**Budget approved**

An $18,307 budget estimate for Mustang Daily was approved by Student Affairs Council as recommended by Finance Committee. The recommendation tentatively approved the extension contingent upon a financial report of Mustang Daily to Finance Committee, at the end of Fall and Winter Quarter, when final determination will be made for Spring Quarter. Debate on the matter in Finance Committee lasted almost an hour.

According to George Yee, chairman, Finance Committee was “mainly concerned with the projected income figures. Local advertising jumped from $13,800 to $29,370 while the national advertising figures dropped from $11,046 to $6,941.”

“We’re just not sure Mustang Daily will be able to achieve this projection,” Yee continued. “If advertising revenue drop in the future, we may have to reconsider the budget extension and possibly recommend that Mustang Daily publish twice per week.”

The budget that was set up for this year’s operation was unrealistic in terms of a five-day operation according to Ian McCabe, editor-in-chief of the Mustang Daily. “The previous budget was set up for a four-day week and increased printing costs and increased salaries for the paper’s staff were two areas that brought about the need for the increase,” said McCabe.

The paper had a budget of $31,446 approved for this year’s operation, but according to Mustang Daily Business Manager, Bob Schwall, this figure was nearly $13,000 short of the amount needed for operation. Mustang Daily must bring in all of its income from the advertising that appears in the paper each day and the newly approved budget will represent $6,000 of advertising distributed throughout the year.

Two other BIU security men, directing traffic around the campus, were wounded in the leg by gunfire from a car. The car sped away and police issued a statewide alert for its occupants. Police said the apartment house under siege was in the vicinity of a house where three blacks were injured last May, apparently when a bomb they were assembling accidentally exploded.

The outburst began in the predawn hours when an BIU security guard was wounded in the leg by the driver of a car on campus and continued when a city policeman was shot by a gunman who fled to an apartment house about 10 blocks north of the campus.

Ten persons were arrested, nine of them at the two-story frame apartment house where police and snipers exchanged shots, including automatic weapons fire, for more than an hour. A tenth man was arrested shooting a shotgun on the BIU campus.

Police said those hurt included six “villains” at least three of whom were flushed from the apartment house by tear gas. None of those wounded, including the police officers, was critically injured.

“Statewide alert for its occupants.”

**Fee petition**

A petition requesting the Board of Trustees to reconsider its stand on foreign student tuition is being developed by the International Student Council for presentation to the faculty, staff and students of this college. International Student Council is planning to present the petition to the board at its Nov. 34 meeting. The council has been hoping to persuade the board to increase foreign student tuition fees until a prohibitive level is reached, only in order to increase foreign student’s standard of living, using skills they have acquired in the U.S. colleges.
Help make boycott effective

Editor:
For some time a group of people has been struggling to be free from the clamps of misery that these people find themselves trapped in. I am referring to the farm working community that makes it possible for us to enjoy the fruits of freedom and democracy. It is time for us, students, to speak up and take a firm stand against such injustices. Let us help to bring the desperately suffering and the misery have been achieved at the cost of many, many years.

A free man cannot conceive of his rights just as he cannot conceive living without liberty. It is time for us, students, to speak up and take a firm stand against such injustices. Let us help to bring the desperately suffering and misery have been achieved at the cost of many, many years.

Guidelines abandon

Drug problem and the law

The Honorable Judge Fred Schwartz of the County Justice Court, Morro Bay, cleared the air concerning illegal drug use and the law at the courthouse Monday night. This Conservation, county key

Conservation was the key word at the San Luis Obispo County Development and Airports conference held Wednesday in the College Theater.

Kenneth with Schwartz explained that the purpose of the conference was to present the issues and communities in the county of San Luis Obispo an opportunity to present their aims and goals for their future development with the theme of the conference to be, "Tomorrow as We See It Today."

The conference opened with a brief welcome by Pres. Robert E. Kennedy, followed by an orientation speech given by Ned Lee, the College’s supervisory director. Ragway said of the county, “We must take inventory of the resources that exist in San Luis Obispo County. We must compile a list of needs of the community, so that we may attract resources to improve the country."

The bulk of the conference consisted of presentations given by the county area concerning their needs and assets with an emphasis on conservation and the preservation of the natural beauty in the county.

Schwartz presented a slide show for the central county area showing a brief history of San Luis Obispo brought up to date by pictures of the pollution in the city of San Luis Obispo.

Schwartz outlined the city’s assets and its drawbacks and said, "The single greatest economic asset of our community happen to be the natural resources. The county should be careful not to destroy it."

The mayor viewed San Luis preparing for the future by giving priority emphasis to: trade and service, recreation and tourist development, and industrial growth in that order.

A panel discussion concluded the conference with the mayors of each city in the county taking part. Members of the audience then asked questions concerning pollution, community communication, airport planning, and taxes.

UPI-A former National Association of Broadcasters official told the government Thursday the tobacco industry has quietly abandoned its code for regulating advertising and is using more television extolling cigarettes with health, fresh air, sports and sex.

Brarer, now a New York advertising consultant, filed a complaint with the Federal Trade Commission saying the agency to impose strict guidelines on Jan. 3 when a ban on broadcast commercials takes effect.

After that, he said, cigarette makers may triple advertising expenditures in newspapers, magazines and on billboards, to perhaps $100 million a year. In asking for the FTC to set standards, Brarer said, "the industry's cigarette advertising disintegrated on Aug. 1, leaving not even that weak form of claims and promotions used in cigarette promotion."

"...claims and depictions implying health benefits which were based on the industry's own code now run rampant," he told the FTC. "If these themes and representations enjoyed unfiltered licenses they can easily trick the young into health warnings on cigarette packages and broadcast ban."

Brarer, former manager of the New York office of the NBA's advertising code authority, supervised a study of cigarette commercials which criticized many of the themes used. The study was not released until Brarer quit NAB and disclosed it himself in June, 1969.

The cigarette advertising code was administered by former New Jersey Gov. Robert Meyner. In his petition, Brarer said it "Finally closed 1968, it exists now only on paper. The industry has discreetly avoided a public announcement."

A spokesman for the Tobacco Institute, trade association for cigarette makers, said he did not know whether the code was still operating but was certain manufacturers were still following its provisions.

Brarer urged the FTC to issue "enforcement policies covering claims regarding gases in cigarette smoke, ads identifying smoking with public concern over pollution; claims for various types of filters; claims that a brand's smoke is "mild," "cool," or "smooth;" and ads associating smoking with relaxation, falsely, femininity, masculinity, romance, romance, beauty, and the benefits of nature."

Senior pictures

Seniors who missed having their pictures taken can have them done Wednesday, Nov. 18 in QA 60. Photographers will be on campus between 10 a.m. and 1 p.m. Call 546-3144 for an appointment. Yearbook subscriptions are now available.

Jobs to open

The opening of the new College Union Building next year will result in a limited number of part-time student jobs. The descriptions will, hopefully, be posted in the College Placement Office or the Placement Office in the Old Union, by the end of November. At that time, the Placement Office will accept applications for the announced jobs. However, since the completion of new student housing will not be until February, hiring will not begin until then.

Generally, the jobs will fall into several categories. Since the school Foundation will be contracting with the AABB for custodial and food service operations, hiring for these jobs will be filled through the present system of hiring such personal

by the Foundation. In addition, personnel will be needed in the union recreation area, the information desks, building operations and possibly other positions at a later date as the building program enlarges.

The interim, interested students should refrain from inquiring about the above positions until they are announced. Seniors who missed having their pictures taken can have them done Wednesday, Nov. 18 in QA 60. Photographers will be on campus between 10 a.m. and 1 p.m. Call 546-3144 for an appointment. Yearbook subscriptions are now available.
Mayor works toward goals

"I have a great deal of faith in what the city could be, and hope to continue my work for it and help guide it.

In fact, in my hands is the plan for Mayor Ronald Reagan and the city to gain his re-election to the governing body's last nine months. Do you remember the above statement used by Kenneth Schwaerts, the former mayor of San Luis Obispo some 19 months ago?

On April 14, 1986, in a director of architecture at Cal Poly Pomona, Schwaerts was a former city council member. He had been on the city planning commission from 1980 to 1981, chairman of the organization since 1983. Recognized among his peers as "an ardent conservationist," he was chairman of the Osyalo Beautiful Association.

In a publicized叫做 "Voter’s Guide," the following questions were asked of candidates Schwaerts, the incumbent, and W. Whitlock, who had served two-year terms as mayor of San Luis Obispo:

What method do you advocate in planning for capital improvements, and which improvements do you think should require priority at this time?

Schwaerts: A "long-range capital improvement plan which establishes basic priorities subject to critical annual review" should be adopted. Projects be funded in established priority order. Vital public utilities and protective services carry top priority. Street system next important. Schwaerts also stressed the need for city's recreational resources is

must be adopted. Hopefully, that will be done. We do believe that citizen participation is feasible. The city should execute the "framework" of the city's recreation facilities. We have focused attention on the recreation facilities of our older people as they represent the fastest growing age brackets in society.

"Some citizens have expressed concern about air pollution in San Luis Obispo. What action do you envision to ensure clean air in the city?"

Schwaerts: "Pollution is an area-wide matter. We must do our part by enacting and enforcing ordinances which will ensure that pollutants are not dumped into the air. We must insist on county-wide controls as well. We could get started tomorrow by prohibiting trash burning in the city."

"Now that the voters have spoken on Mission Plaza, what do you think may be the future completion of the Plaza development?"

Schwaerts: "A master plan"
Author pegged for slander

MOSCOW (UPI) - Andrei Amalrik was convicted Thursday of slandering the state in his book "FATAL" and sentenced to three years in a labor camp, friends reported.

In his book, which was published in the West, Amalrik predicted war with China that would lead to the collapse of the Soviet state.

He said the Soviet Union already is "disturbing itself and disintegrating like sour dough," and said that sometime between 1980 and 1986 it would explode in "anarchy, violence and intense national hatred."

The source said Amalrik was convicted by a court in Birobidzhan of "preparing and disseminating falsehoods derogatory to the state" and said that he be kept under a "strict regime" during his detention.

A codefendant, Lev O. Ubochik, who was convicted to three years in a labor camp but under a more lenient "general" regime, was also convicted as reported.

The 13-year-old Amalrik, who had denounced his trial as illegal, is a historian by profession although he never earned a degree because his views conflicted with those of his professors at Moscow University.

He was arrested last May 21 and the prosecution based the case on five documents, including "1984" and "Involuntary Journey to Siberia," which also was published in the West, an open letter he wrote to writer Anatoly Kuznetov and two interviews with the Columbia Broadcasting System.

Foreign loan must wait

Foreign students in need of money will have to wait a little bit longer, as Student Affairs Council appears to be playing bureaucratic football with the International Students Emergency Loan Fund.

At the October 27 meeting, SAC could not agree to go ahead with the loan in—so to say foreign students. The fund, tagged ISELF, was started to aid the many foreign students who are suffering financial hardships from the increase in tuition. As last Tuesday's meeting SAC rescinded the move.

A hassle arose over the clause that says a foreign student must have a "responsible adult, let alone be willing to do it. And suddenly our skies are filled with jets. And, suddenly, jet pollution is a major problem.

General Electric tackled the head on when building the DC-10 engines. And we accomplished two things. When you see the DC-10 take off, you'll see no black marks at all. Because the engines make virtually no smoke.

Of course, there's more to jet exhaust than just smoke. Our goal is not only to make jets run totally clean. Another problem with jets is noise. If you've ever lived anywhere near an airport, we don't have to tell you that.

General Electric has been working on noise, too.

GE was chosen by the federal government to help solve this problem for the aviation industry. At present, we know of no way a powerful jet engine can be made noiseless. But we've made progress in that direction.

The DC-10 engines, for instance, are quieter than any jet engines on the passenger planes of the Sixties. Quieter, even though they're more than three times as powerful.

We have more work to do before we'll satisfy all the people concerned about jet pollution, ourselves included. But because we've been working at it since the mid-Fifties, before it was widely recognized as much of a problem.

we've already crossed some important hurdles.

Why are we running this ad?

We're running this ad, and others like it, to tell you the things General Electric is doing to solve the problems of man and his environment today.

The problems concern us because they concern you: We're a business and you are potential customers and employees.

But there's another, more important reason. These problems will affect the future of this country and this planet. We have a stake in that future as businessmen. And, simply, as people.

We welcome your comments. Please write to General Electric, 507 Lexington Ave., New York, N.Y. 10022.

Tone of newspoint, to be used for Mustang Daily, links the halls of the Graphic Arts Building because of loan of space.

The Mustangs didn’t retain their CCAA title last Saturday at the conference meet at Cal State Fullerton, however senior Greg Tibbetts did qualify for the NCAA College Division meet in Wheeling, Ohio. Tibbetts finished fourth in the race, while teammates Wally McConnell, Dale Horton, Rich Walline and Frank Uher crossed the line in 11th, 19th, 22nd and 26th positions, respectively.

Due to a minor eligibility technicality, Brian MacPherson and Rich Walline were unable to compete in the five mile event. Distance coach Larry Bridges said the team felt the loss of the two leatherlegers, but would have been hard pressed to down the powerful Cal State Fullerton Titans even at full strength.

A Pomona runner bites the dust as first McConnell and then Horton pass him near the mid way point of the race. The two Mustangs practically paced each other throughout the race, finishing one behind the other.

Distance Coach Larry Bridges and Tibbetts review the race shortly after it ended. Tibbetts finished only five seconds behind a Fullerton runner who had bested the Mustang harrier by a minute and a half earlier in the season.

You know him, but have you ever been to his house?

Sure, you got through Shakespeare in class. You can even quote lines from his plays. But have you ever walked down the streets where he walked? Like Henley Street where he was born. Or visited Hall’s Croft, the home of his daughter Susanna? Or some of the other homes he held dear? Because only then can you truly understand the man and his times. There’s so much more you can learn about history simply by being where it happened.

And in Britain you can travel through thousands of years of history. And you can do it on a very limited budget. To find out about accommodations for as little as $3 a night (full English breakfast included), places where lunch or dinner costs $1.50, special discount tickets and lots more ways to save money, send for our free booklet: Britain for Young People.

It’s one way to get acquainted with the right people and places.
Soccer team wants victory against Loyola

The Mustang Varsity Soccer Team will be facing the 11-man team from Loyola University Saturday, at 1:30 p.m., on the soccer field behind the Men’s Gym.

The crusty improved Mustang team will be going for their first win after losing their last game to Santa Barbara in the final few minutes of play. Coach Weanouaky stated that “the team is finally beginning to function as a unit rather than individually.” The Mustangs will wind up the season on the 21st when they will go up against Cal State, L.A. Due to a late appropriation of funds, the Mustangs started slowly and have just now reached their peak. Come on out and support the Mustangs.
