**Draft death 'costly'**

Bob Newhart, a city and regional planning major who had planned to run for a city council seat in June, has announced that he will not be able to run because he does not meet the three-year residence requirement.

At the same time Newhart announced that he will drop out of the race, Keith Gurnee, a structural engineering and architecture major, announced that he plans to run for the position. Gurnee works as an aide in the county planning department. Newhart, who is chairman of the Citizens Advisory Committee in San Luis Obispo, had planned to challenge the residence requirement. He decided against that because of the costs involved, and because legal maneuvers by the city council could keep him off of the ballot for several years.

Newhart thinks that the three-year requirement should be deleted from the city's regulations. He said that he could run for Congress with only one year's residency. He said the requirement was "an oppressive law and is discriminatory to a large minority group—the students."

Gurnee, who has been living in San Luis Obispo for five years, cites a need for planned and controlled growth of the city and surrounding areas and for more cohesion between students and the community.

**Student drops seat bid**

Dr. Emil M. Mrak

WASHINGTON UPI—Sen. Edward M. Kennedy (D-Mass.) opposed Friday that Congress set a limit on the number of draftees during a two-year extension of the draft and abandonment of the volunteer army.

Rep. F. Edward Hebert (D.-La.) and Sen. John C. Stennis (D-Miss.) announced that the Kennedy proposal for an all-volunteer force by mid-1973 is "too costly" and "impractical." Kennedy indicated that he would continue to promote his idea as all-volunteer army during wartime as "too costly" and "inevitably infeasible."

"In the future, the idea would be supported in the Senate," Kennedy said in a Senate speech. 

**Dorm chief solicits new leaders**

College students with a sincere interest in people and their problems are being sought by Robert Bostrom, director of housing. Bostrom's office is now accepting applications for positions of resident manager and resident assistant for Fall, 1971.

"He is an integral part in the housing program, being available to help students at all hours, to answer questions, and talk with many answers who is able to make many referrals," Bostrom said in describing student managers.

According to Bostrom, several requirements are looked for in applicants. They include a sincere interest in people and their problems; a 2.3 grade point average or better; and "a knowledge of the college gained through residence hall living experience, co-curricular activities and leadership opportunities."

The salary range is $67.50 to $125.00 per month depending upon the size of the hall assigned.

Bostrom added that the amount of time which the position requires differs with the type of hall. A minimum schedule includes six hours desk duty per week, three hours in the hall, plus two or three weekends on campus.

For these leadership positions the college seeks students who have time, ability and desire to serve others," Bostrom announced.

Persons interested in applying should send their applications for the 1971-72 academic year are encouraged to obtain an application at the housing office in the Administration building, Room 2.

The selection process for both dorm chief and assistant is a personal interview and recommendations. Interviews will be scheduled between Feb. 15 and April 15. Applications are to be delivered by May 1.
Editor: An important part of our college experience is involved not with classroom learning, but with people. In the course of our years we spend, most people strive to improve their ability to get along with others and to form rewarding emotional relationships with one another. Inherent in achieving these goals is learning how to accept one’s own overt behavior and appearance to the warm human hidden inside. It is learning to see past a person’s outer behavior and appearance to judge them one against the other.

In our culture there are a number of institutions which judge them one against the other. The warm human hidden inside is lost, so to speak, to the warm human hidden inside. It is lost to us and to each person as they are and not to judge them one against the other.

In our culture there are a number of institutions which promote behavior quite the contrary to these desirable modes. One of the most notorious of these is the beauty pageant. Many men and women are trying to overcome this type of behavior as an obstacle to their learning to relate to one another. It is unfortunate that such pageants still exist today. A very good example of such an event is the upcoming shortly at Cal Poly.

The Poly Royal Queen Pageant will be held on Feb. 5. Unless you help. We (Students for New Action Politics) are asking all campus organizations to join with us in ending the pageant by refusing to sponsor a candidate to it. We are asking all Cal Poly women to help by please turning down any offers of club sponsorship. Finally we are asking the entire academic community to help by boycotting this pageant and all other activities which promote discrimination.

Prezident
Students for New Action Politics

‘Carnival’ look not needed for massive walls
Editor: Jim “Architecture Major” King’s letter regarding the validity of the color scheme of the new College Union is an insult to the intelligence of Cal Poly architecture students (or any other students for that matter). We are appalled at the logic he used in justifying this grotesque idea. He listed three reasons for justifying the painting: (1) “a lively visual relief”; (2) “a substitute for a system of redundant signs”; and (3) “to present a ‘carnival-like atmosphere.’”

We don’t know if Mr. King knows the architect of the project personally or whether he instinctively or intuitively arrived at these so-called “simple answers,” but he is wrong. No matter what the architect’s motives, the huge consensus on this campus (including architecture majors) is that the scheme stinks. One’s position for doing something can be based on the highest ideals, but if they aren’t executed with care and concern for the human element, they just don’t work.

The first reason, a “lively visual relief”, is highly exaggerated. Since when is color a panacea or cure-all for the mistakes of the architect’s design? If the architect felt his walls were too massive, he could have textured or tempered them, or even altered his whole design, but should not have tried to cover them up with a “lively visual relief.” One of the advantages of concrete as a building material is its ability to withstand weathering without a protective coating.

The second reason, “a substitute for a system of redundant signs”, is unclear. No other building on campus, including the old bookstore ever required such a system of signs. The form and shape of the building usually determine the entrance, not the color of the portal itself.

The last reason given by Mr. King is “to create a carnival-like atmosphere.” How do awkward coeds, arbitrarily placed, create a carnival-atmosphere? Why must a College Union have a carnival-atmosphere? Once you have honestly asked yourself these questions, Mr. King, you will realize that the justification of the architect is to consider what the needs and functions of the people are and then provide them in the best possible way; not to give them an injection of artificial atmosphere in order to create a mood or a setting. If that is what you would like to do, we suggest that you get out of architecture and go into stage design.

Two students take advantage of recent hot weather by flying their flag high while engaging in a power trip.

‘Tighten’ up to beauty beneath
Editor: I’m writing this not because I particularly want to expose all the aspects or virtues of the women’s life movement or event because I’m convinced with the deterioration of society in general. What has been overlooked or even ignored is contributing significantly to either one of these is the extreme simplification or perhaps more properly a “sanitization” of beauty.

The true meaning of beauty seems to be lost in the wise eyes of a Mysubikan statue of a superwoman reverberating excellence from the end of the Victorian era. Today people assume that beauty can be painted on or that it vanishes with time. How vain the world is to think that there is nothing under the superwoman layer. What is an ocean until you look inside of it? Likewise, what is a person until you look at him? Home was paralyzed and blinded by its own grandeur—are we any different? Lighten up. I belong to a generation of frunks but at least my world has a lot more in it than yours.
Dumke plan: dud?

by Keith Wilk

With increasing pressure on the state college system by increased enrollment and higher taxes the present system is going to have to change or else limit its services and cut educational quality. In an effort to change all this Chancellor Glen S. Dumke presented an 18-page report to the Trustees meeting in Los Angeles.

Several of the proposals are worth considerable attention as means for furthering education. Dumke’s suggestion for better utilization of campuses through evening classes and more extensive use of extension courses are suggestions long overdue from state leadership. A suggestion for reworking the teacher work load system and the freeing of undergraduate students from state leadership. A suggestion for reworking the instructor-student contact would be reduced. What would now be needed would be faculty members that resembled giant computers that could advise and evaluate but that could not share their tremendous practical, industrial experience with students through laboratory problem-solving sessions. Programs in engineering, architecture and agriculture, which we are so famous for, cannot be taught in three years of concentrated study at the student’s own selection pace.

Perhaps the most shocking and dangerous proposal is the suggestion that students not pursuing and making satisfactory progress toward a degree or credential objective be charged the full cost of instruction, those students who on their own will take in excess of that required for the degree or credential also be charged full costs.

What will happen to students who are working part time or full time to pay current expenses? What will happen to the student who wants to broaden his education in other fields like ecology, ethnic studies, or other programs not required for a degree? Should these students be penalized? Dumke claims these students are a burden to the state.

Dumke has suggested that a task force be appointed to investigate his proposals. Hopefully this task force will spend some time on this campus and allow the students as well as the faculty and administration to voice their opinions.

Dollar bills for senior ills

Two scholarship awards are available for the remainder of this academic year, according to Mary Kyler, financial aid counselor.

The California State Employee’s Association Senior Award is available to a senior student at this college. The applicant should be the son or daughter of an active, retired, or deceased member of either CSEA Chapter 97 or a CSEA Chapter R or a CSEA chapter in San Luis Obispo County or anywhere in California.

Another scholarship, the San Luis Obispo County CSEA scholarship is available to a woman student in her freshman year who is majoring in one of the following: agricultural business management, animal science, journalism (agricultural segment), or home economics. The applicant must be a graduate of a San Luis Obispo County high school and have an interest in the promotion of the use or production of beef.

All interested students should contact the Placement and Financial Aid Office for application forms as soon as possible.

Come to NCR in Los Angeles for opportunity that won’t quit

If you can think creatively in the realm of advanced data processing systems, we offer you the opportunity to create an important place for yourself in one of the world’s great computer companies. Because of our across-the-board, worldwide commitment in computer systems, your career will be as secure as it is challenging. Your work will consist of challenging, non-defense assignments aimed at improving business, financial, government and educational operations in 121 countries. In short, NCR offers you a rewarding today, a certain tomorrow and a chance to claim your fair share of the future.

Opportunity at B.S. and M.S. levels

Software Development

Various positions exist involving origination, design, development and implementation of complex software systems, development of original functional design and processing techniques, design and implementation of state-of-the-art database management software and a large-scale on-line multi-programming executive, design, flowcharting, coding and implementation of on-line executive software modules. Positions require a degree in business (computer science) or science.

Diagnostic Programming

Work involves creative use of existing computer logic for automatic diagnosis of hardware malfunctions. Specific activities include writing programs to debug function specifications and/or programs to verify hardware capability, writing test routines, coding, de-bugging and documenting programs. Positions require a degree in computer science, mathematics or electronic engineering.

Design and Development

Perform engineering, checkout, redesign and documentation for state-of-the-art computing equipment coordination from specifications of a logical sequence of components and circuitry for a desired computer output, design of circuitry for high speed computers and systems. Additional opportunities for men to perform design of test equipment to check out computer systems. Candidates should be interested in logical and circuit design for EE graduates.

On-Campus Interviews Tuesday, February 2

To arrange an appointment, contact the Placement Director in the Occupations Placement Office now.
Mustangs rout Fullerton(82)

by Bruce Albert

The Mustang's 14th straight win and a 6-6-2 league mark has swamped Oregon, 29-3, last Friday night at the Men's Gym.

After his timely first half shooting had kept the Mustangs within breathing distance, the 6-8 sophomore forward piloted a devastating second half attack which provided the margin of victory.

With the loss, Fullerton drops from the CCAA lead, allowing the Mustangs to gain temporary possession. Fullerton is now 3-1 in league action while Cal Poly rides along at 3-1.

As expected, the visiting Titans opened the game in a 1-2-2 (jug) zone defense. The strategy proved effective in the game's early stages as Fullerton captured the lead and held it exclusively for the first seven minutes of action. At that point, a corner Jump shot by Randy Genung gave the Mustangs the upper hand. The advantage continued to pass between the two clubs no less than eight times before the intermission break. At that time Fullerton held a 41-40 edge.

With the continuation of play. the Mustang five proceeded to scrunch the neta, hitting the initial eight points of the final half. Their efforts produced a 64-41 lead before the Titans managed to score. The home squad remained in command, however, as they outscored their opponents 33-23 over a ten minute span.

Senior Dennis d'Aumont earned an admirable performance within those limits as he hit eight points, mostly on power moves inside.

The remainder of the show belonged to Jackson as he continued to hit on outside jumpers and follow shots. His 32 total points established a personal and team high for this year's squad.

The game was not decided until Anderson of Oregon claimed victory.

The local club employed a zone defense to advantage in limiting the Titans' Tony Rodriguez to 15 points, far below his league-leading average.

In Saturday's contest, the Cal Poly five defeated Chapman, 92-77. The Mustangs overcame a cold shooting streak in the initial half to capture the triumph. First half action was unevenful as the teams traded scores, yielding a 39-36 advantage for the Mustangs.

After the intermission Cal Poly managed to penetrate the Panther's zone defense for inside shots. The result was a higher shooting percentage and a lead that widened to 18 points, the final margin of victory.

Senior guard Lew Jackson topped the scoring totals with a 35 point effort. Dennis d'Aumont and Billy Jackson followed with 16 and 14 points, respectively. Billy Jackson and Bob Jennings again paced the rebounding.

Champion's Oakie Martin and Brian Koss combined to swash the net for 25 points, mainly on jump shots from the 20 foot range.

With the home sweep the Mustangs climb to a 6-1 overall record and 8-1 in conference play. Cal State Dominguez Hills provides the most competition as they arrive for a Tuesday night game.

Grapplers pluck Ducks, avenge last year's loss

by Mark Cooley

The Mustang wrestlers swamped Oregon, 26-1, last Friday in preparation for their tough road trip through Michigan and Illinois.

Oregon never posed a serious threat to the Mustang victory for the entire match.

Victory number nine for the Mustangs was plucked one in a receiving venue of last year's disastrous roadtrip to the Pacific Northwest.

It was on that trip that the grapplers dropped four of six matches, including Oregon. But the Mustangs were ready for the Ducks this time.

The grapplers overcome expected troubles in the lightweight but it was not until the fourth bout that Oregon claimed victory. Gary McBride (118) won his bout from Oregon's Dave Luik. The bout was tied at the end, but McBride was awarded the victory for his riding time.

Glenn Anderson (138) came from behind to claim victory over Jason Schier, 9-4. Schier built a four-point lead, but Anderson overtook that lead in the second period. From that point he was never behind; however the bout was not decided until Anderson recorded an escape with 37 seconds left in the bout. Larry Morgan (134) casually defeated his opponent, 9-4. Morgan built a five-point lead that proved too large for Oregon's Brett Merrill to overcome.

Oregon gained its only victory of the evening when Jim Ventura posted a 13-4 decision over the Mustang's Steve Gardner.

Gardner had almost two minutes riding time but could not take advantage of his position.

The Ducks offered no competition as the Mustangs completely dominated each remaining match. Allyn Cook (130) got the grapplers on their winning ways after being momentarily sidetracked. He posted a 7-1 decision over the Duck's Dean Dixon. John Finch (190), Wayne Robak (134), Jon Morgan (142), Gary Malolfi (190) had no trouble in defeating Oregon's opponents, 9-1. This was one of many drives to the hoop that netted victory.

Billy Jackson 29 points against Cal State Fullerton Friday night Jackson also snatched 16 rebounds in the game.

Other Mustangs in double figures were Lew Jackson (18) and d'Aumont (21). Bob Jennings added 18 rebounds to the team effort.

The local club employed a zone defense to advantage in limiting the Titans' Tony Rodriguez to 15 points, far below his league-leading average.

The game was not decided until Anderson of Oregon claimed victory.

The remainders of the show belonged to Jackson as he continued to hit on outside jumpers and follow shots. His 32 total points established a personal and team high for this year's squad.
