by Richard Palmer

The Wall Street Journal yesterday made a front page observation that the news that’s replacing drugs at all the colleges is beer. Yet, TVU, and Cal Poly are as inseparable as the Three Musketeers. Which just shows that good old Cal Poly, by avoiding progress of any kind, has finally caught up with the times.

The Journal cited fraternity men as leading the way back to beer and liquor and noted that Delta Chi of San Luis Obispo Polytech recently held a Saturday night beer party and invited the whole student body at $2 a head, all the beer you could drink. According to the Journal, “Crowds of
dazeless guys in shorts and school sweatshirts sat around, beer cups in hand, talking “Hi ho, hi ho, we’re off to the bumskeep show.”

But that’s not the least of it. Members of this same Delta Chi, the “biggest drinking house on campus,” hold contests to get into the “Campus Club,” an
“all society of beer drinkers who can consume 80 ounces, or five cans of beer, in one minute.”

Eastern colleges should hang their heads in shame, for a year’s record, set by our own Theta Chi, is 80 ounces in 10.9

The Journal stated that there
was no particular reason why
college kids are turning to the once scorned stimulant of their parents, but cited that cost, bad

drug trips, and mob appeal might be the reason. At Harvard, the cost of three joints of grass, good for one long high, is around $8.

“Psychologically, marijuana goes to you, says one Ivy League senior who spent a recent semester in a mental health clinic. With the switch might be a preference for a mess in the brain rather than

beer, but that's not the least of it: Raymond Haight:

Chamber music’s with it

by Richard Boschetti

Raymond Haight, an ex­

instructor at this college and once

a candidate for” governor of California, says this is a “hotbed

of conservatism in the California

education system.”

In a speech to some 400

students and teachers yesterday

in the multi-purpose room of the

College Union, Haight said: “The

best institution for finding truths

is the educational system. But

how can we find truth if there are

no conflicts and no exchanging of

ideas?”

“A lot of teachers here use the

same books where the authors
give their interpretations and

that’s it. The author’s inter­

pretation is many times no

different than the teacher’s. How

do we get new ideas and change

this way?”

Haight said teachers who are

not being reared next year,

should be, . . . because they are

speaking out and we need

someone to speak out. I think they

are not reared because they

have courage and we need

courage.

“With the attack on education

today, we need people who are

speaking out to defend and help

out our education. Conservative

people or groups wanting to stay

in power, attack education and

the media so that we lose con­

fidence in what we think to be

truths.”

Haight came out strongly in

favor of students having some

say in the hiring of teachers.

“How can one teacher evaluate

another when he only sits in on

his class once or twice a quar­

ter?” he asked. “Teachers to­

struct in many different ways.

One instructor may get the point

across in the first meeting and

another not in the seventh or

eighth week of the quarter.

Secret lemon

What took ten years to create, is painted yellow, and is beginning to smell like a lemon? (Hint number one: it cost 4.5 million to build.)

It has been given various criticisms, like too much extravagance at a time when funds for education are at a low point, sacrificing learning for luxury. (Hint number two: one of the top administrators on campus called it one of the college’s “worst projects.”)

Elsewhere on these pages appears a story concerning some of the major faults (like 9,000 square feet of floor has to have the sealer torn out) of the College Union—structurally as well as problems in maintenance.

But there seems to be a problem that is worse than those just physical—an effort by certain administrators to curb discussion about troubles that have beset the huge structure. Workers in the building have been ordered not to discuss any of the problems of the building—with anyone.

Something as big and as expensive as the college union should not be delayed into the files of secrecy—if there are problems, which there seems to be an abun­dance of, then they should be aired. After all, it is out of the students’ wallets that the building was constructed—they of all people should have the opportunity to be in­formed of any problems that the building has.

Urquidi, a Mustang Daily reporter was to receive a list that would describe all of the various College Union problems. That idea however, was quickly canned.

How will students learn about the buildings’ problems? How will the students learn about how these problems were rectified? How will the students find out how these problems came about?

Closing problems in secrecy will never solve them.

Banke comment rapped

An Open Letter To President Paul:

Having read your interviews printed in both the Los Angeles Times and the Times and the Tribune, I was disturbed at your outspoken comments directed to the college trustees.

As Student Body President, you are "representing all of the students at Cal Poly. Both ar­ticles did not make it clear if you were speaking for yourself or for the Cal Poly student body.

Personally, I have had no trouble trying to talk to my in­

strutors when I have made the time to contact them. Could it be that your instructors do not prefer to talk to YOU? Alas, 40 to 50 students in my classes are a small number when compared to the 300 to 600 seat lectures offered at universities such as U.C. Berkeley?

Usually in most of my classes 40 students may attend class during the first 2 weeks of the quarter, then about one-third will attend regularly. If one can not adapt himself to the reality of over­

population and its effects upon him, he has a right to know how these problems are rectified. How will the students find out how these problems came about?

One of the problems in secrecy will never solve them.

On the thumbs

It is economical. It saves wear and tear on the car. It is an adventure. It is a method of meeting people.

It can and has caused death.

Hitchhiking—currently under fire by the California legislature—has more than once been the topic of heated criticism by local folk: hitchhikers scare away the tourists, they are dirty, dope-crazed freaks and so forth.

And hitchhikers have their grives—like San Luis Obispo is one of the worst spots on the California hitchhike trail. That people pelt them with insults, rocks, saliva, try to run them over and generally instruct them to hitch to the theological place of eternal punishment.
Medieval Canterbury exists in modern Avila

This is for real. The Canterbury Fair is in Avila. A delightful recreation of complete medieval atmosphere on the grounds of Avila. The fair will be sponsored as a complete medieval atmosphere. The fair will be sponsored as a complete medieval atmosphere. The fair will be sponsored as a complete medieval atmosphere. The fair will be sponsored as a complete medieval atmosphere. WATCH
REPAIRING SERVICE

REPAIRING SERVICE

The following is an astrological forecast according to your Sun Sign for the week beginning Friday, May 28 and ending Thursday, June 3.

Aries (March 21 to April 20)—You are in great danger, at this particular time, of not finishing something which you started. Make sure you concentrate on whatever it is you are supposed to be doing, and get it over with.

Taurus (April 20 to May 21)—You have been working very hard and patiently, and it will pay off soon. When you are finished with whatever it is you are working on, take a break for a while and enjoy yourself. You deserve it.

Gemini (May 21 to June 21)—You are quite changeable, and during this particular time, you need to guard against losing sight of your real objectives in life and going off on some strange tangent. Be sure you really know what you want before straying from the path you have laid out for yourself.

Cancer (June 21 to July 22)—You are inclined to be overly sentimental which may hamper you when making plans for the future. Go ahead and try something different. Don't attempt to hold on to the past too much when beginning a new venture.

Leo (July 23 to August 22)—Guard against excessive pride—you may have made a wrong decision, and no one is going to think any less of you if you admit it. Give yourself time to think things out a bit before going ahead with plans.

Virgo (August 23 to September 22)—Your practical nature will show very soon. You will be rewarded for your perseverance of late. Try to relax a bit afterwards, more strenuous times are in the future.

Libra (September 23 to October 22)—Remember to take all factors into account and weigh them very carefully when making plans for the future. Plans you make this week will be very important to you in a few months, and they should be made with care.

Scorpio (October 23 to November 21)—You may have a big disappointment in the near future—try not to take it so hard, and especially avoid being vindictive. Just go ahead with other plans and try to develop other interests.

 Sagittarius (November 22 to December 21)—You are ambitious and have been working very hard towards a goal which will probably soon be fulfilled. Just look carefully at what you are doing in order to finish it. Then stop and take a break, or you may lose sight of what you are working on.

Capricorn (December 22 to January 19)—You are ambitious and have been working very hard towards a goal which will probably soon be fulfilled. Just look carefully at what you are doing in order to finish it. Then stop and take a break, or you may lose sight of what you are working on.

Aquarius (January 20 to February 19)—You have developed greatly lately and are now becoming able to see people for what they are and accept them as such. This should help you a lot in the near future as a friend may need help and you will be able to give it.

Pisces (February 20 to March 20)—There may be a gap between your aspirations and the real conditions of your life. This may make you restless, but you should avoid giving too much thought to insignificant matters to make up for it.

Haight speaks out...

If in a student evaluation a teacher gets a 3.0 then he should be rehired no matter what the rest of the staff says. "I think Pres. Kennedy and the dean feel intimidated by all this and I think they are wrong, " Haifdt said, referring to the students' struggle to help the non-

"I think you're all a bunch of losers who think you're going to get your goals. You can't expect that he'll turn around and rehire all of these left wing radicals. In that sense we are all a bunch of losers. But remembering, be a loser doesn't necessarily mean you haven't won."

Haight was met with a standing ovation as he walked down the sidewalk of the multi-purpose room on his way out. Many students reached out to shake his hand to pay tribute for his appearance. It was announced that some students had been confessing that they had been going to court and have the instructors reinstated. A can was passed around for contributions to aid in the legal expense. The rally was not only a multi-purpose room, of the College Union because of rain.
Oakland quarterback Don Milan got some extra practice against the varsity as he prepares to hand off the much-valued ball.

It was the varsity against the alumni. And the alumni came out on top, 15-7. It was a time of learning and a time of remembrances for both sides.

The poor ball in the middle did not have a chance. It was kicked and pounced upon but yet it was treasured by both sides.

It was also a time for some of the alumni to find out how much out of shape they are. But it was worth it.

It was a time of leap frog as the ball eludes its hunters.

The ball outdistances its alumni pursuer on a long pass play.
Buildingitis: whose fault?

(Continued from page 1)

reached by doors that are sticking. Once outside, there's no way back without a key or someone's inside help. Of this admitted safety hazard Rubenbeck said, "It would be my deauction that it would be the architect's fault since it was the design of the structure."

The man whose job is the CU summed the situation up by saying: "I personally feel that the building is poorly planned and designed for $4.5 million."

As executive dean in charge of facility planning, E. Douglas Gerard is perhaps in the best position to compare the CU with other projects in the past. His words on the subject: 'It is probably the worst project on campus because of problems with the architect and contractor in resolving differences." This predicament in one of the most expensive buildings on the whole campus.

The building is almost a standing joke among the custodial staff, who find new things wrong daily. They are outspoken about the problems, mainly because "there's a lot to be outspoken about."

One young custodian pointed out places where putty was used to seal the crack between the thin glass that was installed and the thick glass that concrete poured left room for. One door had to be replaced after the grand opening.

Problems with the floor go deeper than the easier. In the ASI Business Office the tile floor is buckling. The most popular theory holds that the concrete beneath the floor is rippled instead of level.

Book racks slung low over an inconvenient place in the men's rooms have caused innumerable bruises and a broken pair of glasses.

There is one room where the wall notoriously does not meet the floor. That room leaks. One of the ladies' rooms has pipes of hot and cold water running close enough to each other to cause condensation. Thus that room leaks. There are holes in the roof of the snack bar. It leaks.

Gerard said, "It's like buying a car for $5,000 that doesn't have the floor. But the proportions could be running high." Buddof said it would be difficult to estimate how much maintenance costs have exceeded what they should have been, but "I'll try."
Judo bash and swim set

Students are reminded of the judo tournament this Sunday in the Men's Gym. All interested students are 'welcome to participate at a cost of one dollar to each entrant.

Competition will begin at 1 p.m. and will be in three categories, white, brown and black belt as each entrant.

The event will begin at 7 p.m. and will be in three categories, white, brown and black belt as each entrant.

Students must have a Water Safety Instructor card to be eligible for the position. Interested students may contact coach Dick Hexton at 546-3754.

In an effort to have the team reach its potential, Coach Steve Simmons changed the running order of his 440-yard relay team in an effort to have the team reach its potential. The Mustang mentor is hopeful the 440-yard relay team will campaign tomorrow in the California Relay at Modesto.

"I still maintain that we'll run as fast as the school record (40.4) or better before the season's over," Simmons said. The best the Mustangs have done to date is a 41.1 although they had a 41.4 clocking in the University of Texas El Paso meet last Saturday and that was run in a 56-mile per hour sand storm.

"I was very disappointed in the conditions we encountered at El Paso mainly because I felt we could have achieved our best performances of the season in the 100, 220 and definitely in the 440-yard relay," Simmons added.

Simmons has changed his team's running order and strategy in the sprint relay.

"We're giving John Haley and Bobby Turner longer zones to run while cutting down on the distance from Dave Hamlin and Lowell Henry," Simmons added. Henry, who has been the leadoff man, has been shifted to handle the second carry.

The team ran in the new order for the first time in competition at El Paso and placed fourth with a 41.4 effort which was the Mustang's second best time of the year. "The wind just killed us or we would have had our best time of the season despite a bad handoff," Simmons reported.

The Mustang mentor is hopeful that his sprinters, Turner and Haley, both will meet the NCAA University meet entrance requirement of 21.3 in the 220 this week. "I expect Turner to run real well in the 100 also," he added. "This will be our second straight week up against top notch competition. It's exactly what we need at this time of the year."

The Mustangs are also entered in the 880-yard relay where their best performance of the year has been 1:35.9 at the West Coast Relays. Simmons is looking for an effort in the 1:34.8 range this week with Henry, Haley, Bennett and Turner running in that order.

Sophomore Raynaldo Brown, who currently ranks as probably the most consistent 7-foot plus high jumper in the country, returns the season of his only loss of the 1970 outdoor season. Although he had lifetime best of 7-10 at Modesto last May he had to settle for second with Bill Elliott of the Pacific Coast Club and Bob Ross of Texas El Paso.

The Mustangs' Mohinder Gill, a senior who two weeks ago captured California Collegiate Athletic Association honors with a lifetime best of 8-6-10, also is entered at Modesto.

"The Mustangs' Mohinder Gill hopes to be ready to defend his triple jump title this weekend. He went 52-4 in winning the California Relays last year but this year bruised heel kept him out of the competition last week at El Paso. He will receive treatments before a day this week in an effort to get him ready for the meet. "I'll defend his title only if his heel is okay. Otherwise, we'll hold him out of competition until the nationals at Sacramento," Simmons reported.

The 1971 Mustangs are loaded with talent and potential. With time running out this season the Mustangs in their quest for eternal youth is the ultimate perversion. Raynaldo Brown cleared 7-2 for the second straight week in winning at El Paso on Saturday. It equalled his own school record first notched at the Martin Luther Games a week earlier. An all-star field featuring 14 leapers who have cleared 7 feet or better has been lined up to compete at Modesto. Olga Burrell, national indoor and outdoor champion in the late 1960's and a former NCAA champion at Nevada, figures to among the chief challengers to Brown. Others will be Elliott, Scott English of Texas El Paso and Jerry Culp of San Diego State.

The Mustangs' Mohinder Gill hopes to be ready to defend his triple jump title this weekend. He went 52-4 in winning the California Relays last year but this year bruised heel kept him out of the competition last week at El Paso. He will receive treatments before a day this week in an effort to get him ready for the meet. "I'll defend his title only if his heel is okay. Otherwise, we'll hold him out of competition until the nationals at Sacramento," Simmons reported.
