Students designs cost-cutting blood machine

Two machines that will greatly reduce the cost of operation at the Tri-Counties Blood Bank, have been designed and built by a student here.

Fred Hollin, of San Mateo, a 24-year-old senior majoring in industrial technology, recently constructed two agglomeration setting machines – more commonly known as blood reconstituting machines – as an added need expressed by the Santa Barbara based bank.

Purpose of the machine is to take frozen red blood cells that have previously been separated from white cells and, with the aid of a saline solution mixed with glycerin, reconstitute the whole blood cell. This is a necessary process since blood in its whole state will last no longer than 31 days. Separation enables the red cells to live up to five years and at any time during that period the cells may be reconstituted with the aid of the machine.

Working along with the faculty advisor, Ray Wysock, began designing the machine for a drawing assignment in a general metals class Fall Quarter, 1970. Actual construction began during the following quarter and was completed this May as part of a special problems project for the Industrial Technology Department.

First developed six to seven years ago, blood reconstituting machines sold for approximately $10,000. Today the cost has been reduced to $3500-4000 or a little under the average. The two machines constructed here were built for approximately $800 each.

"This little machine takes the place of the $10,000 machine," said Dr. Laurence L. McLellan, medical director of the Tri-Counties Blood Bank. "It makes it possible to level out the peaks and valleys in blood donations, McLellan stated. "We are the only bank of our size that is using the freezing treatment for blood storage."

Although personable on stage—when a young Irish singer came on stage with him his comment was "now you have two red heads entertaining you—he seemed too anxious about his performing abilities.

With a voice reminiscent of early Glen Campbell, Zane bashed out a few songs, two with local interest. The "VW Blues" and a song about venereal disease in the Architecture Department were given a lot of voice and guitar, excessively at times.

Zane tried. With a little more exposure he may become very popular around San Luis Obispo.

The redemptive spot of the evening, however, came with the next performance of guitar picking, twangy voiced Greg Carr.

Carr had a natural feel for the songs he performed. "Windin' Through the Blues" featured a lot of good guitar playing and singing. His light, happy songs were easily heard without the extensive amplification that seems so popular today. Hopefully, future concert performers will keep this in mind.

The next Concert Under the Stars is scheduled for Sunday night, July 31 at 8 p.m. A follow up for this past week's performances are all good.

Good, bad, or just plain fair, the next concerts are bound to be successes. The evenings and the fun of being out-of-doors with friends is enough to bring a fairly good sized audience to these free music fest.
Camera workshop

The clicking of shutters and the popping of flash bulbs are bound to appear from every corner of this campus when the Journalism Department and the California Press Photographers Association (CPPA) co-host the first annual Image Workshop West on campus on August 20-22.

Geared for both the amateur and professional photographers, the three-day workshop is being planned to tax the abilities of its enrollees to produce high-quality, photographic results from assigned photography problems.

The workshop is being supervised by the Image West Committee, chaired by Jack Wilson, picture editor of the Santa Barbara News-Press and a former member of the Journalism Department Staff. Other members of the committee are Jim Vestal, picture editor of the Sacramento Union; Gary Gillis, CPPA president and Sacramento Union photographer; and John Healey, head of the Journalism department.

According to Healey, anyone with an interest in photography may apply for inclusion in this summer program. However, a committee of professionals has been chosen to evaluate all applicants and to narrow final enrollment in the program to 50.

Applicants will be accepted, in part, on the basis of three letters by 10-inch prints to be submitted with their applications.

Ed program planned for youth work

The Education Department of the college will provide a workshop on campus this summer for one course at several locations throughout the state over the next 12 months.

The purpose of the program is to improve the professional preparation of the teachers and others who work with the youth enrolled in work experience education programs in the state's high schools.

The project is designed to accomplish four basic activities:

First is the summer workshop, running from Aug. 16-30. Its purpose will be to familiarize educators with the concept of goals and objectives for their programs.

Second, will be the training of 10 participants to serve as resource persons and teachers for the courses to be offered Fall and Spring Quarters.

Presentations in seven different classes of a course on fundamentals will be the third phase.

Fourth among the basic activities will be an advanced course in evaluation for work experience education.

Both of the courses planned for the program are being scheduled as regular courses of the college extension program. They will be worth three units of graduation credit.

The Communication Workers of America are back at the switchboards or installing telephones today. The 48,000-member group voted Wednesday to accept a three-year contract package. Balloting will continue for two more weeks. If at that time the members have rejected the proposal the strike will resume.

The purpose of the contract is to improve job security, wages, and working conditions for the installers and maintenance personnel. The strike caused little, if any, inconvenience to the users. Due to partially automated systems and the use of management personnel, there were up to par at the other end of the line.

The Tropicana food service welcomes the public to its full-service unlimited portion cafeteria. You can now dine at Tropicana at 35 North Broad Street in San Luis Obispo for the finest in prepared meals at prices students can afford. You'll be glad you did.

Thank you very much.

Last week's Mustang carried a story entitled "In a car, help a fellow man!"—a piece that attempted to convey a plea to you to reach across the walls and touch a hand that needed help. We didn't do a very good job.

The story related the struggles of a Paso Robles family in their attempt to put life together for their 10-year-old son. It hasn't been too easy—not too easy at all. But thanks to a few who heard what the story said.

Chris Christman and another boy from Atascadero were two who heard the story and decided to do something. They were two who decided to help.

Through the work of Don Tutko, Pete Evans, and Billy Mounts, next Friday, June 30, will be the day the CU plaza will be the place where you will give chance to love someone constructively. An area will be set up where you can give something of yourself to be someones else. Blood for two young boys is needed. Do you love them enough to believe that a needle in your skin hurts less than two boys who may not...

Thank you very much.

Ringing Victory

A spokesman for the strike stated that the contract did have everything we wanted—It did represent wage and benefit increases exceeding percent.

Pacific Telephone Company, which employs almost 15,000 people in California and Nevada, has been fighting the phone workers' increases that may be necessary to meet union demands. The strike has been going on for weeks.

Through the work of Don Tutko, Pete Evans, and Billy Mounts, next Friday, June 30, will be the day the CU plaza will be the place where you will give chance to love someone constructively. An area will be set up where you can give something of yourself to be someones else. Blood for two young boys is needed. Do you love them enough to believe that a needle in your skin hurts less than two boys who may not...

Thank you very much.

The campus Camera Club has announced its summer schedule.

The meetings are slated to begin July 19, 20, and Sept. 15. Meetings will be held in the Scott Conference Center at 8 p.m. Participants will be asked to bring their photos and slides for the enjoyment and the critique by the group.

Photo buffs are invited to attend.

What do you think of President Nixon's proposed trip to China and the good relations which might ensue?

by John Taves

Corrections
Apologies to Jay Peterseus, Nancy Joes, and Carol Benner for the misprint in the Open It Wide column last week.

Ray Beehm-GSM-Dr.—I think it's a pretty good idea. The more communication the better off you are. If you don't talk, you never solve problems.

Mark Wilson-Big Chem-Dr.—I'm not sure if he's going. If he does go, it'll be good for American's Far East relationships, because we'll have a gathering of the major political representatives. If he doesn't go, it's probably because he won't have adequate security from anti-Americans in China.

Mary Bright-Home econ.-Jr.—Let me think...I think there is going to be problems with Chiang Kai shek. I'll bet he's upset. We made a pledge to stand by them as far as the communists being intruders was concerned. But at least it will open up communication.

Beverley Bentley-Bio Greald.—I think it's a good thing. I think the differences between our two countries has to cease if world peace is to come about. I try to be an optimist and I think it will. I think two countries with different government forms can exist. It doesn't have to be one whole democratic system.

Jeri Brandt-Home Eco.-Jr.—I think it's really neat. But I wish he'd hurry up and get over there.

Mike Brady-Arch Ir.—I think we ought to be optimistic and hopeful about it. It just might strengthen the U.N. ties. It will help the whole situation. Having all the world powers in the U.N. will be much better.

Anton Dieker-Entel—Jr.—I was totally unaware that he had made any such plans. Don't think I'm from outer space, I've just had my head in a lot of books.

Lloyd Bestte-EL-Jr.—I think we'd be very cautious. The position that China is in right next to Russia is important. They have 80,000 troops there now. They need an insurance policy. I don't know if we wanna be their insurance.

Jane Hill-Bio Bel.-Dr.—I think it's good he's going. I don't know if they're telling us all. Kissinger was so secretive I don't think the people of China will be glad to see him.

Lawmakers ban bikes

Out of the office of 39th district Assemblyman William Keachum, San Luis Obispo and Tulare Counties comes the announcement that last week the legislative Joint Rules Committee ascended to new legislative heights. They have banned the parking of bicycles in the Capitol garage.

At a time when we are presumably encouraging the removal of as many cars from the highways as possible this action encourages questioning. Some members and many staff people ride bikes to work. Bike theft being what it is, the cyclists have parked their bikes in the garage inconveniencing no one.

It seems that with all the problems confronting the legislature the Rules Committee should certainly find more important items to occupy their time.
CTA fights budget cut

Governor Reagan's $78 million veto of State Teacher Retirement System (STRS) funds threatens a $20 million cut to the STRS board to make up the difference—$78 million—from its contingency fund.

Bittle added that the quickest and most effective way to solve the problem would be for the Legislature to stick to its original concept of the state's obligation to the retired teachers and override the governor's veto on this single item—by restoring the $78 million contractual obligation and legally fixed charge to the budget.

According to Bittle, the $78 million does not represent an increase in retirement allowances. It merely meets the current inadequate allowances, which have not been raised for several years in spite of inflation.

Monday—a 'good' day

If Monday mornings have been a drag for you in the past, then this is to announce that things are looking up.

From 9:30 a.m. to 11 a.m. on Mondays you can relax under the trees in the Arborc Park while sipping coffee and enjoying pleasant conversation with fellow coffee-drinkers.

This Key

is your key to happiness in love and college living.

It's your home.

Stemen Glen, our key to success.
How important is it to know her?

by Joanne Wilson
Staff Writer

Marianne Dobii couldn’t understand why she was being interviewed. “Why not interview someone who has already contributed something—like Beatrice Devlin or Rev. Charles Keating?”

That forced me to do some reflecting. How important is it to the student body to know their ASI vice-president as a person? Another question presented itself. How much was she willing to reveal?

At the beginning of our conversation the barefoot girl in a long cotton gown made it clear that she wished to keep her private life private. Not because she had nothing to hide—simply because she wanted it that way.

Mrs. Navin Dobii is an oriental herbalist married to a two-and-a-half-year-old daughter and some very definite political opinions.

She ran for ASI vice-president and won last May “to further the political opinions.

Bernadette Pete decided to run for office because she wanted it that way. There was strength in numbers, from the top down. Believing in the bottom up decided to work for it himself.

The student body to know her just isn’t...and that’s where she stood.

Her very definite political opinions:

- She is for student rights and to help make their years at Poly meaningful to them (the students).
- She and AS President Pete Evans had worked together in the Student Tenants Association (STA) over a year prior to running. Mrs. Dobii has heard about many of the problems facing students here and...rather than view them as change from the bottom up decided to work for it from the top down. Believing in the bottom up decided to work for it himself.
- According to Pete, the political awareness was aroused while in the second grade when the first Supreme Court case involving a decision on integration originated in her home town. I noticed that one of Marianne’s biggest social concerns seemed to be the man’s struggle for equality.
- When I asked her to give her views on the U. S. economic system, Marianne began to warm up. Directing the conversation away from her personally to the system as a whole, she expressed a generalities is easy,” she said, “but a bunch of radicals” taking it to the student body to know her just isn’t...and that’s where she stood.

Sitting beside her daughter, ASI vice-president Marianne Dobii, contemplates the role of womanhood—“pretty much and individual thing.”

Recently to England, Thailand, Malaysia, and India. She lived one half year in Malaysia and India on “a sort of extended vacation.” She says next she would like to visit South America.

Marianne has been attending Reed College for two and a half years. Prior to coming here she spent two years at Reed College in Portland, Ore., then worked for a while.

I asked the female vice-president what her views were on the woman in her traditional role as housekeeper. “I think that the original tasks that women had have been rendered useless by technological advances. No person should have to do something that person doesn’t see the relevance in.”

Mrs. Dobii did not express a particular personal preference or aversion to the traditional role of the woman. She seemed to think that it was pretty much an individual thing.

Marianne did not relate any particular interests in music, literature, or art. She said she likes music but it’s “the usual thing—what everybody likes.” Marianne depletes in a variety of crafts. Among them she mentioned pottery, gardening and sewing, but said she doesn’t have time to really get into one special thing.

According to Marianne, her political awareness was aroused while in the second grade when the first Supreme Court case involving a decision on integration originated in her home town. I noticed that one of Marianne’s biggest social concerns seemed to be the man’s struggle for equality.

When I asked her to give her views on the U. S. economic system, Marianne began to warm up. Directing the conversation away from her personally to the system as a whole, she expressed a generalities is easy,” she said, “but a bunch of radicals” taking it to the student body to know her just isn’t...and that’s where she stood.

The economy is showing itself to be defunct.”

She mentioned that the poorest people (blacks and women) are the ones kept in subordinated positions and are those to be left off first when the economy starts to go downhill.

As Marianne sees it, the supersonic transport (SST) is a waste of money which has been proven to be unfeasible. She said that it is clear that “industry is controlling our economic domestic and foreign policy.”

She summed up the economic question by asking, “What good is going to the moon if we’ve got people starving in our backyard?”

When asked about President Kennedy, Marianne replied, “I don’t think being president of a college is an easy position.” She said Kennedy is interested in the students’ welfare, but is in a tight situation, caught between the students and the trustees.

Marianne said she hopes to see a closer, more open attitude develop between students and the administration.

Having heard only rumors about Marianne’s connection with Students for New Action, I asked her about that. She said, “I judge it (SNAP) by what’s been done, not by the aura it has created.”

Marianne is not a member of SNAP, but did speak on one occasion last year in club members. She has friends in the organization, but pointed out that she has also friends in many other campus organizations.

Marianne gave SNAP credit for being instrumental in bringing the non-retention of and disassociation within the faculty to the students’ attention, promoting anti-war actions, and introducing a greater variety of speakers to the students on campus.

I asked Marianne how much responsibility she thought one man had to another. She said that she had the responsibility to the degree that he saw his relationship to his fellow man. She said problems in the universe stem from unsettled questions within oneself. However, she feels that there definitely build between all people.

Marianne referred to the concept that people must come together as people. “If we don’t, the situation is not going to get any better.”

“There definitely is a bond between all people.”

Not willing to let negativism overpower the positive, Marianne says she has a lot of hope for the direction mankind is going. On one level, she said, “it’s happening—people are coming together in the fight to regain their rights.”

Marianne believes that although all people are basically alike, they are afraid of each other. “Loving everyone in generalities is easy,” she said, “but bringing it down to specifics—like you and me...,” and that’s where she trailed off.

SAN LUIS OBISPO 543-1208
Backpacking, to the beginner, can be a very painful experience. About half the people accompanying the Outings Committee on an excursion to Jennie Lake in Sequoia National forest last weekend, found this out the hard way.

In spite of thunder and lightning, blisters, strung muscles, soggy sleeping bags, and rain and more rain, 23 people left Friday and 23 returned Sunday.

Outings Committee Summer Chairman Jeff Engelried explained that the weekend backpack trip is basically a friendly animal which will be raising its head again many times this summer; "depending on whoever shows up at the meetings and depending on what they want to do."

Sponsored and funded by ASI, the Outings Committee exists to bring together people who like to go places and do things. "We'll do whatever the people want to do," advisor Les Griffin said.

In the past that has included trips to such places as Yosemite, Pinnacles National Monument, Disneyland, San Francisco, and even paddling canoes down the Russian River. According to Engelried, on one occasion Spring Quarter, there were three trips going simultaneously. One group went to San Rafael wilderness, one to Redwoods National Park, while the third went hiking in Zion National Park.

Engelried stressed the Outings organization is not a club—it is a committee. He added, "We pride ourselves on being one of the most open organizations on campus."

He said that it is not uncommon for someone to accompany the group on one trip, then not show up for another outing until six months later. People participate according to the way things fit into their schedules.
Outings Club

Anyone is welcome to attend committee meetings Tues. evenings at 7 p.m. in CU 220. Usually this is where suggestions are made and a place to go is chosen for the coming weekend.

Engelfried said that this summer many of the regulars are interested in outdoors activities, so he looks forward to many camping and hiking trips.

The jaunt last weekend to the Sierras was considered to be a beginner's hike, according to Engelfried. Hiking twelve miles Saturday, and six Sunday didn't reach anybody's limit, but to one poor reporter it came pretty close.

Engelfried said that when the committee was formed, about three years ago, it nearly died because there were only a maximum of eight active members. During the regular school year, the committee meetings boast a regular attendance of over fifty.

Outings Committee tries to plan at least one activity per weekend. Transportation is provided by those members with cars, while those without share the expense of gas. Average cost for a weekend is $8 for food and whatever the transportation costs.

This weekend the group plans two small outings. Tomorrow beginning at 5 p.m. until dark they will go horseback riding at Avila Beach. The cost is $2.20, plus the cost of transportation. Sat. night a camp-out is planned at a local beach. Its cost is $1.50 plus transportation.

If either of those strike an interest, sign up at the CU information desk by 9 a.m. tomorrow. Departure time and place for both outings is 5 p.m. at the TCU on their respective days.
LEARN HOW YOU CAN READ FASTER WITH EQUAL OR BETTER COMPREHENSION.

- You'll discover various study methods and procedures.
- This is a Special One Hour Introductory Lesson.
- You'll learn the rate of your reading speed.

We want you to decide for yourself the value of becoming a rapid reader through the use of the Evelyn Wood Reading Techniques.

For the first time we are offering a special one-hour introductory lesson to provide you with a glimpse of what it is like to be a rapid reader. You'll actually participate in the techniques that will improve your reading and comprehension. You'll find that there’s no particular magic to becoming a speed reader... the real ingredient is mastering the proper techniques. Students, educators, businessmen and housewives, over 500,000 of them have mastered the Evelyn Wood method and the late President Kennedy was sufficiently convinced of its value to invite Evelyn Wood to the White House to train his staff. The only investment on your part is one hour of your time... we think that's a small price to pay for what could lead to financial profit and hours upon hours of enjoyment. Decide for yourself at a Free Introductory Lesson at the Evelyn Wood Reading Dynamics Institute.

Give SLO
air a rest

"Give the Air a Rest Day" will begin today at 3 p.m. at the City Hall.

The activity planned is a bike ride around town—an attempt to relieve San Luis of excess smog.

This monthly event to give the San Luis Obispo air a rest is being sponsored by the recently formed bicycle clubs. For more information call John Hoyt at 544-8666.

CABARET: OPEN July 28

The production "Cabaret" will open July 28 at the Pacific Conservatory of the Performing Arts at Allan Hancock College in Santa Maria.

Laird Williamson has returned to direct Cabaret, the epic story about the decadent society of Berlin in 1930. Williamson is the guest assistant professor in acting and guest actor at the University of Texas.

Theatre goers will find the production bizarre, grotesque and inhabited with brassy, wanton, carefree people living in a world doomed to die. Some members of the audience may find themselves comparing trends and mores of today. This decadence which ultimately laid open the way for Hitler and his regime.

"Mature audiences will see truth is often harsh but artistically we cannot back down," said Williamson.

However, the play is not all decedance there are many tender, warm moments. It is the kind of show that has a little something for everyone.

Cabaret is one of the most acclaimed musicals of our time and has been hailed "...a sparkling ingenuius musical."

by Rob Bandu
Staff Writer

Just sniff the air and you know it's all just a sign of the times.

A step to encourage more bicycling and fewer automobiles on campus will be taken this semster. Bike lanes six feet wide will be created on all of the major campus traffic arteries. Although the construction of the lanes has begun, the final touches of signage and painted curbs will not be completed until the fall quarter.

President Robert E. Kennedy approved the recommendation of the campus planning committee to get the bike lane system in operation. Kennedy authorized removal of approximately 360 temporary on-street automobile parking spaces to clear the way for the bike lanes. The lanes will provide for improved safety of bicyclists and pedestrians and will encourage greater use of bicycles by students and faculty.

E. Douglas Gerard, executive dean, and Peter K. Phillips, facilities planner, who developed the bike lane plan, ride bikes to and from campus.

Gerard said the street parking spaces created hazards for pedestrians, especially at crosswalks, and that the motorists will now be encouraged to use available parking spaces in campus lots. Some of the spaces are not as convenient as the street parking, but the bicycle lanes are definitely needed for the increasing number of cyclists on campus.

"The relatively inexpensive multi-speed bicycles, and the ecological impact of motor vehicles are factors in this increased use of bikes," Gerard said. "We have three times as many bicycles on campus this year as last year."

The diagram at the left illustrates the areas where the lanes will be located. The darkened lines designate the lanes.

The construction includes striping the street surface to indicate bike lanes and intersections, and stenciling of new signs for pedestrians and motorists.

There will also be a change for motorists using the Grand Ave. entry. Restriping will provide two incoming (northwest) vehicle traffic lanes and one outgoing (southwest) traffic lane, to accommodate early morning rush-hour traffic.

The bike lanes will occupy six feet on either side of Outer Perimeter Road and Grand Avenue and one side of the other streets. Two-way traffic will be permitted in all bike lanes.

Dean Gerard said he believes that the college's action will not only increase bicycle use on campus, but will encourage the development of similar bike lanes on city streets leading to the campus.

The opportuneltiM listed with

in their rich culture died without a

which is a decrease in numbers.

the vanishing people

fulfilling spirit of our modern day society are

becoming frequently attuned to their

own ancient culture. They are

banning together in a new

solidarity. A family of Indians made up of every tribe in our

nation. This new found union and the power that arose from it was

totally lacking in the makeup of the Chumash Indians that once

lived in the San Luis Obiopo area.

Unlike the Indians of the great

Plains the Chumash did not band

table together as a tribe or nation.

From reports of the early

Spanish settlers it has been

determined that the Chumash's

only true allegiance was to his

immediate family. The people

could only be identified as a tribe

through their common Hokan

language and cultural traits.

There was no central tribal

organization or strong individual

leadership on the central coast of

California. The Chumash

village that once stretched from

Ventura to north of Morro Bay

were totally independent from

each other.

At the village level, however,

the Indian man initially chose a

chief who did not have any

political power, but, who was

obliged during wars or trouble to

gather the tribe together for

defense. During times of peace

his rule was imaginary—he was

more of a master of ceremonies

at celebrations rather than a

disciplinarian or leader as were

the Plain's Indians powerful

chieftains.

Unlike today's highly

specialized and specialized life,

the Chumash are still very

traditional. Their way of life is

highly generalized people with

the only major division of labor

being the man and the woman.

Each member of a family had

their own job to do. At certain

times of the year, however, the

village would join together to

gather acorns or to fish during

the run of steelhead trout or

tuna off the coast, but most of

the time the collection of food was a

family affair.

Since the Chumash had no

great loyalties to their tribe or

chiefs and cared only for their

families they could offer no solid

resistance to the influx of

Spanish, Mexican and finally

American peoples who invaded

their ancestral lands. Lacking

the know how of organisation, the

Chumash faded away into total

extinction in a little over four

hundred years. The people and

their rich culture died without a

whimper—lost before any concern

could reverse the dying process.

The Vanished People

by Brian McCanlcos

Final Part. Today's Indians

perceiving a certain falling spirit of

the people and the whole future

of the race. Hitherto they had

settled together as a tribe or

nation. Today, however, the

Chumash are independent from

each other. In the early days the

Indians erected a road system

which connected the various

villages and allowed for easy

communication. But with the

arrival of the Spaniards the

Indians were forced to abandon

this system and to live in small

isolated groups.

The Chumash were never a

warlike people and were content

to live in peace. They did not

make war, but they were

defensively minded. They

gathered together in times of

danger and protected each other.

The Chumash were a peaceful

people and believed in

cooperation and sharing.

The Chumash were

considered the best hunters in

California. They were

excellent at fishing, gathering

acorns, and gathering shellfish.

They were also skilled at

making baskets and

wooden bowls.

The Chumash were

considered the best farmers in

California. They were

excellent at growing crops, such

as corn, beans, and squash.

They were also skilled at

making canoes and

fishing nets.

**Dramatists...**

The damsel in distress (above) is played by Nevada Barr, her attackers are played by Richard Carriger (left) and Ernest Garey (right).

Above right, the Maid (Ninou Lake) and the Noise-maker (Susanne Rabig) fend off the advances of the Giant (Brave Gary).

Below right, the Noise-maker (Susanne Rabig) trumpets the announcement of the beginning of the story.

**Guest tells club's past**

An interesting and informative discussion was prompted by Harold Mlossi, Chairman of the San Luis Obispo County Sierra Club, last Thursday in the CU. Mlossi gave a brief recap of the Sierra Club's history by relating the club's founder was John Muir to the audience. He concluded by stating the club succeeds with its stand no development would be allowed in the area.

The audience won't be the only unusual aspect of the performance. The setting will be too. The dramatists will be working on the playgrounds of six elementary schools in San Luis Obispo.

The five-week series of performances are scheduled for two Morro Bay schools as well as a performance in the San Luis Obispo City Library.

The two plays consist of three acts. "The Brave Little Tailor" tells the story of two maiden queens who are saved from the giant by the little tailor. The other play, "Androcles and the Lion," describes the adventures of a slave who befriends a lovely girl.

The performances are open to all children and there will be no admission charge.

**Interviews for Pan Am co-op study**

C. R. Russell, associate dean of engineering, said Pan American World Airways representatives will be on campus next Tuesday to interview freshmen and sophomore students majoring in engineering and business administration for co-op studies.

The program allows students to attend classes one quarter and work in industry the next quarter in such places as Miami, Florida and New York, New York.

The audience won't be the only unusual aspect of the performance. The setting will be too. The dramatists will be working on the playgrounds of six elementary schools in San Luis Obispo.

Intramural Sign-ups now taken

Coach Dick Stanton of the Intramural office reminds students that they do not have much longer to sign up for competition in basketball, softball, volleyball, handball, and tennis. Sign-ups for these sports have been extended to the end of this week and play will begin next week.

The basketball league will be held on Monday and Wednesday nights from 4-6 p.m. while the volleyball league will be held on Friday nights from 4-6 p.m.

Tennis competition will be held Monday through Thursday from 4-6 p.m. In the afternoons, racquets and balls will be furnished for those who desire them.

Softball action is slated for Tuesdays and Thursday from 4-6 p.m. while a handball round-robin tournament is scheduled for July 31.

Reston also advises that students may sign up either as a team or as an individual to be assigned to a team.
