Welcome to the world of POLY ROYAL '70
Royalty is present in 38th Poly Royal

Reigning over the 38th Poly Royal, which is spanning April 24-25, is Fresno co-ed Anne Barnum.

The 21-year-old social science major, who plans to begin graduate study and qualify for elementary teaching, enrolled for classes in 1966.

She is a member of the Cardinal Key honorary service society and the Music Board of Control. She is also a member of the Women’s Glee Club and last year was honor major in the Women’s Glee Club Newsletter.

She, like all other candidates had to be a senior with a cumulative grade point average of 2.7 or better. She was sponsored by the campus Rally Club.

Assisting Miss Barnum in the two-day monarchy over campus will be her four princesses: Mary Candiello, Linda Farrell, Kathy Nesbitt and Carole Vedder.

Miss Candiello, a native of El Segundo, is an English major and is active in the Women’s Glee Club and the Rally Club. She is also secretary of the Senior Week Committee.

Miss Farrell, who hails from Gridley, is a social science major and a member of the campus chapter of Pi Gamma Mu, an honor society for social science students and professionals.

Miss Nesbitt is majoring in human development and belongs to the Cardinal Key honorary service society. She is also a member in the campus ski club. Her home is in San Juan Capistrano.

Miss Vedder, of Sacramento, is a home economics major and a member of the American Home Economics Association and the Gamma Sigma Sigma honorary service society.
President's Welcome

CALIFORNIA STATE POLYTECHNIC COLLEGE
San Luis Obispo, California

April 24, 1970

President's Welcome

Welcome to the 18th annual Poly Royal, our "Country Fair on a College Campus." Whether you are a parent, a prospective student, or just a college enthusiast in Poly Royal's program or in college in general, you know that you will find much of interest.

Those who have not been on our campus for many years will probably be amazed at the changes they observe here this weekend. This will also be true for residents who live on the campus, for we have changed a great deal in a short time. We have added more facilities and new programs, and we have expanded the number of faculty and staff.

In these days of campus unrest, Cal Poly has been favored by a widespread spirit of cooperation and a willingness to work for change, not only by the students, but also by the faculty and staff. Cal Poly's tradition is to call the campus a "community," and this is evident in Poly Royal. "Poly Royal" is not a part of the college's official namesake, but the underlying purpose behind Poly Royal remains the same. We at Cal Poly want students, parents, and the general public to know and understand our college as it is today.

In the spirit of Poly Royal, the slogan "Many Hands Make Light Work" is appropriate. The goal of Poly Royal is not protest, but rather a celebration of the growth of Cal Poly. The large map included in this edition will help you to plan your visit to a hundred exhibits, displays, concerts, and more than thirty special events offered for your enjoyment and instruction.

Cal Poly has grown, and we will never be too large to record the bond of friendship and service to the people of the State of California.

I hope your visit to the campus -- be it your first or your 10th -- will be enjoyable as well as educational.

Robert E. Kennedy
President

Watched campus grow

Robert E. Kennedy, president of this college, has been a member of the faculty and administrative staff here since 1940. He has helped the college grow from an enrollment of 739 when he arrived on the San Luis Obispo campus to more than 11,000 students today.

Kennedy joined the faculty here in 1940 as an instructor in English and journalism, became head of the Journalism Department in 1948, and was named public relations director in 1949. From 1960 to 1967 he served as assistant to the president under the late Julian A. McPhie. Kennedy was dean of the Arts and Sciences Division from 1967 to 1969.

Kennedy served as vice-president of the college from 1969 until he was selected president by the Board of Trustees of the California State Colleges in April, 1970.

Kennedy has served on many statewide educational committees in his 30 years as a California State College faculty member and administrator. He is chairman of the Student Affairs Committee of the Chancellor's Council of the State Colleges Presidents, and a member of the 11-man national board of directors of the American Association of State Colleges and Universities.

Kennedy is the only president of a California State College who is a product of that system. He received his bachelor of arts degree in 1936 from San Diego State College where he majored in English. He earned his master's degree in journalism from Stanford University in 1950 and his Ph. D. degree in educational administration from Claremont Graduate School in 1960.

Kennedy is married and has four children, two of whom graduated from this college.

Young Louis honored

In the 1920's he came to the agriculture-oriented Cal Poly because he didn't want to be a farmer.

In 1934 he saved the Poly Royal Queen from being without her ceremonial headdress by fashioning a crown out of cardboard and glitter.

In 1960 he was named "Alumnus of the Year" and in 1968 was awarded a special "Mustang Award" for enthusiastic support of college activities.

In 1970, Young Louis, a 1923 graduate of this college will return to the campus to be the honored guest of the 38th annual Poly Royal. Now a commercial photographer, Louis had a brief fling at agriculture when he went to work on one of his father's seed farms. The long hours in the field did not appeal to his fancy. His next employment was that as a restaurant worker. By the time he worked his way up to second cook he realized that the hours of a cook were worse than that of a farmer.

After joining the Elmo Theatre as a stage hand, and working his way up to projectionist, Louis realized that if the projector ever broke he would have to do some searching before he could find someone to repair it.

After his 1923 graduation Louis was instrumental in setting up a student loan fund in the name of his electrical engineering instructor, Dr. J. W. Wilder.

Fourty-seven years after his graduation Louis says he would "like to see a closer relationship between the college and the city." Louis feels that "although the administration is making efforts," he would like to see the "local people make more of an effort. They would be much more interested if they knew more about what was going on at the college."

Of the campus mood today Louis feels that "Poly students are doing a fine job of keeping themselves on an even keel." He feels that students of this college are "clear-thinking" young people who do not need to attract attention through radicalism."
This giant eight foot cube will rest on the library lawn during Poly Royal. Constructed by student architects, the cube is to serve as a graphic unity for this year's Poly Royal.

Draft call drop

WASHINGTON (UPI) — The draft call for May will drop to 10,000 men, the Defense Department said today. The quotas in February, March and April were 19,000 each.

A Pentagon spokesman Jerry W. Friedheim, said, "I wouldn't read any significance into this drop," explaining that draft calls fluctuate in accordance with the number of men leaving the service.

Defense Secretary Melvin R. Laird said recently he expected draft calls this year would be "210,000 or below," or averaging 18,000 men per month.

Drill team not war mongers

by JOHN CAPUANO

War mongers, the Kaydettes are not, according to Jane Fisher, the 18-year-old president of the college women's drill team. People mistakenly associate the team with the military at a time when such an association is an unpopular one, especially with young college students. "We have nothing to do with the Army. There is no military obligation. We are just a social organization," stresses Miss Fisher, a sophomore from San Pedro, Calif., who hopes to go to some field of social work upon graduation.

Originally organized as a ROTC group, Kaydettes now stamp to emphasize its image as a social organization, concentrating less on drill work and more on serving the campus and community in a volunteer-help capacity. In keeping with this change, the membership has dropped its name from Reserve Officer Training Corps Kaydettes to simply the Cal Poly Kaydettes.

Although Kaydettes is a social group, its basic aim is to become proficient in fancy drill. Membership requirements for the ROTC department are people who are proficient in drill. Members draw on the advice and direction of the ROTC department, even though Kaydettes is a part of the department. Doug Hidek serves as the group's resident ROTC commander, instructing them in various drill procedures.

A movement is underway to make a national military service and honor society for women, a counterpart of Seaabees, the men's national military service and honor society. "We decided not to participate in the Army," states Miss Fisher, "because conflict can arise so easily when people get on each other's nerves. You have to work together," states the college sophomore. Furthermore, hours of practice are necessary in order to represent Cal Poly favorably in drill competitions and exhibitions throughout the year. Past trips include Santa Maria, Paso Robles, Santa Barbara and Los Banos.

To date, members have paid almost all of their uniform material and equipment. Most of the girls make their own uniforms which consist of a dress uniform, a campus uniform, and a short parade uniform. The group's main source of income is cash awards presented at parades. Kaydettes is a recognized budgeted group under Associated Students, Incorporated.

The Agricultural Business Management Club was formed to promote leadership and scholarship among ABM students and to provide service to agriculture-related industries. Among the individual benefits for active participation in the club are the opportunities to work with fellow students, to meet potential agricultural-business employers, and to gain the personal satisfaction of doing something to improve the educational system.

The club's objectives are found in three areas—the first being to stimulate and develop academic interests in members; second, to provide club members the opportunity to grow and develop socially; and third, to enable the members to develop their leadership qualities.

The fencing team's number one man, Doug Skilling, will be competing in the National NCAA Fencing Championship this weekend at Notre Dame.

The ABM Club, one of the busiest groups on campus, has an annual Fall Quarter barbeque, sponsors the Homecoming Coronation Ball, runs its excursions at the Poly Royal Inn and holds various seminars, meetings with prominent speakers throughout the year.

Musical variety offered

Open-air concerts, troubadours and quiet, intimate recitals are the ways the Music Department will contribute to the celebration of Poly Royal.

Opening ceremonies will be complemented by the first of two open-air concerts to be performed by the Symphonic Band. The band will give another concert at noon, Saturday, on the lawn in front of the Business Administration and Education Building. Performing several times during the year and going on tour this group has also made a record.

The Concert Band, a small and relatively new organization, will give its first concert of the year in the Amphitheater at 3 p.m. today.

The Collegians, a 14-piece dance band will perform at the Coronation Ball Friday night. The band performs both popular and traditional tunes in the style popular during the days of the "Big Bands."

Troubadours during Poly Royal come in two varieties, vocal and instrumental. The vocal group is the "World Famous Majors and Minors," a 13-man barbershop group.

In keeping with the wandering minstrel idea will be the groups, the Chamber Singers and Dixieland Band, an offshoot of the Symphonic Band. Their performances rival those in New Orleans.

Post-Poly Royal recital will be given Sunday night by two other

a few members of the Chamber Orchestra.

The Music Club has also planned a display of Music Department activities, which will include a slide show.

Ag Council promotes educational activities

The Agricultural Council, a board of students representing the various departments and classes in the School of Agriculture, strives to be a communications network which conveys the ideas and thoughts of agriculture students to the Student Affairs Council, the primary governing group on campus.

In addition, the Ag Council includes members on the Student Judiciary, the Cal Poly Student Planning Commission, the Publishers’ Board, the College Union Board of Governors, and the Homecoming Committee and the Poly Royal Committee.

The Ag Council conducts campus tours for elementary school classes which want to see the agriculture units, holds an annual leadership banquet to recognize agriculture students with distinguished records of leadership, and sponsors Farmer’s Day activities in San Luis Obispo.

The Ag Council also hosts visiting Future Farmers who are on campus for state FFA conventions and judging finals, maintains the bulletin board in front of the Agriculture Building.

Dog races

The first annual Poly Royal Dog Race is being held tomorrow in the field behind the Men’s Gym from 10 a.m. to noon. Five classes will be featured and the contest is being sponsored by the campus Farm Bureau.

College Union work continues

"I've been putting my money into that thing over since I started school here and now they say it won't even be finished until December. I won't even be here in December!"

"Well look, they've had their troubles." "Sure, but they were supposed to have it finished in October of '69. I bet they didn't have that much trouble with the Great Wall of China."

"They didn't have to put up with monsoons and labor strikes. Well, labor strikes anyway."

That's the way it's been with the new College Union facility. When it wasn't the rain it was the workers. We weren't even lucky enough to have them both at the same time. The rain held things up for six months and the labor went on strike for three months. These things all happened last year.

Peter Phillips, facilities planner on campus, said the work is about 65 per cent complete on the three million dollar complex, which will include a bowling alley, snack bar, banquet hall, book store, billiard room, lounge, conference rooms and student governmental offices.

It is now beginning to look like a real building. Most of the windows have been installed and, according to Phillips, the interior design have been completed. Barring further delays the completion date is set for December 1970 with people moving in during the quarter break.

Ag, Engineering draw most foreign students

Agriculture and Engineering tend to be the most popular majors with the foreign students who attend this college.

Of the 469 foreign students on the campus this quarter, about 300 are enrolled in the School of Engineering and another 100 in the School of Agriculture. Forty are in Applied Science, with Printing Technology just about accounting for the rest.

According to the Foreign Students Office, these students come from 63 different countries. Seven countries contribute a great influx of students. Taiwan is represented by 18 students; Hong Kong; 43; India, 25; Pakistan, 42; Vietnam, 20; Thailand, 31; and Iran, 94.

Glen Rich, foreign student adviser, states, "While attending Cal Poly, many were very active in college and community affairs and shared their culture and ideas with American families. They have been excellent ambassadors in promoting inter-

nternational understanding and goodwill."

ROTTC team applauded

The Cal Poly ROTC Drill Team was wildly applauded and recognized for its fine performance in the Annual Governor of Arizona Drill Meet on April 11, according to Maj. Arnold T. East, the team's faculty advisor. Top prizes once again were awarded to last year's winner, Howard University of Washington, D.C.

Competing from Cal Poly were: Michael J. Barron, John Bertram, William J. Braund, Steve Guderhahn, Doug Hidaka, Steven Hurlburt, James Kang, Gary Magrino, Frank McGee, David McPherson, Jose Morales, Ronald Nakamoto, Larry Nottingham, Pedro Rosado.

Be in style during Poly Royal—go Western!

The meet was held in Phoenix.

We have everything to complete your outfit. Boots, hats, belts, shirts. Lee's Levis...

CAMPUS PRODUCE STORE
SNAP offers draft help

Do you know your rights under the Selective Service System? Are you confused as to just what obligations and alternatives pertain to the present draft-lottery system? If you are, help will be available on campus in the form of a Draft Help Center which will provide information and counseling to deal with these problems.

The center, a Students for New Action Politics program, will provide assistance on the first and third Wednesdays of every month in Math 148. Counseling for legal procedure in filing for alternative status to military service will be available, including information from the Central Committee of Conscientious Objectors. Alternatives to the draft will not be the only type of counseling offered, any and all questions involving the draft will be welcome.

SNAP president Sue Malcolm stated that after a brief dispute over the name of the Center with the administration, the program was set up to offer its services without forcing any views, in the form of information or counseling, on anyone who seeks help at the Center. The aim of the program is simply to inform people of their rights and alternatives, as well as the legal procedures required by the local draft boards in dealing with draft problems.

In addition to the Center’s activities, several faculty and community members will be available to support the Center and to advise and offer legal council.

Anyone in need of immediate help, or unable to make the scheduled dates, can call Free U at 543-029.

Architects begin the job of giving the much visited Architector Patio a facelift for the 1970 Poly Royal. This year’s patio will feature a flooded area in front of the stage.
Poly Royal organized by 125 member board

There is much more to Poly Royal than meets the eye, and it is the job of the Poly Royal board to control these invisible features of the country fair on a college campus.

Don Colvin, general superintendent of Poly Royal, says that the purpose of the Poly Royal board is to plan and coordinate all activities. The board consists of one representative from each chartered campus club and council, approximately 25 members. An executive board is elected to serve as the group's over-all leaders.

Colvin feels the "purpose of Poly Royal is to be a festive open house showing Cal Poly's educational facilities, and student interests and accomplishments." It also provides a preview of trends and innovations in various fields. Both Colvin and Axell explained that Poly Royal is a student thing. Without the students, the administration could never have a successful Poly Royal Colvin, noted.

Campus church groups

Four of the campus' religious organizations will display and exhibit during Poly Royal. The different aspects and activities of each club.

The Inter-Varsity Christian Fellowship and Campus Crusade for Christ will be working together in their effort to show the reality of religion through the world of folk music.

The "BT" (Soul Salvation house) and "The Inside Story" will be performing on the lawn in front of the English building. These singers—students from the campus and nearby Cuesta College—along with Sharon Banas, a new talent from UCIB, will be performing a wide variety of numbers, while concentrating on many new "soul-searching" tunes.

Alpha Omega Fellowship plans the Chemical Magic Show for Poly Royal. Hansen, a new talent from LICSB, will present this show in Science E-27. The show will be sponsored by the Chemistry Department in Science E-27. The show will attempt to Illustrate how religion can affect the individual's life.

The Christian Science Organization, through its exhibit on display in Room E-30 in the Science building, will attempt to inform people about their faith. Coordinated by Barbie Scott, Maria Bishop, Bob Webb, John Nuffer and Jerry Reibman, club members will be available for discussions.

to produce a new twist to life as they invite you to enter their "Plan of Salvation." Spanning over 50 feet long on the lawn in front of the library, the massive puzzle attempts to illustrate how religion can affect the individual's life.

Video-recorder used in documentary film

This year’s Poly Royal will see a remarkable innovation for the campus. An advanced journalism course in electronic media is producing a 20 minute documentary on the operations of the Journalism Department.

The fact that the documentary is being created is not so remarkable, but the way it is being produced is. The real thing is being done on the department’s new video-recording equipment.

The department recently purchased the Sony equipment so the students can become acquainted with the recent innovation in the field of electronic journalism. It includes not only studio-type camera, complete with tripod, but a fully portable unit that weighs approximately twenty pounds.

The documentary will feature the three main facets of communication found on this campus, Mustang Daily, El Rodeo and KCPR.

The documentary will be aired frequently on a monitor located in Graphic Arts 220.

Poly Royal rodeo rides again

by SUSAN NYDER
Staff Writer

It is well known among rodeo people that this college has some of the best rodeo material in the nation. They have been the National Inter-Collegiate Rodeo Association Champions in the West Coast Region for the past several years and have always ranked high in the national championship standings. The NIRA which promotes rodeo as a standard national intercollegiate sport has six regions with 110 colleges and universities that have rodeo teams. This school belongs to the West Coast Region and competes in regional rodeos throughout Arizona, Nevada, and California. The Mustang team is currently No. 1 in the region. Team captain Larry Ferguson, Women’s team, backed by Robin Duncan and Donna Carter. Bill Gilby, instructor Animal Husbandry, is the team’s advisor.

The 20th Annual Poly Royal Rodeo will include the standard NIRA events saddle bronc, bareback, bull riding, ribbon roping, calf roping, steer wrestling, barrel racing, goat tying, girls break-away, plus team roping.

Saddle bronc: riding is done with a plain halter, one rein, and a saddle. The cowboy must ride for eight seconds using only one hand and spur the horse continuously to score points. He is disqualified if he bucks off, changes his hand on the rein, touches leather or the horse with his free hand, wraps the rein around his hand, or rides without locked rowels on his spurs.

The same rules that apply to saddle bronc riding generally hold true for bareback riding. The cowboy uses a one-hand rigging and is scored from 1 to 25 by each of two judges on how well he rides. Each judge rates the horse from 1 to 5 on how well he bucks, and the four scores are added together for the ride’s total points.

A bull rider, using a loose rope and one hand, must stay on his bull for eight seconds. He is not required to spur the bull, but can gain extra points by doing so. A strap is pulled tight around the bull’s flanks so that he bucks harder in an attempt to get rid of the strap. A bull rider is disqualified if he bucks off, touches the bull or rope with his free hand, or rides with sharp spurs.

A ribon rope starts off from behind a barrier, ropes his calf, diamonte, and with the help of a mudder pulls off a ribbon that is tied to the calf’s tail. He then races back to the finish line on foot with the ribbon. The calf is given a head start, and if the rope leaves the box too soon, he breaks the barrier and a penalty is added to his score.

Calf roping is similar to ribbon roping. However, after the cowboy has roped his calf and dismounted, he must flank the upricht calf on his side and tie any three legs together with a piggin' string. To be legal, the tie must hold for six seconds.

A steer wrestler gets off his horse at a fast gallop and takes the steer by the horns and throws him to the ground. Time is called when the steer is on the ground with all four feet and his head are facing in the same direction. A hazer rides on the other side of the steer in order to keep the 600 pound animal running as straight as possible.

A barrel racer must circle the barrels that are set up in a triangular pattern. She starts off at a fast run, circles each of the barrels in a clover-leaf pattern and races back across the finish line in the shortest time possible.

Enjoy the very best!

**Feedback: What does Poly Royal mean to you?**

*By Dale Kern and Ray Morawski*

**Busie Rowe, B.S., Sci., Sen.**

"I think that the Ag and Architecture departments do the most now. I like the informal idea of being able to go where you want over a two-day period. I would like to see the Social Science department do more for Poly Royal."

**Brian Adams, Arch., Jr.**

"I think that it is a good idea that it's two days only so that we don't have to be out of school any longer. As far as change, I think that it is good just like it is. It is good that it gets students involved."

**Terry Balamboo, E.T., Soph.**

"I think that they should have more student participation and more contests for the students who build projects. I think that they should have go-cart races and more activities for the students to participate in."

**Bruce Dunn, Bus., Sen.**

"It is great because it gives students a chance to participate as well as faculty. It is a wonderful opportunity for people to come and see what is really going on on this campus. I think that it should be held during school time because it is a school activity."

**Mike Reif, Arch., Soph.**

"I think that it is very worthwhile, but I don't think that people really understand what the purpose is. People don't know all that goes on behind the scenes. I don't think that the students realize that it is a learning thing and what can be done when everyone gets together on a project."

**Bruce Dunn, Bus., Sen.**

"I think that it is a good idea to keep it the way it is. I like the idea of the students getting together and making an effort. I especially like what the Architecture Department is doing this year."

**Jannel Balmanno, B.S., Sci., Sen.**

"I went to Poly Royal last year and stayed about a half a day. I went with my parents and really enjoyed it. I think that it gives people a chance to come see all that Cal Poly has to offer."

**Karen Aquistapace, Home Ec., Sen.**

"It gives people an idea of what is going on. I think that it is a good way of promoting the college as we get a lot of people here to see all the new developments that are here."

**Phil Hindenach, Arch., Jr.**

"It should be an exhibition with each department putting out all that has to offer. I don't think that it should be a propaganda type of thing but it should be something for the students to enjoy."

**Clint Janzen, B.S., Sci., Jun.**

"I think that it is too much the same each year. I think that something should be done to emphasize each and every department. I think that some things should draw more attention other than just the rodeo."

Archies go ‘all-out’

by CAROL CHADWICK

Staff Writer

Hot, hot, hot. Last week was a long one for almost everyone in the school. By the end of the week, almost every student was more than ready to head home. But for one group of students, the end of the week meant a big celebration.

The School of Architecture has planned a week-long event to celebrate the completion of the new building. The event is called Poly Royal, and it promises to be a week of fun and excitement for everyone involved.

The architects and engineers behind the project have worked tirelessly for months to complete the building on time. Now that it’s finished, they’re ready to show it off to the world.

The event begins on Monday with a ribbon-cutting ceremony. The mayor of the city will be there to help cut the ribbon, and there will be speeches by the architects and engineers involved in the project.

On Tuesday, there will be an open house for students and faculty to tour the building and see all the hard work that has gone into it. There will be guided tours of the building, and visitors will have the chance to ask the architects and engineers questions about the project.

On Wednesday, the school will host a festival in the new building’s courtyard. There will be food, games, and music, and visitors will be able to see the building up close and personal.

On Thursday, the school will hold a grand opening ceremony at the building. There will be speeches by the architects and engineers, as well as by the mayor and other city officials.

On Friday, the school will host a gala dinner and dance in the new building’s ballroom. The event will feature live music and dance performances, and there will be a silent auction with proceeds going to benefit the School of Architecture.

On Saturday, the school will host a grand opening celebration for the public. There will be food, games, and music, and visitors will be able to see the building up close and personal.

On Sunday, the school will host a final open house for students and faculty to tour the building one last time before the event comes to a close.

Architects and engineers who have worked on the project will be on hand throughout the week to answer questions and discuss the building with visitors. They will also be available to answer questions about the event and the building itself.

The event is free to the public, and there will be no limit on the number of people who can attend. Visitors are encouraged to come out and celebrate with the architects and engineers who have worked so hard to make this project a reality.
Food featured

Such savory items as wonton, chicken dikkas, goob jamas, and shankheeb, make Poly Royal a delight for those with a taste for international dishes. Many foreign and ethnic clubs will be serving up their home-style specialties Friday and Saturday in food concession booths scattered throughout the campus.

Two styles of shankheeb are available. The Iranian Student Association will be serving their version with salad, boiled tomatoes, and bread and butter. The Arab Student Association has added something new to their shankheeb plate. A dish made from crushed wheat cooked similarly to rice will complement their version of the skewered delight.

Spiced chicken dikkas, similar to barbecued chicken, is being prepared by members of the Pakistani Student Association. Something like donuts, gulab jamun, made with flour, cottage cheese, and sugar is also a specialty offered by the Pakistanis.

Members of Hui O'Hawaii are serving teriyaki meat on sticks and, of course, Hawaiian punch. The United Mexican-American-American Students are preparing tacos, using cilantro, a Mexican spice, to give them authentic flavor. Bagels are the featured specialty of the Israeli Student Association booth.

Egg rolls, wonton, and shrimp flavored chips are the items offered by Poly Chi, the Chinese student organization. People to People international club is featuring a varied international menu.

In addition to demonstrating the culinary aspects of their cultures, many of the clubs have also set up cultural display booths showing handicrafts and arts of their countries. All of these booths are located in the enclosed patio area outside of the library.

The International Council is coordinating the display efforts of the Latin American Club, and the African, Indian, Iranian, Pakistani, Vietnamese, and Arab Student Associations.

Circle K plans yearly breakfast

Circle K, the campus service club affiliated nationally with the Kiwanis Club, will hold its Sixth Annual Pancake Breakfast tomorrow. The meal will consist of pancakes, sausage, orange juice and milk or coffee. It will be served on the Library Lawn from 8 a.m. to 11 a.m. A donation of $1 per person will be charged.

SACRAMENTO (UPI) — The legislature has been served with a take-it-or-leave-it proposition on Gov. Ronald Reagan's $468 million tax revision program.

Assembly Speaker Robert T. Monagan, one of the major backers of the governor's proposal, said "It's the best tax reform program that can be devised" and put susceptible to "major compromises."

The entire exhibit is located in the Machine Shop on the North Perimeter Road, near the Ag Engineering shops and labs. The security and fire risk will be posted around campus by aid interested persons in fields of ET. Juniors and seniors will have to take the public guided tours of the area.

Showmanship contest set

The annual Poly Royal Feed and Show will be held at the Feed Barn. The emphasis on the animals conforms with the emphasis on the mechanics ability to show his cattle, more than the animals conform.

The contest will take place in the Beef Pavilion, at 4 p.m. on Saturday. Judges will be shown the fitting, grooming and handling of the animals.

As for the meet this week, Purcell thinks that the college would have a display of welding machines, some demonstrations of welding techniques, a method of joining very small connections is a specialized technology and is being offered by the Ag Engineering department, each visitor is presented with a souvenir rate that they can watch and enjoy.

The year 1970 is still a new one and yet we have already seen many major events in the news. The Apollo 13 mission is uppermost in our minds, but 1970 has also seen the first mail strike in this nation's history and the refusal of the second Nixon Supreme Court nominee.

Probably the most widely publicized item has been the great concentration of millions of people on the pollution problem our nation faces today. With advancing technology man also has contributed greatly to the imbalance of nature.

Biologists, large corporations, businessmen, students and many others have banded together to fight the problems that threaten to destroy us all.

With this in mind we invite you to view the many exhibits on campus this week-end. Many are geared towards the problem of pollution and possible solutions to these problems.

As you view the exhibits, visualize the world in a few years if these ideas are not put into effect. Then we hope that you will realize there is something you can do to help save the world in which you live.

Welcome and we hope you'll enjoy Poly Royal 1970.

The Editors
A sheriff's deputy collars a youth in the Isla Vista area near the University of California at Santa Barbara. One student was killed and many were arrested during the night of violence near the campus. A 6 p.m. to 6 a.m. curfew was set for the area.

**Organization big job**

by SCOTT SMITH
Staff Writer

As I drove away from his house, I thought about the interview Don Colvin and I had just completed. I thought of the planning, the hard work and the extra hours of worry a person of his position puts in to stage such a mammoth event as Poly Royal. The position Don holds is Poly Royal Board, general superintendent, but to put things simply, we call him "head honcho" of planning, the hard work and the acquired his job at an election of mammoth event as Poly Royal.

One day he walked out, just what hit him hard. The position Don holds is Poly Royal Board, general superintendent, but to put things simply, we call him "head honcho" of planning, the hard work and the acquired his job at an election of mammoth event as Poly Royal.

"We were trying to tell people what Poly Royal was all about. With at least 30 per cent more students and teachers, it makes the job a lot tougher."

Don's point is made a lot clearer when looking at the growth and advancements Poly Royal has made in the last year. 1968's total of concession stands was Poly Royal was 84 compared to 1969's total of 102.

Kevin Morgan was the type of person most of us like to pattern our own lives after. He was a friendly person, intelligent and dependable. He had a certain moderation about him—he thought he could get the attention of any radical and talk to them, maybe even change them.

"He was a very intelligent person."

Kevin Morgan was the type of person most of us like to pattern our own lives after. He was a friendly person, intelligent and dependable. He had a certain moderation about him—he thought he could get the attention of any radical and talk to them, maybe even change them.

"For What It's Worth," by Buffalo Springfield. A man was killed last weekend. I think it's about time that we stop and look around and find out what it's really worth.

Kevin Morgan was a 33-year-old student who was planning to graduate in May. He had his problems, but to put things simply, we call him "head honcho" of planning, the hard work and the acquired his job at an election of mammoth event as Poly Royal.

"What a field day for the "heat" trucker's of police drove up the street. Tear gas was shot into the crowd. People just ran out. A man was killed last weekend.

Morgan was the oldest of ten children. His father, Malachy Moran, called his son "my good right arm. He set an example for the entire family."

Kevin Morgan was the type of person most of us like to pattern our own lives after. He was a friendly person, intelligent and dependable. He had a certain moderation about him—he thought he could get the attention of any radical and talk to them, maybe even change them.

"He never got his chance. He was cut down by a single bullet form the gun of a man with a gun over there. Sunday morning in the Isla Vista district adjacent to the University of California at Santa Barbara campus.

Morgan had been studying with his roommates. Friday night in their Isla Vista Duplexes when they heard an appeal from UCEB student body president Bill James on the radio to students to help control the rioting that had taken place. The heavy student-populated district Thursday and Friday night.

They left for home early Saturday, and joined by many others who heard the appeal on the radio, they attempted to quiet the violence.

A Molotov cocktail was thrown onto the steps of the Bank of America, and Morgan and his buddies attempted to put it out. The demonstrators surrounded the bank and closed In on It, In another sense, we should consider ourselves fairly lucky that we are able to pursue our studies without the hassles and interruptions that those at UCEB are frequently hindered by. We are lucky that we don't have a 6 p.m. to 8 a.m. curfew with helicopters hovering above us enforcing it.

In many ways, the students at this school should consider themselves fairly lucky that we are able to pursue our studies without the hassles and interruptions that those at UCEB are frequently hindered by. We are lucky that we don't have a 6 p.m. to 8 a.m. curfew with helicopters hovering above us enforcing it.

"There's a story happening here. What is it? What is it?" I thought it's about time that we stop and look around and find out what it's really worth. I was there last weekend. I wanted to see what a "real" riot was like; this college doesn't offer such a course in its curriculum. When I went into Isla Vista, I felt I had entered the streets just like the majority of the rest of them. I wanted to say I was there just in case anything controversial happened. I would be able to come back to this school and tell some exciting yarns to my fellow students. I would make myself into a hero. When the tear gas canisters were shot off, I ran as fast as the rest of them.

In many ways, the students at this school should consider themselves fairly lucky that we are able to pursue our studies without the hassles and interruptions that those at UCEB are frequently hindered by. We are lucky that we don't have a 6 p.m. to 8 a.m. curfew with helicopters hovering above us enforcing it.

But in another sense, we should look at their problem with both eyes wide open. This is hardly an encouragement to riot, because I have yet to figure out that those in Santa Barbara are rioting their lives for, Martin Weissberg once said, "If a man has not found something worth dying for—his life for—he is not fit to live."

"Don't get involved in something that the entire family."

"Don't get involved in something that
Audio Visual staff is service oriented

by ANN OMMERT
Staff Writer

Deep down under the Business Administration, Administration Building is a basement filled not with musty, useless objects, but rather in the heart of an organization.

Two interwoven programs, the Instructional Materials Program and Instructional Production Productions (IMP-VEP), work in a dual operation to form the Audio Visual Department. These two operations, working in tandem, act as a producer, consultant, and distributor of instructional aids not only for this campus, but also for the world.

It takes a large staff to keep an organization this large functioning smoothly. There are technologically advanced departments in Audio Visual-A or V.

Production is headed by John Hines. Services are organized under the direction of Marcus Gold. The head of IMP is Clyde Hiney.

Wides, inlaid dressing boards and stacks of paper, creative sketches hung on the walls...are in various machines fill the production room. Working inside are two of the best assistants, Williams and Karen Treenor. Not far away productions coordinator and the production assistants are on the top desk. There are also three student assistants.

Down the hall, in a fully equipped classroom where students work on their own, is the staff photographer Boyd Wettern. He is in charge of the photo unit for the college.

A-V's new buildings, E or V, the "visual picture of Cal Poly is its major concern in productions. In this new age, for either personal, club or committee reasons are not filled, all of these are filled with ideas, "We help the faculty with visual aids, but if everyone came down we wouldn't be able to do it all," stated Reynolds. Not all teachers believe in audio-visual aids and some "still prefer the board and a piece of chalk."  

In the same vicinity is a shop where classroom equipment is repaired by three workers. It is important to the system because damaged materials would either be sent to a repair shop or be replaced with new material. "This year's won the "Princess Award."

Because the school's grants were funded to California and in some cases outside the U.S. for materials. The department decided to sell outside the state for a twofold reason. First, because they were spending money initially for materials which are taken from taxpayers in all states, they use equipment that they can afford. Secondly, if they expanded production they would have more available to use. Orders are now placed free in every state in the union and now a department is being established including both sides of the Arab-Israeli dispute. A $100,000 order was recently made from an international distributor of materials. "It will be better as we have a separate department to handle non-domestic affairs," stated Hostatter. The main problem with A-V handling non-domestic affairs is that they are not prepared to handle non-domestic affairs, stated Hostatter. They will be prepared to handle non-domestic affairs by the end of this year.

Possibly as early as next year, the Audio Visual department will be comparable to the national distribution. This would help fund the University's expansion into new countries and again lowering costs to California teachers.

Many teachers thought that later generations would be able to replace his faithful cowpony? It wasn't long ago that people used to teach machines to teach teaching people. In the eastern U.S., however, there is a school that has completely programmed computer. Because of finances, this college is a long way from that. But as far as matters go, the future of the computer looks mechanical.

The reason was noted the increase in computer assisted instructing and is constantly increasing in both the U.S. and the state of California. The most sophisticated tool is in the computer program. The more sophisticated, the more the equipment will cost. As the students grow older, it is not just the computer technology used, but rather the students themselves.

On the desk (and my mind) are two articles: Ronald Reagan's article on campus violence and the Fair-Fair Fair Symposium entitled "My Love. A Report on the Massacre and its Aftermath," in the May 1570 Journal on the Massacre and its Aftermath. He is saying here but would like to be recorded. Neither is this so. It is a dispassionate look, and the best I can do. His campaign was the first time I have seen so much black and white in the world. If not a dispassionate look, it is a dispassionate look. He was saying, "In his efforts, His campaign was the first time I have seen so much black and white in the world.""

"To live in this environment is to be a Sacramento. I'm just as cosmopolitan as Ronald Reagan as I am with Reagan's spirit. He is with us."

"Tired, white and blue, I trudged."

"Red stands for a kind of man. He is quiet, gentle, serene, and patient."

"Brown stands for a kind of man. He is gentle, serene, and patient."

"Green stands for a kind of man. He is gentle, serene, and patient."

"White stands for another kind of man. He is gentle, serene, and patient."

"Black stands for a kind of man from the equatorial zone. He stands for a kind of man from the equatorial zone. He is native, not foreign."

"He deserves an ear, if not a hug."

"He is a blend. He is the mix of black and white."

"His campaign was the first time I have seen so much black and white in the world."

"He was saying, in his efforts."

"In his efforts, his campaign was the first time I have seen so much black and white in the world.""
Cattle working time is a busy time on Escuela's spread. Here students apply a hot iron to a bowling calf at branding.

Five students win honors

Members of this college's debate squad won several honors at the Northern California Forensic Association's spring individual events championship tournament at American River Junior College in Sacramento April 17-18.

Twenty one schools from all parts of the state participated in the tournament.

Five students from this campus, Bowsera, Smallsen, E. Pinson, Bruce Wilkinson, Nevada Barr, and Debbie Ware composed the entry in Reader's Theatre program at the tournament. Reader's Theatre is a group presentation of literature. It is a chance to learn how to handle commercial speaking practices which might be encountered asIdlly after graduation. The competition on this project makes some decisions concerning the cattle, make reports to the program and says Flanagan, "I have the students figure a budget on a hypothesis of price and base their work on this. So they know what taxes and interests on investments they would be paying. From this they want to make the project a success to the real commercial firm.

The Escuela Ranch Enterprise covers about 2,000 acres. The cattle project in turn, repays the college. In the preliminary rounds of the novice oral in expository speaking, Dhinsa's project made him a winner in the preliminary rounds to win him a certificate of excellence.

This college won as many awards as any other school participating in the team. The success at this tournament makes the year's debate round a superior one. Many of the students learned to participate in individual events or debate next year should contact James Conway in MCB 104.

Dean named

E. Douglas Carter, a member of this campus' faculty and administrative staff for 18 years, is the new executive dean at the college.

Appointment of Germaine, 41, to the post was announced by Dr. Robert E. Kennedy, president of the college, following the recommendation of a committee composed of members of college Academic Senate, Staff Senate, and Associated Students, Inc.

Ranch offers training

by LYNEE CARTER
Staff Writer

The agricultural enterprise project at this college, a proven plan, offers ways to augment students with job skills in their various academic programs. Among the students to view, first hand, the concepts that the classroom does not offer, it places not only some of responsibility upon those who enter the project, but it reflects the commercial aspects of agriculture.

Different enterprises are sponsored by the California State Polytechnic College Foundation. The foundation organization, backs the enterprises by supplying needed funds. The college, in turn, repays the foundation for the loan. Two thirds of the enterprises are divided among those who worked on it. The other third is returned to the foundation.

One such project is the Escuela Ranch Enterprise. It covers about 2,000 acres. The cattle project in turn, repays the college. In the preliminary rounds of the novice oral in expository speaking, Dhinsa's project made him a winner.

The system was constructed in this way, according to Flanagan, that the students can learn to handle commercial practices which might be encountered asIdlly after graduation. The competition on this project makes some decisions concerning the cattle, make reports to the program and says Flanagan, "I have the students figure a budget on a hypothesis of price and base their work on this. So they know what taxes and interests on investments they would be paying. From this they want to make the project a success to the real commercial firm.

The Escuela Ranch is located 8 miles north of downtown San Luis Obispo. The computer age Is being put to good use by many commercial agricultural farms. The Escuela project uses computers for tracing the calves to their mothers. The cows are then charged the weaning weight of their calves, and their ranking. All this information is kept on computer cards, and can be recalled at any time for use in production record analysis.

The nutrition of the cattle centers around three categories, large cattle, small cattle, and feeder cattle. The type of range land in this area has annual grasses, says Flanagan. The cattle are moved in a four-year cycle. The carrying capacity of the land is six to eight acres to one cow. The production of the cattle is governed by the acreage. When these grasses taper off, in the late fall and early winter, hay and energy supplements are used. Flanagan adds that the project's land is well watered and currently, range fertilization is being used to increase forage production.

And while the steer are being sold, crossbreeds between the two, are the type of cattle used on the project. The Angus are solid black in color, Herefords red and white, and the crossbreeds are black with a white face.

"You get certain genetic advantages in crossbreeding: Harder calves, milking ability, and the advantages in crossbreeding: Harder calves, milking ability, and the advantage is that they are better for the beef industry. For those newly graduated students wishing to get off the campus and get into the beef industry, this will set them as a guide, when the graduate embarks into the beef industry, knowing both knowledge and preparing him for that big step.

Dance concert features variety

The Astec legend of how the canoe began with the birth of the sun is presented for a featured act in the Spring Dance Concert, to be presented April 7 and 8.

Being produced by the college's Physical Education Department, the concert begins at 8 p.m. daily in the Little Theater. The public is invited to attend.

With the Aztec culture being the theme of the concert, the students of MCB 174, the Aztec Tribe, as its title, the number which is scheduled to open the show on April 7.

The students are working on the project. The Escuela Enterprise offers various agricultural pursuits. It is a unique way to acquaint students with the programs. The Foundation, a non-profit organization, backs the enterprise, in turn, repays the Foundation for the loan. Two thirds of the enterprises are divided among those who worked on it. The other third is returned to the foundation.

The Astec legend of how the sun came from a classroom and putting the students out of a classroom and putting him or her into a real job is important. The students will work on the project. The Escuela Ranch is located 8 miles north of downtown San Luis Obispo. The computer age Is being put to good use by many commercial agricultural farms. The Escuela project uses computers for tracing the calves to their mothers. The cows are then charged the weaning weight of their calves, and their ranking. Classifieds are not too famous

by BONNIE ANDERSON
Staff Writer

What classified section? Compared to the L.A. Times' 10 pages of classified ads, Mustang Daily has reached one column. Enterprisingly, that's not too bad given this isn't the Times. This paper is, however, supreme campus medium with a circulation of 6500. The Mustang classified section was started last quarter according to Advertising Manager Ann Jones. As, "New arrivals open with favorable rates that now make advertising for students something other than an impossibility."

With all good intentions advertised, it seems with much regret the Mustang classified section is near death. Mr. Jones put it this way, "We led a bad start in that the first printing of the classified wasn't there but after that it picked up and was rapidly expanding but during this quarter it has really started falling off."

Why? It was this reporter's attempt to find out why and I didn't expect. Records were taken of all the students who had used the classified section.

Thirty of the people who had placed classified were contacted by phone. They were asked two questions: 1.) Did you satisfied with service you received? and 2.) Would you use the Mustang classified section again?

The results were as follows: Only three out of the thirty students contacted denied the service and only one of those who did "Wouldn't advertise a second time, I don't want the hassle and don't want to advertise."

Donald A. MacLean, curriculum coordinator for the Department of Oceanography, San Diego County, will discuss latest developments in oceanography including mining the sea, human consumption of algae and plankton, underwater apartments, deep submarine vehicles, Sea Lab II, the marine mammal, salty water conversion, artificial reefs for humans, and the changing world-wide weather. MacLean is a part-time instructor in oceanography at four University of California campuses.

Cash for study

Margaret Ann Jacobson, an interviewer on the staff of the Placement and Financial Aid Office here since last September, has been selected to receive a 500 cash award for graduate study in student placement.

Mrs. Jacobson is one of three persons named by the Western College Placement Association to receive 1970 Vera Christee Summer Fellowships for 1970.

The Vera Christee Summer Fellowship program provides financial support for professional members of the placement staff of any WCPS member college or university for the purpose of pursuing course work designed to enhance his or her professionalism in the field of placement.

Sea explored

The resources of the sea will be explored by the keynote speaker of the Agricultural Engineering Society banquet to be held in the Elite Club in San Luis Obispo at 7 p.m. tonight.

Home Ec day

A College Career Day for students interested in home economics or child development careers will be held today by the Home Economics Department, the career day is open to high school and community college students, teachers and counselors from throughout California.

Objectives of the career day program are to introduce students, teachers and counselors interested in child development and home economics to the various opportunities they provide to course programs, faculty and students.

"Round the clock is required if these architects hope to finish their chores, and get a chance to enjoy Paly Regal."

Students teach in north area

Settlers in the local area by student teachers has created an expansion by the Education Department into new counties. Salinas Union High School District welcomed nine graduate students on March 26, according to Richard V. Jones, Coturer of Student Teaching. Jones stated that these students are becoming more involved in their districts by building up a neighborhood and are gaining "superior experience."

Home Economics, English and Spanish are subjects being taught by students in the new Salinas teaching center.
Garbage for paving?

Staff Writer

Kennedy made his millions on Wall Street. Rockefeller made his millions on oil. Saracusa is making his millions on garbage.

On garbage

Who in the hell is Saracusa?

John Saracusa of Los Gatos is the inventor of a revolutionary new way of disposing of soluble waste (garbage). This new invention could be the most effective way of getting rid of pollution — since the invention of the can.

Saracusa, a brick mason by trade, became aware of the problem of disposing of waste while discussing the problem with his daughter’s boyfriend, a garbage man. He came up with the idea.

Instead of the conventional burning of garbage, he proposed that the waste material be ground up and then burned at a very high temperature. With more in depth thought he went to Food Machinery Corp (FMC) of San Jose and told them the idea. After three years of research and experimentation, bids were sent out for the manufacturing of the first disposal system.

The machinery consisted of a series of two crushing units, both powered by 500 h.p. electric engines. The first installation grinds and crushes any size and kind of material, from tree stumps to entire refrigerators, into six inch chips. At this point any metals that can be recycled into industry are segregated.

The remainder goes into the second crushing unit which reduces the garbage into one fourth inch chips. These chips are forced by centrifugal force into an oven burning at 2700°F. The burning process is smog free.

The final product is used in much the same way any gravel is used; in bed rock, asphalt and road pavement. Experiments are now being conducted for the possibility of using it as a supplement in chicken feed.

Over $1 million was raised to finance the first plant. The floated stock, at $30.00 a share, was bought by the Tri-City Disposal Co. (Los Gatos, Saracusa and his stockholders all of San Jose and the Pennsylvania Crusher Co. (The company that manufactured the machinery).

After five years from the time he came up with the idea, the first plant is now in full operation. The plant serves Los Gatos, Saratoga and the part of San Jose on a daily basis.

Saracusa must not think the American dream is dead. He migrated from Italy to the United States in 1934 via Brazil. After a small financial failure in an apartment complex he came up with the garbage idea and may become the richest brick layer in Los Gatos.

Economists have estimated after plants have been developed every ton of garbage that goes through the machinery throughout the nation will be worth one cent to each original stock holder. Unless the idea is made obsolete in the near future, Saracusa and his stock holders should make their millions on garbage.

Graphic arts come alive here

by CLAUDIA GALLOWAY

"What we try to do is to introduce something new into the course every quarter," says James F. Rice about the graphic arts classes he teaches. The classes, Graphic Arts Processes (PT 127), Advanced Graphic Arts (PT 236), and Screen Processes (PT 307) are primarily "service courses" of the Printing Technology and Management Department.

When Rice talks about his classes he becomes very excited. "I believe in a real need for people to be aware of how things can be recondensed. Graphic communications is a very important field today that it is necessary for knowledge of the area to be confined to the printer," he says.

In 1963, Rice came here from Delano to teach graphic arts and power technology in the Technical Arts Department. At that time, the 127 and 236 classes were listed in the catalog, but were not offered. Rice began teaching the 127 class and started teaching it during the Winter Quarter of 1964. The class started out with only one section, and the enrollment was almost limited to students majoring in Technical Arts. The following quarter he began teaching the 236 class and several quarters later the 127 class and started teaching it during the Winter Quarter of 1964. The class started out with only about ten students.

Since 1963, several changes have been made. The classes are no longer a part of the Technical Arts Department, but are part of Printing Technology and Management. Enrollment in the 127 class is now so much that Rice only teaches the lecture for the class and other instructors in the department teach the laboratory sections. The course is offered every quarter to accommodate the students in Technical Arts. The Screen Processes class was started with only about ten students.

Enrollment in the 127 class is now so much that Rice only teaches the lecture for the class and other instructors in the department teach the laboratory sections. The course is offered every quarter to accommodate the students in Technical Arts. The Screen Processes class was started with only about ten students.

Rice states that he is "taught" in the field of graphic arts. He received his degree in Industrial Education from San Jose State College in 1964 and in Master's from Fresno State College in 1966. Before teaching graphic arts and automation at Delano, he had no experience with graphic arts, other than having worked in newspaper work. After working at Delano, he expected to teach woodworking, but when the graphic arts teacher there left, Rice was given the job, and "fell into it."

The way Rice learned what he knows about graphic arts was greatly influenced by the way he teaches. He says the key to teaching graphic arts classes is to experience is better than teaching. He believes that students should take the classes to learn the course is better than to do it as an assignment. But Rice says that students should take the classes to learn, not to do work. "It's a great way to learn it," Rice says.

The vote was 34-0. Included in the bills would be alligators, crocodiles, polar bears, sea otters, vicunias, coral, and cheetahs. It would be illegal to possess more than four crocodiles, polar bears, sea otters, vicunias, coral, and cheetahs. It would be illegal to possess more than four crocodiles, polar bears, sea otters, vicunias, coral, and cheetahs.
Roper Jerry Koff slide stops his horse as calf takes up slack.

Today cowboys and cowgirls, like these, from 31 colleges in California, Nevada, and Arizona, will compete against each other, the animals, and the clock. The 20th Annual Poly Royal Rodeo will consist of three action packed performances, Friday afternoon and evening and Saturday afternoon.

Mustangs' come alive

by PAUL SIMON
Sports Writer

A new coach and a young crop of ballplayers soon may make a difference which will, permanently, has been a losing Mustang baseball team. The coach is Augie Garrido, a native of Vallejo, Calif., who last year was winning baseball games as coach at San Francisco State College. On a challenge for a sport on San Francisco State's ten-year-old ball field, he now is hoping to create a winner.

Garrido inherited a baseball team this spring that had only one winning season in the past decade. Not once in that span did the Mustangs capture the top spot in the California Collegiate Athletic Association.

The team came close last year, in Bill Nich's final season at the helm, but they dropped their first three games against three top teams of the CCAA. Going into the series they held a 6-2 record, but they lost all three games.

The best year for baseball on this campus was 1953, when the team compiled a 10-game winning streak during the season.

The Mustangs dropped their first four games and 16 of their first eight games and 16 of their first 24, according to statistician Bob Thomas, who keeps track of the team's records.

"We can do a job of helping a boy, and with larger athletic budgets. "Financially," he says, "we can do a big job of helping a boy, and we can afford to be more selective next season. He'll need nine different players to be successful. What I need is for the players to take hte edge away at practice, not heurts in the practice during the week.
