President and vice-president elect Pete Evans and Marianne Doohi's program of a student housing office, student legal aid and a child care center were voted down by Student Affairs Council last night.

The concepts of a student housing office, a student legal aid center and a child care center on campus was dealt a crucial blow last night as Student Affairs Council approved the 1971-72 ASI budget.

The proposal of cutting all ASI budgeted programs, excepting EOP, by four per cent, and which would put funds in a contingency for the three proposed concepts, was defeated by a 13 to 8 vote with one abstention.

The three programs were presented to the Student Affairs Council last week by President and Vice-president elect Pete Evans and Marianne Doohi. SAC asked the two to bring the proposal to last night's meeting with more information.

The approval of the ASI budget as it stands was approved by a slim vote of 11 in favor, nine against.

Controversy over the proposed San Luis Obispo municipal bus system has been far reaching, starting with the first conceptions of the idea.

In 1969, there was to be a bus system set up by December 1 of that year which would provide service on a one-year trial basis. The system was operated by the Yellow Cab Company, according to Jack Hathaway who was the operator of Yellow Cab. Hathaway's ideas were later advertised which would bring in steady revenue in addition to fares. Sponsors of the bus system also paid fill per month to be able to have a sign inside of the bus, but even this did not save the system from eventual financial failure.

Councilman Donald Miller proposed a bus system in 1969 that should be city-operated. A series of mini-buses would be used to cut down expenses and to eliminate the bus driver carrying over a few passengers. This idea was turned over to the Citizens Advisory Committee for Community Improvement for further study.

In July of 1970, Miller proposed a new bus system—this time employing surplus school buses from either the San Luis Coastal or Atascadero School Districts. The buses could be used by lease or contract basis for a six month trial period. Miller also proposed that a small nominal fee be charged or no fare at all.

In 1971, President Robert E. Kennedy met with officials of the Upper State Transit Authority in Washington D.C. Kennedy found that federal grants are available to help establish a municipal bus system. The grants would pay up to two-thirds of the total capital outlay needed for buses, garage, and repair facilities. The new system would cost about $800,000 per year. It would cost $250,000 to set up and $234,000 to operate.

About that time a group of students came to a survey and found that 3,400 students would be willing to shift immediately to the system. The city of San Luis Obispo was the logical answer.

Filling a preliminary application with the Upper State Transit Authority is the first step in applying for the grant. This application sets forth the applicant's proposed program. Federal officials then study the application to determine the feasibility of the proposal, and would not accept new money for the plan. A detailed application was to follow later.

About that time a group of students came to a survey and found that 3,400 students would be willing to shift immediately to the system. The city of San Luis Obispo was the logical answer.

Dear Ralph Alioto:

I was certainly stunned when I read your letter to the editor in last Friday's Mustang Daily. I have always considered you a very rational, open-minded person; however, some of your statements were totally inaccurate and certainly didn't reflect your knowledge of student government here at Cal Poly.

You stated that Pete Evans and Marianne Doshi attempted to use "proper channels" to initiate the programs they promoted during the campaign. Anyone who knows the structure of student government knows this is untrue. The "proper channels" are to apply to Codes and Bylaws Committee to acquire status as a "coded group." After subsequent approval by SAC does submit a budget to Finance Committee in early January asking for funds for each such group. This committee then makes a recommendation which is sent to SEC and then to SAC for their respective approvals. Surely our newly elected officers cannot believe that money should be appropriated for programs that do not yet exist.

Ralph, you said that Bob Parks, Chairman of Finance Committee, will make sure that the Dairy Judging Teams get their $4,000 because he is a member of the Dairy Cattle Judging Team. I hope it was misinformation that prompted you to write such a lie rather than your own narrow-minded ignorance. Bob Parks is not a member of any judging team. You go on to say that baseball and track have members on Finance Committee that will see to it that various other sports teams get a good chunk of AIS funds. Your implication that these people represent their own teams and friends rather than the respective groups from which they were elected or appointed is absolutely untrue. The "proper channels" student government knows this is so. However, we need money to initiate court action.

We have signed petitions, we have shouted loudly and continuously for months, we have expressed our discontent; and the administration has not responded. They will have to respond to court action.

You can pledge your support by donating money to the Academic Freedom Fund. A table will be set up in the snack bar Tuesday through Friday of this week. Help put an end to Kennedy's demagoguery. It has just begun.

James Patterson

True statistics?

Editor:

Mrs. Doshi, your facts straight. In yesterday's paper, page 2, you stated that in "A recent survey..." which in fact was a year and half ago, of "261 married students interviewed, 115 or 56 per cent had NO children."

Fact one: 1185 married students were sent the proposed Housing Questionnaire and only 561 responded. This is a low 22 per cent.

Fact two: 151 or 58 per cent of these students had NO children. Of the 110 students with children, 60 had 1 child, 22 had 2, 14 had 3 and 4 had 5 children.

Your implication was that these children were in need of the Proposed Child Care Center, but the survey did not indicate the age level of these dependent children and therefore no conclusion could possibly be reached as to their needs.

Fact three: On page 3, question 9 of this survey, 18 per cent of the students said they had NO children.

An Academic Freedom Fund has been started on campus. The money from this fund will be used to cover legal expenses and court costs derived from action taken against the administration on behalf of several fired instructors.

An attorney is working on the case now and the probability that court action will be taken is virtually certain. However, we need money to initiate court action.

We have signed petitions, we have shouted loudly and continuously for months, we have expressed our discontent; and the administration has not responded. They will have to respond to court action.

You can pledge your support by donating money to the Academic Freedom Fund. A table will be set up in the snack bar Tuesday through Friday of this week.

The fight is not over. It has just begun.
Refresher for nurserymen

Over 200 persons are expected to participate in the California Association of Nurserymen’s refresher course being held on campus. The program began yesterday and will continue throughout the two-day period.

The nurseryman’s association has been staging the program with the college’s Ornamental Horticulture Department annually since 1948. The 23rd annual event began yesterday at one p.m. and will conclude by noon Thursday. At the conclusion of the course, a mid-year examination will be offered by CAN to candidates seeking status as a California Certified Nurseryman.

In its second year, the certification program has seen 196 individuals qualify for the certificate and have their credentials certified by the association. In addition to passing the three-hour exam, candidates must have satisfied a work experience requirement—completion of the certification is required every three years.

Guest speaker Harvey, an environmental specialist from UC Davis, was scheduled to be the keynote speaker for yesterday’s program. Harvey was to speak on the nurseryman’s role in improving the environment, and to discuss the importance of living plant materials in enhancing the beauty of communities, and quality of the environment.

Pres. Robert E. Kennedy was to welcome the nurserymen to campus—Charles S. Crum of Arcadia, president of the 1,100 member nurseryman’s association, is scheduled to present a reply.

The refresher course participants will take part in nine hours of actual classroom-type sessions during the program. Panels will talk on technological advancements within the nursery industry as well as current business trends.

This year, for the first time, the course program included attendance by participants at the student Ornamental Horticulture Club’s annual awards banquet scheduled for last night in the College Union. Presentation of industry scholarships, along with installation of club officers for next year are on the agenda for the banquet.

A Trade Fair will be staged in conjunction with the program, with exhibitors displaying products for the home garden as well as grower nurseries. Another feature is a book sale which consists of a large display of horticulture publications, gardening information, and UC Agricultural Extension Service literature relating to gardening and horticultural production.

Host of this year’s program is the CAN’s Centinela Chapter which represents the Western region of Los Angeles. Chairman is Kenneth E. Terry of Hawthorne. Co-chairman is Dr. Howard Brown, head of the Ornamental Horticulture Department.

Executive secretary of the nurseryman’s association is Jack A. Wick of Sacramento, a 1963 horticulture graduate of this college.

Brown consistent at 7-2; avenges last year’s loss

Reynaldo Brown continued with the consistency that has made him a superstar as he cleared seven feet two inches for the third straight week to claim the California Relays title at Berkeley.

Brown defeated over a dozen jumpers to win the event. Turner tried for a personal best and met a record at 7-4¾ but missed on all three attempts.

Last year, Brown completed unattached and cleared his lifetime best of 7-4¾ but lost the event to Pacific Coast Club’s Bill Elliott on fewer misses. That height now stands as the meet record. Elliott, one of three performers to clear seven feet, finished fourth.

Mike Stone, the California College Athletic Association high jump champion, was a close third with a 7-2. The Mustang was unable to clear the opening height of 6-4.

Another disappointment came when triple jumper Mohinder Singh Gill reinjured his heel and was unable to compete. Singh Gill was unable to clear the 7-foot mark.

The 440-yard relay team of Ward Kinsman finished second in its heat with a 41.3. The record. Elliott, one of three performers to clear seven feet, finished fourth.

On April 21, 1918, the Red Baron of Germany and the Black Sheep of the R.A.F. met in the skies of France. For the last time I...
