Free Angela rally here

by Ahmos Zu-Bolton II

A BSU sponsored "Free Angela" rally was held at high noon in front of the Student Union. About 30 students attended the rap session, but very few voiced their opinions.

DeWayne McGhee, newly elected BSU President, said, "Angela will never get a fair trial, the media and the Chief-Pigs have already convicted her," and the Chief-Pigs can't afford the best lawyers.

McGhee also called Miss Davis a "great Freedom Fighter and the symbol of the Black Struggle." - "What some people don't realize" countered McGhee, "is that revolution means bloodshed."

"The California Judiciary System caused the murders in Marin County," continued McGhee, "40 per cent of all prisoners in the state pens are Black and it is our duty under the Declaration of Independence to free them."

"What some people don't realize" countered McGhee, "is that revolution means bloodshed."

John Brown, BSU Vice-President, attacked this statement, saying that "the court system is gonna kick us in the face just because we are Black. Even a great lawyer can't cut-talk prejudice!"

McGhee then announced that a demonstration was to be held at the County Courthouse. He urged students to "show their concern (for Angela) to the townspeople."

Only about 30 students attended the courthouse rally. They marched orderly through the main building and then proceeded down Monterey Street chanting "Free Angela."

A "Free Angela" banner was placed in front of the Court Building, and then the rally broke up quietly.

Two on counseling staff author psychology book

A psychology text which may be used for self-study has been authored by two members of the Counseling Center staff on campus.

Dr. Robert E. Alberti and Dr. Michael L. Emmons are co-authors of Your Perfect Right: A Guide to Assertive Behavior.

The book, printed in Arizona and published by San Luis Obispo, is described as a guide to the development of assertive behavior for persons who have problems of non-assertiveness or aggression. It is particularly designed for use by teachers, counselors, and personnel workers in schools and colleges.

The authors contend that many students and others are troubled by non-assertive or aggressive behavior because they are unable to assert their "perfect rights" in an appropriate manner.

A section of the book deals with the process of assertive training and is also intended for use by psychiatrists, psychologists, marriage and family counselors, pastors, social workers, rehabilitationists, and employment counselors.

Examples are given of assertive behavior situations encountered in business, school, family, and work settings.

Dr. Alberti is a graduate of this campus and later received his M.A. degree from California State College at Los Angeles and his Ph.D. from Michigan State University prior to joining the counseling staff in 1960.

Dr. Emmons is a graduate of the University of Illinois. He also received his M.A. degree from that institution and his Ph.D. from the University of Wyoming prior to joining the counseling staff in 1960.

Trustees hear cases

At the Los Angeles meeting of the Cal State Trustees yesterday the major issue was the hearings of terminal disciplinary cases.

The Trustees heard the case of a Mathematics Department head at Cal State L.A., Prof. Eckert. Eckert was cited for allegedly getting paid for teaching at Cal State L.A. while he was actually teaching somewhere else.

The Trustees will make their final decision on Eckert at today's session.

Professor James Freeman, a Psychology Instructor from San Bernardino State, is accused of falsifying faculty evaluations reports. Freeman allegedly submitted a faculty evaluation without interviewing the subject.

Spring quarter is frozen

No new students will be accepted for spring quarter. This was the word yesterday from Pres. Robert E. Kennedy.

Kennedy also said that the projected total enrollment for next year will be no larger than this year's final average of 11,700 full time equivalent (16 units or more) students.

This means that the possibility exists that next year might see a closed winter and spring to new students to keep within the projected capacity.

Kennedy also said that letters are being sent out to "some 3600" students, of which "about 3,000" are new or transfers.

Tom Dunigan, director of institutional research, said that 3000 summer quarter students are expected to enroll, 1200 of these students being new. Dunigan also said that the total for next Fall's enrollment is 12,270 full time equivalent students, of which "about 3,000" are new or transfers.

Dunigan said that the 12,270 full time equivalent students will fall off with the usual attrition rate in Winter and spring quarters, but that Winter quarter may be closed to new students if the projected total enrollment looks as if it may be exceeded.
Four Thoroughbred colts from this school were sold at auction for $8,400 in the California Thoroughbred Breeders Association Winter Sale at Pomona.

The school's top selling colt was Peppa's Picture, by Peppa's All out of Lady Avila purchased by Don M. Bucci, Littleton, Colo., for $2,700.

Father's Tux, by have Tux out of Colt sale totals $8,400.

Charge to Father, brought a high bid of $2,100 from James D. and Nelfa of Nuevos, Calif. Irish Host purchased by Jack Davidson of Vancouver, British Columbia, and Runnymede purchased by Jack Varia of Parkfield, Calif. brought $8,400 each.

The colts were produced by mares maintained in the foundation herd for use in instructional programs in horse management. The herd was established by donations of members of the CTRA, and is cared for by students.

Announcements

The college union board of the students wants memb., two yrs. experience. T.C.U. FEB. 1 Deadline.

Summer lots closing, opening, 8 a.m. to 4 p.m. until end of June.

Private Italian lessons by native Italian, minimum rate 500.00.

Do something different this winter: Go to the movies at 6 p.m. until end of June.

Custom T-shirts. The more you order, the better the price. Give your order to Mrs. Roycroft, Roycroft, Long Beach, CA 90801.312 312.

AQUARIAN SUN BUST! We are the only show to be member AQUARIANS, 18 yrs. minimum, athletic, Specialty rates for class displays. Special rates for class displays. Special rates for class displays. Special rates for class displays.

GENERAL TELEPHONE & ELECTRONICS

In addition to the Mars exploration, the United States plans to launch a Mariner spacecraft to Jupiter in the early 1970s. In addition, the United States plans to launch a Mariner spacecraft to Venus in the early 1970s.

Cape Kennedy UPI - Russia's successful landing of an automated probe on Venus gives the Soviets at least a five-year lead over the United States in the exploration of the surface of another planet.

And there have been repeated hints from Soviet scientists and commentators that last December's Venus 7 landing was just the start of an extensive planetary exploration program. To United States plans also have ambitious plans to explore the planets, but severe budget cutbacks have delayed some projects and threaten to affect more. The scope of the U.S. program may be revealed by Friday when President Nixon presents next year's budget to Congress.

In any event, the U.S. is devoting most of its planetary funds to exploring Mars because scientists say the red planet has the best chance of harboring some form of life.

Russia appears to be concentrating on Venus. Three probes in addition to Venus 7 penetrated the thick Venetian atmosphere during the past four years. There have been no an¬nounced Soviet Mars missions since 1964, and no prior ones succeeded. America's Mars programs of the 1970s begin in may when the space agency will launch two Mariner television auroras designed to orbit Mars and flash back photographs of 70 per cent of the Martian surfaces.

These will be the first spacecraft to orbit another planet and scientists hope the Mariners will operate long enough to show seasonal changes on Mars.

America's big step in unlocking the secrets of the planet is now scheduled to come in 1978 when two large and sophisticated Viking spacecraft will land softly on Mars and search for life.

$800 million Viking program will mark America's first attempt to land on another planet.
Avant-garde production

"Avant-garde" is the byword, America Hurrah! is the production, according to Kirk Stathea, publicity chairman. The modern play depicting the foibles of Americans will be performed on Thursday, Friday and Saturday nights at 8:30 p.m. in the College Theater. Admission will be $1 for students and $1.50 for the public. Free cider and bread will be served.

Groggs plunder LA club, test Fullerton Finlanders

This school's Rugby Club reached its top performance of the season last weekend in swamping perennial state power L.A. Rugby Club 36-6. The Groggs employed a strong overall team effort to overcome the size advantage enjoyed by the L.A. club. Scrum-half-back and coach Dave Ritchie attributed the overwhelming, victory "not only to our fine ability, but also to our hardline training program."

The contest was never close. Gary Abate broke loose for four tries, two on runs of 60 and 70 yards, as the Groggs leaped ahead in the first half. Backs Jon Garretson and Bill Matthews also enjoyed strong performances, each scoring two and containing the L.A. captain, Ed Johnston. Others instrumental in the victory were Al Coelho, kicker Jan Juric and Vic Riviera. The Groggs, favored by the Southern California Rugby Union to take the conference title, are now 1-1 on the season. Saturday, Jan. 30 they tangle with the Cal State Fullerton Finlanders in a 1 p.m. away match.

Come to NCR
in Los Angeles for
the opportunity that
won't quit

If you can think creatively in the realm of advanced data processing systems, we offer you the opportunity to create an important place for yourself in one of the world's great computer companies. Because of our across-the-board, worldwide commitment in computer systems, your career will be as secure as it is exciting. Your work will consist of challenging non-defense assignments aimed at improving business, financial, government and educational operations in 121 countries. In short, NCR offers you a chance to claim your fair share of the computer future. To learn more, please reserve the date below.

Opportunity at B.S. and M.S. levels

Important, continuing commercial activity in:

Software Development

Various positions exist involving origina
tion, design development and implementa
tion of complex software systems. Development of original functional design and processing techniques. design and implementation of state-of-the-art data base/file management software and a large-scale on-line multi-programming executive, design, flowcharting, coding and implementation of on-line executive software modules. Positions require a degree in business (computer science) or similar field.

Design and Development

Perform engineering, checkout, redesign and documentation for state-of-the-art computing equipment. Coordination from specifications of a logical sequence of components and circuitry for a desired computer system. Design, checkout, testing and documenting software programs, diagnosing and debugging equipment. Positions require a degree in computer science, mathematics or electronic engineering.

Diagnostic Programming

Work involves creative use of existing computer logic for automatic diagnosis of hardware malfunctions. Specific activities include writing programs to de-bug computing equipment; coordination from specifications of a logical sequence of components and circuitry for a desired computer system. Design, checkout, testing and documenting software programs, diagnosing and debugging equipment. Positions require a degree in computer science, mathematics or electronic engineering.
