$10,000 gas chromatograph, a recent addition to the Foods Department. Photo by Brabec.

**New $10,000 instrument advances foods school**

The fruit flavor in strawberry jam and the pesticide residue on vegetable crops are now within the investigative reach of agriculture students at this college via the recent installation of a valuable instrument.

A double gas chromatograph and recorder, valued at about $10,000, has been obtained through a matching funds program shared by the National Science Foundation and the college.

With the super-sensitive device, students in the Animal Science, Soil Science, Crop Science, Dairy Science, and Food Industries Departments will be gaining valuable exposure to modern technological tools like those they will probably encounter and utilize when they leave the campus to enter commercial, industrial, and private occupations in their respective fields.

"A chromatograph is an extremely sensitive instrument and its acquisition here is a valuable boost to our educational purpose," said Dewey Sampson, food industries faculty member in charge of the instrument. "Many of our students will encounter this type of device and other more sophisticated equipment when they leave us."

Dr. Ray Steele, head of Food Industries Department, said the main function of the instrument is analysis of organic compounds, and the separation and identification of unknown organic compounds.

"With this unit we are able to do things we weren't able to do before, and some things we're able to do much faster," said Dr. Steele. "And because it has a double capacity, it's a much more versatile instrument and so will serve the students better."

Classroom demonstrations and laboratory experiments will call heavily on the chromatograph, although advanced students may utilize the instrument in special research projects.

"Students going into quality control, research and development, or graduate study in any of the agriculture or food processing fields will especially benefit from study with this instrument," said Dr. Steele.

The department head explained that gas chromatographic equipment was first developed about 15 years ago for a specific field, but that recent improvements adapted the system to greater applications.

Samples as minute as a microcutter, one millionth part of a liter, using voltages as sensitive as one thousandth part of a volt are possible. Samples in either liquid or gaseous form are injected by a small hypodermic pipette into the chamber for analysis. A small hydrogen gas flame aids accurate measurement of the sample.

The second half of the chromatographic system, the recorder, contains an inking needle which strikes the electrical impulses—in familiar lie-detector fashion—onto rolled graph paper.

The operator measures the height and width of the "peaks" and, in relation with specified periods of elapsed time, compares his findings with calibrated standards and is able to analyze or identify the sample.

**Trustees hit housing plan**

The seventh week of instruction ended at 8:00 p.m. on Monday, November 5, 1970.

"Except for college recognised emergencies, no withdrawals from a course will be permitted after the seventh week of instruction."

Cadet defends ROTC

Editor:
I sincerely hope D.E. Pollock is reading this issue of Mustang Daily. He obviously did not understand what ROTC stands for and could learn much by reading this short column. ROTC gives civilian influence to the military system. I'm sure all of us can see that this influence (and the military system itself) are very important in the United States.

Without ROTC the army would largely be run by professional military personnel (with the exception of the President) and of all people, I think Mr. Pollock would not want that. I would not want that myself for fear of an unchecked military. I'm glad he pointed out that percent of today's Army officers are ROTC grade. This is comforting to me.

Chris L. Reed

Army withdraws medals

BAIJON (UPI) — American headquarters Tuesday reported "administrative Irregularities" in the awarding of two bravery medals to Brig. Gen. Eugene P. Forrester and announced that the decisions were being rescinded.

Five enlisted men brought the embarrassing incident to light last month, charging that they had been ordered by superior officers to "create recommendations" for the award of the medals, the Silver Star and the Distinguished Flying Cross, to Forrester.

A letter spelling out the fabrication charges was sent to Rep. H. Mendel Rivers, chairman of the House Armed Services Committee, by the five men in the awards section of the 1st Air Cavalry Division. It was signed by Spec. 4 Anroy V. Trent Jr.

A terse three-paragraph statement Tuesday night from U.S. headquarters said an investigation was made following the charges and that "action is being taken to rescind both awards due to administrative irregularities which have been disclosed by the inquiry."

It said that Forrester, former assistant commander of the 1st Air Cavalry Division, was not aware of the "irregularities."

Forrester received the medals on Oct. 4 at the completion of his Vietnam tour. He then returned to the United States for a furlough but is now back in Vietnam, saving in U.S. Military Headquarters.

A spokesman at U.S. Army Headquarters in Long Beach said today the investigation was continuing and that it was not known whether there would be any disciplinary action in the case.

The Silver Star is the third highest decoration for valor under enemy fire. The Distinguished Flying Cross recognizes courageous action by aircraft crew members, including men riding in helicopters which are used extensively by the Air Cavalry Division.

Forrester, 44, is a native of Watertown, Tenn., and participated in the Allied offensive to Communist lairs along the Cambodian-South Vietnamese border last May and June.

Editor:
Regarding the Friday, Oct. 23 issue, I thought I was being pretty clear when I used the abbreviation C.O. in my letter which you printed as "commanding officer," but I was referring to a conscientious objector. The misinterpretation really loused up the whole paragraph.

Love always,
Joan Thompson

Ideas sought for new CU

After some five years of a cost of close to four million dollars, the Julian A. McPhee College Union Building is near completion. En keeping with the suspicions of the occasion, the College Union Committee has made plans for the Grand Opening sometime late in the quarter.

Students are being offered the chance to contribute ideas and work on the event which will be open free to all students, faculty and alumni.

If interested, you are invited to bring your ideas and willingness to work to the meeting of the committee this Thursday during College Hour in the TCU.

Three men charged with complicity in war crimes

FRANKFURT, Germany (UPI)—One of the more grisly Nazi war crimes on record unfolded today at the trial of three middle-aged Germans accused of complicity.

The three were charged with selecting 118 concentration camp inmates, mostly Jews, and shipping them to a World War II experimental institute in occupied France. After gaoling the victims, Nazi experimenters studied their skulls to try to find evidence that they were inferior to those of the German "master race."

At the time, the three defendants were working for an organization called "Ahne-merbe," (ancestral heritage), founded by Nazi SS chief Heinrich Himmler.

Trustees hit housing plan

(Continued from page 1)

Some trustees objected to a point in Kennedy's presentation of the proposed housing complex that called for a limited number of units to be set aside for faculty. Trustee Carl Wente questioned the priority of faculty over students in the rental of housing units.

Following the meeting Ken­

edy and Harold O. Wilson, administrative vice president, told Mustang Daily they would proceed in a "positive manner"

Licking the costs of food

Next you will be asked to fill out an application form for the purpose of screening applicants. Questions asked are: "how much money do you make," and "how many in the family?" Then you wait. Your application will be forwarded to the Food Stamp unit, where, after many In the family?

Food stamps are not free. Depending upon the size and income of the family, you pay anywhere from $1 to $36, and this amount will purchase $8 worth of stamps.

Stamps may be purchased once or twice a month, depending upon the individual's preference. The stamps do not have to be spent in the same month—they are good anytime.

Anyone already on a public assistance program is already qualified for stamps. Most college students fall under the non-assistance category, and must therefore apply.

Food stamps may be used for all items purchased or grown in the United States, and for items that must be imported, such as bananas and cocoa. No paper products, and no taxable items may be purchased, except soda and candy. In

San Luis Obispo, 90 per cent of the stores are participating in this program, with more small grocery stores applying to join the program every day.
Bicycles, although non-polluters, are suffering a blooming case of congestion on campus. Racks and streets are becoming a bit crowded as students and teachers turn to two-wheel transportation for reasons economic and therapeutic.

Bicycles ‘taking over’; new pathways proposed

Two wheeled, pedaled machines seem to be taking over in the transportation field this year. Bicycles are on the upswing.

E. Douglas Gerard, executive dean, who rides a bike to work, revealed in a recent interview that bicycles are creating some problems on campus.

Gerard said increased bicycle traffic is creating parking problems and a safety hazard.

More parking racks are being planned, he said, but student pedestrians are still going to have to take their chances when a bicycle comes speeding its way-for a while anyway.

About a month ago, according to David Romero, city engineer and director of public works, 18 students brought the idea of bicycle pathways to the City Council. As a result of their efforts, a proposal to install pathways on three major streets near campus was initiated.

The proposed pathways will be located on California Boulevard from the football stadium to just beyond the Highway Patrol office, on Grand Avenue from the campus to Monterey Street, and on Foothill Boulevard between Santa Rosa Street and California Boulevard.

If the pathways are approved, there is a chance that they may be extended into the campus, according to Gerard.

Romero stated that the pathways, which will carry two-way traffic, will probably be financed by the city. If they are extended on to the campus, the state will pay for them.

Romero explained that the trail on California Boulevard will be the most expensive because as the plans are now, the pathway will be constructed between the palm trees and the railroad tracks. Parking lanes on Grand Avenue and Foothill Boulevard will not have to be “constructed” but painted and designated as bicycle lanes, he said.

Problems are being encountered. Romero pointed out that the lane on Foothill Boulevard will take over 30 parking spaces. The apartment owners along this route are opposed to this particular plan because the trails will be taking space away from on-street parking for their tenants and guests.

Presently, the proposed trails are resting with the Citizen’s Advisory Committee. If passed, the proposal will be passed on to sub-committees and then to the City Council for the final decision.

Coffee Hour

A coffee hour for all history majors and History Department faculty will be sponsored tomorrow at College Hour by the recently formed History Society.

The purpose of the coffee hour is to provide the students and faculty an opportunity to become better acquainted and to generate interest in the History Society.

“Since this is a new organization, we need to let people know what our goals are and what activities we have planned,” said History Society officer Liz Ellery, describing the event.

The coffee hour will be held in room 223 of the Erhart Agriculture building.

Female sports

The women’s intercollegiate volleyball team will compete in a league game against the University of California at Santa Barbara tomorrow night at 6:30 in Crandall Gymnasium. Admission to the game is free, according to Donna Dwyer, volleyball team publicity agent.

In last weekend’s competition, women’s team “A” defeated Cal State Fullerton and lost to San Fernando Valley State.

Indians busted for “camp-in”

REDDING (UPI) — The Indians arrested on trespass charges during a camp-in at a Pacific Gas & Electric Co. recreation area were placed on probation today for a year.

The sentence was imposed by Shasta County Superior Court Judge William Phillips who also ordered each to pay a fine of $6.95.

A total of 46 Indians was taken into custody during the camp-in protest staged earlier this year near Burney.

The Indians claimed that the PG&E property was illegally taken from them by the white man during the Gold Rush era.

ANDRE BEAUTY and BARBER SUPPLY

Young Men and Women look for every beauty need at the right price. See Andre'
Good deeds by Health Center women’s group

Hospitalized patients in the campus Health Center are finding that the Center’s Hospital Auxiliary has added material goods to the personal services it has regularly provided for student patients at the college for the past several years.

The material goods — two portable television sets mounted on mobile stands which can be moved from room to room — were a recent donation of the auxiliary, a special interest group composed of members of the campus Women’s Club.

The Hospital Auxiliary is jointly headed by Mrs. Betty Gibson, wife of J. Cordner Gibson, dean of the School of Agriculture and Natural Resources, and by Mrs. Betty Jo Pierce, wife of the college’s international education director, Dr. Douglas Pierce.

In addition to providing mail supplies, chewing gum and candy, and other convenience items, members of the group offer valuable liaison services for hospitalized students, regularly transporting assignments and homework between individual students and their instructors.

The 20-member auxiliary is part of the campus Women’s Club and is composed of wives of faculty and staff members as well as individual women faculty and staff members.

Events for FFA

Future Farmers of America members from San Luis Obispo and Santa Barbara Counties will converge on this campus Saturday, Oct. 31, for an annual field day and chapter farmer initiation.

The Collegiate FFA Chapter, Young Farmer Chapter and the State Bureau of Agricultural Education are co-hosts for the annual event.

The Collegiate FFA Chapter membership represents students planning careers as vocational agricultural teachers.

“Which channel would you like?” asks Mrs. J. Cordner Gibson, co-chairman of the Hospital Auxiliary of the Campus Women’s Club. Mrs. Gibson prepares to adjust one of two television sets on mobile stands donated for use by student patients in the Health Center, as Richard Williams, a patient, watches.

Is aid your bag? Join Circle K

Circle K is a nationwide college organization dedicated to campus and community service. It is sponsored by Kiwanis International and is the college equivalent of high school Key Clubs.

The Cal Poly chapter is hosting its annual membership drive meeting tonight, and all interested students are invited to attend. The meeting will be held at 8:30 this evening in Science E-26. For further information call 544-8540.

No Egypt trip for Leary

CAIRO (UPI)—LEO advocate Timothy Leary, two Black Panthers and a Yipple were barred from entering Egypt today when they arrived from Algeria where they began their tour of the Middle East last Sunday.

Leary escaped Sept. 13 from the West facility of the California Men's Colony in San Luis Obispo where he was serving a sentence for possession of marijuana. He surfaced in Algeria last week as the guest of Eldridge Cleaver, the Algiers-based Black Panther "information minister" who is a fugitive from a California violation charge.

With Leary today were Black Panthers Don Cox and Martin Kenner and Jennifer Dohrn, a member of the Youth International Party—Yipples—whose leader Bernardine is wanted by the FBI for alleged Weatherman terrorist bombings in the United States.

Leary and the others had wanted to spend two days in Egypt and then go on to Jordan and Syria. At Cairo Airport, when they were told they would not be permitted to enter Egypt, the group requested visas to go to Jordan and Syria.

"We did not get them," Cox was quoted as saying. In Beirut, legal sources said they would have to leave the Middle East at their own expense.

Four years ago, Moser, a native of El Segundo, took the first step in becoming a member of the motorized law enforcement agency by completing an application form and taking a written examination. An oral examination, physical agility test, and physical examination followed.

Next came a thorough personal background investigation by state agents, in which they searched out his friends and numerous persons who had observed him.

"They could tell me things about myself I don't know," he says.

He was finally chosen for training at the Highway Patrol Academy in Sacramento. During his 4 a.m. to 11 p.m. training days, he attended classes in psychology, speech, human relations, legal codes, high speed driving, motorcycle training and firearms training.

Moser, 29, lives in San Luis Obispo with his wife and three children. He notes that students here are less hostile to law enforcement officers than those at other campuses he has seen.

Relating his Christian commitment to his career, Moser says he discusses his faith with an average of one person each day. He recalls stopping a motorist for a mechanical warning citation. In the course of small talk, the youthful driver told him he was going to Monterey for meditation.

"What are you going to meditate for?" Moser asked.

"To get closer to God," he replied. The Highway Patrol officer then explained how Christ had become the way for him.

"You're a policeman," the meditator gasped. "You're not supposed to have that kind of feeling—you're blowing my mind!"

Moser obviously relates both the professional and spiritual challenges of his career. A Highway Patrol officer must be ready for any situation, any change, including varying working hours, which change each month.

THE OTHER DIRECTION

Religion on 4 wheels

"Good morning, sir. May I see your driver's license, please?"

The man with whom you next discuss the finer points of the California Vehicle Code could be Officer Jerry Moser of the California Highway Patrol.

Moser, whose duties occasionally bring him to this campus, is one of about 90 officers who work out of the San Luis Obispo Highway Patrol Office.

He reminds you of a western movie from the days of Johnnie Mack Brown, where the hero was a young, clean cut, smiling buddy to everyone—except the dastardly desperadoes. A product of the rigorous CHP selection and training process, Moser is dedicated in his professional approach—and in his Christian life.

"Information minister" who is a fugitive from a California violation charge.

With Leary today were Black Panthers Don Cox and Martin Kenner and Jennifer Dohrn, a member of the Youth International Party—Yipples—whose leader Bernardine is wanted by the FBI for alleged Weatherman terrorist bombings in the United States.
INTRAMURALS

Discussion of intramural tournaments tonight

Intramural sports director, Coach Richard Heaton, announced the scheduling of an intramural meeting to be held in his office tonight (Wed.) at 7:30 p.m. in the men's gym.

"The purpose of this meeting," says Heaton, "is to get all of the athletic representatives of fraternities, residence halls and departmental clubs together to discuss dates for tournaments for the remainder of this quarter."

Heaton added, "Those people who are interested in seeing the intramurals program at this school continue to succeed, are respectfully requested to attend this important meeting."

Items to be discussed will be times and dates for tournaments for the remainder of the quarter, and preliminary planning for next quarter's program will be started.

Ropers win again

In the muck and mire of the Chico fairgrounds the Mustang Rodeo team rolled past runner up University of Arizona 603 to 175.

Hartnell College came in third with 150 points.

Melvin Dick, senior ABM major, led the Mustangs to victory capturing the All-round Championship. In winning the All-Round title Dick claimed the top spot in both bareback and saddle bronc riding.

Following Dick in the bareback, splitting second and third, were Tom Mason, unattached rider, and Jim Roddy from Hartnell College. John Seymour, also an unattached rider landed the fourth spot.

In the saddle bronc riding Ed Kuts, competing as an individual, grabbed the second spot followed by Ken Tipton from the University of Nevada.

Top honors in the bull riding went to Tom Ford of Yuba College. Splitting second and third were Jay Vantresse of Piedmont College and Tom DeForest, Poly individual.

Jim Ingram tied up the first spot in the calf roping for the Mustangs followed by Phil Bidegan and Don Kimble, both from the U of A. Tom Ferguson was fourth for the Mustangs.

It was a clean sweep for the Mustangs in the ribbon roping. Larry Ferguson was the fastest man afoot in the thick mud followed by Jerry Rollis and Tom Ferguson.

Hartnell's Bruce Holthouse turned in the best steer wrestling time. Following Holthouse were Butch Jones, Fresno State; Phil Bidegan, Uof A; and Tom Ferguson.

Water poloists win 1

The Mustang water polo team went down to defeat two times last weekend while managing only one victory. The water poloists lost to Cerritos Junior College, 4-7, and to San Fernando Valley State, 7-4. The Mustangs only victory came last Friday afternoon against the San Francisco State Gators, 23-4.

According to Co-Captain Dick Anderson, the San Fernando Titans will be held in Mustang Stadium, 11 o'clock. The game will be open to the public and admission will be $8.00.

Rodeo team trounces Chico

The Cal Poly Rodeo team beat Chico (32-21) in the stadium every Tuesday and Thursday afternoon from 11 to 1 o'clock. The game will be open to the public and admission will be $8.00.

The minister's daughter.

Her father taught her about God.

The gypsy taught her about Heaven.

"No story—and no film—better reveals Lawrence's moral absolutism than 'The Virgin and the Gypsy.' Between its boundaries is sown the seed of the Lawrence canon—the familial conventions, the social hypocrisies, the annealing force of sex. An exemplary case."—Time Magazine

"D.H. Lawrence's
THE VIRGIN AND THE GYPSY

A young man who fields passes like Brook Robinson who plays third base for the Baltimore Orioles is the Mustang 'Player of the Week.' He is Mike Amos, the sliding sophomore split receiver from Alameda who gathered in four passes for 121 yards last week including a 46-yard touchdown grab in the Mustangs' 48-31 win over San Fernando Valley State.

"He catches anything that is catchable and some that are not," commented quarterback Don Milan, the man who is on the firing end of Mustang passes.

Backfield coach Dave Gross put it this way: 'I haven't seen a kid catch the ball any better than Mike does. He's not distracted by somebody harassing him. It's going to be nice having him around for three years.'

"Forest Klein, his high school coach, told us he was the best athlete on the squad," Gross recalled. "When we recruited him we didn't know whether he'd be a receiver or defensive back. He reminded us quite a bit of Dick Christie, our all-conference defensive back of 1968.'

Amos, a 5-4, 170-pound split end has grabbed 18 passes worth 60 yards and four touchdowns. He's averaging an amazing 34.3 yards per catch. Last week he had a 58-yard catch in the Mustangs' second scoring drive, grabbed the 46-yard TD aerial which put the Mustangs up, 27-21, then made an impossible grab for a 48-yard gain to the Matador seven before the TD.

"We're really pleased with the threat he gives to the outside," Harper said. "It really helps balance our running attack. He was outstanding on our true team last fall, so his play hasn't been any surprise to us.

1. Take a pen or pencil with you to the Polls.

2. Write in only the candidate's last name in the numbered block (NUMBER 4) on the left side of the voting machine to correspond with the number shown under JUDICIAL SECTION 4, Judge of the Justice Court.

You must do the following to elect GARY G. FOWLER as Judge of the Justice Court, San Luis Obispo, on Tuesday, November 3, 1970:

1. Take a pen or pencil with you to the Polls.
2. Write in only the candidate's last name in the numbered block (NUMBER 4) on the left side of the voting machine to correspond with the number shown under JUDICIAL SECTION 4, Judge of the Justice Court.
