Cyclists plan “march” on city

By Pat Thorton
Staff Writer

Bike riders of San Luis Obispo are uniting tonight at 6:30 at the Mission Plaza.

The goal? To take up as many parking spaces in downtown San Luis Obispo as possible. One bike will be parked in one car parking space as a motor vehicle would be normally.

The bike “march” is a direct reaction to the San Luis Obispo Police Department’s issuance of Article Four of the California Vehicle Code. Essentially, the law says that every person riding a bike on the roadway has all the rights and is subject to all the laws that apply to motor vehicles.

To demonstrate the cyclists’ rights, interested people are urged to be at Mission Plaza. However, a few important items should be noted.

Don’t chain bikes to parking meters. And because Mission Plaza is considered a sidewalk, don’t ride bikes on it. Be sure to have lights on bicycles if they are to be ridden after sundown. Traffic tickets will be issued to violators.

Construction continues

The honeymoon in student-housing ratio this fall will have no affect whatsoever on the rate of construction of the new residence hall and dining facility adjacent to Yosemite dorm.

Douglas Gerard, executive dean, explained that the two construction companies in charge of the separate housing and dining projects are under contract and are obligated to maintain the pre-arranged schedule of construction, regardless of how the housing picture fluctuates.

“Unfortunately we’ve seen these housing cycles before,” said Gerard. “It’s either a feast or a famine.”

Completion of the $11.4 million dining facility, which will include a cafeteria and a sit-down restaurant, is aimed at next winter.

The $3.3 million coed residence hall, which will be similar in appearance to Yosemite dorm, should be ready for use in early 1971.

The 8.3 million coed residence hall, which will be similar in appearance to Yosemite dorm, should be ready for use in early 1971.

The goal? To take up as many parking spaces in downtown San Luis Obispo as possible. One bike will be parked in one car parking space as a motor vehicle would be normally.

The bike “march” is a direct reaction to the San Luis Obispo Police Department’s issuance of Article Four of the California Vehicle Code. Essentially, the law says that every person riding a bike on the roadway has all the rights and is subject to all the laws that apply to motor vehicles.

CU flick on for tonight

Tonight’s movie, “The Thomas Crown Affair” will be shown in Chaminaud Auditorium at 8 p.m. Featured in the movie are Steve McQueen, who plays a rich, urbane type who gets his kicks from robbing banks, and Faye Dunaway, a career crime fighter who falls in love with her victim, McQueen.

When McQueen plans his last crime before reforming, Miss Dunaway tries to dissuade him, but he tells her that if she really loves him, she will not tip off the police. The dilemma leads to a startling and surprising denouement.

Admission price is 50 cents.

Freeze effects “up in the air”

by John Teves
Staff Writer

Along with the rest of the nation, this school has spent the past week up in the air as a result of President Nixon's wage, price, and rent freeze. School officials have been as much in the dark as anyone else since President Richard Nixon's change of policy was announced Sunday night.

When asked what effects the move might directly have upon this school the college’s business manager Don Nelson could say very little with certainty. He did find out, however, that the rate for foreign student tuition for all students would remain the same.

A grandfather clause established by the legislature as an exemption to current students from the increase of $900 to $1150 per year and since removed due to budget difficulties was thought to have been a possible price increase, therefore affected by the President’s decision. Nelson was contacted, however, by the Chancellor’s office Tuesday and assured the grandfather clause would not be reinstated.

As to other possible areas of affect upon the college, including the state employee’s merit of five per cent merit increase, Nelson was unsure. Apparently local offices representing the federal government will have to be established before specific applications can be determined.

Jack Fryer, speaking for the Foundation Association, could only remark that they would have to wait and see what comes “down the pike.” In the meantime, said Fryer, all employees were concerned about the possibilities and anxious for more specific word.

Business manager for the student body, Roy Gersten, was sure of only one thing. Whatever happened to the state could be counted upon happening to the student body. Other than that, Gersten was still seeking someone who knew something.

It appears then, that people working for and attending this school will have to hold their collective breaths as they wait for the final clarifying word.
Great idea but...

Editor:

Marianne Doehl's endeavor entitled "Child Care!" in the August 12, 1971 issue of the Mustang has stimulated me to write you. I was very interested in the article because I am a full time working wife, and we have two children ages 3 and 4½ years old. My reaction to her piece was mixed amusement and irritation.

I was amused to learn that the establishment of child care centers should become one of the most pressing current campus issues. And that, behind this demand are two facts. First, a large proportion of today's students are parents of young children - both parents being students. Secondly, the concern by students that higher education continues to be an "elite social service" from which low income and minority background groups are excluded, and which threatens to exclude even children of the middle class who do not fit the mold.

After reading the article several times, I became irritated by the fact that one of the most pressing current campus issues and students are demanding is the establishment of child care centers. When choosing to have children, they assume the responsibility to love, rear, clothe, and care for their offspring. I don't feel the state college system should be expected to provide or assist in any way for the care of the children of its students.

The two facts on which the demand is based are not very strong. Granted, a large number of persons with small children attend school and the strain on the financial resources are great. But remember, you made the choice to have children and continue with your higher education. The second "fact" leaves a lot to be desired. I was under the impression that higher education was an earned privilege, not a service. Perhaps we are getting down to semantics, but the opportunity for higher education was an earned privilege, not a service. Perhaps we are getting down to semantics, but the opportunity for higher education was an earned privilege, not a service. Perhaps we are getting down to semantics, but the opportunity for higher education was an earned privilege, not a service. Perhaps we are getting down to semantics, but the opportunity for higher education was an earned privilege, not a service. Perhaps we are getting down to semantics, but the opportunity for higher education was an earned privilege, not a service. Perhaps we are getting down to semantics, but the opportunity for higher education was an earned privilege, not a service. Perhaps we are getting down to semantics, but the opportunity for higher education was an earned privilege, not a service. Perhaps we are getting down to semantics, but the opportunity for higher education was an earned privilege, not a service. Perhaps we are getting down to semantics, but the opportunity for higher education was an earned privilege, not a service. Perhaps we are getting down to semantics, but the opportunity for higher education was an earned privilege, not a service. Perhaps we are getting down to semantics, but the opportunity for higher education was an earned privilege, not a service. Perhaps we are getting down to semantics, but the opportunity for higher education was an earned privilege, not a service. Perhaps we are getting down to semantics, but the opportunity for higher education was an earned privilege, not a service.

Yes, Marianne Doehl, it is a good and noble idea to have places where children of students can receive loving care at low cost while their parents attend school, but, don't expect the taxpayer, the state or the school to be involved.

Staff Comment

War waged

by Pat Therese
Staff Writer

After nearly slaughtering a bike rider on California Boulevard I decided that there must be something that could be done about the war being waged, involving the bicyclist and the motorist.

However, my decision came a little late. Bob Newhart, a 25-year-old City and Regional Planning senior had started on this problem over a year ago. With a few fellow bike riders Newhart presented plans for bike lanes around San Luis Obispo to the City Council last year.

It took numerous meetings and discussions with groups such as the Chicanos Advisory Committee and the City Council until the riders were persuaded that they should take it slowly.

Alternative to expensive bike lanes which would eliminate parking spaces on one side of major streets was a bike route designation. This, in essence, would supply signs with pictures of bike riders that would state that the motorist was not only traveling on a street, but a bike route as well.

No warnings, no real place for the bike rider to call his own, just a sign to "help communications" between the motorist and the bike rider.

Well, swell. Now when I nearly murder the next bike rider who has tried to avoid a car pulling out from a parking space on a bike route, I will know that at least, for a moment, I was "communicating."

Hirings for some still continue

The position of the School of Business and Social Sciences has been filled by Edward H. Barker. He was appointed last year but his duties, as a member of the administrative faculty were delayed while he completed his appointment as a member of the University of Southern California faculty.

Dr. G. O. Chosa filled the position on an interim basis during the 1970-71 college year. Dr. Chosa, who formerly served as director of research and development, will become a member of the Social Sciences Department faculty in September.

Burned? - drop it now

If you are getting burned in a class this quarter or just plain don't like it after all, today is the day to drop class without penalty.

Drop forms are available in the Student Records Office in room 222 Administration building.

Cost for dropping a class is $5.

Signature from one's advisor and the teacher are required, as well.

Budget ax cuts here—but lightly

by John Spitzer
Staff Writer

"Gim'me the ax! Gim'me the ax! Harder! Harder! So goes the old gridiron fight song. It's a little out of season on campus campuses, but in our state capital the "gim'me the ax" theme is just coming into its own.

State College Chancellor Glenn S. Dumke said recently that so much of next year's college money has been chopped away that what remains is a "very austere budget."

Indeed. The new budget provides 30 fewer faculty jobs than last year, but requires that 10,000 additional students be allowed to enroll within California's 19 state colleges.

Dumke says that "it is a minimal maintenance budget providing services at a marginal quality level for a maximum number of students under our present operating methods and promises. . . . we have few funds available for research and development and accompanying risks needed to break out of the spiraling cost cycle."

Dumke outlined the more immediate problems caused by the decreased number of faculty and the increased number of students as follows:

1. Classes must be cancelled or postponed at each of the state colleges to save money. What does it mean to this college? Statistically it means there will be 181 fewer sections offered this September than last. Last fall 2,059 classes were offered, whereas, this coming fall 1,878 are in the making.

According to Donald Costa, Associate Dean of Education Services, the office is responsible for coordinating class schedules, each department determining which of its sections must go.

Costa indicated that in the elimination process experimental classes usually go first. These are followed by elective and special credit types and finally mandatory classes.

In some instances classes are dropped because a department can't find instructors to teach them.

6. Some students may be unable to get the precise classes they wish in the term they desire. This may result, in delayed graduations and postponed career plans.

Costa says this college should experience losses that a "certain number of students have always had problems getting the classes of their stream and the very best program that fit their needs.

4. Students would have the advantage of knowing the good teachers who can get the material across.

Van Lowe, Math, Grad. It's hard to say. I have a friend going to Stanford who tells me that he has had instructors who are well known people, and Nobel prize winners. These people are well qualified but they can't teach. Students should have the advantage of knowing the good teachers who can get the material across.
MOUNTAIN SPORTS is proud to announce that two of Southern California's best young climbers, Greg Bender and Dan McHale will be teaching rock climbing in the San Luis Obispo area. Our instructors have extensive experience climbing in the Southwest at such places as the Sierra, Yosemite Valley, and the desert regions in California. Their goal is to instruct students in the proper techniques of climbing with safety being the key to the students' enjoyment:

Courses will be taught at three efficiency levels—Beginning, Intermediate, and Advanced. The basic fundamentals of climbing will be taught in the beginning classes. The Intermediate classes will be taught the skills required for hard free climbing and easy direct aid. Advanced classes will learn specialized skills and techniques required in the ascent of multiple pitch climb.

We also offer a guide service and hope to hold rock climbing seminars in the near future. Our instructors would be happy to answer your questions about the courses or just climbing in general.

A limit of six to eight students will be taken for each of the following dates: August 7, 8, 14, 15, 21, 22, 29. Reservations are required.

at St. Lucy's High.

emet family has lived in

the central coast area since

"We enjoy the central coast

California," says Cleath,

for the past several

years. "The people including the

people particularly in the

area, he thinks this is

what's created the

"Delightful part of it.""}

October. Dr. Cleath's

and Tim, were hitch-

hiking for Christmas and

were involved in a one-car ac-

cident near Needles, California.

The father who had offered them a ride

was thrown out of the car.

The teen died four days latter

and Rob has been in a coma for

the last seven and a half months.

Tim received a skull fracture and

a badly injured shoulder but is

now back in school.

Dr. Cleath expresses the

feeling that "these prayers not

only have been answered in Rob

being sustained, but we have

found that our own spirits

have been constantly lifted and we've

been able to go through this very
difficult situation where it's a day

derafter constant care and

watching of him, with good

stability and great hope and real

consolation.

"We haven't been depressed by it

to the point of being really down

and out, but rather God has given

us the strength so that we have

great hope and confidence that

he's going to be restored."

"Somehow, in a way we don't

comprehend, there was a purpose

behind this."

Dr. Cleath says that he

believes God is going to use his

(Rob's) life when he awakens.

"It's going to have a profound

effect not only on his life, but on

our family's life and on the lives

of many people who will see that

God does indeed answer prayer." This incident has changed the

Dr. Robert Cleath, a speech instructor on campus, has kept his

everyday routine of the Cleath

family in many ways. Rob must

be exercised twice a day and

managed to prevent rigidity of

muscles and joints. Numerous

drugs are given at various hours

of the day and his feeding and

personal hygiene must be taken

care of.

But these extra tasks don't

seem to stop Dr. Cleath from

having a very busy summer.

Even though he is not teaching

this summer, he has given about

twelve speeches at various

churches and participated in the

baccalaureate services in

Wheaton when his daughter

graduated.

He did a book review for

"Christian Scholar's Review," a

writing articles for "Christianity

Today," and is in the process of

writing four essays for the

"Dictionary of Christian Ethics"

on public opinion, propaganda,

brainwashing, and prisons of war.

A few months ago, Wheaton

College Men's Glee Club was

touring California. Rob sang

with the group on a European

tour last summer. They stopped

during their tour to sing in to the

hospital. This event was

covered by the local television

station.

Dr. Cleath says that the

"Wheaton College student body

has had for many, many weeks a

36 hour prayer vigil where there

was a student praying every 15

minutes of the day."

It is interesting to note that on

the day that Dr. Cleath was being

interviewed, the draw lottery

pertaining to Rob had just been
drawn. Rob was number 66.

When he wakes up it doesn't look

like that'll have to worry about

it."

But until that triumphal

awakening, the Cleath family

is "praying, and waiting, and

learning, too, in the midst of it."

New economic plan affects all

President Nixon's new economic plan affects all

because of the 10 per cent duty and because of the cheaper U. S. dollars overseas, but part of the duty hike would be nullified by dropping the 7 per cent excise tax.

Farmers: Farm prices are not subject to the freeze. For this reason supermarket prices will not remain stable, although the change is expected to be slight during the 90 day period.

Taxpayers: If Congress agrees to it, less money will be deducted from your paycheck starting January 1. The personal exemption, which rose to $880 this year, would increase to $970 next year, allowing a taxpayer to deduct that much for himself when he fills out his tax form.

The standard deduction, used by taxpayers who do not itemize their expenses, would rise from its current 11 per cent or $1,100, whichever is larger, to 18 per cent or $1,620 again whichever is larger.

Businessmen: If Congress approves, you may subtract from your corporate income taxes the same year whatever you spent on new equipment or machinery, up to a total of 12 per cent of your tax bill. The figure would fall to 9 per cent next year and in following years to 3 per cent. The President is urging you to freeze your stock purchase at previous levels until Nov. 12.

Bankers: Interest rates, including mortgage rates would not be affected.

That's why we feel you would serve good purpose in submitting a disagreement with the Attorney General's opinion.

The proposed resolution by Gurnee had already been agreed upon and was sent to the Council at this college.

In the council member's opinion, a majority of the council thought that the students supporting this resolution were taking wrong steps in differing with the Attorney General's opinion.

The final vote by the City Council was resolved in having the San Luis Obispo city attorney resolve the resolution that would suggest a change in the age of majority from 21 to 18.

All council members agreed that they would support such a resolution.

In an interview with Mustang, Gurnee gave his feelings on the Council's final decision.

"I was very disappointed with it because the other members were quite fearful of having dissent against the law," he said.

Gurnee added, "The whole reaction to this issue by the minority of the members of the Council is just a classic example of this 'status quo mentality' on the part of the council. They just don't want to see anything out of the norm."

If the council's proposed resolution is followed through, the main possible effect would be the one of setting a precedent for the entire state, because the entire state has a similar statute. By holding the 21 age limit, we are in just as bad shape as those people who have been fined over $6,000 if he had previously

...
Fat City makes crowd whoop

Students enrollment to increase

Student enrollments from big schools through college are expected to increase again in September. This is the indication from enrollment projections in California’s schools and colleges which expect some 6.5 million regular full-time students and some 18,000 part-time students, with the California State College systems expecting an enrollment of about 20,000 full-time and part-time students, giving them a grand total of 21,000.

The enrollment statistics were compiled from reports made by the Population Division of the State Department of Finance, the California State Colleges, the University of California, and the Special Education Division of the State Department of Education.

This increase, according to the systems of the University of California, is due to inadequate state financial support.

According to Dunne, the faculty-student ratio will increase more than 13 percent.

This will be translated into more crowded classrooms with less than more limited personal contact between faculty and student, with the amount of time faculty have available to counsel and advise students.

Job experience conference

Secondary school teachers from throughout California are in the midst, calling work experience on the job as a part of work experience education, which opened Monday, August 15, on campus. The program, which staff members said would continue through Friday, is designed to expose students to the Education Department and the state Department of Finance.

One of the early phases of a year-long effort by the college to help upgrade work experience education is an opportunity for high school students to attend Fat City during the fall semester.

Teacher strikes dropped nationally 27 percent in 1975-76, while written negotiation agreements between teachers and school boards continued to climb, rising about 7 percent, according to the National Education Association (NEA).

Negotiation agreements climb; strikes sluff off

Teacher strikes dropped nationally 27 percent in 1975-76, while written negotiation agreements between teachers and school boards continued to climb, rising about 7 percent, according to the National Education Association (NEA). NEA estimated 185 strikes in 17 states this past year compared with the all-time record of 216 strikes in 18 states in 1970-71. A strike last year had been listed for only three counties.

Diane has done it again and has received an award on the Medal of Honor.

Riles’ goal: coordination

State Superintendent of Public Instruction, Wilson Riles, is convinced that California wants good schools and are willing to support them if a more equitable way is found and they feel they are getting their money’s worth.

In every way possible, I will be trying to improve the image of education and the people committed to the job,” he declared, in an interview with the Education News Service. “I’m not going to go out of position to denounce and blame.”

Riles noted he has already taken steps to and suggested a list of priorities for improvements next year to the State Board of Education. His priorities stress the need for working, and to move toward the goal of equalization of local wealth for school districts and an accent on preventative education.

The aim, he said, is to coordinate these areas, find out what’s working, what’s not working, and to work toward adopting the best programs. In this, he says, his department can provide leadership.

The superintendent noted he is emphasizing this department help local school boards with fiscal management. This is made sure, if there is financial trouble, the cause is due to poor management.

We need some kind of equalization of local wealth for school purposes and increases in state support,” of state support for local schools is not meaningless the majority of the money comes from local taxes,” Riles concluded.

Less freshmen enrolled for Fall

A drastic change in new student composition this fall is being felt in areas all over the campus.

One of the traditional organizers of the event is the Week of Welcome.

In the past the Week of Welcome (better known simply as Welcome Week) has been directed at orienting new freshmen and welcoming them to their straigh, new life away from home.

This year, out of 3,300 new students, only 1,000 are freshmen, according to Bob Walters, WOW Board chairman.

Rob Erickson, WOW Board chairman, says that WOW Week concentrated on students and the campus program away from campus, and several days of social events alternated on campus.

This year WOW Week officially runs Sept. 17-24. Films, dances, a parent’s reception, hometowns, and a “gambling” night as well as two-day camps near Cambria, have been planned. Each year a new student has a choice of whether he wishes to attend camp during the early or later part of the week.

Erickson said WOW Week

Dairy, Poultry

now combined

J. C. Gilson, dean of the School of Agriculture and Natural Resources, announces the Dairy and Poultry Industry Departments at this college have been combined into one department.

The new department is known as the Dairy and Poultry Department. Farm Tomes, head of the Dairy Science Department, will serve as the newly-created department.

Bachelor’s degrees major in dairy science or in poultry science will continue to be offered separately by the department.

Miss Ross is the pick

This week the started album at WHOL on the air was a “Barracuda” by Janis Ross.

Miss Ross has once again presented herself in a form as a dominating vocalist supported by a harmonizing background of high female voices.

Her performance is one of the traditional orchestre-type that, together with the vocal support, provides the freshness in Miss Ross’ unique sound presentation.

The orchestra uses a reed section together with piano and drums to set forth distinctive pieces that are typical of all Miss Ross’ works.

On this album, the former lead singer of the Supremes stages recent top songs, “Remember Me” and “Reach Out I’m a Rain.”

The title song, “Barracuda,” is already number 8 on Billboard’s top 50 for the week of September 20th after only two weeks on the chart as a single. Diana Ross makes it as a star performer, which makes it one of the records that has shown 100 percent increase in retail sales over recent weeks.

The album itself is already number 80 on Billboard’s top 50 for the week of September 20th after only three weeks.

Diane Ross has done it again and has received an award on the Medal of Honor.

Crowd whoop

The crowd whoop during the performance of the fat city's band style. Others slept on the floor and wondered when the record would stop repeating.

Fat City is really (ratty skinny, consisting of two young freaks who dig country music, Mac Benford plays the banjo and guitar, Bob Potts plays the fiddle. Both try to sing well.

The death of the sound system around eleven o'clock provided a chance for many people to make their own songs. Fat City did not have too much in the way of original music, and no works were ever distantly heard by these performers, but their impromptu music was able to stimulate the entire audience to loud “yea-haws.”

One of the early phases of a year-long effort by the college to help upgrade work experience education is an opportunity for high school students to attend Fat City during the fall semester.

Cuesta registration date scheduled for Sept. 1, 2

Registration for students who have pre-registered for day class will be held September 1 and 3 in the college gymnasium. These students will receive a notice of their registration time by mail. New students, who have not pre-registered, are urged to do so by making an appointment at the counseling office. New students will register September 7 and 8, from 8:30 a.m. to 1 p.m.

Placement tests for new students will be held Saturday from 8:30 a.m. until noon on September 7. Registration by mail for evening classes will continue through August 27. Regular on-campus registration will be held September 7 and 8, from 8:30-4:30 p.m. Late registration for evening classes will be from September 13 through 16, from 8:30-4:30 p.m. in the gym. All classes begin the week of September 8.

TROPICANA VILLAGE

TROPICANA ISLANDER VALENCIA
55 W Broad St. 543-2300

Students who are planning to go into teaching should be interested to know . . . that after a steady decrease for four years, class size in California public schools suddenly got larger in 1970-71, the California Teachers Association (CTA) reported.

The report, "Class Size in California School Districts, 1970-71," was compiled by CTA's Research Department with the cooperation of the California data Department of Education. It includes only the sizes of academic classes.

Major findings in the report are:

- Average class size for all elementary districts in 1970-71 was 25.3 pupils per class. This was an increase from 24.8 the previous year. It was still down from 1966-68 school year.

- According to Jack D. Rees, executive director of CTA, the situation is causing teachers to have more pupils in their academic classes. In many instances teachers are being forced to baby sit large classes instead of being able to work with the pupils the individual attention required for quality education.

- Rees added that the heavier class loads, rather than fewer pupils, is the major cause of a so-called oversupply of teachers. "School districts are not hiring the teachers they would to fill vacancies. Thus, the so-called oversupply of teachers is in actuality an educational shortage for the pupils."

Rees declared that California's high class size are deplorable when compared with conclusions of the most recent study on the subject. This Is a 7-year study recently completed by Columbia University's Institute of Administrative Research.

The study pointed out that the high breaking point for elementary classes should be 16 or fewer pupils, depending on the subject taught. At the high school level, it should be 18 or fewer students.

"This study supports the contention of teachers that class size does make a difference in pupil performance and is directly related to individualisation, interpersonal regard, the effectiveness of group activity, and creativity," Rees said. "As the study concluded, 'Any way one tries to slice it, the smaller class sizes produced significantly higher scores.'"

Rees warned that class size will continue to increase in California as long as the state neglects its responsibility for local schools. State support, he said, has not kept up with rising costs of inflation, and is now about $800 million less than it should be.

Consequently, although they are not oversupplied, local districts have not been able to raise property taxes fast enough to keep up. Among the detrimental results are larger class sizes.

Rees said, the hard fact is that our school boys and girls are the losers by being crowded and jammed into larger classes, while the governor of our state seeks political credit for so-called tax saving. It is a "tax saving," however, subsidized by our pupils and teachers are having unmanageable class loads forced upon them.

CTA director claims large classes mean quality loss
BSU Pres. Doyle McGhee: ‘Impossible for blacks to gain power’

“Another is the black student’s need for more relevance toward the black community in his education, because the training he receives in college is not adequate to deal with unique problems that the black person faces in a community.”

Doyle said one of the main problems areas the BSU has been actively working toward solving is the recruiting of black faculty.

Doyle said one of the main problems that faces to cut us off from it.

“Another is the black student’s unique problems faced by black people all around the world,” he said.

News for vets again

Veteran planning to travel overseas are warned of certain limitations in their rights and benefits. Vets should contact the Veterans Administration Information Service Office in Los Angeles for further information concerning emergency hospitalization abroad, loan guarantees and foreign school attendance.

AIDS conference

The Engineering Technology Department will host the American Institute for Design and Drafting (AIDD) annual meeting and technical workshops. Members are invited and registration is in advance for Friday, Aug. 26-27.

McGhee said those hopes were destroyed by whites. McGhee, as a result of this background, has very positive opinions about the needs of black people in the United States.

“Looking at the total picture in black America, I see it as impossible for blacks to gain power unless our struggle is intensified and united with the struggle of black people all around the world,” he said.

“Because of laws like the McCarran Act and the King Alfred Plan which seek to eliminate black people, we must develop a better offense against the institutions that suppress black people.”

McGhee has been a member of the BSU since it was organized in the fall of 1967. His term of office runs until January. He is an organizer and coordinator of BSU programs, and a representative on the State BSU Council.

Doyle McGhee has got it together. McGhee, president of the Black Students Union here, has struggled with the “Movement” ever since his birth in Boley, Ohio.

Boley, an all-Black town, was established after the Civil War by blacks who hoped that it would some day become a black metropolis. McGhee said those hopes were destroyed by whites.

“Because of laws like the McCarran Act and the King Alfred Plan which seek to eliminate black people, we must develop a better offense against the institutions that suppress black people.”

McGhee said, “One of the examples of this would be the name Negro—having no relationship to our past culture it serves to cut us off from it.

“The other problem is the covert and overt institutional racism which does not allow the black man to receive power.

Money given to library

Although state college funds are being cut, federal money is still available. A $9,000 federal grant was recently received by this college's library, according to librarian L. Harry Stauss. The funds were awarded under Title I-D of the Higher Education Act of 1965. They included a basic grant of $8,000 and a supplemental grant of $4,000. Backruns of several periodicals and audio-visual materials will be purchased with the grant funds.

The Return

‘Zuke’ the scholar

by Steve Gale
Staff Writer

The Journalism department on this campus presents a unique faculty member: Ed Zuchelli. Why?

He’s just begun his first quarter in the capacity of a student at Cal Poly. Known to his friends as ‘Zuke’, Zuchelli is normally a Journalism instructor, handling the broadcasting students of the department. He is the advisor of KCPR and teaches broadcasting, broadcasting newswriting, and other related courses.

Zuck has begun his masters program in English, taking four English graduate courses this summer for a total of 11 units. These classes are regular standard graduate classes and are in no way arranged specially for him.

“I have some of my own students in these classes, which makes it a distinct challenge for me,” he noted.

His present classes include American Writers with Dr. Willard Pederson, Romantic Poetry and Modern Novel with Dr. Mona Rosenman, and English Literature Survey with Dr. James Simmons.

What’s it like starting back to school after a 20-year layoff?

“Well, this is the first time in my entire life that I’ve ever been motivated in school, and I’m enjoying it very much. I feel I’m doing pretty well — it’s a matter of discipline when you have other responsibilities such as a family to worry about along with other business matters. When my youngsters want to go to the ball game or to the show or beach on my days off, it’s sometimes hard to force myself to do the necessary reading involved.

“Not having studied for over 10 years, I’m really pouring the wood into it, and when I’ve got four classes in one day and they’re all reading, it’s requiring a lot to get back into the swim of being able to study.”

“I’ve got some doggone good teachers in these first four classes, and they really whip my thinking cap. Photo by Phil Bromund.

Zuchelli lives in Santa Maria, where he’s a member of the city council. He’s been in broadcasting for over thirty years, ranging from high school reports over KMPC radio in Los Angeles, to free-lance sports announcing, to television work for KHJ-TV 9 in Los Angeles, to ownership and management of KCOY radio and television in Santa Maria. He is one of the leading public figures on the central coast.

Studying for his masters sometimes requires Ed Zuchelli to put on his thinking cap.

THIS WEEK ONLY
introduced the impressionable newcomers to the possibility that the future holds for them as graduates of the Ralph Alexander workshop in journalism. Ralph Alexander, veteran news reporter is the founder of this workshop. After his senior year at school he went on to become editor of the University of Redlands newspaper. And his graduation in 1964. To top off his education, he received his masters in graduate school at the University of California at Los Angeles. It seems like he's done everything that a journalist would want to do. He's seen a string of writers for the Los Angeles Times magazine "West" and been a correspondent for "Life Magazine" in Florida and New York.

A past graduate of the journalism workshop, Bill Bruns, the sports editor of Life Magazine, came back to teach future sports reporters and is soon here correcting papers. Photo by Phil Brunson.

Bruns just asks him shot-gun questions and expects shot-gun replies. There have been those that haven't impressed Bruns very much. To name a couple, Johnny Bench of the baseball Cincinnati Reds, and soccer star Derek Sanderson. Sanderson, for example, was pictured in "Life" with his girlfriend on a large bed in his apartment. He didn't, however, expect Bruns to put in the story that the girlfriend had also been living with Sanderson for the previous ten months.

Bruns related a friend's experience with Mantle that occurred some twenty years ago. The friend, about 16 at the time, had handed Mantle a few self-addressed post cards. He asked the baseball king to please autograph them and drop them in the mailboxes. After a few feet away with the cards Mantle proceeded to tear them up as the young admirer looked on. "The guy has never forgotten that," said Bruns.

Bruns was planning a trip to Helsinki, Finland last week, Japan this winter, and Germany the next spring. All the trips are covering sports events.

His life sounds ideal to a budding young journalist. Ideal, yet in his dreams. "I live in New York right now it's not so bad for me, but my wife hates it. It's dirty, crowded, and noisy."

It is also difficult to have a family when the writer-editor is on the road so much. So, he is considering plans to settle down in a southern area in California and take up teaching.

His life has made an impression on students of the writing world. With Bruns example, more of Alexander's young proteges may become the leaders of major news productions all over the world.
Coach Hitchcock... Calls time out for vacation

by Rich Keppel Staff Writer

Vaughn Hitchcock, Mustang wrestling coach, called time out Tuesday when he began a one week vacation. This will be Hitchcock's first "real" vacation in his nine years at this campus.

A usual summer for the state's most successful coach consists of traveling the nation, instructing in workshops, clinics and camp.

Although this summer he has limited his schedule to seven weeks of such work, he will have appeared in Wisconsin, Michigan, New York, Oregon and California. He is one of the most sought-after guests at these wrestling seasons in the nation.

Hitchcock has led the Mustangs to five NCAA College Division national titles, including four in a row due to him. He has coached 11 College Division national champs and one in the University Division, has run up a string of nine California Collegiate Athletic Association mat crowns and has a cumulative record of 336-101-1 in competition.

In short, he is one of the top wrestling coaches in the nation. Hitchcock will also spend two weeks at the Paso Robles school for Boys, the for delinquent youths in this county. He is called a "permanent-employment" employee, and acts as a coach for the period when the regulars take a vacation. It would rather work with those boys than attend all of the workshops. They (the workshops) are enjoyable, but, in the summer, I tend to over-work," this is Hitchcock's term for thinking so much about the sport that he worries about what hold to use on his steak at dinner. At the School he gets a chance to get away from the mats to coach some other sports.

Hitchcock is an all-around athlete. While at Washington State, he was a fullback on the football team as a sophomore, and was 18-5-1 in 26 dual meets for the wrestling team. In his senior year, he was voted "Football Player of the Year." When this was going on, he was also wrestling, and put in four years on the varsity squad, losing only two of his 40 decisions. This, along with his gradmark, earned him the title of "Athlete of the Year" as a senior.

He began his coaching career at Castro Valley High School. There he led the grapplers to two championships in the Hayward Area Athletic League and placed first both years at the North Coast Sectional. In 1969, they ended up as state champions.

Moving on to his alma mater, Hayward High School, his wrestling team compiled a dual meet record of 16-1, and his football efforts netted a 16-7-1 mark, from 1966-1969.

Asking about future Poly efforts, Hitchcock said he was the "person of the best team in the history of the school." This year's team is a "good" team, which he feels is often stronger than a junior-senior team. Last year our team was 4th in the country at the gate. Unfortunately this will be a sparse year for home contests, due to the budget crunch.

Hitchcock feels that there is a chance of seeing "honest wrestling," and perhaps professional sport in the future. "Today's fan grew up in the age when basketball and football were the games. The current students are the buyers of the public of the next 15 years, and now interested in wrestling is moving to an all-time high. Once was a popular professional sport, but its only periods of activity, and one in the University College Division national champs and one in the University Division, has run up a string of nine California Collegiate Athletic Association mat crowns and has a cumulative record of 336-101-1 in competition.

The Koala Club sponsored its annual sale of kayaks and delftware on the dunes for fun and games. A campfire will enliven and warm abundant.

The coat is $3.25 plus tax. The crew will leave the TCU at 10:00 a.m. Saturday and return at 3:00 p.m. Monday, July 14. The cost is $25 plus tax.

Evaluation is the game

Each year faculty members are evaluated by their department, heads for promotion, tenure, for reappointments, and for any other recommended personnel action.

In arriving at his recommendations, the department head will consult tenure council and think that they have consulted. Each faculty member will be invited to write a letter to his or her faculty member who will be evaluated. Each faculty member will be entitled to represent his or her faculty member who is being evaluated.

The Department Head's views are passed to the school and division Deans, who evaluate the candidates performance.

The Academic Vice President by December 1 will notify each faculty member who is being reappointed or whose employment is to be terminated due to the closing of the current academic year.

Variety spices '71 county fair

by Brooke Judson Staff Writer

Clowns, hot dogs, fried chicken, entertainment, displays and exhibits combined to make the 79th San Luis Obispo County Fair a big success.

Fairs are for kids of all ages. Rides and attractions were scaled according to size and the daring spirit of the individual.

Entertainment came in a variety of form for a variety of special. For the older generation there were clowns and dog acts in the Young World section. For the teenagers there were bands and a variety of form for a variety of special. For the younger generation there was music on the grandstand, under the giant oak trees of the grounds.

KCPF fills "gaps" with new show

KCPF has initiated a new program entitled "Open Channel," designed to eliminate communication gaps between the Poly student government and the school.

The program will be presented one night every week. It will feature Asst. President Peter Evans and vice president Marnie Dohle. Listeners will be invited to call in and discuss current issues of student government.

"Open Channel" was presented last evening and will be aired again next weekend Wednesday evening at 8:00 o'clock.

The station's frequency is 89.5 FM.

Freshmen eligible to play varsity football for first time since 1957

A change is occurring in football eligibility at this campus. Freshmen are eligible for varsity football competition for the first time since the 1991-92 season. Eighteen freshmen will be bolstering the Mustangs.

We are extremely pleased to have these athletes in our program and that they think have an opportunity to help us right away," head coach Joe Harper said.

The Mustang mentor has fashioned a 1-2 record in Harper's first three seasons at Poly and has brought in school three straight championships for the first time in more than a decade. A third of the 18 freshman recruits will be participating in a high school all-star football games coming up shortly at Poly.

The future gridders who are scheduled to appear in the Sacramento all-star game include Brian Stone, defensive back and wide receiver and Jeff Van Dyk, offensive guard and linebacker both from Sacramento.

All players have accepted athletic scholarships from this campus and will report on campus at 7:00 a.m. when the Mustangs begin preparations for the school's first 11 game schedule.
