewed by telephone, State Senator Donald Grunsky told Mustab Daily: "We are confronted with the unhappy dilemma of having to consider charging tuition as an additional source of funds to provide facilities for the growing student population or curtail enrollment. It seems to me that the lesser of the two undesirable situations is to charge tuition of those who are financially able to pay rather than to turn away qualified students simply so we can continue a policy of no tuition at all."

"I will do what I can to avoid the necessity of tuition. If it becomes inevitable, I will support such a program only if there are adequate provisions or a means test or scholarships so that no qualified students will be prevented from attending college because of their financial inability to pay tuition."

Grunsky stated that the outcome of the tuition question will have to wait until later in the academic year.

Draft ruling for 2-S changed

by FRANK ALDERSTE
Staff Writer

The Selective Service System, the repository of the draft law, has notified this college of a recent change in a student's draft vulnerability.

According to Gerald Holley, campus registrar, the student may now complete any three quarters of the scholastic year, summer included, retain his student deferment.

According to Selective Service regulations a college must report promptly any change in a student's enrollment. Previously the college did not take any action when students left school for the summer. Now, according to the new ruling by the State Director of the Selective Service System, a student could attend summer quarters and then drop out for the fall without fear of being drafted as long as he attends three quarters of the scholastic year.

The new procedure, Holley said, will be to notify the draft board only after a student has failed to enroll for two quarters in a row.

The ruling came about after Holley had written to the state director of the Selective Service System and asked if a student could drop out any quarter of his choice.

Though directed only to this college, the ruling will probably hold true for other California colleges on the quarter system.

Monagan takes sides in Republican senate race

by GEORGE SKELTON

Sacramento (UPI) - As a supporter of U.S. Sen. George Murphy over Sen. Edmund Muskie, a Democrat, George Monagan over Rep. Henry Reuss of Wisconsin, Monagan said he was for a "liberal" candidate. He pledged Tuesday to remain neutral in the primary and trusted the Murphy-Technicolor arrangement on to qualify for the November election.

"I don't think it's out of bounds," Monagan told newsmen. "I can't find any reason for objecting to anyone bringing it up, but I don't think anyone would gain anything.

"He added, "I don't find anything wrong with the arrangement," which has sparked a controversy. He said the contract has been made matter of "public knowledge."
Pollution hits everyone

The following is an open letter to the president of the college.

President Kennedy:

We of the Ecology Action Committee had submitted a report to your Ad Hoc Committee on Pollution on our campus (Feb. 17, 1970) March 25, 1970. Ecology Action Committee toured the creek to observe the expected corrections.

1. The steam cleaning platform by the Farm Shop was still in operation, using steam and detergents to wash grease and other assorted farm chemicals into the creek.

2. We observed evidence of at least two cans of paint poured into the creek.

3. Ashes from the horseshoeing unit are still being dumped into the banks and into the stream in the area of the Farm Shop.

4. Steiner Creek behind the Swine Unit is still being filled with excess dirt from construction. We felt that we had been assured that this practice would be discontinued.

5. We have noted and would like to repeat ourselves by saying that these above numbered practices are illegal under Fish and Game Laws Number 5650 and Number 5653. We realize that some of the major polluting factors on this campus will take some time to be corrected, but the above mentioned inci

dences can be corrected immediately.

We have noted and appear to have been stopped, and I'm sure the old ashes will be cleaned up.

6. Ashes by the Horseshoe Unit on the creek bank "was supposed to have been stopped, and I'm sure the old ashes will be cleaned up."

3. Ashes from the horseshoeing unit are still being dumped into the banks and into the stream in the area of the Farm Shop.

4. Steiner Creek behind the Swine Unit is still being filled with excess dirt from construction. We felt that we had been assured that this practice would be discontinued.

We have noted and would like to repeat ourselves by saying that these above numbered practices are illegal under Fish and Game Laws Number 5650 and Number 5653. We realize that some of the major polluting factors on this campus will take some time to be corrected, but the above mentioned inci

Environment meet set

The Ecology Action Committee is meeting tonight in Science B-4 at 7:30 to discuss plans for the national Environmental Teach-
in, upcoming April 21, and Poly Royal, according to Justin Congdon, spokesman.

Funds for EOP?

The Educational Opportunity Programs EOP were instituted in California during the 1965 school year. The programs were geared towards minority and low-income people, thus giving us a chance at higher education. Funding of EOP in the State College system comes from Sacramento and provides for tutorial and recruitment services, student loans and grants.

Over the years EOP has served many. However, its value is not to be measured solely by the number of people served, but also in what it has done and meant for those lives it has served.

I spoke with four students who presently are on the EOP. This is what they had to say about the program.

Brenda Black: "I'm from Watts where I've been living with my sister and her husband. I couldn't depend on their income to get me through school cause it's barely enough for them to get by on. My father's physically unable to work, so things are pretty bad. But thanks to the EOP program I've been given a chance to go on to school."

Luis Alcala: "I first heard about EOP during my senior year at Arroyo Grande High School. My counselor knew my dad was permanently out of work and that our family was in need. So he helped me get on the program. Today I'm a Architecture major here at Poly. But if there hadn't been a EOP program I don't know where I'd be now. I'd probably be lost."

Blendore Hutchings: "There are three of us in my family. My father isn't around and he won't help us financially. I wanted to go to college and I wanted to make it on my own. But in the end money was holding me back. With the EOP I didn't care if I knew, this program is more than money. At times it can be a family away from home."

Patricia Gonzalez: "The family income is just enough to feed us. So I wouldn't be here if it wasn't for the EOP. It has meant a lot to me. Because of its funding I entered school, but because the program is behind you when your lost or there when you need someone, I've stayed in school."

Within the last five years the Educational Opportunity Programs have matured and spread to all of the State Colleges. This year however, the State College Trustees along with the Coordinating Council on Higher Education and various legislators contrived a many-pronged attack on EOP. In essence, these attacks will phase out the minorities and low-income whites from the four years colleges.

Throughout the state, colleges have reacted with alarm to the distortion of EOP by Reagan and company. Many colleges have thus reestablished their priorities and have channeled a portion of their ASI funds for the survival and maintenance of the EOP on their campuses. Fresno State's Associated Students for example, now allocates $45,000 toward that college's program.

On April 15, we as students, will go to the polls. This will be a special election at which we will decide the future of EOP here at Cal Poly. A victory means $20,000 of ASI funds will go towards our EOP and will extend a needed hand to the many disadvantaged people of this society.
The Rag

There's a kind of hush

by BRAD BROWN
Staff Writer

Don't think your parents are the only ones helping you through college, your younger brothers and sisters are too.

What a flash I had looking through the Playboy. I recognized the girl, her features and anatomical) from a couple of years ago. It's one of those things you just don't know how to take. The kind of thing that you hope no one has or will ever touch her, only you; or you will never be close to her (though you now know ridiculous that is). A being being close then apart then the ultimate flash: seeing her again in her four color beauty, for less than a buck. To the Music Center fountain at Hanburger place, or after dieeriesder practice when we were in high school. The first time I saw her. Montani semper liber.

Don't think your parents are the only ones helping you through college, your younger brothers and sisters are too.

Militants stage left, government stage center

By LOUIS CASELSE
UPI Senior Editor

WASHINGTON (UPI) - There may be some alienated youths and embittered blacks who are seriously intent on overthrowing the U. S. government.

But most of the noisy exponents of "revolution" who get so much attention from the news media are merely playing a "genuine" warm and decency that this generation still retains.

That is the judgment of Dr. Robert Brustein, dean of the Yale University Drama School and author of a book on "The Theatre of Revolt."

If Brustein's observations are valid, they suggest that the greatest danger in the current climate of confrontation is that guardians of social order may over-react, invoking viciously repressive measures to deal with a "threat" that really is not very sinister.

Brustein says the news media have displayed an "astonishing hospitality" to expressions of radical views, including open calls for revolution.

Although this has been upsetting to some of the staiders, including high officials of the Nixon administration, it has served a valuable safety-valve purpose, permitting angry minorities to vent frustrations which in a closed society might lead to genuine revolutionary action.

Brustein is no timorous conservative whistling his way past the graveyard. He sees plenty wrong with American society, and wishes that impatient young idealists were coming forward with genuinely innovative programs for reform.

He suggests it is time for the public and the news media to "turn away from these playactors" and give other, less charismatic young people a chance to express, in their quieter ways, the "genuine warmth and decency that this generation still retains."

Washington (UPI) — President Nixon must make a fateful decision on what to propose when the United States and Russia resume strategic arms limitation talks in Vienna April 16.

His task is not an easy one. It has been complicated by disagreements within his administration as well as conflicting pressures on Capitol Hill.

More than the face of Nixon's era of negotiations is at stake. The outcome of the Soviet-American efforts to agree on limiting and possibly reducing strategic nuclear missiles may—to take the gloomiest view—determine whether the human race is to survive.

At the very least, failure to halt the spiraling arms race will mean that each nation must pour tens of billions of dollars more into weapons at the expense of urgent domestic needs.

The Russian and American delegations at the exploratory SALT talks last year made no specific proposals. They confined themselves to exploring the areas for possible negotiation. The Helsinki session ended on a note of hope.

The atmosphere has been clouded since Helsinki, however, the United States planned to begin deployment of the ABM, which Pentagon officials insist inartial tests.

However, what is not mentioned in the public debates is that U.S. officials consider the Soviet ABM already obsolete and are working on a more sophisticated system.

All top officials in Washington are agreed that time is running out on the effort to put some lid on fantastic arms expenditures. What they have not yet agreed on is how far they can trust Russia to respond in good faith to any bold American initiative involving some element of risk.

The betting here, however, is that the initial U.S. approach at Vienna will be on the cautious side.

Interviews

Peace Corps representatives will be on campus through Friday for recruitment of teachers for Peace Corps service overseas.

Abdul Matin, a native of Afghanistan, serves the Peace Corps as a program supervisor.

Constance Swonger finished a two-year assignment as a Peace Corps Volunteer in Turkey in June of 1968.

Matin and Swonger, both experienced Peace Corps representatives, will be in BA & E 101 from 9 a.m. to 4 p.m. The Peace Corps has a great need for teachers to begin two years of service overseas this summer, according to campus Peace Corps representatives.

Workers needed

The first meeting of the 1971 Housing Committee will be Tuesday, April 7 at 5 p.m. in Graphic Arts 106.
Citizens join for ecology

She's note—This is the first in a five part series article by Bea W. Witter on the Citizens Advisory Committee on Environmental Quality Report. By JAMES W. WITTMER.

Today, I see a report that President Richard Nixon and to the President's Council on Environmental Quality. Our citizens, we hear much about the wrong with our environment, and we all know much of the wrong with our environment. It is not impossible but it's going to take a long time for the universities and our government to bring about improvement.

One of the most challenging of environmental problems is the using pile of garbage and debris in our cities and towns. It's not impossible but it's going to take a long time for the universities and our government to bring about improvement.

Next Sunday, I hope to discuss the issue of pollution established by college "houses" on campus. Environmental problems is the challenge of the President's Council on Environmental Quality. The council noted in its report to the Chief Executive that "man's interaction with his environment, both natural and man-produced, is the basis of all learning—the very origin and substance of education. Yet, our formal education system has done little to produce informed citizens, sensitive to environmental problems and prepared and motivated to work toward their solution."

The report continues, "A few concerned educators have begun programs in environmental education, indicating environmental considerations throughout the normal curriculum. These educators are making students aware of man's responsibility for the quality of his environment."

The Ad Hoc Committee to Promote the Elimination of Environmental Pollution-composed of 24 faculty, staff and student members—was established to give support to the well being of the campus, students and the community, both present and future, according to Dr. Norman Eaton of the Chemistry Department. The committee was not, Dr. Eaton said, organized because of complaints of students, citizens or local groups.

In the memorandum establishing the committee, Dr. Kennedy stated, "In order to help in coordinating efforts to publicize the problem and to encourage the college community and the public to increase their efforts through positive assistance in finding solutions, I am establishing an ad hoc committee of faculty, staff and students to act as a clearinghouse of ideas and a catalyst for effective action."

The committee answers the challenge of the President's Council on Environmental Quality. The council noted in its report to the Chief Executive that "man's interaction with his environment, both natural and man-produced, is the basis of all learning—the very origin and substance of education. Yet, our formal education system has done little to produce informed citizens, sensitive to environmental problems and prepared and motivated to work toward their solution."

The report continues, "A few concerned educators have begun programs in environmental education, indicating environmental considerations throughout the normal curriculum. These educators are making students aware of man's responsibility for the quality of his environment."

The Ad Hoc Committee to Promote the Elimination of Environmental Pollution—composed of 24 faculty, staff and student members—was established to give support to the well being of the campus, students and the community, both present and future, according to Dr. Norman Eaton of the Chemistry Department. The committee was not, Dr. Eaton said, organized because of complaints of students, citizens or local groups.

From the basic groundwork established in their first meeting February 17, the committee, under acting chairman Lauchlan MacDonald, director of information services, established four subcommittees.

Specifically, these subcommittees have the task of approaching range finding and coordination in the areas of curriculum and course content, projects, campus planning, public relations, and related areas.

The curriculum subcommittee, chaired by Dr. Ruben J. Grefenius of the Soil Sciences Department, has the task of compiling a study guide of relevant courses available for spring quarter or throughout the year. This list will be published. The subcommittee will also recommend new courses, curriculum and organizations dealing with environmental pollution.

Headed by Dr. Norman L. Eaton of the Chemistry Department, the planning subcommittee will make recommendations for endorsement to the Water Quality Control Board and other off-campus agencies concerned with long-range planning.

In total, the committee intends to develop a realistic and workable policy for finding solutions to the causes of current problems and anticipated trouble areas, and, where practical or possible, suggest ways for implementing them.

THE LIGHTER SIDE
By DICK WEST
WASHINGTON (UP)—Thanks to the development of satellites and other highly sophisticated instrumentation and equipment, many cartographers are reputed to be able to measure distances between terrestrial points with hairline precision.

It was therefore astounding to discover in recent congressional testimony that Rand-McNally made the maps too short.

There was no indication as to whose fault it was—but Rand perhaps misplaced a decimal point or whether McNally may have mired his sextant.

Nevertheless, we have it from a hot source that the House of Representatives is going to make a real deal from what the members actually found they were traveling.

The amazing thing is that the Rand-McNally mileage maps apparently always varied on the short side. There was no mention of any congressman finding the distance was less than what Rand-McNally had measured it.

So the House Administration Committee, which has charge of such things, now allows House members to add 10 per cent to the Rand-McNally mileage maps.

I'm sure Rand-McNally will feel pretty sheepish when it learns about its error. And I assume it will immediately rework all of its maps to make them 10 per cent longer.

Rally delayed

The car rally scheduled by the Rallymasters has been postponed due to technical difficulties. It was originally scheduled for Friday, April 1. A new date will be announced by the club later.

Pill not hard to swallow

by WILLIAM BUNDERLAND
UPI

Despite Senate testimony on possible harmful side effects of the pill, the sound and fury has apparently caused little movement yet among American women to other methods of birth control. Their gynecologists don't seem especially apprehensive, either.

In many cases, statements are conflicting. For example, a few gynecologists reported mass defections from the pill, while a much larger majority said there has been a minimum of fuss among their patients, with a relatively small number deciding to quit oral contraceptives.

Family planning clinics generally said only a few women have given up the pill.

The pill was taken up against the pill remains in the hands of the Food and Drug Administration (FDA). As a result of the hearing, the FDA has sent a letter to some 38,000 doctors urging them to make clear the possible dangers of the pill to their patients. It has also called back into session a special panel of expert advisers on the pill included in the past had recommended some changes in labeling of oral contraceptives.

A number of women have asked their doctor whether they should continue using the pill. Generally the doctors told them to continue taking it if they were not suffering side effects and as long as they continued regular monthly examinations, usually every six months.

Some women have decided to switch to interuterine devices (IUD) and women asking for guidance in birth control methods have opted to use IUD rather than the pill.

Gynecologists feel nothing new was called out of the Senate testimony. Most said harmful side effects have been around for some time and they have decided the good effects of oral contraceptives outweigh possible side effects. However, regular checkups are necessary, some doctors say every three months and others every six months. Most make these checkups necessary by giving prescriptions for pills only for six months at a time.

Women who quit the pill should do so at the end of their monthly cycle and not in the middle of their cycle. Stopping suddenly can cause spotting, which, although not necessarily harmful, might frighten the women.

would be 900,000 women deserting oral contraceptives.

Dr. C. Courtney Wederburn, medical director of the Planned Parenthood Association, said there were only a few, 10,000, unwanted pregnancies due to women being scarred off the pill. He said the figure was based on predictions that about 10 percent of those stopping oral contraceptives will become pregnant.

Wederburn added that since the Senate testimony, Planned Parenthood offices around the nation have been overcome by frightened women. However, some birth control clinics have reported much less fuss.

Dr. D. Victor Wynn of the British women under 46 on the pill. The pill showed a "significant" increase in coronary disease among British women under 46 on the pill. Wynn also said the study showed 18 per cent of the women developed a type of chemical diabetes, which makes sufferers more susceptible to heart attacks.

Whether any such exertion amount will be taken against the pill remains in the hands of the Food and Drug Administration (FDA). As a result of the hearing, the FDA has sent a letter to some 38,000 doctors urging them to make clear the possible dangers of the pill to their patients. It has also called back into session a special panel of expert advisers on the pill included in the past had recommended some changes in labeling of oral contraceptives.

A number of women have asked their doctor whether they should continue using the pill. Generally the doctors told them to continue taking it if they were not suffering side effects and as long as they continued regular monthly examinations, usually every six months.

Two bosses chosen

Athletic director and head football coach Joe Harper, announced last week two new additions to next seasons Mustang football coaching staff.

Bob Lane and John Crivello will replace coaches Vic Buccola and Tom Lee, both of whom have been granted sabbatical leaves.

The 30 year old Lane is coming from San Luis from San Diego and will take over the defensive line coaching position left by Buccola. Lane graduated from Baylor University in 1963 and played with the San Diego Chargers from 1963 through 1969 as a linebacker.

Crivello, was an assistant to Lee on last years freshman football squad and will now take over the duties vacated by Lee. Crivello is a 1969 graduate of San Jose State College.

Harper also announced the 1970 grid schedule. Four new opponents were noted on the 10 game slate.

The Mustangs will play their first four games in Mustang stadium and will open with Cal Lutheran on September 10.

HOUSTON UPI—A young man walked into a surplus store Monday and told the clerk, "I'd like to buy a gun."

The woman showed him a .46 caliber automatic pistol. He reached in his pocket, pulled out a shell, loaded the gun and took it and the pistol.

McLain suspended

NEW YORK UPI—Dennis McLain, pitching star of the Detroit Tigers, was suspended from baseball until July 1, 1970 by Commissioner Bowie Kuhn for "conduct not in the best interests of baseball."

McLain's suspension will last exactly two months and 24 days to the start of the season on April 6th.

HOUSTON UPI—Dennis McLain, pitching star of the Detroit Tigers, was suspended from baseball until July 1, 1970 by Commissioner Bowie Kuhn for "conduct not in the best interests of baseball."

McLain, 30, was suspended by Kuhn for "conduct not in the best interests of baseball."

Kuhn also said that there is "no evidence to indicate that McLain ever bet on a baseball game involving the Detroit or any other team." He added, "There is no evidence to indicate that McLain gave less than his best effort at any time while performing for the Detroit Tigers."

McLain's suspension will last exactly two months and 24 days to the start of the season on April 6th.

760 Foothill
Mustang nine nipped

by TERRY CONNER

The ultimate team goal for a wrestling team is a National Championship. For most of the last five years, the Mustang Matmen have won the College Division National Championships. In 1970, this year, the national tournament was held in Ashland, Ohio on March 13-14.

The Mustangs were pre-tournament favorites to win the championship again, but they fell far below their record high of the year before in points in notching the win.

Nine schools represented by 381 athletes showed up for the 8th annual event. Cal Poly entered 18 wrestlers, one in each weight class.

Also representing this college at Ashland were coaches Vaughn Hitchcock and Dick Heaton, team trainer Frank Egmund, Sports Information Director, George Ramoe, KVEC radio representative, Lee Cryer, Mustang Daily sports writer, Terry Conner and freelance photographer, John Russel.

The Cal Poly caravan left San Luis Obispo on the morning of March at the sleepy time of 4:30 in the morning and arrived in Ashland at 7:30 that night, via state vehicle, United Airlines and Hertz Rent-A-Car.

Wrestlers were up at the crack of dawn running to make weight and then before going to bed they would be running again or sitting in sauna baths. They didn't do it to much and they didn't sleep to much.

Some of the finest wrestlers in the nation here at Cal Poly did not go to the nationals, because Cal Poly picked the cream of the crop to wrestle. They were; Terry Hall, first place 118 lbs., Glenn Anderson, third place 128 lbs., Larry Morgan, 134 lbs., Steve Gerges, 141 lbs., Lee Torres, second place 150 lbs., John Finch, second place 154 lbs., Rick Arndt, 177 lbs., Rich Simmons, second place 177 lbs., Gary Maiolli, 190 lbs., and Greg Barnett, heavyweight, heavyweight division.

In every tournament, someone has to lose. The Mustangs placed four wrestlers in the finals, only one of whom came away victorious. Terry Hall was also named outstanding wrestler of the tournament. Lee Torres lost a match that just as easily could have been his victory. John Finch, unseeded upon entering the whole meet was seeded 149 when he and his opponent rolled out of bounds and separated. John shouldered Rich Simmons lost his match due to poor officiating.

After Finch's injury, victory for the Mustangs was not as sweet as it should have been, feeling that I had been sumoing like a real tall wrestler when reaching the top, sumo down being even more sumo.

The finals were run Saturday night and we, the Poly caravan, left Ashland, los as we had arrived the night before. The Poly drive arrived home at 9 p.m.

The five Mustang wrestlers eligible to attend the University Division National Northwestern University at participate in that event; all had to lose.

Netters win

by RUSS BRABENAC

Sports Writer

The Mustang tennis team showed themselves in excellent form for the beginning of the CCAA Round Robin Tournament as they stomped Westminster College 6-0 Tuesday afternoon.

Cal Poly's number one man John Ross beat Westminster's Rich Machota, 6-7, 7-4, 6-4. Joe McGahan toppled Ken Watson, 6-3, 6-4, Larry Morey over Pete Shinnum 6-1, 6-1, Burt Easley won Jon Dinglein, 6-1, 6-3, Greg Piers over Darrell Cornelius, 6-4, 6-1, and Paul Summers over Charlie Mehl, 6-1, 6-4. The doubles team didn't encounter much opposition either. Poly's Morey and Easley got by Westminster's Machota and Watson, 6-4, 6-1, McGahan and Piers over Shinnum and Dinglein, 6-3, 6-4, and Summer and Ross beat Cornelius and Mehl, 6-3, 6-1.

Starting today the team will be hosting the CCA Round Robin Tournament. The tournament will last through Saturday, which will end the first half of Conference Tournament. The tournament will be the match between the Mustangs and San Fernando Valley State at 3:00 p.m. on Friday afternoon. San Fernando will the NCCA College Championships last year, and show signs of being strong this year.

The Mustang netters are also having an excellent season, sporting an 11-3 win-record. Coach Jorgensen said, "I certainly feel we have a fine team, and if we put out our best games forward, we can come out on top."
