BOSTON (UP)—The first attempt by a Massachusetts serviceman to avoid going to Vietnam under a new state law contesting the illegality of the war has been rejected by two federal judges.

Infantryman John Griffin, 21, of Holyoke, Friday filed suit to have the U.S. District Court and the U.S. First Circuit Court of Appeals prevent the Army from sending him to Vietnam until the Supreme Court acts on the Massachusetts statute.

Griffin was scheduled to report to Ft. Dix, N.J., today for reassignment to Vietnam.

On Thursday Gov. Francis W. Sargent signed into law a bill obligating the state attorney general to defend the state's servicemen who seek to challenge the President's right to send them to fight in wars not declared by Congress.

U.S. District Judge Andrew A. Califfre ruled the court lacked jurisdiction in the suit. One hour later Griffin's attorneys sought an injunction from Chief Justice Bailey Aldrich of the U.S. Circuit Court of Appeals who denied the request.

Griffin, eldest of five children, was waiting outside the court for the decision. He said: "As far as I know, my orders are valid and I will report to Ft. Dix Saturday.

""Attorney Joseph Oeri, one of Griffin's lawyers, the GI said: "I have a conscientious objector claim pending. I don't want to interfere with that. We have told Griffin to think it over and if he decides to seek relief in federal court in New Jersey we will be there on Monday to help him."

Griffin, who dropped out of the University of Massachusetts in his junior year, was drafted last July.

His suit asked the court to issue a writ of habeas corpus forbidding the Army from assigning him to Vietnam.

The strategy behind the Massachusetts legislation is to force the Supreme Court to rule on the constitutionality of the Vietnam War by establishing a state law that conflicts with federal military policy.

If the court accepts as justified the state's role as co-al instuff, it would have difficulty refuting original jurisdiction in Massachusetts as it has yet to become a party to the Griffin case.

Music lifts jammed gym

The singing group Cold Blood was part of the two-program that performed for a capacities crowd in the Man's Gym Friday night. The main attraction of the evening was the appearance of the English rock group Moody Blues.

by VAL HOUDYVELL
Ruff Writer
Friday night two of the most popular rock groups of recent times played to an enthusing and anxious audience in the Man's Gym. The Moody Blues were backed by Cold Blood, a band of five musicians and a singer that boasts memorials of Janis Joplin in Chicago Thirli.

Cold Blood really got it all together. They went through all their hits on their current album and each song sounded out a rock sound with a hint of blue. The audience responded vibrantly as Lydia Penas, the petite and pretty lead singer, poured out what seemed to be a sincere and exhausting format of sound. If the sweat on her face was any measure of how much she fell, her feeling for music must be deep and honest.

The final number by Cold Blood, I Wish I Knew How it Would Feel to Be Free, clicked (Continued on page 2)

Note planned on EOP, elected ASI Secretary

Students will vote April 15 on the largest-ever ASI funds to the Educational Opportunities Program at California State Polytechnic College. San Luis Obispo should receive $21,000 which is above the ASI budget. The special ASI election was called on the EOP.

Currently, the student council Cabinet recommended that ASI also take to the campus for the question of replacing the ASI Secretary with assistant secretaries. The approved ballot for the ASI election follows:

Question 1: "The Educational Opportunities Program at California State Polytechnic College, San Luis Obispo should receive 21,000 which is above the ASI budget. The special ASI election was called on the EOP."

Question 2: "The position of an elected ASI Secretary shall be eliminated, and the duties will be performed by hired student assistants." (YES. NO.)

Measles may delay Apollo

CAPE KENNEDY UPI—All three Apollo three astronauts have been exposed to German measles, their doctor reported Monday, threatening a month's delay in Saturday's blastoff for the moon.

Dr. Charles A. Berry said James A. Lovell, Thomas K. Mattingly and Fred W. Haise are now in "good physical condition" but he said their state of immunity to measles will not be known until Wednesday.

Toblari chanted poetry is approximately 50 students on the English lawn Thursday during College Hour.

What the jfzp?

A sonorous voice droned from the tape recorder. Tapping his feet, the post chimed in with his pre-recorded voice. A television camera whirred to life in a syllable. Tobla Lurie turned on his "language shattering" poetry reading. A sonorous voice droned from the post the audience responded vividly as Lydia Penas, the petite and pretty lead singer, poured out what seemed to be a sincere and exhausting format of sound. If the sweat on her face was any measure of how much she fell, her feeling for music must be deep and honest.

LETTERS TO THE EDITOR

II-S explanation offered

Poly California College Republicans have a deep regret ready to register to vote (call 444-808 or 444-805). Registration may also be done contacting the County Registrar of Voters or at the League of Women Voters.

Remember, April 8 is the deadline for registering in California's Primary Election. Will you be one of the 17 percent of the 21 to 24 age bracket that is not registered to vote?

Matthew J. Grady

Buck around at the ocean

The Poly Range Bisons are sponsoring a beach bash every Friday from 6 to 7 p.m. in the club room. The horseshoe tent is sure to be a hit at the beach. The charge is $2 for two hours.

For more information contact the Student Grant nor 444-416 or Bernie Carr 444-420.

Moody Blues

Editor:

Amongst all the print, I would like to remind you and your readers that part of democracy is people exercising their power at the elections. Many city elections throughout the state are being held this month and absentee ballot requests were due in by Thursday, April 9th. The California's Primary Election deadline for registering to vote is Tuesday, April 14th. Also, I would like to emphasize the importance of being registered to vote, especially for the upcoming election.

It was an aerosol day when I stood on that morning of the Vernal Equinox breathing the breath of air that only knows the day of April, for these are the underest of all days. Standing gazing upon the scene into the green rolling hills, I suddenly remembered all the happy incidents of my life hence blurred by the wintry winter winds. I stood for some moments staring into the face of the scene where the sunshine and the grass entwined in its greenness and it reminded me of a day of joy. Knowing to get where I was going, I soon set out through the trees and the grass and tasting the sunshine, I found that spring was talking quiet, though I was not aware of the titter or seemed like it was coming from inside a hollow log. The air around him was as cold as winter. He seemed to be in great anxiety as he talked to someone else in the log. Much more aghast than I was surprised, I quickly ducked behind a near tree to watch what was taking place.

"Oh, spring you have all but sprung, my season's wasting and yours begun, the four winds are blowing anon to me, but I cannot leave til I wake thee."

I heard a tender sigh and a gentle rustle of leaves. "Oh, winter time, why do you wake me? Go away and let me sleep in reverie, thou knowest my season has yet to be."

At that, a breath of warm sweet air floated out from in the log close behind the warm air came a great gust of cold, and the voice said, "Well then, sleep on, oh silly spring, I leave your season with nary a bird to sing, let spring lovers afloat, humming birds die from no rhyme or reason, who cares if the flowers bloom without care, because, dear spring "(spoke he) "I leave spring."

"Oowl! Let go of my arm you melting old season, for that I'll call out all my spring flowers and trees'n out shine the whole year over fall winter, summer, and my whole season will be a spring flinging hummer."

I had to stand back lest the birds and flowers and springeries, that were being cast from her person overwhelmed me, but gazing on spring in all her artful splendor I was sapped by spring fever. Winter ran off, leaving only melting fog banks behind, but when spring woke up everything was a pin wheel of color.

After that little incident, I walked across the rest of the field happily hearing the birds sing, and the bees buzz and the butterflies flutter (that's what they do) knowing it was indeed spring all around me. Walking away, I didn't glance back thinking maybe next season I would return to see what spring pulled out of the log next. So I did a somersault here and a cartwheel there thinking only spring thoughts, tied in a bundle of sunshine and being happy being.

Spring, ah... tender days
Editor's note: This is the second part of a two part series by James W. Witter in the Mustang Daily on the committee on environmental protection.

WANTED — Someone to translate Japanese to English. Ask for Jerry

Pollution is the establishment of a published study guide of relevant courses and recommendations for new courses, curricula, and organisations relating to environmental protection.

From an initial poll of committee members, the committee learned that action is needed on the various schools, and individual departments within those schools, are taking environmentally conscious, informal groups to promote the elimination of environmental pollution.

Within the School of Agriculture, several courses are offered in the use of pesticides. The school has a chemical safety council and a Chemical Safety School has been developed through the Instructional Materials Program.

In natural resources management, study is underway of the relation between man and recreational areas, the impact of visitors on areas, and how industry is affecting the environment. Soil science is also concerned with erosion control and environmental impacts on campus, such as pollution in streams, scarred hills and washed trails.

Department within the School of Applied Arts also play a significant role in environmental pollution education. The Journalism Department encourages students to write or broadcast in the areas of environmental control. The Printing Technology and Management Department control the use of materials which could become pollutants. The Home Economics Department, mainly concerned with consumer action and food additives, has discussed the various types of pollution.

The Business Administration Department is concerned with the social responsibility of business in its environment. The Schools of Applied Sciences and Architecture, in the normal course of instruction, will be greatly concerned with environmental pollution as agriculture, since, in some way, must study the relationship of man to his surroundings.

Since chemicals are discussed in terms of their influence on pollution, the Chemistry Department chooses experiments to prepare chemical pollution that might result. The department offers a course in agricultural chemicals and studies the contaminating effects of chemicals. Students are now conducting air pollution tests.

Many courses are offered within the School of Sciences Department which orient the student to the field of ecology—the relationship between organism and their environment. The Save Our Stream Committee, which lists the contacts by area, provides a free check clinic.

The Mechanical Engineering Department is studying the impact of fuels in relation to the environment. A brainchild of students in the Biological Sciences Department, the Ecology Action Committee has grown from simple awareness, now growing into a complex organization. Its main responsibility is to keep a wary eye on pollution on campus as well as other areas. The committee hopes to develop a program to reclaim the streams on campus, a program which has been started by biology students and faculty.

The Architecture School Poly Royal Committee plans to form a Community Design Center and work directly with the people of the community to improve their own environment. The committee hopes to develop a road in Poly Canyon to stop its erosion.

Within the School of Engineering, the Environmental Engineering Department offers courses which study environmental pollution. The first course in the series is Introduction to Air Pollution, which is open to all majors.

The Radiation Safety Committee regulates the use of radiological materials in lab experiment.

The Radiation Safety Committee monitors the use of radiological materials in lab experiment. The Radiation Safety Committee monitors the use of radiological materials in lab experiment.

The Biochemistry Department chooses a course in Biological Chemistry which orient the student to the field of ecology—the relationship between organism and their environment. The Save Our Stream Committee, which lists the contacts by area, provides a free check clinic.

*All I know about tuition is what I read today in the "Mustang Daily", and my first impression about that was, that if it passes, I don't think that I will be able to stay here too long. I work now and am also trying to get a loan, and I am having a hard time trying to get that."*
Netters win CCAA tourney

by RUSS BRABENAC
Sports Writer

The Mustang tennis team, once rated as the dark horse team in the CCAA Championship race suddenly became the team to beat as they won the CCAA Round Robin Tournament last weekend.

The Mustangs, now 4-0 in league play, made decisive victories over the other 4 teams and left no doubt as to who the Round Robin Champion was. The highlight of the Robin was the victory by the Mustang's over San Fernando Valley State last year's NCAA College Champions. The Poly netters trounced the Matadors 7-2.

Matador George Benedict beat Mustang John Ross 7-4, 5-3 in the number 1 slot and Tighe Taylor of the Matador team beat Larry Mores in the third slot 6-4, 7-6. The Mustangs, however, won the rest of the matches. Joe McGahan slipped by Brie Eisendrath 7-6, 6-1, 7-6, Bert Easley stomped Del Newquist 6-2, 6-1, Greg Piers over Jeff Marshall 6-4, 6-0, and Paul Summers beat Tom Conover 6-3, 6-4. The doubles teams fared as well. Easley and Mores knocked out Benedict and Eisendrath 6-3, 6-4, McGahan and Piers over Taylor and Marshall 8-3, 6-4, and Ross and Summers beat Newquist and Conover 6-4, 6-2.

The Mustangs had an easier time than other teams in the robin with the Matadors. They beat UC Riverside 8-1, Cal Poly Pomona 8-1, and Cal State Fullerton 8-4.

The standings so far into the season show the Mustangs to be in first place with a 4-0 record, San Fernando Valley State College in second with a 3-1 record, University of California at Riverside at 2-2, Cal Poly Pomona in fourth at 1-3, and Cal State Fullerton in the cellar with no victories and 4 losses.

This Robin ended the first set of conference play. The Mustangs will now play each team once more, the next match being the road against Cal Poly Pomona this Friday.

The next day, the team will stay on the road and travel to UC Riverside for an early morning match.

On April 17, the netters will return for a very important homestand against San Fernando Valley State. If they win the...
Mustangs are surprised by UCR nine 13-11, 3-1

Two Mustang errors in the sixth inning of the second game of a doubleheader Saturday donated three runs to the University of California, Riverside team and handed the Highlanders their second upset win of the day.

UCR gathered only seven hits in the first game of the set, but downed the Mustangs 1-1. The Highlanders then took the seven inning second game 5-1, despite rustering only three hits.

Allen Noble had opened the series Friday with a 2-0 four hitter, and the Mustangs stood a strong chance of sweeping the series with Dean Treanor and Bill Hall to pitch the doubleheader.

But, Treanor gave up six runs while lasting a third of an inning. And in the second game the fatal errors in the sixth broke up a scoreless pitching duel between Tim Hall and UCR's Jeff Nicholson.

The Mustang hurler loaded the bases on walks in the sixth, and with two out faced left fielder Randy Lance. On an attempted pickoff, catcher Dennis Wallin's throw to first overshot its mark and a run scored, moments later Lance lofted a fly along the right field line that the Poly fielder caught hard to catch up with, and added two runs scoring.

On an attempted comeback Rick Pence opened the bottom of the seventh with a double, and Wallin drove him in with a single. The rally terminated when UCR's shortstop made a leaping catch of a line drive off Hall's bat and turned it into a double play. Early in the game the Mustangs had loaded the bases on walks with none out, but after a forceout at home plate a perfectly executed double play ended the inning.

Twice in the game standout defensive plays by Mustang fielders prevented the Highlanders from scoring. Right fielder Mike Nichols threw a strike to the plate nail runner in the first inning, and a similar throw from left field cut down a runner in the seventh.

The first contest of the afternoon was a hitter's ballgame. UCR bombed Treanor for six runs in the first inning and added three in the second to take a commanding 9-1 lead. The Mustangs tried to come back, but never caught the Highlanders.

Larry Silva was the only effective Mustang pitcher to take part in the massacre, hurling the final four innings and allowing but one hit while whiffing nine opposing batters. But UCR's Charlie Slaughter effectively halted the Mustangs on a single run during the same stretch, and he was credited with the 13-11 victory.

Lee Smith had a home run, three singles, and three run-batted-in in five at bats, and teammates Nichols, Dave Oliver and Dave Yeasell contributed a pair of hits apiece. Tim Searle paced the Highlanders with three safeties.

Aikido not devasting

(Continued from page 7)

Aikido means to be in harmony with and is not just an art of self-defense but involves elements of philosophy, psychology, and dynamics. Otto skillfully pointed out that "It requires a cool collectiveness, lots of practice and a positive attitude if one is to become skilled enough to use it with precision."

The positive attitude learned in Aikido can be beneficial throughout life, stated Otto. "You make it possible to walk where you want without fear. By becoming a deterrent to violence, you will learn the knowledge and ability to control an attacker without hurting yourself or the aggressor."

Those who were unable to attend Saturday's demonstration and would like to join in may do so by attending tomorrow's meeting in Crandall. "I'll be first on the sign-up sheet, looking for a roommate who can move quickly," said one who was unable to attend Saturday's demonstration.
