Guests-of-the-Week

Summer at Mustang welcomes contributions from students, faculty, and alumni of the university. They may be left at Adm. 14 any weekday between 8 a.m. and 5 p.m. and may be signed into the building. Contributions should be no longer than 750 words in length. A copy will be published in each issue if space permits. Contributions are subject to the approval of the Editor.

My Idea of an Effective Teacher

By A. M. W., a student who has never attempted to teach but is qualified to give a fair criticism of what success is. For the larger part, we are all very quick to criticize and extremely slow to suggest a course of study. However, I would like to describe the ideal person, who in my opinion, would be best suited as the modern day educator. Appearance is the first and often the most lasting impression any teacher gives; therefore a man, neat and conservative appearing, would be most attractive. In my opinion, this would be followed quickly by a developed voice that creates the desired vocal reaction with ease. The situation varies when the student in question is a woman, but I hold that kindness and thought processes developed unhindered. A well-developed vocabulary of manners and the ability to think for oneself is searching for in every human being. Therefore, I feel that this attribute should appear unperturbed.

My next requirement is the ability to possess initiative, which the ideal teacher would either offer or avoid acquiring. There are usually many dropouts from any class, for one reason or another. It is the amount of experience that makes a proper teacher. The ideal teacher must venture into the laboratory at every opportunity. He could possibly enumerate many attributes which would be more feasible however, in my ideal class these basic general considerations. Especially, he will essentially possess all of us. I could think of and perhaps, not name few more—imagination.

I wish I’d Found It Sooner

WORKING for a Master’s Degree at Cal Poly is certainly an experience for me. This “learn-by-doing” is the one thing that I’ve been looking for since I first started college. The University of Massachusetts at Amherst, the University of Connecticut to Cal Poly’s graduate program has given me many new experiences.

At UMass, the philosophy was to learn as much as a book and then find some way to use what we learned. Here, we find out what we need first, and then go out and find the certain concepts that make this method work. Here, more meaningful opportunities are available. I have taken the initiative and modified the system of education.

Next is a part of this. I take it as a new outlook on the world as a whole and how it is programmed. I can even get to see my instructors when I need their advice concerning my program. At UMass, I had to chase a teacher half the day and 45% of the time he was not willing to take me seriously. I had to wait quite often. At Cal Poly, each instructor is more than willing to give their time and attention to my students.

Now that I have seen Cal Poly in action, I realize how valuable it would have been to do my undergraduate work here. I am sure there are many problems that came up during my first few years at UMass. I have heard many say how much as an undergraduate. —Lena Allen, Ed, New Haven, Conn.

Lunch Workshops Here May Need to Double in Size

The catering office has reported that a number of workshops here may need to double in size. In most cases, the larger groups are for new students. The problem is not due to overcrowding, but due to the need for more equipment. The catering office has reported that a number of workshops have been canceled due to overcrowding. The catering office has reported that a number of workshops have been canceled due to overcrowding. The catering office has reported that a number of workshops have been canceled due to overcrowding.

State Board of Education Meets on Poly’s Campus

Meeting in the General Offices, which has been transformed into a session-chamber, the State Board of Education, included in the group are members of the State Retirement Board and various representatives of the State Department of Education headed by Dr. Roy Bimpson, superintendent of public instruction and state director of education.

The group began arriving Wednesday evening. First official session was yesterday. A dinner was scheduled for last night or early tomorrow. The meeting was set for Cal Poly as part of the policy board and the board the board gathered at the various capitals under the jurisdiction of the board.

Members of the Board include:

New-Student Files Keep Growing for 56 Fall Quarter

A 18.6 per cent increase in new-student applications for the fall quarter has been reported for Cal Poly’s home campus, here, with a total of 1,182 applications, or a 1.48 per cent increase. Women in the arts and sciences and arts and science. It will be a big help to the local faculty in providing new students with a better organized program. In addition, the State Board of Education, headed by Dr. Roy Bimpson, superintendent of public instruction and state director of education.

Flyers Earn U.S. Honors

The Mustang Firing Association, a student organization at Cal Poly, has won an Honorable Mention in the National Safety Program for Flying Clubs. It was sponsored by the Campus and the American Association, Fresno, which sponsored the contest under a program of the State Department of Education.

No Flies-Schul Schedule

No announcement schedule will be published for this week or the two classes meetings, according to needs of the instructor.
For his two-year program, a student may select such courses in floriculture as Nursery Practices, Flower Arrangement, Floriculture Practices, Marketing, Flower Shop Arrangement, Green House Management, Advanced Flower Arrangement, Florist Advertising, and many more. The courses offered this fall will be Flower Arrangement, which deals with designing and arranging of flowers, bouquets, corsages, and specifically designs for all occasions. All of the courses are retail and wholesale florist work.

All of the courses are retail and wholesale florist work.

Survey Shows

Married Housing

Supply Limited

A surprising list of figures indicating that Cal Poly's living quarters for married students are in constant demand has been released by Howard D. Waite, housing department head.

Since 1945, according to Waite, more than 2,000 couples have taken advantage of campus quarters.

Last spring quarter figures show that a total of 668 couples lived on campus with 175 trailers occupied and 19 "Poly Ninos" filled. Next, the five types varied from 27 for men and 22 for trailers to 78 for "Poly Ninos", depending on whether you occupy one or two bedrooms.

Marcellin Heads

Welding Society

Wayne Marcellin, mechanical engineering major from Bishop, will head Cal Poly's chapter of the American Welding Society this year. It was informally installed at the 1968 Winter Student Congress at Santa Clarita Park.

Nearly a dozen students have signed up to become members of the society, which meets regularly.

Marcellin says that the society will have a technical advisor at the present time.

R. C. Wiley is faculty advisor for the organization.

Post Office Asks Visit

From All Summerites

If you have checked in with Cal Poly's post office yet if not, you are urged to do so to offer a helpful service to the university, while Margaret Hoyt is eagerly awaiting your call.

Editorial:

Let's Help At Home!

The FOREIGN policy of the United States is one of the most widely discussed and criticized facets of American politics at home and abroad today. Most of us who are quick to criticize would have little constructive advice to offer Mr. Dulles and President Eisenhower if they were to ask us. "International relations" seems too complicated and too distant a subject to cause us much concern.

However, we at Cal Poly have a wonderful opportunity to help our government further these relations. We have had on our campus students from over 40 countries representing every continent in the world. What a chance we are missing if these students don't go back to their countries with stories of the friendly reception they enjoyed here!

We interviewed a group of seven students from Indonesia last week. They were enthusiastic about Cal Poly and happy to have the privilege of studying here. One thing they said, however, disturbed us. "Americans are so busy—they rush to class-room—Then, after classes, they rush for food. They have no time to talk. How can we practice our English?"—We can't stop them and make them listen.

What a small thing for us to do—stop and listen! Like the proverbial rock tossed in the pond; the widening circles of small friendly gestures in the world. This is one of the many opportunities we have to further "international relations" without a great deal of effort.

—Helen Sturges, Ed.

No Let-Down in Electronics Career

Field, Predicts Clarence Radius

"Opportunities are nothing short of phenomenal in the field of electronics engineering—without any indication that there will be a let-down," declares Clarence Radius, head of the electronics engineering department, who recently returned to campus after a year's sabbatical leave in the East. Graduate study at New York University, attendance at several conventions, visit to industry and contact with other schools filled his daily program to capacity.

A half-train half a mile confidence building along at 15 miles an hour, to place a crossing guard and take only two minutes. A passenger train takes it in about 10 seconds, yet many motorists risk their and those of their passengers trying to save this little bit of time.

Take It Easy!

How long do you think it takes a passenger train half a mile long in crossing a 300-yard wide street? And how fast does it travel? A half-mile long train does it in about 10 seconds, but a passenger train takes as long as two minutes. A passenger train takes it in about 10 seconds, yet many motorists risk their lives and those of their passengers trying to save this little bit of time.
