Annual "State of the College"

Due to budget cutbacks, the number of faculty that won't be around next year will be higher than that of the previous year's. It hurts if you don't think about it. Following normal attrition, 62 students had been in on the design and proposal made by Chancellor Glenn Dumba. "In my opinion the budget is not a good one for Cal Poly and for the other state colleges," said Kennedy. "But it is an understandable one."

He told of "unfortunate myths" that have played a role in the budget makeup. One myth is that "faculty members don't work hard enough." He said that these people feel that when an instructor is carrying a teaching load of 13 units, he is only working 13 hours a week, not considering the hours of preparation. "Where there is smoke there is fire," is another popular belief. Kennedy said. Each time a display of radicalism takes place on a neighboring campus, "we are hurt by it."

Kennedy said that people also feel that "we can cut the budget without cutting the enrollment." He listed some of the negative points of the cutback: eliminate a clerical position in the business program area; eliminate all reclassification funds for staff positions; reduce the college community budget request by ten percent.

A return letter from Dr. Carl A. Larson he said, "It is our opinion that school districts are generally still looking for the best qualified candidates they can get."

There are jobs, insists Mary Shaw, "supervisor for teacher placement at this college. Some candidates don't find employment because they don't want to leave a particular area because of salaries, climates, relatives or financial responsibilities. They aren't willing to go to the jobs. Eugene A. Rittenhouse, director of placement at this college, agrees. His advice to teacher candidates is "consider going into all areas. We have teaching jobs that are begging because teacher candidates won't go after them." Ridgeview encourages candidates to come into the Placement Office early to get an idea of what's available before getting committed to a certain academic area.

Developing a major and minor academic package that will be most desirable in schools is advisable. The greatest need of most teachers is in industrial arts. Women teachers are needed in physical education. Of course, there is always a demand for special education and reading teachers.

Employers are impressed by teacher candidates who show an early interest in becoming teachers. Carol Crow, elementary placement supervisor, advices teacher candidates to take education courses early so an student teaching can be taken during the Fall or Winter Quarters. It is easier to obtain a student teaching assignment during those quarters. It also completes the student teaching record so prospective employers can interview and decide before the end of the school year. This is important because most employers want to see the student teaching record before hiring, according to Mrs. Crow.

Teacher candidates should get involved in as many teaching situations as possible. Head Start and Day Care Centers offer summer work that gives that valuable experience. It is best to complete the five-year program and secure a full credential. Mrs. Crow wrote to the Bureau of Teacher Education and Certification in Sacramento to get an answer to this question: "Would a candidate now be more likely to find employment with a partial fulfillment credential or a standard credential?"

In a return letter from Dr. Carl A. Larson he said, "It is our opinion that school districts are generally still looking for the best qualified candidates they can get."

LETTERS TO THE EDITOR

Enduro rides again

Editor:
This letter is in response to Mr. Congdon's letter concerning the Hi Mountain Enduro. I have responded to a motorcycle enduro as most unintended people do, with an emotional outburst. He couldn't really believe that motorcyclists come to our recreation land from Arizona, Nevada, and even farther to rip up the serene and beautiful forest to be replaced by a holocaust of noise. It takes little insight to see the effects of off-road cycling, and they prefer to do like so many "Chicken Littles" who scream "The sky is falling!" without ever looking up.

David W. Baskin
William E. Lake

Holocaust in the forest

Editor:
I have often wondered why motorcyclists find it necessary to rampage another small part of our semi-artificial environment. I will agree that we all must try to live in this planet in brotherhood and peace, but such illiterate communications (letter of Feb. 11) must be answered. (I doubt if anyone believes them.) We are finding more people that man does not realize the destruction he creates immediately but is manifested in slight changes which he cannot see because his present excitement and enthusiasm have blinded him. I would ask the motorcyclist how they can honestly say there is no destruction in rampaging plants, spilling oil and causing our once serene and beautiful forest to be changed into a holocaust of noise. Man finds himself ignorant in many fields of ecology. However it takes little insight to see the possible damage that could be caused by 600 motorcyclists. Think with your brains not with the throttle of a motorcycle.

Bob Well

EOP helps

Editor:
In the past few weeks, it seems as though there has been a growing backlash against the Educational Opportunity Program. The reason for this appears to be related to the fact that students may be losing sight of how EOP benefits the entire student body of Cal Poly. EOP helps to open up Cal Poly to a more representative cross section of the California population. This is a need that is definitely obvious and a goal that is certainly inherent in the definition of a public institution. EOP accomplishes this by extending to people of low income communities the opportunity to attend Cal Poly. This enables people from the least representative communities who otherwise would not be able to attend college.

Because of the recent judiciary decision and the declining attitude toward EOP, a group of students has begun an initiative to designate EOP as an acceptable recipient of the 30 per cent federal funding. This petition requests that Student Affairs Council take all necessary measures to designate EOP as an acceptable recipient of the 30 per cent federal funding. This petition is outlined in Article 1 of the Student Affairs Code 41e. This stipulates that the present methods of disposal are inadequate and in need of quick reform. (This means you, Administration!)

How about a fences or something that keeps the trash in the dump where it belongs? I for one am willing to devote my time and energy to help clean up the stinking mess... will you help?

Carol Black

Kennedy

(Continued from page 1)

Students have asked for a stroll down scenic Litter Lane. We could spend an afternoon evening watching the moon rise over the garbage dump... yes, it is nothing quite like the sight of all that lovely trash spilling gracefully down the side of the hill to the creek in the valley below... it really makes my liver quiver (sigh). There's just something about the way the garbage surrounds the so-called DUMPING sign that takes my breath away (or is it just the fragrant air?)

Poly Canyon is becoming quite a sight (and if you have sore eyes you'd better steer clear!). It is getting worse and more garbage blows down from the school dump. This indicates that the present methods of disposal are inadequate and need of quick reform. (This means you, Administration!)

How about a fences or something that keeps the trash in the dump where it belongs? I for one am willing to devote my time and energy to help clean up the stinking mess... will you help?

Carol Black
New queen is a natural beauty

Miss Black, using her voice for talent, sang "Summertime," which resulted to her winning the talent award.

The BSU is cultural, its purpose is to enlighten. It's meant to make us more aware of ourselves," stated the queen in reference to BSU.

Miss Black, a member of the campus faculty since 1966.

The BSU scholarship honors the past long-time general manager of the CNPA who was a leading figure in the re-establishment of the printing curriculum at this college in 1944. Individual awards were presented by James L. McLain, general manager of the San Luis Obispo County Telegram-Tribune, on behalf of the CPNA Newspaper Personnel Recruitment, Education, and Scholarship Committee.

The five recipients are all students in the Graphic Communications Department. Each has first-hand experience on newspaper production staffs, two are also journeyman printers and members of the International Typographical Union.
Once Barkley Moore gets a good thing going, he quietly drops out of the picture. This continuous dropping out has been his life’s pattern for the past seven years. It all started when he dropped out of the University of Kentucky just one year short of his law degree and joined the Peace Corps. Besides being known as a drop-out, Barkley Moore is also known for being the most persistent Peace Corps volunteer that has come along in years. He has just recently returned after having been a record six years and four months abroad.

When he first arrived at what was going to be his home for the next six years or so, Gonbad-e-Abad, a small city located 75 miles east of the Caspian Sea and just 60 miles south of the Russian Turkmen Republic, Moore quickly noted the absence of any sort of library. A door rather than a more pleasant place enabled the help of many Iranians in the area and set out on only the first of many tasks to come: soliciting new door to donators to help build a library. This was just the beginning.

Through Moore’s instigation and the hard work of the Iranians, the first library in Gonbad opened its doors in the summer of 1960. At that time, it contained 10 hardback books, 262 paperbacks, three shelves and six chairs.

At this point in the project, Moore quickly dropped out of the picture. The Gonbadians completely took over the project and today the library hosts of large reading rooms, 1,000 hardback volumes and 400 chairs. As proud of the hard-working Gonbadians as a new father is of his offspring, Moore proudly claims "thousands of people use the library everyday!"

In addition to the library project in Gonbad, the Peace Corps enthusiast was also responsible for initiating a building of schools as well as 11 smaller libraries in villages around the city.

Unlike the rest of the country, "in the Turkmen area of Iran the mother tongue is not Persian," explains Moore. "Often the children from this area would find themselves one year behind the rest of the children in school. So we started a kindergarten." Funded privately rather than by the government, the kindergartens now permit a thousand more students to obtain an education each year.

In the beginning, an attendance fee was set at the kindergarten at 460-466. It would require parents to share small 3-b. house in Oceano near Higuera after 144-2114. For Rent-Avila Beach. I need two male roommate, room to yourself is Islander Cont. Winter Quarters Room. Tenant must be clean after 1 p.m., another In a series of highly successful College Hour concerts, this program will feature the 64-piece band Admission to this concert is free.

Friday, Feb. 6th, the fifth annual Winter Band Concert will be offered at 7 p.m. Admission for the evening concert will be $1 for students and $2 for all others.

The Winter Band concert will feature musical selections as "Holidays Fanfare and March," "Symphony for Band," "Encores in Jazz," and "Guests of Honor." Also included on the program are selections from the musical play and motion picture "Paint Your Wagon" and various other selections in jazz and classic style.

Rough enduro tests cyclist

Five hundred riders entered the Hi-Mountain Enduro of those, approximately 320 were checked in during the official finish time from 1:39 p.m. to 4:23 p.m. Dirty-dirty wore out men and their tested machines made their way to the finish line. Running out of gas, many pushed their bikes back. Some managed a smile but most gave a sigh and a look of exhaustion and relief. 

The endurance run demanded two loops. The first loop was 16 miles long, the second 7 miles. "The purpose of the first loop is to weed out the week riders," according to Dennis Warren, President. "A small matter, one of the first loop about 16 miles, was paved, the remaining first loop was 7 miles, the second loop is even harder than the first. If the rider makes the first loop, he should make the second loop," Dennis said.

Hidden checkpoints were arbitrarily placed throughout the course. Noon check, not hidden, began at 10:18 a.m. Riders serving half an hour early and an hour late were automatically disqualified. Riders were allowed a thirty minute break between their noon check time and the time they began their second loop.

Many riders gave up after completing the first loop; many came back with flat tires. Many of the riders came back nodding a "no" as they were being pulled in by another fellow rider. Others rode on through missing the noon check with an outcry of "I quit," or "I give up." 

Joseph Parkhurst, publisher of the Motorcycle World was one of many who did not run the second loop. His bike developed a broken oil line. "I think it's a fantastic year for you (Penguins) get so much cooperation from the forestry and the sheriff," Parkhurst continued expressing his thoughts. "I think this area is beautiful. I always enjoy a look forward to riding here. Down there (Los Angeles) the area gets too hot, I always look forward to an endurance. We always put up a good work for the Penguins, they always do a fantastic job," the publisher said.

Out of that recording came their first song, "Till There Was You." By a growing popular demand, the group took a name and have agreed to start engagement at various nightclubs throughout the area. The song "Zuppino Quintet" was born and they plan to continue spreading their unique musical style to a waiting world.

On the tall end of their first recording, the five have been looking into national recording contracts. Informal sources close to Nunslo himself have stated that talks have been conducted recently with major recording companies.

The source told this reporter that Nunslo spent several hours in a recording studio some ten days ago. Nunslo himself has been unavailable for comment of this matter.

For over a week now, Nunslo has taken up another facet of the entertainment business. KCPR news director David W. Dexter told Mustang Daily that Nunslo will be featured daily on the evening news program of the station. KCPR has agreed to direct the Climatological Prediction and Forecast Division of the KCPR News Department.

Rinaldi, an electronics student on this campus, is the quintessential historian and has stated that the five musicians have requested him to design a record label and begin recording, the group is met a name in a location for an installation to the studio. Up to now, all recording sessions have been conducted in secret location throughout the city of San Luis Obispo.

Rinaldi stated, "The group has asked me to try and stand up the best people we can to provide the background operations for Nunslo operation."
Swimmers evened score but face a couple more

by Mike Garcia

The dual meet record of the Mustang swim team was evened 3-3 and 5-5 with a doubleheader victory over Poly Pomona and UC Riverside last weekend. The victory over Poly Pomona and Mustang swim team was evened both teams, but especially were the main difference against firsts in both the one-meter and 7m to 4m over Pomona.

Bob DeGrasse secured a first place finish in both the 60 and 100 yard free events. His 100 yard time was also good for a first place against Riverside and 41% over Pomona.

Mustang Cave in Kentucky played an important part in the War of 1812, providing saltpeter to make gunpowder.

Mammoth Cave in Kentucky was the main difference against firsts in both the one-meter and 7m to 4m over Pomona.

During and Bill Currier each turned in first place times in another CCAA meet. According to coach Dick Anderson, "We don't have much of a chance to make gunpowder."

On top of it, Bob Miller at 168. Rounding out the Mustang team were Ed DeGraze, Jim Burnee, Lester Grappler, and Steve Gardner, who are 11-6.

As you contemplate one of the most important decisions of your life, you will want to remember this: It is not just a "job" you are seeking—it should be the beginning of a career. And if it is to be successful both you and your employer must need and want each other.

To help you with your decision, we invite you to consider the opportunities at Pratt & Whitney Aircraft. Currently, our engineers and scientists are exploring the ever-broadening avenues of energy conversion for every environment... all opening up new avenues of exploration in every field of aerospace, marine and industrial power application. The technical staff working on these programs, backed by the most advanced facilities and scientific apparatus, has already given the Company a firm foothold in the current land, sea, air and space programs so vital to our country's future.

We select our engineers and scientists carefully. Motivate them well. Give them the equipment and facilities only a leader can provide. Offer them company-paid, graduate-education opportunities. Encourage them to push into fields that have not been explored before. Reward them well when they do manage it.

Your degree can be a B.S., B.M., or Ph.D. in:

- *MECHANICAL ENGINEERING
- *AERONAUTICAL ENGINEERING
- *ENGINEERING SCIENCE
- *ENGINEERING MECHANICS

If your degree is in another field, consult your college placement office—or write Mr. Len Black, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut 06108.

*Undergraduate degree is required.

  - Golfers to greet Gauchos after Vandenberg tourney

Coach Bill Hicks' golf team is looking ahead to a home golf match against the University of California at Santa Barbara on Friday after placing fifth in a six team field in last Friday's Vandenberg Aviator Invitational tournament.

The Mustang swingers host the Gauchos in a 1:30 p.m. match at the San Luis Obispo Country Club. Heading the team will be Greg Edwards, Jim Klger and Steve Mowry.

Competing for the other three positions are eight other squad members.

At Vandenberg San Fernando Valley State College totaled 817 team points for the victory. Santa Barbara, the Mustangs' next opponent, finished fourth at 806. The Mustangs tallied 800 points.

Low individual medalist was Mike Mitchell of Camp Pendleton with 181. Jim Porter from UCLA placed second at 182. Mowry, low medalist for the Mustangs, tied for ninth with Tom Timblance, who is from Camp Pendleton, at 187.

"We were disappointed with our scores," Hicks said after the match, "but we found out some things that we have to work on and we think we'll do better."

The Santa Barbara Gauchos will meet the Mustangs Friday at 1:30 p.m. at the San Luis Obispo Country Club.

Following Mowry in the Mustang individual scoring were Klger at 181, Edwards at 186 and Bob Miller at 188. Rounding out the Mustang team were Ed DeGraze at 187 and at 178 was Mike Jones.

Golfers to greet Gauchos after Vandenberg tourney

By the time you were born, the Moon is currently on the far side of the Earth and the Sun will be in the constellation of Aries.

Play volleyball for doubled fun

Entries are being sought for a mixed doubles volleyball tournament to be held Sunday, Feb. 17 at 3 p.m. in the Men's Gym.

Entry in the afternoon event is $10 per couple and $12 per couple for dinner and the afternoon event.

Admission is free.

For more information call Mike Hensley.
Basketballers work hard for all-important contest

Two days away from what appears to be the championship game in the California Collegiate Athletic Association basketball chase Neale Stoner has his team working hard on the basic fundamentals of play.

The Mustangs host San Fernando Valley Junior College Friday night at 7:30 in the Men's Gym. Both teams have 5-1 conference records; both hold a share of the conference lead.

"We're not going to do anything special in preparation for San Fernando," Stoner said yesterday. "The game will be won or lost through execution of the basics—shooting, rebounding and defense."

The Mustang coach cited the latter as fundamental to the team's successes. In four of the last five games the opposition has been held to a shooting percentage under 40. During the same streak the Mustangs have consistently shot over 50 per cent.

Also during the past games the Mustangs have kept team fouls down, a fact Stoner attributes to an easing up of the tone press the team employed strongly earlier. He said the press has not been needed because the team has jumped into the lead and stayed there in each of the past games.

Currently riding an eight-game winning streak, the Mustangs need only a win against San Fernando to tie the school mark of nine established during the 1960-61 season.

Perhaps more important regarding the Saturday game, according to Stoner, is the looming possibility of making the Western Regionals. The team is 14-4 on the season and may need to capture all its remaining games in order for this school to be considered for the site of the playoff game, providing, of course, the Mustangs champion the CCAA.

Victory against San Fernando the Mustang's unblemished homestand record, would ensure at least a tie for the CCAA title.

Not since 1966 has this school's basketball team been involved in the thick of a league championship scramble. In 1966 the team shared the title a year after winning it outright.

To perform well the task ahead, the Mustangs must subdue the Matadors, who have improved since they fell to the Green and Gold 63-49 a month ago.

Tickets for all Mustang games are available in advance at the TCU ticket booth.

Mustang netters to see heavy weekend action

The Mustang netters, owners of a 1-1 win-loss record in dual matches this season, will visit the University of San Diego Friday at 1 p.m. as a warmup for two Saturday matches. At 6 p.m. Saturday the Mustangs host San Diego State and at 7 p.m. they will face U.C. San Diego.

"We are expecting a weekend of very fine competition," said coach Ed Jergenson. "Of the three teams, San Diego State appears to be the toughest team. They have always been pretty strong in the past," he added.

The Mustangs will stick with the same lineup that earned them a 9-0 sweep over Westmont last Thursday. The team lost to U.C. Santa Barbara, Sunday, however, 7-5.

The singles will be: No. 1 Dan Lambert (#4) of Arroyo Grande, No. 3 Tim Martin (#1) of Santa Clara, No. 1 Greg Piers (#4) of Mountain View, No. 4 John Ross (#5) of Menlo Park, No. 3 Tom Martin (#4) of Santa Clara, No. 1 Paul Block "Stick" Stlokelmaler scored two points in last weekend's game against the UCR Highlanders.

The Mustang coach cited the latter as fundamental to the team's successes. In four of the last five games the opposition has been held to a shooting percentage under 40. During the same streak the Mustangs have consistently shot over 50 per cent.

Also during the past games the Mustangs have kept team fouls down, a fact Stoner attributes to an easing up of the tone press the team employed strongly earlier. He said the press has not been needed because the team has jumped into the lead and stayed there in each of the past games.

Currently riding an eight-game winning streak, the Mustangs need only a win against San Fernando to tie the school mark of nine established during the 1960-61 season.

Perhaps more important regarding the Saturday game, according to Stoner, is the looming possibility of making the Western Regionals. The team is 14-4 on the season and may need to capture all its remaining games in order for this school to be considered for the site of the playoff game, providing, of course, the Mustangs champion the CCAA.

Victory against San Fernando the Mustang's unblemished homestand record, would ensure at least a tie for the CCAA title.

Not since 1966 has this school's basketball team been involved in the thick of a league championship scramble. In 1966 the team shared the title a year after winning it outright.

To perform well the task ahead, the Mustangs must subdue the Matadors, who have improved since they fell to the Green and Gold 63-49 a month ago.

Tickets for all Mustang games are available in advance at the TCU.
