Unique housing for the married

In an effort to add campus married student, faculty and staff, a concept unique to the state college system has been developed, says Dr. Douglas Garrard, executive dean.

The concept is unique in the fact that it enables a private developer to construct housing on state-owned land leased to the developer on a long term contract. "He will be charged a token fee," Garrard said, "something like maybe a dollar a year. Thus, all the benefits accrue to the married students." In the fall of 1968 and in the fall of 1969 the college conducted surveys of their own. "Their results were just about the same as ours," he said.

Garrard has not been able to provide for the housing demand. The housing, planned, will range in cost from $120 to $180.

William Lyon Development Co., of Newport Beach, was picked by the college board of trustees as developer of the project. The next step is to have the California State College Trustees approve the trustees recommendation.

The choice of developer will not be that simple as one long-term lease, which delineates the management and financing duties, is agreed upon by Lyon and the college trustees.

The developer was chosen on the basis of projects which would be offered and architectural design.

The project will be in two phases: the first, 250 units which would be ready in the fall of 1971; the second, 250 units which would be ready for occupancy in the fall of 1972.

The complex will be located on campus land on the west side of Highway 1. The estimated cost for construction is $3.8 million.

1000 more enrolled

Fall quarter enrollment figures show that over a thousand more students are attending this college today than last year. The official number of students enrolled as of Friday night is 12,970. Last Fall Quarter there were only 11,779 enrolled. Late Registration is continuing all through this week, so the final figures may end up somewhat higher than the current 12,970.

The official departmental breakdown of the enrollment figures published in Mustang Daily either tomorrow or Thursday, pending completion of the computer roster sheets.

Several of the departments, however, have given approximations of the number of majors their department will have. Business Administration cites 820 as the number of majors this quarter. Home Economics estimates from 300 to 350 will be enrolled. Education reports that approximately 225 students will be in their department.

Men's P.E. is expecting 360 majors, while Women's P.E. estimate majors will number in 350 will be enrolled. The official count estimates an enrollment of 800. Child Development projects approximately 225 majors for this quarter. The Graphic Communications and Journalism both estimate majors will number in the 150-200 range.

These numbers are simply the first approximations of the individual departments and are not official departmental figures.
Radicals open new alternative schools

UPI—About 60 "alternative schools" are open this fall in the San Francisco area, operated by young radicals who are convinced "the public school system is dying."

That's an increase in four years

Student ghetto?

The planned housing complex for married students, faculty and staff to be instituted for the fall of 1971 should come as a welcome note to many members of this college community. But many may see it as only a short-term solution to a problem that increases two-fold as the enrollment of this school continues to climb.

While the single students of this school have been able to find some way of withstanding the housing squeeze, the married students have found it difficult to find living in a Farm van even close to meeting the comforts of home. The married student has not been able to compete with competitive rents established for single students whose communal funds can push rents at what the married student can afford.

With rents set at a maximum of $800, married students can compete for space in these housing units. Where else can a married student find housing complexes that offer dishwashers, carpeting, balconies or patios, double-wall party-walls for sound reduction, cultured marble counter tops in the bath, luminous ceilings in the kitchen and storage rooms on the balcony or patio?

Where else would the married students find features such as a 34 foot by 48 foot swimming pool, a volleyball court and badminton court, a putting green, children's play yards, a recreational hall, a study room building, covered bicycle parking and extensive landscaping for a maximum of $180 dollars a month?

"This is for the married student that are able to get into the complex, but what is being done is to aid the students who can't get into the project because of money."

This school must take a long look at what it plans to do in the future and the ramifications that these actions will play on its students. They can't expect to admit more and more students and expect the area to absorb them or the classrooms to hold them or the supply of competent instructors to teach them at once.

The housing situation is only one of the first many problems that the school will continue to face as the enrollment increases and the facilities remain the same as they did 10 years ago. What are the solutions to these immediate problems facing this college community? Perhaps the school could also find a way to establish a ghetto for single students facing all the luxuries of this new married student housing complex. It seems that the source of the problem lies in funding such projects and how can teachers and administrators be expected to seek funds for the benefit of students when they are seeking pay raises which they too are justified in receiving? Where does justice fall? Where is Truman Capote when we need him?
Man behind the illusion

You see the phantom flit across the stage. You hear the echoing sound of the saw. You gasp as you see the unflinching victim. Or do you?

The illusionist behind the mirror, Andre Kole, is the suave, expert showman who will fascinate his audience. Kole is the knowledgeable lecturer who will alert his hearers to the condition of the world and challenge them to involvement with reality, rather than with illusion.

But Andre Kole is also an intense, personable individual, concerned even more with the needs of people than with the value of his magic as a craft.

"As a professional magician," he says with an eloquent shrug, "I lived for fifteen years in a world of fantasy, manipulation, and magic." Sometimes ago, however, I discovered something in the realm of reality that was so exciting it completely changed the entire course of my life.

Kole began in magic when he was seven years old. After his graduation from high school, where he was voted the student most likely to succeed, he invested several years training in magic. He recalls many nights going to bed with aching, blistered fingers after ten to twelve hours of manipulating the objects used in his shows.

Success for Kole, however, was accompanied by dissatisfaction.

"Many nights backstage in my dressing room I thought, 'Here I've accomplished everything I set out for in life and there is still an emptiness in my life.'"

When two of his best friends in show business committed suicide, he began to ponder what he calls basic questions, such as;

"Why am I here? Where am I going? What is the purpose in my life?"

He was later challenged by friends to investigate the miracles of Christ from a magician's point of view. Having a degree in psychology from Arizona State University, an interest in philosophy, and experience as an illusionist, Kole was skeptical. But he did investigate.

"You see, I know how very easy it is for a scientist, professor, theologian, or anyone else to be fooled by a clever magician," he explains. "They do not understand all the psychology and methods we use to fool audiences."

"But Andre Kole is also an individual who alerts his hearers to the condition of the world and challenges them to involvement with reality, rather than with illusion."

No disability

UPI - Alcoholism is not the kind of ailment that should entitle its victims to receive disability relief, the state attorney general's office said today.

Under the rules governing welfare payments, "transient conditions or diseases which may be cured or conditions which lend themselves to rehabilitation" are excluded from disability assistance, according to the brief, written by Deputy Attorney General A. Chester Rubin.

The attorney general says the program was "designed for persons whose afflictions are visible, permanent" and should not be extended to alcoholics.

The challenge of determining whether Jesus was a first century sorcerer.

"After several months of investigating the evidence concerning the resurrection of Jesus Christ and his other miracles, I came to the place where I eliminated every possibility of the use of some form of mesmerism, hypnotism, or other means of deception," he recalls. Kole did further research into Christianity and entered what he calls a personal relationship with Jesus Christ. He then decided to use his unusual personal relationship with Jesus Christ. He then decided to use his unusual talent to present his discoveries to the public. He has spoken at major colleges and universities in every state and 46 foreign countries.

Kole will give students here an opportunity to experience his wizardry and reveal to him the secrets of his art. The program will be on Thursday at 8 p.m. in the Little Theater.

GI's gain added benefits

The Senate Labor and Public Welfare Committee recently unanimously approved a de­

ranging group of veterans bills

covering GI education, home loans, flight training, and automotive

equipment for disabled veterans. Senator Alan Cranston (D.,

Calif.), chairman of the Veterans Affairs Subcommittee, which had

voted for the bills earlier, commented on "the unbroken

record of Senatorial unity to

help every piece of veterans

legislation so far this season."

The bills, which Cranston said

he hopes will get to the floor next

week, are:

- S.3657 (introduced by Senator Cranston), which would allow veterans going to school or taking vocational training under the GI

bill to receive their allowances in advance each month, with the

first payment coming as early as

two weeks before enrollment

time.

- The bill also sets up a work-

study program by which a veteran could receive a $250

allowance for doing special work

for the Veterans Administration

such as patient duty in a

veterans hospital or as part of the

VA's new "outreach program" to

persuade minority group and poor

veterans to take advantage

of their educational and job

opportunities.

- S.3667 (introduced by Senator Cranston) would eliminate all deadlines by which veterans must apply for a VA guaranteed

home loan and would restore the

elishments of all those whose

time has expired. Immediately

affected would be 10,300,000

veterans of World War II and

Korea who have passed their

deadline without taking full

advantage of their home loan

privileges.

- S.3686 would also make it

possible for an ex-GI to get a VA

direct or guaranteed loan on a

mobile home if it is to be used as a

permanent dwelling. The

measure would enable a veteran

to get up to $10,000 of the cost of a

mobile home guaranteed, plus

another $5,000 for land for the

home. He could also borrow extra

sums for necessary site im­

provements as septic tanks and

driveways. Loans would run for

15 years.

- S.3687 (introduced by Senator Cranston) would establish a

percent bonus for veterans who

volunteered for service in the

Guam area or as part of the

Veterans Administration

"outreach program" to

persuade minority group and poor

veterans to take advantage

of their educational and job

opportunities.

- S.3688 (introduced by Senator Cranston) would eliminate all deadlines by which veterans must apply for a VA guaranteed

home loan and would restore the

elishments of all those whose

time has expired. Immediately

affected would be 10,300,000

veterans of World War II and

Korea who have passed their

deadline without taking full

advantage of their home loan

privileges.

- S.3689 would also make it

possible for an ex-GI to get a VA

direct or guaranteed loan on a

mobile home if it is to be used as a

permanent dwelling. The

measure would enable a veteran

to get up to $10,000 of the cost of a

mobile home guaranteed, plus

another $5,000 for land for the

home. He could also borrow extra

sums for necessary site im­

provements as septic tanks and

driveways. Loans would run for

15 years.

- S.3687 (introduced by Senator Cranston) would establish a

percent bonus for veterans who

volunteered for service in the

Guam area or as part of the

Announcement made by Dr. George G. Chucas, interim dean of the newly-formed school. All assigned to teaching duties in the Social Sciences Department, the new members of the faculty are:

- Donald P. Castano, Dr. Malcolm J. Carr, Dr. David L. George, Reginald H. Gooden, Jr., Dr. David R. Harrow, Robert L. Hoover, Earl D. Huff, Earl E. Lucin, Dr. Earl B. Norris, Dr. A. Lloyd Pulliam, and William W. Speth.

The School of Business and Social Sciences, established recently as part of the academic reorganization announced by Dr. Robert E. Kennedy, president of the college, also includes the Business Administration and Economics Departments.

Some 1,500 students are expected to enroll for degree major programs in the school this quarter.

The Social Science Department had been part of the School of Applied Sciences for several years and the Business Administration Department, part of the School of Applied Arts. The Economics Department has been formed recently after separation of economics courses and programs from the Business Administration Department.

Dr. Chucas is serving as interim dean of the new school pending arrival of Dr. Edward H. Barker, whose appointment as its dean was announced last month by President Kennedy. Dr. Barker, a veteran member of the University of Southern California faculty, is presently concluding his duties there and expects to assume his assignment as soon as possible.

In addition to undergraduate degree programs in business administration and social sciences, a graduate curriculum in business administration, the new school will provide general education and support courses for the entire student body.

Castano most recently has been a lecturer at San Fernando Valley State College and a teaching and research assistant at University of California at Santa Barbara.

Dr. Carr, most recently a personnel research specialist and program director for the U.S. Navy Personnel Training and Research Laboratory, is a former member of the faculties of San Diego State College, Sacramento State College, Sam Houston State College, Texas, Illinois Institute of Technology, and Westminster College, also in Texas.

**Free speed reading lesson.**

You'll increase your reading speed on the spot!

**HERE'S A GREAT OPPORTUNITY:** Evelyn Wood Reading Dynamics offers you a free glimpse of what it is like to be able to read and study much faster. At our free introductory lesson you will actually participate in techniques that will improve your reading and study speed on-the-spot. See what is holding back your reading rate and see how you can easily read much faster.

**WHAT YOU'LL LEARN:** At our introductory lesson you will see that Reading Dynamics is a comprehensive reading improvement program. You'll learn that our students not only read faster but also comprehend more, and remember better. You'll learn how our study method can cut study time in half. In short you will have an opportunity to see what we teach and how we teach it.

**OTHERS HAVE DONE IT—SO CAN YOU:** Seeing the instant results of your progress at the introductory lesson will help you understand why our average graduate increases his reading speed 4.7 times with improved comprehension. You'll see why over 500,000 people have improved their reading skills through the Reading Dynamics techniques. You'll understand why Reading Dynamics has been taught at the White House to staff members of Presidents Kennedy and Nixon.

**COME SEE FOR YOURSELF:** We want you to decide for yourself the value of becoming a rapid reader through the use of the Evelyn Wood Reading Dynamics techniques. Plan now to attend a free introductory lesson; they are informal and last about an hour. Come as you are, even bring a friend.

Gretal II evens American Cup yachting series

Gretal II, the challenger from Australia rallied on the fifth leg to best Inrepid of the U.S. by one minute seven seconds Sunday and tie the 1707 America’s Cup yachting series at 1-1.

The race again was marred by protest flags.

The victory in the best-of-seven-race was only the seventh by a challenger in the 118-year history of America’s Cup.

Stoker Jim Handy, off to a poor start and trailing for the history of America’s Cup.

It apparently was the right move as Gretal went in front by 80 seconds going into the last leg and kept drawing away by about 200 yards.

Inrepid rallied the 34.6 nautical mile course with Steve Van Duyk, its regular tactical advisor who was evacuated by helicopter to a Newport hospital for treatment of about 100 yards.

Inrepid hit the 34.6 nautical mile course with Steve Van Duyk, its regular tactical advisor who was evacuated by helicopter to a Newport hospital for treatment of its head and was injured in an incident.

UIP + The Oakland Raiders could easily get a campers about going to Cincinnati.

For the second straight year the Raiders, one of the real powerhouse in pro football, leveled to the Queen City only to lose to the low-rated Cincinnati Bengals.

The Bengals used a young fired-on defense and some tricky running to down Oakland 31-0 Sunday and put a big smile on head coach Paul Brown’s face.

“They really carried the fight to the Raiders and I’m really proud of them,” Brown said patriotally of his team members.

“We were up for it. It was an inspired effort,” he continued.

“Defensively it was a wonderful effort,” added.

Oakland coach John Madden was something less than ecstatic about the loss but insisted that “there are no excuses, the Bengals are a very good football team.”

“This is a game of momentum,” Madden said philosophically in the locker room after the game. “They had it early in the game, we got it back some fine pass plays and they took it back again on that long draw play touchdown.

“They took the opportunities we gave them,” he said, “and they had the ball most of the time. Their defense was excellent and kept giving the ball to the offensive.”

The draw play Madden mentioned was a third touchdown scamper by Cincinnati fullback Jesse Phillips on a third-and-30 situation.

“I’m sure everyone was surprised when it went for a touchdown,” a happy Phillips relates.

“I asked Bamm Wych how many yards we needed and he said 33, so I tried for a good gainer.

“I don’t think anyone touched me on that run,” he grinned. “I got some fantastic blocks and after all, I’m only as good as that line.”

Phillips was asked if he was thinking about the 33-yard run he made against Oakland here last season which failed to go for a touchdown because he ran out of steam and was tackled on the goal line.

“You bet I was,” he said emphatically. “I definitely didn’t want that happening again.”

Phillips said he was extremely tired after the game and the heat on the artificial turf at the Riverfront Stadium “took a lot out of me.”

Someone else was less than happy about the heat generated by the synthetic surface, said to be near 100 degrees on a sunny day.

“I personally do not like artificial turf,” commented Oakland’s all-pro quarterback Danny LaMermore.

“I’ve never like to play on it and have always preferred grass. My feet were burning all day.”

The Bengals dump Raiders

Cincinnati punter Dave Lewis, a product of Canadian football, averaged 48.3 yards a punt against Oakland, while place kicker Horst Muhlmann had only one kickoff which was returnable and it only came back to the 22 yard line. Madden summed it up as he sat in the locker room, his head resting against the wall and his eyes closed.

“I guess we’ll just have to look at the film and see what really happened,” he said.

It was difficult to tell from the statistics, however, as LaMermore completed 17 of 26 passes for 386 yards and two touchdowns.

Ban in N.Y.

UPI - parking ban went into effect in a 2-mile block area of lower Manhattan, including the Wall street area. No cars will be allowed to park on the streets from 7 a.m. to 7 p.m., although tradesmen can stop briefly to conduct business. Violators are subject to $5 fines.

The ban is designed to ease traffic congestion in the Wall street area.

Fondal bails Panther

UPI - Actress Jane Fondal posted bail Saturday night for a Black Panther jailed on weapons possession charges.

She said she put up $1,300 in cash and signed for an equal amount, for Sayed Malik Shabir - a deputy minister of information for the New York Panther chapter, because, “I’m a friend of Mr. Shabr and know he’ll show up for his trial.”

Fonda bails Panther

RENO, Nev. (UPI). Thid, the ball, she said, was excessive and “punitive.”

Shakur was arrested Saturday for felony charges of possession of three sawed-off shotguns. A city marshall found the guns while serving an eviction notice at Shakur’s Breyer apartment. Police said anyone is innocent unless proven guilty in this country, and we must assume he is innocent,” Fonda said.

Loening win nat. air races

RENO, Nev. (UPI) - The national championship air race was completed Sunday but it still up in the air who won an unlimited race class.

Mike Loening of Boise, Idaho was declared winner of the $7,200 first prize in the Harrah’s unlimited event. Clay Lacy & Van Nuys, Calif., was given second place after a judge rule he had cut a pylon.

The specialists left the Reno Stead Airport thinking Loening the winner. But then Len protested and the contest began to take on a life of its own.}
