Earthquakes rock L.A. damage and death rise

UPI—California's mightiest earthquake in 36 years smashed sections of Los Angeles and its sprawling suburbs into fire and rubble yesterday, killing at least 31 persons and forcing 160,000 to flee their homes beneath a cracked and leaking earth-fill dam.

Nearly half the victims died when the earthquake, "like a child's plaything. It was literally lifted up and dropped."

The quake was centered 40 miles northwest of Los Angeles and fell along 300 miles of California's underground fault network from Fresno to the Mexican border.

Nearly 1000 persons were injured. Damage mounted into the millions of dollars. The death rate is slowly mounting.

Byrd soars on Sunday

The Charlie Byrd Quintet will present an evening of pop jazz in the Men's Gym this Sunday, February 19.

Byrd's musical experiences include study with some of the world's greatest guitarists. He studied at Hartnett National Music School in Manhattan. In 1984, Byrd received a scholarship to study with the Spanish classical guitarist—Andres Segovia.

Byrd's extensive training in classical guitar, in addition to a formidable jazz background, opened up a new level of performance. Byrd did not attempt to synthesize jazz and classical elements into "modern music."

He said, "It's a wedding that lose the best of both." (Time 8-14-63). His music is better described as jazz played on a classical guitar without a pick or amplification.

In 1963, Byrd and saxophonist Stan Getz recorded Jazz Samba. According to jazz authority Leonard Feather, "...the entire brass love theme created in the United States may be said to have sprung directly from this album."

Byrd and his Trio have appeared at the Newport, Monterey, Longhorn and Virginia Beach Jazz festivals. Byrd has captured virtually every major award available to a guitarist, including Downbeat Magazine's International Critic's Poll and for several years running, Playboy Jazz Festival Awards.

Byrd and his group have made goodwill tours for the United States Department of State to South and Central America, the Near and Far East, and Africa.
LETTERS TO THE EDITOR

Learn more, gripe less

Editor:

Apprently there is some concern that the school motto of "learn by doing" may become "learn and that's it." I'm just wondering if that's not such a bad idea anyway.

Personally, I don't care if I learn by doing, by reading or by osmosis. It's still my sole purpose for being here.

I already know about the atrocities committed by the "Yankee Imperialist." No one has to remind me of the racial problems in this country. I'm well aware of the apparent discrepancies of our present administration. And I even get a through update on those issues every night at six o'clock.

More protest voices of dissatisfaction we don't need. Instead of using the campus as a sounding board for more dissent, why not utilize it as a tool for understanding and solving our massive problems. Who knows, we might learn something.

Love to CP

Ah, the agony of the ecstasy,
Paint the block, open the alley,
Let us in, there's hair to be cut,
Feed the grease, yeah that's education.
What's that you say about a war?
Sell that land, shovel that dirt,
Running cars are waiting,
There's gas for all.

Someone's rocking the boat! Drown em!
War? Yeah that's too bad,
Polly's my life, I love it,
These mountains sure keep one the fog.
Yeah that's not all, where's the world?
We've gotta fight to keep,
We can't lose.

Jobs are waiting, get those grades,
If you learn too, that's okay.
Fit right in, pay the tax,
And the war rages on,
Ah, the agony of the ecstasy.

I'm just

Shakes mark quakes

By United Press International

Seismologists have devised at least three scales for determining the force of earthquakes. They are the Richter scale, which registers the magnitude of quakes as shown by the movement of seismograph needles, and the modified Mercalli and the Rossi-Forel scales, which measure intensity—the amount of damage caused when a quake strikes.

The Richter and Mercalli scales are most widely used today.

The Richter scale was devised in the 1930's by Dr. Charles F. Richter of the California Institute of Technology, one of the world's foremost authorities on earthquakes, volcanic eruptions and other seismic disturbances.

The scale has no theoretical top limit, although 10 is generally considered its practical limit. Each full number on the scale indicates a tremor one time as strong as the next smallest number. Thus, a quake with a magnitude of 2 is one time greater than a magnitude 1, a magnitude 3 is one time greater than magnitude 2 and 100 times greater than magnitude 1 and so forth.

Using this logarithmic progression, a quake with a billion times more powerful than a tremor is a magnitude of one. The most powerful earthquake ever recorded—in Chile—had a magnitude between nine and 9.5 on the Richter scale. The Alaska earthquake of 1964 had a magnitude of about 9.3 on the scale.

The Mercalli and Rossi-Forel scales, rather than offering a mathematical formula for determining the force of tremors, instead provide rough guidelines for determining their strength by observing surface effects. The Mercalli scale ranges from I, described as "not felt except by a very few under especially favorable circumstances," to XII, "destruction total," which would be similar to a quake with the magnitude of 9 on the Richter scale.

The Rossi-Forel scale, seldom used today, runs from one to ten and is quite similar to the Mercalli scale.

A flag's valiant demise

Not since the days of Betsey Ross has the American flag received as much controversy as it has during the past year.

Used for everything from decorative shirts and ties to red, white and blue sheets and pillow cases, the colors are destined to become a commercial gimmick smash success. It's added color to motorcycle gas tanks and at the same time it's provided a mark of patriotism to thousands of hard-hats.

Victims of the "Easy Rider" syndrome, these people are usually seen with a flag sewn to the heel of their pants or as a patch in an old pair of Levi's. Stepping into the spotlight now, the government has supplied one of the most paradoxical policies in history. A series of arrests condemning unrestricted use of the flag has shed a great deal of light on a delicate subject. Arrests that, some complain, have every tendency to be discriminatory to young Hippie types.

California serves as an excellent example of how a law can be vague and often self-defeating. In that state, as in most others, the law states it "is a misdemeanor to publicly mutilate, deface, defile, or trample on any flag of the United States."

But why do people put flags on their windows? One student at this college with a flag on his car yesterday asked the Selective Service System to draft 17,000 for the Army in March, the same as in the first quarter of 1979, and about half the total of the first quarter is left. The calls for the first three months of this year are roughly the same as in the first quarter of 1978, and about half the total of the first quarter in 1978.

The Defense Department spokesman Jerry W. Fredheim said he expected the Pentagon spokesman Jerry W. Fredheim said he expected the Pentagon to break away and start his own design business. He was not yet licensed but did some miscellaneous work including metal sculpturing. He joined the governor's staff late last month. Hill became acquainted with Reagan during the term of his ASI office.

A past ASI president has been appointed to the governor's staff. Rush Hill, class of '68, is the Assistant to the Educational Advisor, Dr. Alex Herrihils. His job concerns matters that relate to current academic issues, from school on up. Hill will also stand in for the governor when he is unable to attend an educational event.

Hill was ASI President in 1968-69. He graduated with a double major in Architecture and Business Administration. He went on to work for Frank L. Hope and Associates, an architectural firm, as Assistant President of the company.

The American flag is a symbol of both pride and dissent. It is on trial throughout the country by people like Clyd Lager, who has found a new place to display the flag.

When asked why he had a flag with a peace symbol over it, and one with an ecology sign on it, one student summed it up, "I believe in peace and I believe in ecology.

The acute radical, however, takes his case off of car windows and uses the flag in a reckless manner. Victims of the "Easy Rider" syndrome, these people are usually seen with a flag sewn to the rear of their pants or as a patch in an old pair of Levi's. Stepping into the spotlight now, the government has supplied one of the most paradoxical policies in history. A series of arrests condemning unrestricted use of the flag has shed a great deal of light on a delicate subject. Arrests that, some complain, have every tendency to be discriminatory to young Hippie types.

When asked why he had a flag with a peace symbol over it, and one with an ecology sign on it, one student summed it up, "I believe in peace and I believe in ecology.

There are others who aren't really sure why they have a flag on the car. One man said, "I guess it's supposed to be symbolic of American patriotism," while another flag was there because it came in the mail.

A number of people are worried about the treatment of the flag. This concern was indicated in New York again, where some 800 arrests were made in 1979. In retrospect, however, in the same area an inverted flag at an American Legion Hall, in response to the Pueblo incident, went unnoticed; and no arrest was made on a N.Y. state's agricultural advertisement with Gov. Nelson Rockefeller's face super-imposed on a flag with potatoes in place of the stars.

Motorists were arrested for having decals on their windshields.

On the legal issue the question stands as to how far a person can go in displaying the flag and still remain within bounds of the law—a problem which has caused much discussion.

A housewife in Hauppauge, N.Y., was arrested for flying the flag upside down to protest the war in Vietnam.

Mothers ‘zapped’

London (UPI)—A joint concert by the American pop group The Mothers of Invention and the Royal Philharmonic Orchestra at Royal Albert Hall was called off abruptly Monday night when officials objected to the program.

The concert was to have been the musical score from the film "200 Motels" to be played by the Mothers and the 110 members of the Royal Philharmonic, led by Frank Zappa, lead guitarist for the pop group.

"We heard rumors about the program," said an Albert Hall spokesman. "The concert as programmed is not acceptable to us." The trouble is not with the music but what it stands for. The film is about the life of a rock group on tour and contains references to drugs and "groupie" girls—teenage girls who follow rock musicians.

"This must be the first time a classical orchestra has been turned away from a concert it was about to give," said Herbert Cohen, manager of the Mothers. The performance would have been about 79 per cent orchestral plus six or seven individual songs with lyrics.

"I don't know why it's been cancelled," said Zappa. "I gather the management thinks the script is obscene."

Frank Zappa, lead guitarist for the pop group.

Way to diploma-leather

"Blond, 17-year-old Tony Kassebaum is taking part in a "lifelong learning experience" by running his own business. Kassebaum has opened a leather shop in student-owned and operated Gaylord Galleries.

Kassebaum is getting credit towards his high school diploma by running his shop through the U. C. Berkeley Extension program.

"It works much the same way correspondence courses do," he explained.

Tony operates out of a corner in the Gaylord Galleries. Belts, visors, and purses are his specialties.

Veiled in mystery

"It was really terrific," says Bobbi Burgess about the Leadership Conference she attended last November. Miss Burgess, a junior dietetics major, didn't really want to go to the conference, but was "talked into it by friends." She says it ended up being a "great experience," and "it teaches you how to talk to people." Gregg Cato, a senior in business administration, was at the November conference too. He says through the group situation at the conference "you get to know yourself a lot better." Cato says "everyone should go to one of them."

"It's called a Leadership Conference," says Joyce Burns, "the Atlantic Richfield Oil Company sponsored five people from the committee at a national conference which was held in Riverside. Going to that conference gave us a lot of ideas which we were able to apply at the November conference which we put on. We want to try even more things at the February conference."

Exactly what goes on at a Leadership Conference is something which remains veiled in mystery. "We really don't like to say," Vilhauer says, "because the reactions from people are better if they don't know what to expect.

Sign-ups for the conference, which will be held at Cachuma Camp at Lake Cachuma near Santa Barbara, began Feb. 1 and will continue until all 60 spaces are filled. Students and faculty members may attend the conference, and should contact the TCU if they are interested. Cost is $6 per person.

If you have a yen for "Chinese Mother Goose Rhymes" the College Theater during College Hour is the place for you to be.

Music maestros Harold P. Davidson and Graydon Williams will be waving the chopsticks as they lead the Women's Glee Club and the Collegians through Thursday's free concert.

Music with an international flavor will be potpourried with contemporary American strains. A handful are: "I Like the Lad With the Golden Hair," "Danny Boy," "Look at That Girl," "I'm a Man," and "Sunny."

Also on the slate are the Majors and Minors, Harboring music men and the Collegiate Quartet, another male group known for its renditions of contemporary, popular and folk tunes.

If you're finding it hard to swallow your tuna, seafood of the future, and this catfish could be your next lunch. Bob Olson is currently studying the possibility of catfish as a common seafood.

Catfish hooked senior student

If you're a fish lover who's finding it hard to swallow your tuna sandwiches these days because of strange reports of mercury poisoning you'd be glad to know that something is being done to help you out. No, not better tuna, but more catfish.

Although it will be difficult to replace the tuna salad with the whitened catfish for lunch, it appears that the Ictalurus Punctatus Broodstock (or common catfish) will be the seafood of the future, and this school is right in the middle of the action.

Bob Olson, a senior Biological Science major, is currently gathering some 100 of the famous felines of the fresh water fish family in Shepherd's Reservoir. He has been working on the project since last summer when he decided to guardian the fish for a senior project.

Even though the main purpose of the fish is for study, they might end up on your dinner menu, eventually, Olson hopes that as soon as the catfish weigh one pound he can sell them to the Food Processing Department where they can be continued.

The project, carried out under the student enterprise program and financed by the Foundation, got off to a good start when a "Fish Breeder," a southern California catfish farm, gave the 1100 fingerslings to Olson.

The project has three objectives according to Olson: to see if catfish can be farmed in San Luis Obispo, since the climate here is different than in the usual growing regions; to study growing areas of different densities; and to study dieting.

Although the fish are serving as a senior project, the far reaching affects of the program could be very important. Dr. Richard Krejza, a biological science instructor working with Olson, is presently submitting a plan to the Committee of Marine Science Technology to gain support in making the catfish a regular feature of the school.

Approached rather skeptically in the past, because of a somewhat gruesome appearance, catfish farming has recently become a popular business in California, as well as in many southern states, where catfish farming has begun.

An estimated 16 million catfish are expected to be sold in California alone this year, with the rest of the country producing over 300 million prospective catfish dinners. The fish are usually sold to fee fishing lakes, but lately the sportman has been outranked by the gourmet who finds that the catfish doesn't taste all that bad. In fact, many fish eaters find it to be quite a treat.

No sugar in Ski Lift stick-up

Soda Springs, Calif. (UPI)—Heading them off at the pass with snowmobiles instead of horses, sheriff's deputies Monday tracked down and captured two men accused of trying to hold up a ski resort with a machinegun.

Authorities said the suspects had bound and gagged six employees at the Sugarbowl Ski Resort near the summit of historic Donner Pass but abandoned it after roadblocks were set up on the mountain highway in California's Mother Lode country.

Deputies on three snowmobiles, swapped down as the two men as they bounded on foot in two-quase about two miles from the ski resort. One man was captured in a grove of evergreen, the second was discovered hiding between a snowbank and an old railroad tunnel.

"It was just a process of closing in on them," said Abies. "Snowmobiles cover the area much faster than on foot and it was merely a matter of finding them and flushing them out," Sheriff William A. Scott identified the suspects as Patrick Warren McDowell, 29, of San Francisco, and John William, 29, who listed no address.

Scott said two men, armed with a 30-caliber submachine-gun and an automatic pistol, entered the Sugar Bowl resort lodge about 1:30 a.m., bound and gagged the six employees, and then tried to force their way into Schwarts' home.

Schwartz pushed one of the intruders outside and fired a shotgun at him. The pair fled. "He was very unfriendly," Schwartz said. "I realised the minute I saw the gun he was not there to play tiddly winks."

Black films shown at 7
by Almos Ez-Bolton
The second Black Film Festival sponsored by the BAU will be held tonight in the Engineering Auditorium. The films will run from 7 p.m. through midnight. "I Have A Dream...", "The Life of Martin Luther King", "The Heritage of Slavery"; and "Body and Soul—Part 1 & 2."

"I Have A Dream..." is the story of King's life and the forces that brought him to the leadership of his people. The film brings a better understanding of the philosophies and ideals that Dr. King exemplified. The civil rights movement of the 60's and 70's is brought into sharp focus.

"The Heritage of Slavery" is an examination of slavery and the attitudes established during slavery which still persist. Interviews with descendants of plantation owners and present-day black activists demonstrate the parallels between attitudes then and now.

"Body and Soul, Part 1" is an examination of the Black American's contribution to sports America. Harry Edwards, leader of the Olympic Games in 1968, is interviewed along with leading black athletes such as Tommie Smith, Lee Evans, Charlie Greene, John Carlos and Rafer Johnson.

"Body and Soul, Part 2" is narrated by singer Ray Charles. Charles discusses soul music in detail. He explains that because of isolation and the misery and humiliation suffered by the black man, the music called "soul" has been developed. Singers Aretha Franklin, Mahalia Jackson, and Billie Holiday cry out their souls of pain and despair.

Free tax counsel
Low income taxpayers throughout San Luis Obispo County are getting free help filing their 1970 federal income tax returns from a team of three students from the Business Administration Department.

The free help clinic was announced this week by Dr. George Clausen, interim dean of the School of Business and Social Sciences. Students John D. Ahearn, Marcia C. Engesser, and James G. Kluck were trained by V. Tony Stapley, manager of the Internal Revenue Service office, to qualify as volunteer income tax assistants (VITA) aimed at advising low income groups with their tax return problems.

For the project Is being maintained through F. S. Schmidt, who is IRS district director in Los Angeles.

The VITA offices will be located at seven separate centers throughout the county on an ongoing basis. The program ends March 6. The clinics, which begin this week in Santa Margarita, will be held at the Grass Roots Centers in each of the communities.

The students, who will receive college credit for their part in the program, will place special emphasis on revisions in the income tax laws which were passed in 1969 but apply to returns for the 1970 tax year.

The tax return problems that will be handled by the VITA team from Cal Poly will be available are:

- Student John D. Ahearn, accounting major, will handle problems 1-2.
- Student Marcia C. Engesser, accounting major, will handle problems 3-4.
- Student James G. Kluck, economics major, will handle problems 5-6.

The students will hold the following clinics:

- Oceano Grass Roots Center—Friday, Feb. 12, 6-10 p.m.
- Morro Bay Grass Roots Center—Wednesday, Feb. 24, 7:30-10:30 p.m.
- Nipomo Grass Roots Center—Friday, Feb. 26, 6-10 p.m.
- Atascadero Grass Roots Center—Friday, March 8, 6-10 p.m.
Two comedies coming

The New Shakespeare Company of San Francisco, a professional repertory company, will give two performances on this campus the last week in February. "As You Like It," a romantic comedy, will be presented Feb. 17. A second comedy, "A Midsummer Night's Dream," is scheduled for Sunday, Feb. 28th at 5 p.m.

Tickets for either performance will be on sale at the TCU starting Feb. 22. General admission is $2.50, students $1.50.

Sponsoring the performances on campus is the Fine Arts Committee.

Virginia Woolf

"An evening of fun and games at the home of George and Martha Middleton" is being promised by the campus theater when it presents Edward Albee's play Who's Afraid of Virginia Woolf. Performances of the contemporary and once controversial drama of middle America are scheduled for Wednesday, Thursday, Friday and Saturday (Feb. 17, 18, 19, and 20) evenings. Curtain time each evening will be at 8 p.m.

Edward Pinson, a senior majoring in speech who is directing the campus production of Who's Afraid of Virginia Woolf as part of the requirements for his bachelor's degree, describes it as "a gripping play that shocked conservative theater goers with its debut in 1962. Its approach to life is realistic, untouched and uncensored by euphemistic parody. The viewer becomes inescapably a part of this vibrating production, seeing perhaps, reflections of his own life mirrored in the action," Pinson continued.

Who's Afraid of Virginia Woolf is four experienced student actors. Barbara Harris, which Elizabeth Taylor memorably portrayed in the motion picture version of the play. The role of George Middleton will be acted by Bruce Wilkinson, a speech major, and Nick and Honey will be played by George Dellagagna and Debbie Ware, both speech students.

An advance sale of tickets for all four performances began this week at the Speech Department office, English 306. Tickets will also be available at the door on the four performance nights. General admission tickets are priced at $1 for students and $2 for others.

UPIL—Israeli Premier Golda Meir rejected Tuesday Egyptian President Anwar Sadat's proposal to reopen the long- blocked Suez Canal if Israel is ready to discuss a separation of forces for reopening the canal in Jerusalem, since Israel is ready to discuss a separate deal for Eilat. Sadat's proposal would turn down what Sadat called a new peace initiative.

Sadat had said the partial withdrawal would be the first step in the timetable the Arabs have demanded for the surrender by Israel of all Arab territory conquered in the 1967 war. The Foreign Ministry in Cairo announced Tuesday that Egypt had called on the United Nations to stop "savage Israeli attacks" on Arab civilians in occupied territories. A memorandum delivered to U.N. Secretary General Thant in New York Monday protested the "increasingly aggressive attitude" of Israeli occupation troops against Arabs in the occupied Sinai peninsula and Gaza Strip. Similar protests were made by the Egyptian Red Crescent Red Cross Society to the International Red Cross and the Palestinian Red Crescent to Thant, according to Cairo and Amman reports.

Israel dismissed the Egyptian charges as "false and hostile propaganda in a letter delivered Tuesday to the U.N. Security Council president.

The deepest sounding recorded in the Indian Ocean is 22,968 feet.
Matmen ranked eleventh in drive for top ten spot

The latest national rankings by Amateur Wrestling News place the Mustang wrestlers in the number 11 spot. This ranking does not take in the grapplers' recent trip against Michigan, Michigan State and Southern Illinois.

Coach Vaughn Hitchcock explained the rankings are not held like those for football. The rankings are based upon how the Amateur Wrestling News feels that particular team will finish in the University division finals. It does not deal primarily with the outcomes of the dual meets, but the dual meets do have an effect on the rankings.

The Mustangs continue to rank in the top position in the college division rankings. But it is the University class rankings that the grapplers seek.

In a battle for the top spot, two Big Eight schools, Iowa and Oklahoma State, fight it out. In the rest of the top ten, the Mustangs will have at least three opponents. Two of them will challenge the grapplers this weekend.

Oregon State, number six, will tackle the matmen Thursday night in the Men's Gym. A critical match comes Friday against Portland State. Though Portland State is behind Oregon State in the rankings, it gave Oklahoma State a scare before bowing, 17-16.

The top team on the West coast will visit the Mustangs later in the season. Washington, number 3, has beaten Portland State earlier this year. According to Hitchcock, this week figures to be one of the toughest for his grapplers.

Amateur Wrestling News said in its release that the Mustangs could make into the top ten again before the end of the season. The next ranking will come in the first week of March.
Brown, Gill first again in two weekend events

High jumper Reynaldo Brown added another trophy to his collection by establishing a Canadian Open record at the ninth annual Telegram Maple Leaf Indoor Games in Toronto, Canada.

Brown, who will be eligible to compete on the Mustang track team at the start of Spring Quarter, was competing as a member of the California Track and Field Club. His leap of 7-0¾ brought an ovation from the crowd at the event.

He later failed at three attempts at 7-4¾, which would have tied the world indoor record.

Also last weekend Brown and triple crown jumper Mohinder Gill claimed first places at the Seattle Invitational. Brown leaped 7 feet even in the high jump, and Gill triple-jumped 58-10¾.

Improve Your Sound System!!
We Take Trade-ins

The Mustang swim team, home from a fifth place finish at the UCSD Relays held last weekend, will take on UC Riverside and Poly Pomona at Pomona this Saturday at noon.

The University of Pacific took first place honors with 111½ points. Host UCSB claimed second place with 154½ points. The coming foes, Riverside and Pomona both participated in the UCSD Relays, placing seventh and tenth, respectively.

"This meet won't be any pushover by any means, but I think that we can beat both teams," stated Head Swim Coach Dick Anderson. "We should be able to turn in some pretty good times, because the Pomona pool is very similar to ours in regards to water temperature and lane markings."

"If they (UC Riverside and Poly Pomona) enter the same relay teams, we should be able to win both the 400 yard freestyle relay and the 400 yard medley relay. We will also be strong in the 50 yard freestyle and the distance events (300 and 1000 yard freestyle)."

Art Carpenter joined Bob De Grasse as a qualifier for the NCAA college division championships at Springfield, Mass. In March. Carpenter turned in an 18:17.8 clocking in the 1650 yard freestyle at the UCSD Relays. De Grasse had earlier qualified with a 22.7 time in the 50 yard freestyle and was leading the CCAA at a 46.8 per cent clip.

Consistent offensive performance from Billy Jackson and the all around leadership of Lew Jennings has contributed toward the team's success. Billy Jackson is second in CCAA scoring with a 22.2 average and is 18.7 on the season. His season rebound average of 9.5 is second only to Bob Jennings' average of 10.7, and both men are averaging three rebounds per game more since conference play began early in January.

Broncos and Highlanders to test Mustang aquamen

Mustang center Bob Jennings muscles up for two points. Jennings transferred to this school and has contributed desperately needed rebound strength in addition to consistent scoring.

Halfway point: Mustangs first

Halfway through an anything goes California Collegiate Athletic Association basketball race the Mustangs are in strong position, tied with San Fernando Valley State College for first place.

Both the Mustangs and Titans are 3-1, Cal State Fullerton is 3-4, and both the University of California at Riverside and Cal Poly Pomona are 1-3. The sole Fullerton loss was administered by the Mustangs, and Neda Bonner's boys lost only their first game to Riverside.

On the season the Mustangs sport a 12-4 mark. Six straight teams have fallen before them, a fact Bonner attributes to sharp shooting by the players and better team play. The Mustangs have shot over 50 per cent the past three games and are leading the CCAA at a 46.8 per cent clip.

Consistent offensive performance from Billy Jackson and the all around leadership of Lew Jennings has contributed toward the team's success. Billy Jackson is second in CCAA scoring with a 22.2 average and is 18.7 on the season. His season rebound average of 9.5 is second only to Bob Jennings' average of 10.7, and both men are averaging three rebounds per game more since conference play began early in January.

Golfers set for season opener

Mustang golfers, under the guidance of second-year coach Bill Hicks, are in their final week of preparation for their season opening tournament this weekend at Vandenberg Air Force Base.

San Fernando Valley State and UCSB are the pre-tournament favorites. Also competing against the Mustangs will be UCLA and Vandenberg Air Force Base.

Leading the field of returning lettermen for Hicks’ squad is senior Greg Edwards. Edwards was the number one man of the 1970 golf team that sported an 11-5 dual match record, a third place finish in CCAA standings and a 19th place finish in NCAA college division championships.

Last year Edwards averaged 77.6 and has lowered that by almost six strokes to qualify with 71.8.

Other returning lettermen are junior Jim Kiger and Ed Phillips. Kiger averaged 77.8 last year and is averaging an even 77 this season. Phillips, number four man in 1970, averaged 78.7, but has slipped to 80.7 this season.

Freshman Bob Miller qualified for the team’s third spot while Costa College transfer Steve Freeborn landed the fourth spot. Rounding out the team is Mike Jones, who played on the 1969 squad.

Starting Vallylines Day

The name of the game is “wait and see” for Augie Garrido and 1971 edition of his baseball Mustangs.

Garrido, in his second year at the helm, said his club “will have to execute well to win.” Last year’s squad posted a 15-33 docket overall and were 9-12 in league play. This year’s schedule has the Mustangs listed for 14 games, plus the UC Santa Barbara tournament in late March.

Garrido emphasized the point that his team must concentrate on “not beating ourselves” if they are to improve on last year’s record.

Garrido will be facing the schedule with basically the same team he fielded last season. Only two newcomers have broken into the lineup. They are third-senior Dave Snow from Cerritos’ state junior college championship team and first baseman Gary Kruickes, a freshman who hit .380 for Richmond last year.

Starting Vallylines Day against San Francisco State at 2:30 p.m. will be: all-state catcher Steve Kline, San Francisco senior leading off; three year starter at shortstop Rick Pence will follow him; Dave Oliver, sophomore second and last year’s leading bat man at .360 will bat third; Snow will hit clean up; and senior left fielder Steve Freeborn will follow him. The sixth, seventh and eighth spots will be filled by right fielder Lathan Marsh, Kruickes, and catcher Rodin Baggett.

Friday’s hurlers will be Larry Sylvia, Kent Agler and Allen Noble.

**Netters open Thursday, pursue 2nd league title**

Three returning letterman form a nucleus for Ed Jorgenson's Mustang tennis team as it opens the season tomorrow (Thursday) at Westmont and entertains the University of California at Santa Barbara Sunday.

Last year's No. one man, John Ross of Hanford, Greg Piers of Merido Park and Paul Summers of Carpenteria are back to lead the team. Top newcomer prospects include Dan Lambert of Arroyo Grande and John McCormick of Fullerton.

The Mustangs, who lost three key netters to graduation, are the defending California Collegiate Athletic Association champions and Look second place in the NCAA College Division Championships. However, San Fernando Valley State College last year's pick to win the conference, again figures to be a thorn in the side of the Mustangs.

**Morgan named best wrestler**

Larry Morgan has been selected the "Mustang Wrestler of the Week" for his performance on the recent road trip to the Midwest.

Morgan won all three bouts on the trip and has been consistent the rest of the season. Morgan is rated the number one man at 125 against the team. Top newcomer prospects include Dan Lambert of Arroyo Grande and junior college transfer Tom Martin of Santa Clara.
