### College status

**by Paul Tokumaga**

Sixty-two—it doesn't really hurt if you don't really think about it. It could have been worse.

Following normal attrition, 62 is the number of this year’s faculty that won't be around next year due to budget cutbacks.

In a message yesterday that was originally planned to be his annual “State of the College” address, college President Robert E. Kennedy shifted into a more timely gear and spoke on the 1971-72 state college budget proposals made by Chancellor Glenn Dumba.

"In my opinion the budget is not a good one for Cal Poly and for the other state colleges," said Kennedy, "but it is an understandable one."

He told of "unfortunate myths" that have played a role in the budget make-up. One myth is that "faculty members don't work hard enough." He said that these people feel that when they have a teaching load of 13 units, he is only working 13 hours a week, not taking into consideration the hours of preparation. "Where there is smoke there is fire," is another popular belief, Kennedy said. Each time a display of radicalism takes place on a neighboring campus, "we are hurt by it."

Kennedy said that people also feel that "we can cut the budget without cutting the enrollment."

He listed some of the negative points of the cutback: eliminate clerical positions for staff positions; reduce the college community budget request by ten.

### Flexibility: the job key

**by John Trombo**

There are jobs, insists Mary Shaw, "supervisor for teacher placement at this college. Some candidates don't find employment because they don't want to leave a particular area because of salaries, climates, relatives or financial responsibilities. They aren't willing to go to the jobs."

Eugene A. Rittenhouse, director of placement at this college, agrees. His advice to teacher candidates is "consider going into all areas. We have teaching jobs that go begging because teacher candidates won't go after them."

Rittenhouse encourages candidates to come into the Placement Office early to get an idea of what's available before getting committed in a certain academic area.

Developing a major and minor academic package that will be most desirable to schools is advisable. The greatest need of most teachers is in industrial arts.

Women teachers are needed in physical education. Of course there is always a demand for special education and reading teachers.

Employers are impressed by teacher candidates who show an early interest in becoming teachers. Carol Crow, elementary placement supervisor, advises teacher candidates to take education courses early so an student teaching can be taken during the Fall or Winter Quarters. It is easier to obtain a student teaching assignment during these quarters. It also completes the student teaching record so prospective employers can interview and decide before the end of the school year. This is important because most employers want to see the student teaching record before hiring.

According to Mrs. Crow, "Teacher candidates should get involved in as many teaching situations as possible. Head Start and Day Care Centers offer summer work that gives that valuable experience. It is best to complete the five-year program and secure a full credential."

Mrs. Crow wrote to the Bureau of Teacher Education and Certification in Sacramento to get an answer to this question. "Would a candidate now be more likely to find employment with a partial fulfillment credential or a standard credential?"

In a return letter from Dr. Carl A. Larson he said, "It is our opinion that school districts are generally still looking for the best qualified candidates they can get.

### Uproarious zoo policy claimed

**by John Trombo**

Despite a petition from 12 students concerned with the treatment of the animals at the county-run Atascadero Zoo, the San Luis Obispo County Board of Supervisors yesterday maintained the animals are doing all right and "like the way they are being treated."

Supervisors referred to Parks and Beaches Director LeRoy Sherwin the petition and letter from the students expressing "concern with some of the old-fashioned practices...applied at Atascadero Zoo."

The students wrote that one lion is housed in a cage five by 32 feet composed of iron bars and concrete floors.

"Scientists have discovered that stresses of confinement, such as this, not only bring on nervous symptoms as chronic depression and animal obsession, but also emotional ill that can cause physical damage and even death." Citing Philadelphia zoo pathologist Dr. Herbert L. Ratcliffe, the students wrote that animals in confinement suffer sharply increased rates of heart disease, cancer and even ulcers.

The students wrote that each animal at the zoo "should be given a chance to live as it would in its natural habitat" or be moved where they can.

Supervisor Howard Manthos said, "I could as easily say the cages are too small and request that they be made smaller. But I wouldn't have accomplished nothing. It's like being against something with no reason."

Supervisor Hans Hellmann, Atascadero, was "surprised people think the animals are mistreated. They're treated better than some people. They are treated the way they treat them. They were born in captivity. We have no complaint on their treatment from the SPCA. There may be some basis for this letter, but I just don't agree with them. Their quarters are adequate."

County Planning Director Ned Ragain told the board that the curator of the San Francisco Zoo had been in on the design and approval of the iso cages when they were built.
Editor:

This letter is in response to Mr. Congdon's letter concerning the HI Mountain Enduro. He asked the question: "Is there a moral outburst?"

I have often wondered why motorcyclists come to the National Forest, at any level of experience, to ride through our semi-artificial environment. They don't stray from the course if at all possible, so it is highly unlikely that a "badlands topography" will result. These riders know that an oil or fuel leak, no matter how insignificant, can cost them the race. Their machines are kept clean, so they are unlikely to add pollutants to the creeks.

After the race the course is cleaned up and put back in shape. Last year the Penguins asked the campus Ecology Action group to help the clean-up crew if ever they had an All-for-the-Planet gathering. The A.E.A. expressed a view similar to Mr. Congdon's. The offer was refused. This was E.A.'s opportunity to see firsthand the effects of off-road cycling, but they preferred to do it like so many "Chicken Littles" who "scream "The sky is falling!" without ever looking up.

Enduro rides again

Editor:

I often wonder why motorcyclists find it necessary to rampage another small part of our semi-artificial environment. I will agree that we all must try to get along in this planet in brotherhood and peace, but such illiterate communications (letter from Paul) must be answered. (I doubt if anyone believes them) We are finding more and more that man does not realize the destruction he creates immediately but is manifest in slight changes which he can not see because his present excitement and enthusiasm have blinded him. I would ask the motorcyclist how they can honestly say there is no destruction in rampaging plants, spilling oil and causing our once serene and beautiful forest to be changed into a holocaust of noise. Man finds himself ignorant in many fields of ecology. However it takes little insight to see the possible damage that could be caused by 600 motorcyclists.

Think with your brains not with your heart. The cost of the rude deer less its blaze summit forms and turns to slate gray in fall and winter.

Editor:

In the past few weeks, it seems as though there has been a growing backlash against the Educational Opportunity Program. The reason for this appears to be related to the fact that students may be losing sight of how EOP benefits the entire student body of Cal Poly. EOP works to open up Cal Poly to a more representative cross section of the California population. This is a need that is definitely obvious and a goal that is certainly inherent in the definition of a public institution. EOP accomplishes this by extending to people of low income communities the opportunity to attend Cal Poly. This accomplishes less from the least representative communities who otherwise would not be able to attend college. Because of the recent judiciary decision and the declining attitude toward EOP, a group of students has begun an initiative petition. This petition requests that Student Affairs Council take all necessary measures to designate EOP as an acceptable recipient of the 30 per cent faculty unit fee outlined in Article 6 of the Facial Rating Code 41e. This stipulates the present methods of disposal are inadequate and in need of quick reform. (This means, you, Administration!)

How about a farse or something to keep the trash in the dump where it belongs? For one am willing to devote my time and energy to the trash)=stinking mess = will you help?

thousand dollars; reduce our faculty positions from the current level of 615, or 41% from the audited 1971-72 staffing formula request; eliminate balance of special leave program; Eliminate all out-of-state faculty recruitment; reduce our technical, clerical and student assistant support in instruction by 15.3 positions and in research by three positions; and reduce the Grounds Department staff of 19 by 3.9.

The Press quoted an expressed optimism when he spoke of Senator Donald Grunsky, chairman of the Senate Finance Committee. "He told people publicly he will do all he can to help Cal Poly." He added, "I think we have a good chance of adjustments being made in our budget." At the same time he cautioned against any political move. "I think we can stand on the merits of our own institution."

There will be no pay raises, but normal merit system will proceed as in the past.
Miss Black, using her voice for talent, sang "Summertime" which resulted in her winning the talent award. An interview of each girl took place, questions pertaining to blackness were asked. The fashion show of African garments concluded the pageant. The girls were judged on poise, talent, and overall performance. "The pageant was a good thing," the queen commented, "it helped motivate me to do things. I'm finding out that being involved is wonderful."

"The BSU is cultural; its purpose is to enlighten. It's meant to make us more aware of ourselves," stated the queen in reference to BSU. The 31 year old queen, a junior business major. Born in Oviedo, Texas, the greater portion of her life has been in Southeast Los Angeles. Her hobbies include singing, dancing, and sewing. Her motto is to live, to learn, to be happy, and to make the best of everything.

Musicians on concert tour

The Symphonic Band from this campus will leave on Monday March 22, for a five-day 10 concert tour in the Los Angeles-Southland which will end on Friday March 26. Conducting the Symphonic Band is William V. Johnson, a member of the campus faculty since 1966.

Five win scholarships

Five printing students have been named co-recipients of the annual John R. Long Memorial Scholarship of the California Newspaper Publishers Association. They are Fred DelBret of Millbrae; Don Fast, San Luis Obispo; John McCormick, Winnipeg, Manitoba; Bill Reed, Arvin; and Timothy Whittaker, Loyalton.

The BSU scholarship honors the past long-time general manager of the CNPA who was a leading figure in the re-establishment of the printing curriculum at this college in 1946. Individual awards were presented by James L. McLain, general manager of the San Luis Obispo County Telegram-Tribune, on behalf of the CNPA Newspaper Personnel Recruitment, Education, and Scholarship Committee.

The five recipients are all students in the Graphic Communications Department. Each has first-hand experience on newspaper production staffs. Two are also journeyman printers and members of the International Typographical Union.
Iran became Moore success

Once Barkley Moore gets a good thing going, he quietly drops out of the picture. This continuous dropping out has been his life's pattern for the past seven years. It all started when he dropped out of the University of Kentucky just one year short of his law degree and joined the Peace Corps. Besides being known as a drop-out, Barkley Moore is also known for being the most persistent Peace Corps volunteer that has come along in years. He has just recently returned after having a record of serving six years and four months abroad.

When he first arrived at what was going to be his name for the next six years or so, Gonbad-e Kavus, a small city located 75 miles east of the Caspian Sea and just 60 miles south of the Russian Turkmen Republic, Moore quickly noted the absence of any sort of library. A dog rather than a more plausible explanation helped the many Iranians in the area and set out on only the first of many tasks to come: soliciting door to door donations to help build a library. This was just the beginning.

Through Moore's instigation and the hard work of the Iranians, the first library in Gonbad opened its doors in the summer of 1966. At that time, it contained 10 hardback books, 260 periodicals, three shelves and six chairs.

At this point in the library project in Gonbad, the Peace Corps enthusiast was also responsible for instigating building of schools as well as 11 smaller libraries in villages around the city.

Unlike the rest of the country, "the Turkmen area of Iran is not Peran," explains Moore. "Often the children from this area would find themselves one year behind the rest of the children in school. So we started a kindergarten."

Funded privately rather than by the government, the kindergarten now permits a thousand more students to obtain an education each year. In the beginning, an attendance and the second part failed miserably—twice as many students as planned for showed up for interview 444-1287.

In addition to the library project in Gonbad, the Peace Corps enthusiast was also responsible for instigating building of schools as well as 11 smaller libraries in villages around the city.

This program helped as the rich and the poor," says Moore. "The children of the well-to-do parents have left the government supported schools for the private ones," thus creating a thousand new places for poor children that would otherwise not have received an education. However, there are two kindergartens, four primary schools and two private high schools in Gonbad offering education in addition to the public schools.

Once the kindergarten project was successfully on its way, Moore again quietly dropped out of the picture. He felt the biggest gain due to this program was the education it introduced into the area. Before it got under way, the government teachers just "wandered along."

Now, with the private schools in existence, Moore feels that the government teachers are kept on their toes.

There are only a few of the many projects Moore instigated—then dropped out of— in and around Gonbad. When he returned to the United States five years ago, Moore left not only friends, acquaintances and thousands of admirers, but also 14 "sons"—male students he is presently supporting financially.

It has been said that Barkley Moore is a saint. Any way you look at it, he is truly a remarkable man.

Band presents public concert

The Symphony Band, under the direction of William V. Johnson, will present two public concerts in the college theater on Thursday, Feb. 18, at 11 a.m., and 7 p.m. in a series of highly successful College Hour concerts that will feature the 64-piece band. Admission to this concert is free.

Friday, Feb. 19, the fifth annual Winter Band Concert will be offered at 7 p.m. Admission for the evening concert will be $1 for students and $1.50 for all others.

The Winter Band Concert will feature musical selections as "Frontier Fanfare," "Symphony for Band," "Encores in Jazz," and "Playdate I." Also included on the program are selections from the musical and motion picture "Paint Your Wagon" and various other selections in jazz and standards style.

by Craig Blies

Recent days have found a growing interest in self-made musicians on this campus. Starting in the twilled halls of Moir Hall with the shrill sounds of the re-muck hum and expanding to the airwaves of KCPR, these self-taught and somewhat inexperienced musicians are adding new dimensions to campus life.

Rough enduro tests cyclist

Five hundred riders entered the Hi-Mountain Enduro of those, approximately 800 checked in during the official finish time from 1:39 p.m. to 4:33 p.m. Dirty dusty wore out many, many pushed their bikes back. Some managed a smile but most gave a sigh and a look of exhaustion and relief. The reply to his question being positive, resulted to a loud "alabala!"

"That's a rough trail you've got," was one comment by a rider arriving at the finish line. It was a real neat run, it was a 1.01 mile, one rider describing the run to a friend. "The hills are filled with people, you people to weave your way through!"

"Boy am I glad to see you. It was pretty rough," another comment a cyclist. "Penguin put in a darn fine enduro. It's the best marked in the state," one rider said.

"Am I disquapped?" was a typical question asked by riders at the time approached four o'clock.

Some of the remarks made by the riders when asked their advice of the run: "Pretty rough but there are too many roads, not enough trails."

"It was laid out nice. Those Cal Poly Penguins sure mark 'em good."

"Good, except for the trouble with my motor it was pretty good. I hope you (Penguins) can do it next year."

"Rough! I got a flat tire."

The first five competitors departed promptly at 8:01 on Sunday, Valentine's Day as planned. The plan became endangered when a heavy loaded truck blocked the passage to the Los Padres National Forest, the riders destination. The sheriff and patrolmen were at hand and the small crisis was overcome.

The endurance run demanded two loops. The first loop was six miles long, the second 7 miles.

"The purpose of the first loop is to weed out the week riders," according to Dennis Warren, Penguin president. "A small number, riding first loop about 11 miles, is paved, the remaining first loop is even harder then. If the first rider makes the second loop, he should make the second loop," Dennis said.

Hidden checkpoints were artfully placed throughout the course. Noon check, not hidden, began at 10:18 a.m. Riders arriving half an hour early and an hour late were automatically disqualified. Riders were allowed a thirty minute break between their noon check time and the time they began their second loop.

Many riders gave up after completing the first loop. Many came back with flat tires. Many of the riders came back sticking a "no" as they were being pulled in by another fellow rider. Others rode on through missing the noon check with an outcry of "I quit," or "I give up."

Joseph Parkhurst, publisher of the Motorcycle West was one of many who did not run second loop. His bike developed a broken pole and together on a Friday night not long ago and recorded their doings. Besides finding out about a small crisis was overcome, they realised the next day after hearing the tape recording that their voices blended together in a way never before realised possible.

Out of that recording came their first song, "Till There Way You." By a growing popular group took a name, and have agreed to start engagement at various night spots throughout the area. The "Zuppo Nunzio Quintet" was born and they plan to continue spreading their unique musical style to a waiting world.

On the tall end of their first recording, the five have been looking into national recording contracts. Informal sources close to Nunzio himself have stated that talks have been conducted recently with major recording companies. The source told the reporter that Nunzio spent several hours in a recording studio some ten years ago. Nunzio himself has been unavailable for comment of this matter.

For over a week now, Nunzio has taken up another facet of the entertainment business. KCPR news director David W. Dexter told Mariglas Daily that Nunzio will be featured daily on the evening news program of the station. Nunzio has agreed to direct the Climatological Prediction and Forecast Division of the KCPR News Department.

Rudolph Leit, an electronics student on this campus, is the quintet's drummer, and stated that the five musicians have requested him to design a recording studio and begin a series of music for a recording company. The group have requested him to design a recording studio and begin a series of music for a recording company. The group have been under contract to complete this matter.

"The group has asked me to try to round up the best people we can to provide this background operations for Nunzio operation."
### Mustang Daily Sports

**Swimmers evened score but face a couple more**

by Mike Garcia

The dual meet record of the Mustang swim team was evened up to 2-2 with a double-dual victory over Poly Pomona and UC Riverside last weekend. The final score showed the Mustangs on top 53 to 61 over Riverside and 71 to 41 over Pomona.

Bob DeDrassie earned a first place finish in both the 60 and 100 yard freestyle events. His 100 yard time was also good for a first place against Riverside, as they both teams, but especially against Pomona.

The Mustang divers claimed firsts in both the one-meter and three-meter events. Their points were the main difference against both teams, but especially against Riverside, as they provided the winning margin.

The freestyle relay team of DeDrassie, Jim Burnes, Lester Waddell and Jerry Heflin came in first against both schools. Bob Doring and Bill Currier each scored first place points against UC Riverside.

Mammuth Cave in Kentucky played an important part in the War of 1812, providing saltpeter to make gunpowder.

### Grapplers seek big number 100

**Victory number 100 for the Mustang wrestling team against California schools could come some time next week.**

Vagian Hitchcock's team faced San Francisco State and Reed College University yesterday in a dual meet. Vagian Hitchcock's team has a 1-5 record. The Mustangs have lost only to Oklahoma State University and have a 5-4 record.

The Mustangs, who have lost only to Oklahoma State University and Navy this season, boast stalwart statistics. In total individual bouts, the team has a 117-64 mark and has outscored opponents 418-155.

In dual competition heavyweight Tim Kopitar has a 13-0 record. Gary Mason is 13-3, sophomores Larry Morgan and Frank Oakes each boast 13-3 dates and Steve Gardner is 11-4.

John Fisch and Lee Towner boast 8-1 and 8-1 records, respectively.

### Play volleyball for doubled fun

Entries are being sought for a mixed doubles volleyball tournament to be held Sunday, Jan. 2 at 3 p.m. in the Men's Gym, according to Dick Heaton, in- charge of the tournament. Entry in the afternoon event is 15 cents, to be paid at the beginning of the tournament. Students are invited to participate in or watch the action. Admission is free.
Basketballers work hard for all-important contest

Two days away from what appears to be the championship game in the California Collegiate Athletic Association basketball chase Neale Stoner has his team working hard on the basic fundamentals of play.

The Mustangs host San Fernando Valley State College Friday night at 7:30 in the Men's Gym. Both teams have 5-1 conference records; both hold a share of the conference lead.

“We're not going to do anything special in preparation for San Fernando,” Stoner said yesterday. “The game will be won or lost through execution of the basics—shooting, rebounding and defense.

The Mustang coach cited the latter as fundamental to the team's successes. In four of the last five games the opposition has been held to a shooting percentage under 40. During the same streak the Mustangs have consistently shot over 50 per cent.

Perhaps more important regarding the Saturday game, according to Stoner, is the looming possibility of making the Western Regionals. The team is 14-0 on the season and may need to capture all its remaining games in order for this school to be considered for the site of the playoff game, providing, of course, the Mustangs champion the CCAA.

Victory against San Fernando will put the school mark of nine established during the 1960-61 season.
