Coffee, milk or DDT

NORTH HOLLYWOOD, Calif. (UPI)—A police officer and his wife who ate relatively large amounts of DDT for 93 days, ended the experiment Thursday, reporting that they suffered no ill effects.

Robert Loibl, 36, said, "we have undergone biopsies and check-ups and there have been no deleterious effects." In fact, during the 93 days, we didn't have any illnesses, not even a sniffle," he said.

Loibl and his 48-year-old wife, Louise, began taking 10 milligrams daily of the pesticide to prove that it is not dangerous to humans. They said they had consumed, during the three-month period, the amount of DDT an average person would take in over an 80-year period.

Loibl said that a recent test showed that he had 17.5 parts per million of flesh in the fatty tissue of his body. His wife had a count of 11.8, he said.

The average person has a 4.8 count," he said, "if DDT is as dangerous as it is made out to be, there's no way we could avoid suffering some side effects."

Dr. William Westlake, a chemist at the University of California in Riverside, commented earlier on Loibl's consumption of the pesticide, saying that it "probably won't have any effect on him."

"It doesn't prove a thing we didn't already know," said Westlake, citing experiments in which people consumes large amounts of DDT without ill effects.

Awareness is the big key

A breakthrough in the enforcement of anti-pollution laws is the key in preventing further pollution of San Luis Creek.

This fact was recently made known by a group of seven city, county, and state officials during a meeting with a class in Awareness of Current Issues.

According to student moderator Ralph Allen, each official present made a statement as to the functions and responsibilities of his organization.

After the introductions, members of the class then asked these officials how they were equipped to handle the problem.

Small card has engineers' trade secrets

A complete book can be reduced to a few post-card sized microfiche cards, and that's a big help in this technological age, especially to the campus chapter of the Society of Manufacturing Engineers (SME) who just received a new microfilm reader-printer.

Presented as a gift by the Los Angeles chapter of SME, engineering and technology students can now benefit from the technical files of the national SME organization. They use a system of microfilm reproduction because the enormous body of available information cannot be economically distributed or stored when printed on paper. Using microfilm lowers the cost of printing and mailing as well as reducing the storage space to a simple card file.

According to SME campus-advisor Paul Scheffer the machine is a 3M Executive II Reader-Printer, similar to the one in the library, but faster, the added feature of reprinting the material on paper. The machine was presented to the group by Joseph Janusz, president of the Los Angeles chapter of SME at a dinner, last Saturday night, where the local group installed new officers for this coming year.

**Letters to the Editor**

**Pay too much**

An open letter to Wayne Williams:

Dear Doctor Williams:
The trouble with you is that you pay too much attention to freedom, and not enough to America.

You pay too much attention to justice, and not the way this country is run.

You are a traitor to humanity.

Love,

Fred Russo

**The better example for the majority**

To The Editor

On Tuesday, May 18, around 1:30 p.m., I observed an incident near the intersection of Foothill and California. Some would-be flat track race in on Highway 20, crossed the line of cars waiting to cross California, went through the intersection weaving around the already moving cars, and continued towards downtown Foothill. The car was following decided to turn into Mustang Village and it was all he could do to keep from hitting the bike down in front of himself and a car. Eventually he forced the car into the oncoming lane of traffic and continued along Foothill.

I ask that those who witnessed this miserable example of a motorcyclist judge it for what it was - one incompetent individual on a potentially hazardous machine. Please don’t let this reflect on those who are competent motorcyclists, who are not erratic, and who do not cause accidents.

Motorcyclists—it is people like this who run it for all of us.

Ken Hahves

**Labor mediator**

A talk on collective bargaining will draw upon Halp Danbury’s 25 years of experience in labor management relations for this Friday, “May 21, 6:30 p.m., at Madonna Inn.

Danbury is director of the California Mediation and Conciliation Service. His talk is titled Collective Bargaining Public and Private—an era of inflation. Obtain reservations at the Madonna Inn.

---

**Help in preserving the system**

To The Editor

I wish to thank all those students in the School of Agriculture and Natural Resources who supported me in my recent campaign for SAC representative.

I was only 22 votes behind the leader with a total of 1239 ballots cast. Each voter was entitled to vote for three. Final results were Wayne Morris 540, Greg Willians 395, Richard Derer 350, Mike Cox 327, and John Lange 466. Even though I did not win I felt we did succeed in getting the votes out and creating an interest in our position. I will be an Ag Council representative next year and will be serving my school by keeping in close contact with our three SAC representatives as an additional contact point between the individual student and our government.

All of us in the School of Ag and Nat. Res. must work diligently to preserve our system here. As bad as it can be, as many faults as it contains, we must recognize that all other forms of government are so much worse. We need work to correct these faults and we must march all of us to get to know Richard Derer, Richard Willians, Greg Willians, 2nd Engineering, and Wayne Morris, 2nd Agriculture (Animals).

Talk with them this year, express your views to them, and help them represent you next year. The Student Affairs Council will clearly be the best foundation upon which our victories and defeat for the Cal Poly philosophy will be determined.

Thank you for the opportunity to communicate with you and once again thank you for your support.

Stockton 6, Farm Mig.
Greek Week 1971

Greek Week has been going on for some 17 years now, stretching back to the time when frats were not recognized by the campus because they consumed a strange golden beverage—often in large amounts.

This year, Alpha Tau Omicron, Delta Chi, Phi Kappa Psi, Delta Sigma Phi, Alpha Epsilon Pi, Theta Chi, Alpha Sigma, Delta Upsilon and Alpha Gamma Rho will be participating in the week-long boogaloofest.

Activities include the infamous Avila Beach bathtub race pictured below, a car rallye that will begin at 2 p.m. tomorrow in front of the Aero Hanger, and a track meet at Port San Luis on Sunday, commencing at 10 a.m.

In order that the general public does not miss out on any of the Athenian antics, Delta Chi will be presenting four hours of T.G. today.

The underground network on this campus is merely a tunnel, approximately 300 feet long, to transport books and supplies from the warehouse to the bookstore.

Many students on campus are probably unaware of any underground tunnel other than the ones that carry sewage or rainwater. Those that are aware are probably suspicious of its origin and purpose.

Mary Lee Green, manager of the book store clarifies all uncertainties. "The tunnel originated about ten years ago, when our warehouse was constructed beneath the cafeteria," Green continues. "Until then, the underground book storage area was sealed off."

During the ten years the warehouse was being used for book storage supplies and Cape gowns. Except for the laborious job of transferring the books from the book store, everything went smoothly until the rains came two years ago. The heavy rains weakened the plywood used for sealing off the tunnel and water began to seep into the huge, 5,000 square foot warehouse area. About six inches covered the floor before it was noticed and pumps were brought in to drain the warehouse. Of the $400,000 in inventory stored in the area only $50,000 was damaged or lost.

"The tunnel is really a labor saver," says Mrs. Green. "We transport nearly 1,000 pounds of books and supplies at a time. The pallet is rolled through the tunnel and water begin to seep into the huge 5,000 square foot warehouse area. About six inches covered the floor before it was noticed and pumps were brought in to drain the warehouse. Of the $400,000 in inventory stored in the area only $50,000 was damaged or lost."

Harv's Highlights

The end of the year approaches as the whole place slowly burns out (a harmony). If you aren't yet broke or broken there are still a few things left to keep you off the streets...FRIDAY: Marathon social function at Delta Chi behind Tropicana Green (free beer & light refreshments...no mitreprint). Live band and refreshments provide another chance to meet those people you've been trying to meet all year. Dress is informal...Treat your sweet tooth to a little "CANDY," an enchanting little tail of a little lass and her brave search for half-examined, half-lobotomized father, Ringo Starr, Richard Burton, Marlon Brando, and James Coburn star at 7 and 9:30 in the Theater for 50 cents...

SATURDAY...To quote Mark Twain, "Waded people have little or no influence on society." Remember what a great American he was as you take your favorite boys to AVILA and expose it to those coming rays and waves. AVILA...

The Symphonic Band will present the fifth annual SPRING BAND CONCERT in the Student Union Auditorium. One hour easy for 75 cents...SUNDAY...El Coffeeshouse taxes on plugin with a jam session at 7:30 in Student Union room 207. Bring your instruments and 14 cents for the jam and a cool drink.

Spring concert

Symphonic sounds will fill the College Union on Saturday, May 25, when the Symphonic Band presents its 1971 Spring Concert. Scheduled for 8 p.m., the performance will be the first formal band concert to be held in the auditorium of the recently-completed Julian A. McPhee College Union.

"The excellent acoustics and sight lines of the auditorium, plus the outstanding musical progress of the band in recent months, should provide the audience with an evening of high quality entertainment," according to William V. Johnson, director of the ensemble. A member of the College music faculty.

The program includes a major symphony for band, a collection of religious music from Old Russia, folk music from Mexico, Dixieland music, and a favorite Sousa march.

Prices are 75 cents for students and children and 85 cents for all others and tickets will be available at the door.

Astrological forecast

Sun, moon and the stars

The following is provided as an Astrological Forecast according to your Sun Sign for the period between Friday, May 11 and Thursday, May 17.

Aries (March 21 to April 19)—You are alert and clever, and your first thoughts on a subject are usually best. You are direct, forceful and spirited, and need to concentrate on developing more patience and powers of restraint.

Taurus (April 20 to May 20)—You are practical, deliberate and constructive. Usually conventional, you are not infallible, and have great diplomatic abilities. You sometimes tend to be a bit too soon.

 Gemini (May 21 to June 21)—Versatile and inventive, you are easily diverted, possibly because of your dual nature. You have an extremely rational mind, however, and are quick to perceive. Lack of persistence is your occasional downfall, and you are inclined to want to give up a little too soon.

Cancer (June 22 to July 22)—You have a clear, receptive, imaginative mind, but are inclined to be emotionally swept away very easily. Your perception, too, is inclined to be highly emotionalized. One area you should concentrate on developing is to become more original in your interpretations.

Leo (July 23 to August 22)—You are creative and self-sufficient, but sometimes tend to be self- absorbed and do things your way. You tend to try to wrap up your life in a compact little package which leaves you with no room for new things to grow in.

Virgo (August 23 to September 22)—You are a little too soon. You are fastidious with a love of moral beauty. You seek harmony in routine and avoid intimate relationships. Try to open up, and don’t expect perfection from those around you as much as you have and you will be happier person.

Libra (September 23 to October 22)—Your desires are refined, and you have a great power of reaction and compromise. Generally relaxed and well- cultivated, you are amiable and courteous but need to watch yourself to avoid becoming lazy and anti- pathetic.

Scorpio (October 23 to November 21)—You are intense in your feelings and have a reluctance to suffer. You are tenacious almost to the point of ruthlessness, and have the power to concentrate on that which you want. You lack, however, detachment and the need for variety.

Sagittarius (November 22 to December 21)—You are impulsive, optimistic and enthusiastic. Your energy is spontaneously mobilized, but can be flabby. Your biggest downfall is a lack of endurance which leads to instability.

Capricorn (December 22 to January 19)—You are ambitious and persistent and have a great organizing ability. If you efficiently control your energy and manage to sustain it, you can accomplish almost anything. Guard against letting yourself become bitter.

Aquarius (January 20 to February 18)—You are independent and have great powers of understanding. You are of dynamic nature and care a lot about people. You need to work to achieve more practical ability.

Pisces (February 19 to March 20)—You have a receptive mind and a vivid imagination but you tend towards instability and are easily exhausted. You need to develop a greater aim, push, and self-reliance.

Saturday is cycology

A few months back, then-convict Donald Q. Miller proposed to the City Council of San Luis Obispo that the 22nd of each month be set aside as a "Give the Air a Rest Day." The request was accepted. Since Miller's original plea, there has been four months in which the twenty-second met with reversed pedaling. Cyclists, as usual, will meet at San Luis Obispo City Hall this Saturday at 10 a.m. From there, they will follow a course through the downtown area in an effort to extract the virtues of non-polluting transport to the local townfolk.

The group usually pedals through town about three times and follows it up with an informal gathering for all of the participants. This Saturday, participants are invited to venture forth into the local countryside and are asked to bring their own lunches. There is no age limit for those who wish to participate. In fact, one may not use a bike if he so chooses—he can walk. The usual participation on past junkets has been anywhere from 100-175 cyclists, one or two dogs and a unicycle.

President Nixon told newsmen yesterday that the U.S. and the Soviet Union are going to negotiate simultaneously on nuclear disarmament.

Demonstrators in New Haven, Conn. march back and forth as the jury deliberates the fate of Black Panther Bobby Seale and bore Huggins.

The Los Angeles Dodgers have a long way to the pennant this year—they are some ten games back—in the National League West.
Because of the great transformation, the team set the 27 records, one of which was the 39 win. The old mark was 22 in 1961, when the Mustangs grabbed a 22-7 record.

All-conference second baseman Dave Oliver was responsible for three of the records. Only a sophomore, Oliver led the team in hitting for the second year with a .347 average. To set that average he set a team record of most hits in one season with 87. It was two more than Vern 'Pinky' Herberes' 1940 total. Oliver also had new marks in times at bat (.381 in 1981 and pasted .381. The old marks were 158 by Mike Iselin in 1980 and 127 by Rick Pence in 1970, respectively.

Freshman first baseman Gary Knuckles was also responsible for three records. His first mark came in most doubles with 11. He also set marks for putouts with 431 and total chances 868. Lynnman

Cline to speak at feast

Tony Cline will be the guest speaker at the annual Mustangs baseball awards banquet. Cline was a rookie defensive lineman for the Oakland Raiders last year and was named the team's lineman of the year.

The event is slated for the Veterans Memorial building with a buffet social hour beginning at 5:30 p.m. The dinner will be served at 7 p.m. Tickets to the barbecue are five dollars and may be purchased from members of the board of directors of the Boosters or at the door.

Cline became a star in the National Football League in just one season after being picked 103rd in the draft. Because of Cline's presessional performance, the Raiders, a starting defensive end, was traded to the now New England Patriots.

Cline's big chance came when the Raiders' first draft pick, Art Thomas, was injured. Since Cline was behind Thomas, he got a chance at the starting position at defensive end. Saturday's affair is open to the entire family.

something happened—27 records

You just knew that something was happening with the baseball team when the Mustangs flew to victories in their first six games. You just knew something had to happen to the diamond men to continue to win.

Well, it did, but it did happen. Twenty-seven records were broken and three were tied as the result of the best baseball season in the history of this school.

A year ago we never quite knew what was happening in coach Ault's ball club. The year before, the Mustangs finished with a 13-23 mark but turned the figures and came out with a 20-0 mark.

Last year the talent was there, but it didn't realize its potential losing 10 games by one run and tying eight. But we was a new coach and there were a lot of new players and it took a while to get everything worked out.

Grid positions on line as spring game ends drills

by Terry Conner

While seniors are struggling to finish their senior projects, and other students are worrying just as equally about term papers and finals, the Mustang football team is preparing for their yearly clash with the alumni.

The annual event will be staged tomorrow at 2 p.m. at Mustang Stadium. The gates will open at 1 p.m., with a 50-cent student charge and one dollar for general admission.

In last spring's contest, the alumni and Mustangs battled to a 7-7 tie. It was a hard fought game, and many of the players who were on the Mustang squad through the past season when they posted an 8-2 record, will be on the alumni team for this battle.

Leading the alumni will be quarterback Don Milan, who is presently going through spring training with the Oakland Raiders professional football team. Milan will have Gary Abate, Ron Nelson, and Jason Orion in the backfield with him. Giving this fine line of backs running room will be the likes of Vic Eklund and Rich (Rock) Colombo at guards, Phil Skinner and Dana Proscal at tackles, and either Bill Parsons or George Murray at center. On the receiving end of the many inevitable passes by Milan will be Mike Stokes at tight end and Bill Pandiani at split end.

An apology is due to Steve Freeborn and Dave Oliver whose names were omitted from their pictures in yesterday's Mustang Daily. The pictures were on page eight. Freeborn was on the left while Oliver was on the right in the two pictures.
