Nixon seeks longer draft

WASHINGTON (UPI) — President Nixon asked Congress Thursday to extend the draft two more years and provide $1.5 billion to help achieve his goal of an all-volunteer army in mid-1973.

Nixon's message to the lawmakers also asked them to abolish undergraduate student deferments and exemptions for divinity students, a proposal Congress rejected last year.

He also proposed that young men with the same lottery numbers be called for induction at about the same time throughout the country. Under the present system in which each local board operates independently, men with low numbers escape induction in some areas while men with much higher numbers are drafted by other local boards.

The Senate Armed Services Committee said it would begin hearings on the draft Tuesday and important lawmakers favor extending the draft, although many question plans to quickly convert to an all-volunteer armed force.

The President said the $1.5 billion he sought would go for a 30 per cent pay increase for enlisted men with less than two years of service and "other programs to enhance the quality of military life." This is designed to make the military more attractive to potential volunteers.

Chairman F. Edward Hebert of the House Armed Services Committee and Chairman John C. Stennis, his Senate counterpart, both have raised serious objections to the all-volunteer concept.

Communication asked by council

Pat Linder

"The whole idea is to give you, the student, a perspective of what's going on." These were the words of Dean Alexander at the Wednesday student council meeting of the School of Business and Social Sciences. Alexander is the dean of the Social Sciences Department.

The main point of the meeting was that the students were expected to form the faculties of the departments of Social Sciences, Business, and Psychology and also have the right to question the departmental council and the administration. Another was that there would be an additional meeting with the student council and the administration would be willing to have an additional meeting with the student council. They have so many meetings now, that the administrators might find it difficult to find time for another. It is difficult to find time for another. It is difficult to find time for another.

Petitions stop service station

San Luis Obispo City Clerk Dean Fitzpatrick reported yesterday that a citizen petition against the construction of a gas station on the intersection of College Avenue and Santa Rosa has been turned into the city council.

According to Jim Archer, chairman of the events, the schedule of activities will begin Monday, Feb. 24, with an Engineering Week banquet, will be held, beginning with a no-host cocktail hour at 6:30 p.m. and the banquet at 7:30 p.m. The guest speaker for the event will be Dr. John Beck, the general manager and vice-president of the Advanced Production Division of White Motors, Torrance, Calif. In addition to these activities, various high schools will be touring the Engineering Department throughout the week, and an essay contest is currently in progress. The contest consists of two categories: one for engineering students and one for non-engineering students and will offer $50.00 in total prizes. The essay must be 250-500 words long, and must be turned into the Engineering, Barbara Reed.

Apollo 14 flight planned

Apollo 14 will be its way to the moon on Sunday with any luck at all. The countdown began on schedule and the astronauts have been put through their paces.

Alan B. Shepard, mission commander and America's first man in space, Stuart A. Roosa and Edgar D. Mitchell with be aboard the craft for the nation's fourth moon landing expedition.

Shepard has said he and his crewmen are "confident that things are going to work well." The astronauts have had the best emergency training of any space team because of the near disater of Apollo 13. They have rehearsed emergencies ranging from blown fuses to in-flight space craft explosion.

The astronauts were brought up to date by engineers on the changes in the craft to avoid Apollo 13's problem. An oxygen tank explosion on the way to the moon last April knocked out the command ship's life support system. The oxygen from the moonlander was used by James Lovell and his crew to make it back to earth. Modifications on the Apollo 14 include an extra oxygen tank in the command module.

Apollo 14 is due to begin orbiting the moon early next Thursday and the moon landing will be made on Friday. The earth splashdown is scheduled for Feb. 9.

The Indian Students Association movie "Woqt," planned for Sat., Jan. 30 at 8:30 p.m. has been cancelled because of unexpected difficulties.

Apollo 14 is ready for its three-man crew in the lunar landing. "My whole career I always felt like you only needed one seat in the airplane. So I think I'm ideally suited for this command module pilot's role in that respect."

Shepard and Mitchell will be landing on the moon. The modular equipment on the "pioneer", nicknamed the "rickshaw", will be used by the astronauts to haul tools, rock samples and other gear on the moon's surface.

Because of the weekend launch, local officials forecast an audience of a half-million people. John Nelson, a community relations official for the Sperry Agency, said indications are that "interest is higher for the launch than it has ever been."

Editor:

I would like to give my support to those who might negatively criticise the "color harmony" of the new College Union. In response particularly to the letter of Jan. 30, by Mr. Banks, I would like to say that if one is to characterise the result now with its might best be described as a Dr. Jekyll and Mr. Hyde effect. One cannot debate the virtuality of the desired effects, namely "a lively visual relief from the massive grey walls... Cheerful colors... a carnival-like atmosphere...", but the reality is far from supportive.

There are three elements present in the structure which might be determinative of some "minor" adjustments; the grey tone of the concrete, and the natural brick color. All of these qualities suggest more natural earth base. The present effect is comparable to painting a piece of granite a bright, primary green or decorating the Grand Canyon with neon lights. It seems to me that the real issue is a matter of some sensitive adjustment. One can achieve to a degree the stated desired effects with "slightly" more natural hues. It is unfortunate if we must compensate for the pre-existing qualities inherent in the facade of the building, but it seems to me that the present solution is an over-compensation in the direction of dis-harmony. There is evidence of a better solution in the use of one "lively," "cheerful," "carnival-like" yellow ochre which is fortunately separated from the more primary hues.

I do not wish to attack anyone personally. I do not have any knowledge of where one might place the responsibility. My protest and suggestions are not meant to be offensive, so much so that I like to think of the issue as ecological. At present I am physically and emotionally repelled by the environment in question. One cannot rationalise away the responses of the "uninformed" who are voicing their opinions. My reaction is real, and believe this to be true of others, no matter how vicious is the intent behind the present situation, the fact remains that many people are reacting negatively, not intellectually but perceptually. There is a valid difference.

Integrity slack

Editor:
The Iranian and Vietnamese students are to be commended for bringing political issues into the spotlight during the fine International Talent Show last week.

But journalistic integrity was not served by the Mustang Daily's Tuesday, Jan. 30th, report of that show. Space limitations may have accounted for the absence of a thorough description of the program. But why the omission of any mention of the Iranian students' anti-imperialist sketch?

Of course, the idea of anti-imperialism obviously made the college administration uncomfortable. So they claimed the goals of BLOTA, or how can he call the organizers irresponsible if he has never attended a meeting? In my opinion the irresponsible person is Paul Banks for saying something when he has no real knowledge of what he is saying.

If he is interested in finding out about the Tenants Association he could come to the next meeting (Feb. 3, Hawthorne School at 7 p.m.) instead of getting his information from an office in the Administration Building.

I have been observing the San Luis Obispo Tenants Association Executive Board meetings for some time now, and have come to the conclusion that the people who are working on this project need a more natural hue. The present color scheme would seem comparable to painting a piece of granite a bright, primary green or decorating the Grand Canyon with neon lights. I have been observing the San Luis Obispo Tenants Association Executive Board meetings for some time now, and have come to the conclusion that the people who are working on this project need a more natural hue. The present color scheme would seem comparable to painting a piece of granite a bright, primary green or decorating the Grand Canyon with neon lights.

I was amazed when I read the letter that Paul Banks wrote about BLOTA. How can he criticise the goals of BLOTA, or how can he call the organizers irresponsible if he has never attended a meeting? In my opinion the irresponsible person is Paul Banks for saying something when he has no real knowledge of what he is saying.

The "Gaudy" U.-fitting title for Cal Poly's latest abomination. I sincerely hope I haven't been paying these last four years, for the carnival atmosphere Mr. Jim King seems to think this campus needs. I need hardly hoped the new complex would work as a center for relaxed conferences, released social gatherings, and possibly even a comfortable spot for the student to rest his tired body between classes. However, the present color scheme would seem conducive to little other than excited debate and nightmares. There are alternatives to this blinding parade of color. Is there no one left on campus who can create? The bland concrete walls could have been very effectively broken, visually, by sculptures, collage, a sensible amount of color and, if obtainable, some true artwork. Please, let's decorate the building, not obliterate it! There must be a happy medium—let's find it.

Geoff King
Quints born in France

GRENOBLE, FRANCE (UPI) — A 29-year-old school teacher gave birth to quintuplets Thursday at Voiron Hospital near Grenoble, hospital officials said.

The officials said three boys and two girls were born to Mrs. Michèle Rioulet.

Get tied up!

Ties, costing $3.50 and $4.50, will be on sale Monday through Friday from 8 a.m. to 1 p.m. in the lobby of the Math and Home Economics Building and on the library lawn. Girls will also be accepting orders for ties from those who wish to supply their own material.

Quints born in France

Immediately after their birth the quintuplets were transported to the Hospital in Grenoble, where they were placed in an incubator.

The mother, who remained at Voiron Hospital, was reported in good condition—but still not over her surprise.

Communication

(Continued from page 1) and the individual department meetings.

Chase brought up the following suggestion: that the school council holds its next meeting at the student council so that they have an idea of what the administrators are dealing with.

The students thought this to be a good idea and it was agreed to hold a "joint" meeting next week.

Dean Alexander said student remarks are very important in matters, but there must be a large number of students reporting an issue. In other words, a student can't just get an idea one morning and expect the administration to jump on it without some support by others.

He said that new ideas are always welcome; it might just be the spark that the administrator needs. "Not to say that we don't have any new ideas ourselves," Alexander laughed. He also said that everything affects you (the student), and this is the beauty of most of the administration.

Another issue briefly brought up during the course of the meeting was concerning advertising of tobacco and liquor in the Mustang Daily. Everyone present at the meeting expressed no feeling against the advertising of such products. Why not?, was the reply of most.

Other issues brought to the attention of the members were the establishment of the new bowling club and a new faculty evaluation system.

Rodeo banquet tickets on sale

The Rodeo Club is sponsoring a steak dinner banquet Feb. 8 at the Elks Club starting at 7 p.m. A film of the 1970 Intercollegiate Rodeo finals will be shown and a guest speaker will be featured, according to Buxx Abrams. Tickets are now on sale in the lobby of the Agriculture Building for the price of $4 per person.

Free concert

A free concert will be presented by members of the Women's Glee Club, the Women's Sextette, and the Men's Quartet this Friday.

The concert will be held in the Hart Building of the Presbyterian Church at the corner of Marsh and Morro Streets, according to Debbie Evans, president of the Women's Glee Club.

The performance will begin at 7:30 p.m. There is no admission, and the concert is open to the public.

Escape from classes, work and city life topped off at 80 degrees yesterday as many students headed for the beach.

About 40 percent of the earth's oxygen is produced by growing forests and other green land plants.
Bob DeGrasse: torch-bearer in Saturday meet

The picture does not look rosie for Coach Dick Anderson’s swimming squad as it prepares to meet the San Fernando Valley State Matadors in a home meet this Saturday at 2 p.m.

"The only event that I feel confident that we can win is the 50-yard freestyle, which features our qualified for the nationals by Anderson. "He has already grown a deal of depth in every event, and we can beat the Matadors, we will have a good chance at the CCAA title. This team will be the super group" by offensive line coach Andy Brennan, senior slot receiver set season and career passing and total offense records last season for the Mustangs.

Players honored

Five members of Coach Joe Harper’s championship football team were honored plaques Wednesday night at a barbecue honoring the Mustang gridders, held in the Veteran’s Memorial Building.

Senior fullback Joe Nigos was selected as the “Outstanding Mustang.” He has already qualified for the nationals by Anderson. "He at Delano High School was Harper's second leading rusher with 871 yards. The two-year letterman played at Bakersfield College after prepping at Delano High School.

Three-year letterman Don Harper was the lone All-West honors. The 5-10, 180 pound Alameda athlete was honored. The 5-10, 180 pound Alameda athlete was named "Defensive Back of the Year." The senior signal-caller set season and career passing and total offense records last season for the Mustangs.

Senior Mark Sindell, anchorman of the line which limited opponents to an average of 153.5 yards a game rushing, was named "Defensive Linebacker of the Year." The middle-guard was also accorded Little All-Coast honors.

Labeled "a representative of a super group" by offensive line coach Andy Brennan, senior slot receiver set season and career passing and total offense records last season for the Mustangs.

Resolved, every loving couple should see this film before it’s too late.

Initial decisions see three passers chosen

The year of the college quarterback. Plunkett. Manning, Pastorni.

The National Football League’s 1971 draft saw pigskin throwers go in the initial three spots of the first round.

As expected, Stanford’s Heisman Trophy winner Jim Plunkett, went number one to Boston. Archie Manning of Mississippi was the second choice; going to New Orleans. Dan Pastorni, quarterback of the University of Santa Clara, was the third choice of the pros, going to Houston.

Passed over by the pros in the first round were all-Americans Joe Theismann of Notre Dame and Ohio State’s Rex Kern. However, four Ohio Staters went to the first round: Tim Anderson, defensive back, to the San Francisco 49ers; Jim Tatum, defensive back, to the Oakland Raiders; running backs Lee Hayden and John Brockington went to the Minnesota Vikings and the Green Bay Packers, respectively.

All-American Leon Burns, who in his two years at Long Beach State, ran over everyone including our Mustangs, was San Diego’s first round choice.
