KENNEDY SUPPORTS
Bicycle lanes get unveiling

by PAUL SIMON
Editor-in-Chief

Six-foot bike lanes on all major roads and an updated parking plan reflecting this college's move toward eventual phase-out of the automobile from the campus are in effect beginning Fall 1971.

The new system places the school right on line with a growing national trend favoring bicycles on campus.

President Robert E. Kennedy, who authorized the changes in May following a recommendation by the campus planning commission, repeated his support of the bicycle campaign as students returned for fall registration.

"I am anxious to support the students and everyone else in the (bicycle) campaign," he said. "It is just unthinkable that we continue to grow, we continue to add parking lots and anticipate each person driving by himself, bringing more and more pollution to the campus."

Kennedy said the bicycle campaign, supported by students, was "a good idea" as an influence against the use of gas-consuming motor vehicles and as the beginning of a form of mass transit.

The new bike lanes, painted through the efforts of the campus security office, feature yellow striping along the curb and street surface along Grand Avenue, California Boulevard, North and South Perimeter Roads and College Avenue.

At the Grand Avenue campus entrance early morning commuters will find for their convenience two incoming traffic lanes, with a single merging lane. Eliminated because of the changes were about 80 temporary one-way parking places. Campus administrators expect a resulting increase in usage of parking lots behind the brick residence halls and between Thowes and Hall and the varsity athletic track facilities.

Officials said the addition of the bike lanes thus created a sacrifice of convenient parking places and should be a step towards forcing on-campus students to leave their cars parked behind the residence halls rather than driving across campuses instead of walking.

The success of the lanes depends upon use of bicycles by the students and enthusiasm two incoming traffic lanes, with a single merging lane. Eliminated because of the changes were about 80 temporary one-way parking places. Campus administrators expect a resulting increase in usage of parking lots behind the brick residence halls and between Thowes and Hall and the varsity athletic track facilities.

Officials said the addition of the bike lanes thus created a sacrifice of convenient parking places and should be a step towards forcing on-campus students to leave their cars parked behind the residence halls rather than driving across campuses instead of walking.

The success of the lanes depends upon use of bicycles by the students and enthusiasm for the new system.

Budget cuts could affect fall classes

by CLAUDIA GALLOWAY
Managing Editor

The biggest problem students at this college face as a result of Gov. Ronald Reagan's state college budget cuts in July may be in getting the classes they seek during registration.

Reagan's record cuts in the state budget included $5,405,887 designated for the state college system.

The Fall Quarter Class Schedule lists about 56 fewer class sections than were offered last fall, according to Dale W. Andrews, academic vice president, who said in addition "we will be unable to add as many class sections during registration as we usually do."

When demand for a class is higher than anticipated the college has in the past tried to accommodate students by adding extra class sections, he said.

The fewer class sections stem directly from Reagan's actions which resulted in a decrease of 110 in the number of students who will register for classes this quarter, according to admissions officer George Davies.

By 5 o'clock this evening some 11,000 to 15,000 people will have received their quarterly grab bag of IBM cards. The final count of students may be about the same number of students this year as last year, said Davies.

Changes were made in the registration procedure to "make things easier for the student," according to Jerald Holley, Dean of Admissions. The registration operation, which has usually been enclosed in the gym, has been divided between the gym and Chumash Auditorium, College Union. "With the new facility for parking the bicycles, the gym would have to be empty. We believe that it would be easier though not as convenient," Holley said.

As the day ends, so will registration. But for many the end of registration signals the beginning of a bargaining and trading session, known as adding and dropping classes. The last day to add classes will be October 4 and dropping classes will end on October 11.

Bike registration project inaugurated by Security

Chief George Cockrill said students a free opportunity to help themselves combat the wave of bicycle thefts that have plagued this campus and the nation.

"Students can obtain special registration stickers at the Security Office weekdays between 2 and 6 p.m. Bike colors, make and serial numbers on bikes will be raised there.

Foreign student funds mounting

by MALCOLM STONE

Foreign students have viewed the results of a summer Emergency Loan Fund drive with mixed emotions so far.

"Some people have been a little disappointed because the need is so great," said Shahir Dalal, chairman of the International Student Emergency Coordinating Committee (ISECC).

"We need $100,000 for the year and we only have $35,000. What has been done has given the foreign students a feeling of joy and relief. We all feel that a tremendous amount has been done since ISECC was formed this summer."

The money will be used to assist the students in meeting the financial crisis created by a two-month stay imposed by Gov. Ronald Reagan and the state college Board of Trustees this summer. That action raised foreign student tuition to the same level as out-of-state students.

The original fee of $28 per year was established in 1961. Last fall, the fee rose to $800 per year and this fall it jumped to $1,110. The rapid rise of fees has created the emergency situation for many of the foreign students attending school here.

Before a foreign student may attend a United States college he must sign a Form I-20 which lists the expenses to be incurred and assures the student's ability to meet those expenses. A student entering the school in 1968 would have listed only $88 per academic year tuition but is now responsible for paying the entire $1,110.

"People in the U.S. seem to believe that all foreign students come from wealthy families. In reality more than 75 per cent of all foreign students are self-supporting," Dalal said.

The Foundation has made available, at cost, rooms for 40 foreign students in two 1949-era campus residence halls, Mariposa and Plumas. The students will maintain their own rooms and cooperatively maintain the community-used areas of the halls.

New engineering degree provides more flexibility

A newly created engineering science degree program will provide more flexibility for students in this college's School of Engineering and Technology, according to Archie Higdon, dean of the school. Approval of the engineering science curriculum was announced recently by Robert E. Kennedy, college president.

Since courses already being offered by various instructional departments of the college make up the new curriculum and administration will be provided directly by the School of Engineering and Technology, neither additional faculty or administrative staff will be required.

Higdon said the bachelor's degree program in engineering science should be particularly attractive to students planning careers in industry such as production team leaders and research and development engineers, and in areas where basic knowledge without a high degree of specialization is needed.

He added that up to this time the programs offered by this college have been highly structured with considerable specialization and relatively few technical electives.

EDITORIAL

On the move or—let's go

As Fall Quarter begins Mustang Daily also opens business for a new year. The newspaper is a little bigger and better newspaper are encouraging. Since expanding to a daily publication schedule last year, the staff has worked to improve the newspaper and signs show this may be the season of culmination.

Mustang Daily is self-supporting through advertising which means it requires the support of the entire community—merchants and students alike. The staff takes pride in being the only state college newspaper to pay its own way and at the same time publish what it feels is a quality newspaper.

We ask the student body's understanding of our difficulties and seek constructive criticism and suggestions. Through an exchange of ideas with our audience we hope to continue to improve. It must be remembered however that Mustang Daily is an exercise in learning just as any other campus program.

Remember, students it is your peers furnishing you with the news.

Our goal is to provide consistent, objective coverage of campus events and people, with select coverage of city news having direct bearing on the campus. In addition, as one of only five state colleges with United Press International facilities, we will continue to provide limited coverage of national news, although our primary concern will be for the students at this college.

As the year progresses we hope to continue to improve and will seek to provide all that the student majority indicates it desires. Because of the limited amount of space available letters to the editor should be kept short and to the point. All must be less than 250 words for publication consideration. The shorter and more relevant letters will have first priority, and others will be published as space permits. We reserve the right to edit all letters.

All letters must be addressed "Editor, Mustang Daily," and must be signed by the author with his or her legal name. While we may not be able to ascertain fraud in all such cases such a determination will be grounds for refusal to print further correspondence from that individual.

Finally, we remind all students and faculty of the service provided by our classified section. It is there for your use. We did not greatly benefit from the service provided by our classified section. It is there for your use. We did not greatly benefit from the service provided by our classified section. It is there for your use. We did not greatly benefit from the service provided by our classified section. It is there for your use. We did not greatly benefit from the service provided by our classified section. It is there for your use.

With that load lessened we say, "Welcome and full steam ahead."

Fall drama tryouts slated

Tryouts for the fall productions of "The Cavern" and "The Killing of Sister George" have been set for Monday in the Music, Speech and Drama Department Building, Rm. 212, beginning at 7:30 p.m.

The College Union Drama Committee will present "The Killing of Sister George" by Frank Marcus October 28 through 30.

The College Union Drama Committee will present "The Killing of Sister George" by Frank Marcus October 28 through 30.

"The Cavern," written by Jean Anouilh and translated by Lucienne Hall has a cast of nine men and six women and will be presented Nov. 11-13 as the Speech Department's fall production.

Any student interested in participating in either of the plays should attend the tryouts Monday.
CU rooms gain names

Official names of the rooms in the College Union Building were announced during the summer by the College Union Board of Governors.

Chumash Hall was the name chosen for the multi-purpose room. Room 208 will now be known as Mt. Bishop Lounge, Room 209 as Mt. Bishop Lounge; Room 210 as Mt. Santa Lucia Lounge; Room 212 as Student Council Chambers; and Room 119 as Mustang Lounge.

Also during the summer the Student Directory card file was moved from its place in the lobby of the Administration Building to the lobby of the College Union.

Four join department

Four new faculty members have joined the School of Agriculture and Natural Resources for the Fall Quarter. J. Corderio Gemin, dean of the school, announced the appointment of the four new faculty members, three of whom will serve in the Agricultural Management Department and the fourth in the Crop Science Department.

The three joining the Agricultural Management Department are Walter Alwood, a graduate of this college; Dr. Reed Pitt, Utah State University, and Michael Cariens, also a graduate of this college.

Alwood recently earned his Master’s Degree in Business Administration here with a special concentration in economics and computers. As an undergraduate student he was both assistant and associate editor of the college yearbook, El Rodeo.

Pitt studied business management at Idaho State University prior to transferring to Utah State University where he earned a Bachelor of Science degree in range management in 1971. He received his doctor’s degree from Utah State University, where he specialized in range management and agricultural economics.

Pitt has had experience as an agricultural economics instructor, forest ranger, insurance underwriter, and as president of a private consulting firm for farmers. He has recently been serving as a research associate and assistant professor in agricultural economics at Texas Technological University.

Gamin, who earned a Bachelor of Science Degree in agricultural business management here and a Master of Arts degree in agricultural economics at Washington State University, is completing work on his doctor’s degree at Washington State.

An Atascadero rancher, Robert Halam, will join the Crop Science Department faculty as a research associate for George Grogan during the 1971-72 academic year. A 1964 graduate of this college with a Bachelor of Science Degree in field crops, Halam also earned a Master of Science Degree in agriculture with a concentration in international agriculture, in 1971.

Halam has served with the Crop Corps and as an officer in the U.S. Army combat engineers.

1. STEREO WEST has the largest selection and stock of stereo components, speakers, and related products on the entire central coast. We handle every major brand of stereo. Famous professional companies such as Fisher, Altec Lansing, ERI. Fisher, Marantz, JBL, and Kenwood are extremely selective in choosing which retail stores to give their product lines. Notice that in this county, you will find these products, and many more, available only at Stereo West. We have recently acquired another 6,000 square feet of warehouse space adjoining our main store in downtown San Luis Obispo — the store you know and love.

2. STEREO WEST has the most complete stereo service and repair center on the entire central coast. Three highly skilled technicians with the latest equipment specialize in servicing and repairing all stereo components, tape decks, turntables and speakers. Our service department is FRIENDLY — and we will be glad to help or advise you on your electronic needs or problems.

3. STEREO WEST has the best record department specials. These highly skilled technicians with the latest equipment specialize in servicing and repairing all stereo components, tape decks, turntables and speakers. Our service department is FRIENDLY — and we will be glad to help or advise you on your electronic needs or problems.

4. STEREO WEST stores are for the young — and the young at heart. Young people are now cutting Stereo West stores and we are proud of it. If the “younger generation,” grew up with stereo, Solid state and integrated circuitry, component stereo, hi-fi, cameras, and new four-channel are all products of our time. It’s our bag. Naturally, then, we are familiar with all these new developments in the public stereo market through ongoing and rapid changes. We take pride in keeping you up to date on these changes — enabling us to help you make the proper selection.

5. BEST PRICES YOU WILL FIND — ANYWHERE. Unfortunately, some stereo equipment is in short supply in the State of California — meaning the price is set by the manufacturer and is the same all over the state. However, on any product that is not in short supply, or in AMT of our package stereo systems we have prices you CANNOT beat. If you doubt this statement then you are welcome to make a long distance call to Pacific Stereo, or any of the large metropolitan stereo stores in California. You will find that the prices we have are in keeping with these prices and we are proud of that. Moreover, as you probably know, local service is just as important as price — and our service has been outstanding.

STEREO WEST Record Department Specials

Departments combined

The Electronic (EL) and Electrical (EE) Departments will be combined this quarter after being separated for the past twenty years.

"We were the only campus in the nation having the two departments separated," explained Archie Higdon, dean of the School of Engineering and Technology. "In analyzing the situation during the past few years, it was found that it was inefficient to operate the departments separately."

"The materials and curriculum for the first three years in both departments are identical. The combination of the two is expected to result in more efficiency and should permit better organization of the faculty. Enrollment in the EL department is around 600 with 31 staff members. The EE department consists of 140 students and 10 staff members."

"The major difference between the two departments was that EL concentrates on communications and data processing while EE is concerned with electrical power, generation, and control." The materials and curriculum for the first three years in both departments are identical. The combination of the two is expected to result in more efficiency and should permit better organization of the faculty. Enrollment in the EL department is around 600 with 31 staff members. The EE department consists of 140 students and 10 staff members.

The major difference between the two departments was that EL concentrates on communications and data processing while EE is concerned with electrical power, generation, and control.

Evan Owen, former head of the EL department, will head the new Electronic and Electrical Engineering Department. William Horton will serve as deputy head. Fred Bowden, after 20 years as head of the EE department, has requested that he be relieved of his administrative duties. Bowden will be on sabatical during the Fall and Winter Quarters but will return as a full-time member of the teaching faculty in the spring.

Owen sees no immediate change for either students or staff in the two newly-combined departments. He does see the combination as a way to utilize the strengths of both departments.

"We are here to assist," Kennedy informs faculty

by CLAUDIA GALLOWAY
Managing Editor

"We are not a factory to exploit the young," Pres. Robert C. Kennedy told faculty and staff members at the Convocation held Monday. "We are here to assist and promote each student who enrolls in this college to a better understanding and tolerance of himself and others and to promote and assist him in finding a place in a world of today and tomorrow."

The Convocation was part of a week-long faculty and staff conference. Also speaking during the program were Marianne Doshi, vice-president of Associated Students, Inc.; Frank Blake, chairman of the Staff Senate; and Howard Rhoads, chairman of the Academic Senate.

Overall Goals

Kennedy reviewed some of the college's overall goals and discussed recent occurrences on the state and national level which will affect them.

"The hallmark of this institution," he said, "has been the persistent review of its unique purpose in the pattern of the system of higher education in this state. We have set out our limitations—staked out our fences very precisely. Our strong determination to avoid trying to be 'all things to all people' was not arrived at by unilateral action of one man but by thorough-going consultation including periodic review with many constituencies—both inside and outside the academic community.

"Those of you who were here during my first year as president," he continued later in his talk, "will recall that we emphasized from the beginning our need to develop processes of communication and decision-making which would help us find the best answers to the perpetual question: 'What can we build if we work together?'

"Team Approach"

"We concentrated on building a team approach with appropriate involvement of all constituent groups: faculty, staff, administration, and students. The principle that 'a group's participation or lack of it in making decisions affects its willingness to accept the outcome' was uppermost in my mind when we established the overlapping group participation organizational model for decision-making on this campus.

"Where it has not functioned properly, it probably was due to pressures of deadlines or misunderstanding of the important two-way communication role of the various individuals who must act as linking pins between the various committees and councils of all constituent groups. There are several areas in which improvement can be made during 1971-72. But in no instance that I know of was there a breakdown in the communication or consultative system because of selfish or bad faith type of actions."

Kennedy attributed the successful communication process here in the college's dedication to the concept that students are here to learn; faculty are here to teach; and staff and administrators are here to facilitate that teaching-learning situation. We are all here to serve students.

"But each student has many responsibilities, too. Not the least of which is to be accountable for the activity of learning which he accepts as a student when he fills an enrollment quota space in this college—space now denied to thousands of others because of limited resources."

Outside Interference

Kennedy pointed out, however, that even if the majority of the faculty, staff, and students here could be in agreement on both long range and short range goals forces outside the campus may stifle our plans.

"Outside the campus," he said, "is a serious conflict for whatever reason, adversely affect us. Even when we internally agree on what is necessary, outside forces may prevent us from carrying out our

(Continued on page 6)
Bend a little every day. It's a good habit to pick up.

Imagine what would happen if every man, woman and child in San Luis Obispo picked up just one piece of litter every day.

Think how much cleaner our town would be.

Now imagine what would happen if everyone picked up two or three pieces of litter every day.

All of a sudden, the litter problem wouldn't be the problem it has been for so long.

It's that simple.

But let's face it. We'll all have to bend a little. Every one of us.

Because anti-litter slogans haven't stopped the litterbug. Threats of a fine haven't stopped the litterbug. Words simply haven't worked.

It's time to stop talking and to start picking up.

The Pepsi-Cola Company of Santa Maria would like to help in the best way we know. By starting at home.

We're asking everyone who works for us—drivers, secretaries, executives, everyone—to pick up litter. Not just pass it by.

Bend a little yourself. It's a good habit. In time, even litterbugs may pick it up.

Brought to you as a public service by the Pepsi-Cola Bottling Company of Santa Maria, California
Inmates enjoy KCPR

Campus radio station KCPR found out recently that it has a rather unusual fan club when Station Manager Woody Goulart received the following letter from a group of inmates at the California Men's Colony.

"An open letter to the D.J.'s of KCPR-FM:

"We at the Men's Colony are really turned on and tuned into KCPR. We've heard you read some of our letters so we know you are not surprised to learn of our enthusiasm."

Listen All Evening

"The local AM stations could all learn a lot about programming from you. The variety of music you present is well-balanced between the latest releases, "Oldies But Goodies," and all the best Hard Rock sounds in between. Many of us listen to KCPR all evening from 8:00 until extra! But most of us stay awake until 10:00 or 11:00. It's a great relief to listen to a station which does not seem to play the same 10 or 12 records over and over again and again.

"We have canvassed the men here in "C" Quad to learn what groups are most popular. These are the 10 favorite groups and we hope that some evening soon you will build a program around them: Ultimate Spinach, Strawberry Alarm Clock, Canned Heat, Cream, Donovan, Joe Cocker, and last but not least Jefferson Airplane.

Doing Magnificent Job

"You will notice that we haven't mentioned any of you by name. Although some of you D.J.'s come through another that others, the difference seems to be a matter of experience. Without exception, each and every one of you is doing a magnificent job. Again, the local "Professionals" could learn something from each of you. If you are representative of the caliber of students at Cal Poly, it is little wonder that Cal Poly S.L.O. has acquired its reputation for the excellence of its student body.

"Thanks for whatever consideration you can give our requests. Keep up the very good work."

The letter was hand-signed by over 50 Inmates.

Goulart said the station plans to devote a regularly scheduled broadcast of music requested by the Men's Colony. "We cannot ignore such a large segment of our audience," he said.

New experimental class to be ocean engineering

The School of Engineering and Technology on this campus has announced the addition of an experimental class in ocean engineering to be offered this fall. The interdisciplinary course will be taught by Richard C. Carlston and L. D. Moore of engineering, and David Shaver of architectural engineering in a joint effort to instruct on corrosion and marine materials, physical oceanography and sound propagation, naval architecture, and submarine rescue.

With a prerequisite of sophomore standing, the three-unit class features oceanographic movies, guest speakers, and field trips. It will be offered Monday, Wednesday, and Friday at 11 a.m.

We know there are a lot of different ideas on student housing. Some are great and some are all wet. We think our concept in student living has a lot to offer. So . . . . . . COME OUT, COME OUT,
Kennedy, Doshi address college staff

plan. Our stance past has been, let us do our thing, our way without interference. Said

President Kennedy, "You can not expect us to accept a sloppy lecture, outdated facts and techniques, and closed minds. You cannot expect us to agree with this. I think you, yourselves, would be shocked if we were entirely satisfied with what you give us in the classroom."

President Doshi went on to express her feelings of sympathy with faculty saying, "We have faced with a state and federal government which has little respect for education in our area."

"We, the students, have sympathy for you," she con­tinued, "We are aware of the pressures under which you operate. There are the students; always questioning; always demanding. But, you can under­stand our impatience. This school is here for us. For it was created—for us,--as a chancellor, a pres­i­dent, a dean, and a teacher created. Our money and time are invested here.

"You cannot expect us to accept something which is not acceptable to you."

GRAD II 'A SUCCESS'
Student placement aid

A program which offers senior and graduate students a chance to see the full range of employment opportunities available to them is beginning its second year here.

Known as GRAD II, the program is being conducted by the College Placement Council, a non-profit organization best known for its College Placement Annual.

According to Eugene A. Rittenhouse, director of placement and financial aid at this college, the initial test of GRAD II was conducted on 17 campuses, including this one, last year and was considered so successful that the program was expanded to include 123 colleges this year.

"One of the main purposes of GRAD II is to assist students to develop their qualifications and interests," Rittenhouse said.

"The program should cut down on the number of wasted interviews on the one hand, and on the other should bring to the attention of students some employment opportunities which might go overlooked without the benefit of this type of system. This latter point is especially important today at a time when job opportunities are not nearly as plentiful as they were a few years ago."

Rittenhouse emphasized, however, that neither GRAD II nor the placement office can create jobs; they merely help identify employers with openings the student should explore.

Employers Participate

He explained that the process has already begun with the input of employer job descriptions. Last year 117 employers took part in the program—the number is expected to increase this year.

"Special forms are available in the Placement Office. Using the form, which takes only a few minutes to complete, the student can indicate the factors most important in his or her job search. Selectors factors include job interest, degree level, major, job function, type of employer, and geographical preference. The last three are weighted by the student in terms of their importance in the individual's career intentions.

"Subsequent to the completion of the application, the Placement Office distributes the information to participating employers. The report will provide the student with names of participating employers sending interviewers to the campus and the dates of their scheduled interviews. Similar printout reports will be provided employers and placement office. Employers will receive "mini-resume" pertinent information about students matching a job description or "job seeker."

Counseling Benefits

Placement offices will be advised of the various matches and in addition will be provided results of the weighting system which indicates the degree of match, enabling the placement officer to do a more realistic and meaningful counseling job with individual students.

Another major counseling benefit will be the supply and demand information generated by the program, giving placement officers and students an overall picture of the employment market early in the college year.

The student will follow the usual procedure in signing up for interviews. Where employers are not participating in the program, their names will appear on the printout and the student will be encouraged to submit a resume to them by mail.

Officials of the College Placement Council emphasize that the GRAD II program does not center special privileges upon participating students who rank high in their class. The primary purpose is to assist those students who were not so fortunate in grades and still want a chance to fulfill their career intentions. Employees who are not participating in the program will still be able to sign up for interviews of their choice.

For more information please contact the Placement Office.
Examination program: Freshmen can receive credit even before starting classes

This college is participating in the College Level Examination Program (CLEP) that allows entering freshmen to test on their experience for college credit prior to starting classes.

Paying any of five CLEP tests enables the student to receive 6 semester units and is recommended as a sophomore. Regular F. Holly, director of admission and records, emphasized that CLEP is a program for entering freshmen to get credit for their experience. He said each college sets its own standards for admission.

"Once they get here and they feel they have a lot of knowledge that they can go on and challenge the course," Holly said.

"A person might come here with a lot of talent and it is ridiculous to tell him he has to start as a first-time freshman. I think that it's (CLEP) going to be used more and more," he added.

The tests will be offered in English composition, humanities, social science-historic, natural sciences and mathematics. Only one new freshman has applied, but all freshmen entering at Bahersfield State this fall and one-third of those entering San Francisco State have applied to CLEP.

The program results from proposals by State College Chancellor Glenn H. Durham to the Board of Trustees in January. This is part of the effort to meet the state college obligation for curriculum innovation and more effective use of resources immediately and in future years.

Mustang flyers to meet, membership roll open

The Mustang Flying Association and Mustang Aviation Club will hold a joint meeting on Oct. 15. The meeting will be held at 7:30 p.m. in Science North, Room 321.

According to Steve Vines, club officer, the organization is a non-profit corporation interested in the advancement and promotion of general aviation. It has its own airplane and offers a very inexpensive program to both beginners and licensed pilots.

Membership is open to any member of the faculty, staff, or student body.

Three architecture students from this campus have placed San Luis Obispo on a recent nationwide prominence level among schools of architecture and design throughout the country.

Mike Brady, Steve Wright and Steve Pulita, all fourth-year architecture students, took the top three prizes in the 9th Annual InterRoyal Student Design Competition. Brady placed first, winning $800 and Pulita took third, with $100.

The competition changes yearly. This year, the plan called for the design of a studio office for an interior design firm functioning in an urban area. The competition was open to students of any recognized school of architecture, interior design or industrial design.

Students were given set requirements for their design, including a 4,000 square feet maximum with the interior space being the most important element of function and design.

The shape and dimensions were not fixed, but left to the discretion of the designer.

Students were required to enter a floor plan on a 90" x 30" stiff board, showing the floor and partitioning layout and a transparent overlay showing the furniture plan.

The judges for the competition were Marvin Affrin of Space Design Group, Inc., Maria Bergson of Maria Bergson Associates and Olga Gueft, editor of Interiors magazine.

Forum project seeks drug abuse answer

The first of a series of Project Number Nine meetings scheduled for the fall will be held Thursday evening, Sept. 18. The meeting will feature Dr. Dave Bollinger, pharmacist, speaking on "Psychopharmacology." 

Project Number Nine began as a class of the San Luis Obispo Free University and is now sponsored on this campus by the Speaker's Forum Committee. Several meetings were held last year and the program has been expanded for this fall.

The objectives of Project Number Nine, according to Robert M. Holcomb, program coordinator, are three-fold. The program seeks: to present to students a broad, balanced understanding of the legal, social and psychological aspects of drug problems; to attempt to influence the future course of drug legislation; and to help establish programs to deal with the problem dangers of the drugs as such, "more obscure," and the effects of mislabeled or imported drugs; and to attempt to influence the future course of drug legislation and the people who enforce the drug laws.

Seventeen meetings are scheduled for this fall, each with different speakers. Half of the meetings will be held on Thursday evenings and half will be held on Thursday mornings. The Thursday evening meetings will be held at 8 p.m. in Rem. HH of the Erhart Agriculture Building. Meetings and speakers scheduled for this time are as follows:

Sept. 20-Dr. Dave Bollinger, pharmacist, "Psychopharmacology.
Oct. 7-Drs. Terry Johnson, campus pastor, "The Moral and Value Question.
Oct. 14-Propaganda Analysis 1-"Bust the Border.
Oct. 16-Dr. James Gates, pharmacist, "Legal Drug Abuse.
Nov. 4-Attorney Panel (June Jenkins, Steve McQuillan, Harry Murphy, and Harry Woodard) "The Law; Where It Is Going and What are Your Rights.
Nov. 11-Dr. Al Egan, psychologist, "Disarming Youth, Guidance for Parents.
Nov. 15-Dr. David Hunt, dance instructor, "Drug Influence on Dance.

The Tuesday morning meetings will be held at 11 a.m. in Rem. HH of the Erhart Agriculture Building. Listed for the morning meetings are:

Oct. 14-Dr. Albert Hair, college counselor, "Human Communication.
Oct. 15-Pete Oates, professional who have dedicated their talents to a new type of music aimed. Instrumentation-wise, the group uses piano, flute, and guitar in help edition their "Carpenterish" sound.

The group will also play today at 11 a.m. in Rem. HH to help attain their "Carpenterish" sound.

Carpenterish group to perform

The "Carpenterish" group will be performing Saturday at Assembly Hall church at 11 Croc Remendale Ave. in San Luis Obispo at 7:00 p.m. for students. The two-man, three-woman group consists mainly of students who are involved in producing solutions for the working environment.

The design was judged on the basis of the student's solution to the problems of space division, flexibility, original architectural design, and the student's comprehension of the problems involved in producing solutions for the working environment.

This was the year that students from this campus participated in the Inter-Royal Student Design Competition. The competition became a class project for a design class of eighteen, taught by Maurice Wilke of the architecture department.

This was also the first year one school has taken the top three prizes in the Student Design Competition.

Whether or not participation from this campus in the Inter-Royal Competition will continue depends on what the competition is, how it is written, whether or not it is fair and what is involved, Wilke said.

WOW... Week of Welcome... Wow.

Commencing with 9:30 a.m. testing last Friday and adjourning with Church Night Sunday... WOW Week—the connecting link between high school memories and college realities. Good-byes to wearing the black sweater and helping her with maths math and holes to all sighters. $67.50 registration fees and books that have to be paid for and can be written in. And of course, a new brand of good-time.

Quite good... instants... really endured it... and as went the average of attitude expected by them participating in this year's Week of Welcome.

"Just from the feedback I've received thus far, the week has been quite good," said Bob Stro, advisor to WOW Week. "It's somewhat of a more educational group—still following the traditional 'pub-crawl' spirit—but the involvement has been much greater than last year," he added.

Trudy Beck, departmental secretary for the Activities Office, termed the group as being "very enthusiastic" and assured that the kids were "really getting to know each other."

This year's Welcome Week includes 440 participants, a large drop from last September's group of close to 1,000, but due to drop in enrollment, the ratio of new students at this college to those who were involved in WOW Week has remained approximately the same. This year there are only 500 new freshmen and 1,600 junior college transfers.

"They've worked themselves to death," said Matt Phillips, campus director for WOW, regarding the staff members. "Our main goal, as a staff, is to help the students get accustomed to Cal Poly and help them make the transition from high school or junior college to Poly," added Phillips.

WOW Week through the eyes of a counselor: "I really enjoy doing this," remarked Riley Benedetti, from the information booth planted on the lawn in front of the "very Cottons" and second year of counseling, felt that becoming "good friends with all the kids" was the most important aspect of WOW Week to her.

Phillips was impressed with the dynamic of this year's group despite the age difference between some freshmen, still sweet 16 and a few of the junior college transfers, in their late 20's and even early 30's. "Some of them are just out of high school while others are just getting back from Viet Nam—definitely the greatest cross-section of kids we've ever had," Phillips said.

Perhaps the highlight and a surprising one of that—was the 101 faculty home visits which took place last Saturday and Monday nights. This was an activity which involved more than 40 faculty members who volunteered having the new students into their homes for refreshments and talk. Some of the remarks made by the counselors of the faculty visits were: "great hospitality"; "almost had to tear the group away," and "conversation ranged from department curriculum to personal history."

The group of 450 was divided into groups of 15 to 20 with three counselors assigned to each group. There were two shifts; while half of the new students were being oriented with the campus, the other half were at a three day camp... and then vice-versa.

The cost of the week was $20, with a "Quiet WOW" which began Wednesday and ended Sunday costing $15.

And what about the staff? How do they feel about the whole thing? Would they do it again? Riley Benedetti, third year Business Administration: "Sure!"

Tom Torvend, Third year, Architecture: "Definitely!"

Katie Ferrlgm, senior year, physical education: "I'd do it again, again, and forever if I had the opportunity."

So says the Week of WOW. A lot of important orienteees. Meaningful relationships. A chance to become a part of the Poly thing. An opportunity to find out what you're really made of. And for sure and again for sure a time of fun. Just WOW

A rest stop may not have been on the schedule after climbing up the hill to the "P!" (Photo by Phil Bremund)
New department chairman named

Among the new faces on campus this fall will be Dr. Ruth O'Reilly, who will head the Home Economics Department. Dr. O'Reilly succeeds Dr. Eva Scully, who for the past 18 months acted as head for the department. Now retired, Dr. Scully plans a trip to the Orient and doing the things she was unable to accomplish while teaching.

Before teaching at SFV State, Dr. O'Reilly taught home economics at the secondary level in Chowchilla and Carmel, worked eight years as a senior home economist for Southern California Gas Company, and taught at both Cal State LA and Cal-State Long Beach.

"I love it here, Dr. O'Reilly remarked. I like this campus because I can see a mountain from any place I stand. I am encountering a friendly atmosphere from students, staff and faculty. I can't think of a place I'd rather be."

In promoting SFV State and this school's Home Economics Department she finds that this department is much larger than though the overall population of the campus is considerably larger at SFV State. Both Home Economics departments are academically oriented, she noted.

Biological sciences turnabout; instructor, head change places

Dr. Glenn Noble, head of the Biological Sciences Department for 14 years, has asked to be assigned to full-time teaching responsibilities as a member of the department's faculty.

The new head of the department is Dr. Richard F. Nelson, a graduate of Brigham Young University where he earned his bachelor's and master's degrees, and State University of Iowa, where he completed his doctor's degree in 1980.

He joined the college faculty in 1990 with previous teaching experience at the two universities he attended. He is a co-author of a botany laboratory manual and in the summers of 1981-84 he worked as a research plant physiologist for the U.S. Department of Agriculture.

Dr. Nelson was one of many who applied for the position of head of Biological Sciences Department. Eight qualified men were selected from applicants throughout the country. The Biological Sciences faculty then selected three of the applicants and submitted its choices to the Dean of the Schools of Science and Mathematics, Dr. Clyde Fisher. Interviews were made by the dean and Provost Robert Kennedy.

Stenner Glen offers grant money

Stenner Glen is offering a financial aid grant of $16,000 for students preparing to enter the off-campus student housing complex. The grant would offer a maximum amount of $200 per student ($100 per quarter) to be applied on Stenner Glen housing costs.

Various grants awarded to six instructors

Members of the faculty of the School of Human Development and Education have received grants totaling $169,739 for work in the coming year. The money comes mostly from state and federal agencies with one private organization contributing.

The National Institute of Health gave $83,285 for a study to determine the effects of lead on children; $27,263 for a cooperative research project in outdoor education; and $60,000 in grants to develop teaching laboratory instruction in migrant education.

From the State Department of Education, Richard Jones in the Education Department received $30,000 to develop teaching laboratories in migrant education, accompanied by another $100,000 given to schools to hire the teachers. The state office also granted $5,000 for a cooperative teacher preparation project in outdoor education.

Two other related funding sources go to that department from the state. Department head Dr. Walter Schroeder applied for the money amounting to $14,400 for research toward goals for high school work experience classes and $73,276 to help high school teachers in work experience programs.

The school also received two grants from the U.S. Office of Education, both to David Farnum in the field of ethnic studies. They are for studies that will add information to the programs of the Southwestern Cooperative Educational Laboratory, Inc.

The laboratory is developing ways of teaching English as a second language to Chicano and Navaho children. The grants total $10,000.
It the three—Robert Cleath, Senate announced the names of Kenneth Schwartz, and Hewitt 0. Wight—who were chosen by a committee of faculty, administrators, and students. Class is an instructor in the Speech Department, Schwartz is a director in the School of Architecture and Environmental Design, and Wight is a chemistry instructor. Also tied at the Convocation.

Three faculty members were honored as “Distinguished Teachers,” during Monday’s Convocation. Howard Rhoads, chairman of the Academic Committee, announced the names of the three—Robert Cleath, Kenneth Schwartz, and Hewitt O. Wight—who were chosen by a faculty committee of faculty, administrators, and students.

Class is an instructor in the Speech Department, Schwartz is a director in the School of Architecture and Environmental Design, and Wight is a chemistry instructor. Also tied at the Convocation.

During the summer quarter the students confronted the problem faced by student renters in San Luis Obispo. They formed two project teams and worked closely with the newly formed Student Tenants’ Association (STA).

One project team is preparing for print a Student Tenants’ Apartment check list which will document the condition of a rental at the time of lease and serve as a protection for student tenants and landlords as well.

A second project team is planning to have 10,000 copies of a newly prepared “Student Renter’s Guide” made up in time for this quarter.

Staff members receiving the similar honor were: Richard Crosby, groundsman; Roy Derr, horticulturist; Donald Nelson, director of Business Affairs; Paul Dillon, plumber; Catherine Nolan, clerk; and Joe Rumpel, property clerk.

Building reorganization for 'smoother' Mustang

The production side of the Mustang Daily operation made several changes over the summer to improve facilities. The entire composing area has been re-arranged according to Steve Mott, technician in the Graphic Communications department. "Rebuilding this area has created a more efficient teaching laboratory and in addition allows smoother flow of work for Mustang," he said.

"Rebuilding this area has created a more efficient teaching laboratory and in addition allows smoother flow of work for Mustang," he said. "The old Mustang area has been converted into three new darkrooms, and also a partitioned area reserved for an electronic color-scanning machine."

The old Mustang area has been converted into three new darkrooms, and also a partitioned area reserved for an electronic color-scanning machine. "The tape-perforating area has been expanded and rearranged with the addition of multi-face tape-perforators. This is a more advanced machine than any used here before," Mott said.

Foreign student funds mounting

(Continued from page 1)

The buildings were previously used to house the overflow from newer residence halls, but because of increased housing in San Luis Obispo, the halls would not be needed and were to be closed this year.

AS1 Pres. Pete Evans was instrumental in the acceptance of a six-point plan presented to Robert E. Kennedy, college president. The plan, drawn up by ISECC, included proposals dealing with community relations, job opportunities, housing and other problems as well as the monetary crisis.

Soil tillers turn thumbs up to new organic gardening course

A non-credit short course in organic gardening is being offered as a Community Services Program at Cuesta College. The first class meeting will be Sept. 29.

Composting, mulching, soils plant care, controlling insects without the use of toxic insecticides and other basic skills and techniques of organic gardening will be taught.

The course will be taught in three, 1 1/2-hour lectures and two 2-hour laboratories. The lectures will be held Wednesday evenings, Sept. 29, and Oct. 6 and 13 at 7:30 p.m. in the College Board Room, Building 1913 at Cuesta College.

The Placement Office has eliminated the 20-hour per week work limit previously placed on foreign students. "Also, jobs are now on a first come, first serve basis rather than the two day waiting period for foreign students," Delal said.

State colleges

(approximately 68 faculty positions from this college. statewide the college system lost about 1,330 teaching positions. Andrews pointed out the action does not mean there will be 63 fewer teachers on campus this fall than last year. Because many positions were vacant, there will actually be only 36 fewer faculty members.

But, the faculty positions were only part of what Reagan slashed from the college's budget. James R. Landreth, director of Business Affairs, outlined the main areas of the college's operation which will be directly affected by the loss of many items from the budget.

In addition to cutting the faculty position from the "Instruction" part of the budget, Reagan allotted no new faculty recruitment funds. "In the past," he said, "we were able to pay transportation expenses for prospective faculty members who wished to interview, occasionally pay part of the moving cost of new instructors coming from out-of-state, and send members of our administration out-of-state on faculty recruiting trips. All of these funds are gone now."

"The balance of funds for a faculty special leave program for on-campus research and creative activity were also cut. According to Landreth the program was originally appropriated $27,000 per year. In the budget for the 1971-72 academic year, that amount was cut in half. This year the remaining $13,500 was removed from the budget."

The budget cuts go deeper than the instruction programs. In "Academic Support," which includes the Library, Computer Center, Audio-visual Department, and College Farm, Landreth said only the funds for the College Farm and the Computer Center were not cut.

"For the first time," he said, "we need for funding the full year rental costs for computer equipment was recognized." The budget did not, however, provide for needed staffing increases in the Computer Center.

The Educational Opportunity Program suffered the greatest of the blows dealt to "Student Services," which includes the Health Center, Counseling Center and Placement Office. Landreth said the budget which was submitted to the governor requested $66,800 for the program—the budget which Reagan approved allotted only $8,800. A system-wide reallocation in EOP allotted only $6,600. A system-wide reallocation in EOP programs further cut that amount to $6,000.

For "Institutional Support," the budget cuts resulted in the elimination of staff reclassification funds, the loss of a position in the college's building program, the elimination of staff reclassification funds, the loss of one position in the Dean of Student's Office, and a $10,000 reduction in the communications budget.

Nursery gives student parents priority

The Child Development Department has expanded its nursery school program to include an additional 40 children.

The increased facilities are the result of duplicating the Head Start preschool area in the north end of Sierra Hall. It is located in the "cardboard jungle" near the baseball field.

This includes 200 square feet of indoor room and 7,000 square feet of outdoor enclosed play area.

Children of student parents have priority in the program which will also provide additional opportunities for work experience to the nearly 300 Child Development majors.

A previous nursery school in Home Economics had a capacity of 32 per day and Head Start has an equal capacity. According to the terms of its federal funding the Head Start children cannot be mixed with the other children.

"Things you are concerned about in the preschool are the children's health and safety and their intellectual, emotional and social development," said Miss Winifred Reynolds, an instructor in the Child Development department and responsible for the program.

The nearly 300 Child Development majors this year is an increase from only 79 last year. They are primarily interested in careers as elementary school teachers or in nursery schools. Every major in the department is required to have some work experience in the nursery here in order to have a better understanding of pre-school children's health and safety and their intellectual, emotional and social development," said Miss Winifred Reynolds, an instructor in the Child Development department and responsible for the program.

The nearly 300 Child Development majors this year is an increase from only 79 last year. They are primarily interested in careers as elementary school teachers or in nursery schools. Every major in the department is required to have some work experience in the nursery here in order to have a better understanding of pre-school children's health and safety and their intellectual, emotional and social development," said Miss Winifred Reynolds, an instructor in the Child Development department and responsible for the program.

Ladies class included in autocross on Sunday

El Camino Foreign Car Club (ECFCC) will be staging an autocross at the Madonna Plaza parking lot Sunday. Registration is to begin at 8:30 a.m., with competition at 9 a.m., according to Chuck Davis, the event chairman.

Entry fee will be $3.50 per driver or $6 per couple. Trophies will be presented to the winners immediately after the event, and participation plaques presented to all entrants.

According to Davis, cars must pass a safety inspection and drivers must use seat belts and helmets. Some loaner helmets will be available for those without them. ECFCC rules for slaloms will be used, including slaloms' class.

Further information concerning club activities may be obtained by phoning Mike Land.
Magazine meet slated Tuesday

An organizational meeting for those interested in putting together the new college magazine will be held at 7:30 p.m., Tuesday in Graphic Arts 303.

Editor Nancy Seal will outline the shape of the campus highlights magazine and discuss the several directions the magazine might go. There are now staff openings for those interested in article writing, photojournalism, advertising, and the business side of the publication.

Editor Seal also plans to set an agreeable weekly meeting time for the staff.

The Publishers' Board of ASI decided to replace the traditional yearbook with the magazine last Spring Quarter. Those students wishing to join the staff should sign up for Journalism 251-02, still listed as "Yearbook."

Intervarsity party tonight

Intervarsity Christian Fellowship will have a skating party tonight at 10 in Morro Bay. Yss, 10 p.m. Interested people are urged to bring at least two pairs of socks, a wild spirit and a dollar for admission charges.

Meeting place for rides to the Administration Bldg. flagpole at 6:30 p.m. If unable to make it, IV is having a meeting at 6:30 p.m. Thursday, Sept. 30 in Science North 215.

Another Christian group, Campus Crusade for Christ, will be sponsoring a "Love Feast," a time for old-time fellowship and some food for thought. It will be held Saturday at 3 p.m. at Bear Canyon Ranch. The ranch is on Los Osos Road, so 52A-0779 is the number to call for directions.

Program

Students interested in working in various committees of the College Program Board should contact Beth Terryn chairman at M6-2476. Help is needed in Assembly, Fine Arts, Dance, Craft Centers, Recreation and Tournaments, Speakers Forum, Outings, Films, and Special Events.

Employment interviews

Appointments for employment interviews scheduled for the week of Oct. 4-4 can be made in the reception area of the main lobby of the College Union today. According to Eugene A. Ritz-tenhouse, director of Placement and Financial Aids, those students with last names starting with A through L will sign up from 1 p.m. to 3 p.m. Those whose last names begin with M through Z will sign up from 3 p.m. to 5 p.m. The alphabetic process will alternate each week in order that everyone has equal opportunity to schedule prime time appointments, and that students must present their identification cards to schedule interviews.

The Placement Office lists the following employers coming to interview during the week of Oct 4-4:

Monday, Oct. 4—Factory Mutual Engineering Association, J. E. Harderan, Jr., assistant district manager, will interview seniors in all engineering disciplines.

Tuesday and Wednesday, Oct. 5-6—Control Data. Daniel Stapleton, personnel administrator, southwest regional representative, will interview seniors in EL, EE, ME, and B.S. or M.S. level candidates in computer science.

Wednesday and Thursday, Oct. 6-7—Arthur Andersen and Company. B.P. Kirkpatrick and J.A. Campbell, partners will be on campus these two days to interview seniors in accounting interested in a professional career in public accounting.

Wednesday and Thursday, Oct. 7-8—Westinghouse Electric Corporation. Bob Burks and Karl Doerr will interview seniors in EE, ME, and B.S. for positions in engineering, manufacturing, and marketing at various plants and offices throughout the United States.

Thursday, Oct. 1—U.S. Air Force Flight Test Center, Edwards. A representatives will interview seniors in aerodynamics engineering, architecture engineering (civil), business administration, economics, EE, EL, ME, and political science.

In addition, all majors with a B.S. GPA and in the top ten percent of their class, or who have successfully passed the FREE with a 90 or better score will also be interviewed for positions in personnel, contract administration, and management analysis.

Friday, Oct. 2—The Hartford Insurance Group. Richard Atkinson will interview fall 1971 and winter 1972 graduates (men and women) with B.S. or M.S. degrees in Business administration, computer science, economics, ET, EE, ME, and math. Openings are available for actuaries, claim representatives, salesmen, work measurement analysts, field assistants, special agents, underwriters, data processors, premium auditors, and operations researchers. Positions are located mainly in the Western United States.

Informal literature provided by employers will be available at the time of sign-ups and should be reviewed carefully prior to appointments with employer representatives.

Company applications also will be available during sign-ups and thereafter in the Placement and Financial Aid Office, Administration Rm. 313. Completed applications should be returned to the Placement and Financial Aid Office one day prior to the scheduled appointment.

Seniors and graduates are also reminded that they are encouraged to participate in the GRAD II Program being sponsored by the College Placement Council. More information is available in the placement office.
CONSTRUCTION SITES

Boom crane serves dual purpose

by MIKE BOHIL

A boom, not the sonic kind, but the type that resembles something made of tinker toys is an latest landmark of this village.

Located on the construction site at the corner of Grand Avenue and Mountain Drive, the metal framed tower doubles as a conversation piece and a construction aid. The purpose of the crane is to assist construction workers in building the new residence hall that is being constructed here.

The boom crane was built by a Swedish company, as it was supposed to have been shipped to Southern California but, because of the dock strike, it arrived to Esmontdon, Mexico. "From there, it was trucked to St. Louis City," said Peter K. Phillips, "the crane manager."

The crane will be used to construct three towers of the new residence hall at a time. "When the first three towers are completed," added Phillips, "it will be moved to the west to build the final three towers will be built."

The new residence hall is scheduled to be completed by the end of the 1972 academic year, according to Phillips. "We are not sure of the exact completion date because some unknown problems may arise," he said.

The new housing facility will be similar to Yosemite Hall in design, but it will be several stories higher and be divided into five parts. While Yosemite Hall consists of 10 towers, the new building will have only six towers, each building more people than the towers at Yosemite currently hold. "But, just like Yosemite Hall," Phillips continued, "the two living quarters will also house 600 students."

Also being built on the same construction site is a new eating complex. This dining hall is a completely new concept in college dining facilities.

Costing approximately $1,000,000, the new cafeteria is scheduled to be completed during the 1972 academic year, said Phillips. The cafeteria section of the new dining hall will be very similar to that in the big city. Food will be displayed in trays and as a student walks by he will pick up the food he desires. The restaurant section, on the other hand, will be run just like any other restaurant.

Featuring walk-in ice, carpeted floors, menus and a view overlooking the campus, the restaurant will cater only to students, but to a degree a student would not be a non-student guest. "During the beginning of the construction of the new dining hall," said Phillips, "a large fault was found by the construction crews. This problem caused a delay in the construction since the fault had to be excavated and the ground around replaced to give the building a good foundation," said Phillips.

$10000 of PERMANENT INSURANCE

for only $12.50 PER YEAR

WHAT IS THIS PLAN?

It is a $10,000 Basic Life Insurance plan with premium rates structured to meet the needs of students. Premiums are automatically paid each semester, with premiums earned on the amount which is to be paid. Premiums are available under the plan which allow for additional coverage to be as much as $100,000.

WHAT CAN APPLY?

Any high school, college, or graduate student, male or female, age 16 years or over. On this plan, in question may apply for life.

WHAT ABOUT MILITARY SERVICE?

There are no military or aviation restrictions on any kind of this policy. If you enter military service, the policy remains in effect as long as you (or parents or guardian) pay the premiums.

HOW LONG ARE PREMIUMS PAID?

Premiums under the basic program are payable until age 65 in which the amount is prepaid for $10,000.

WHAT IS THE COST?

An annual premium of $25.00 is paid for a 4 years or to age 20 whichever is later. One-half of these premiums are credited against the premium due. The result is an initial account of $12.50 per year. Future premiums are indicated in the following table.

<table>
<thead>
<tr>
<th>Year</th>
<th>Premium</th>
<th>Age 20</th>
<th>Age 65</th>
<th>Age 85</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>25.00</td>
<td>36.00</td>
<td>100.00</td>
<td>100.00</td>
</tr>
<tr>
<td>2</td>
<td>25.00</td>
<td>36.00</td>
<td>100.00</td>
<td>100.00</td>
</tr>
<tr>
<td>3</td>

<td>36.00</td>
<td>100.00</td>
<td>100.00</td>
</tr>
<tr>
<td>4</td>
<td>25.00</td>
<td>36.00</td>
<td>100.00</td>
<td>100.00</td>
</tr>
</tbody>
</table>

MUST I BE EXAMINED?

No. Occasionally, we Company will request an exam due to the information submitted. The Company reserves the right to decline an applicant, in which case the premiums will be promptly refunded.

WHAT IF I SHOULD LEAVE SCHOOL?

Your contract will continue in force as long as your premiums are paid when due.

HOW DO I APPLY

Phone 543-2377

SEE: MAC E. VANNER, C.L.U.

778 MARSH STREET, SLO. CA.

WHAT ARE THE BENEFITS?

a. $10,000 at Permanent Life Insurance with illustrative cash values as follows:

<table>
<thead>
<tr>
<th>Issue Age</th>
<th>Age 20</th>
<th>Age 65</th>
<th>Age 85</th>
</tr>
</thead>
<tbody>
<tr>
<td>10</td>
<td>0</td>
<td>0</td>
<td>0</td>
</tr>
<tr>
<td>20</td>
<td>0</td>
<td>0</td>
<td>0</td>
</tr>
<tr>
<td>30</td>
<td>0</td>
<td>0</td>
<td>0</td>
</tr>
</tbody>
</table>

b. Waiver of Premium Benefit without extra cost that will pay all future premiums if you become totally and permanently disabled.

c. Guaranteed insurability options which give you the right to purchase additional life insurance without evidence of insurability at specific future dates.

d. Participation in surplus earnings through dividends.

5512.50 is the net cost figure. The annual premium is $25.00 per year, but one-half this amount becomes available as a credit which reduces the cost to $12.50. Higher rates apply after the first year.

First pop concert of season slated

Guitarist and blues singer Danny Cox, who appeared with the Chambers Brothers here last April will open the 1971 pop concert season.

Cox's appearance on Friday, Oct. 1, is being sponsored by the Assemblies Committee. The public is invited to attend and tickets are priced at $1 each for college students and $2 for all others.

Reviewers have praised the ability of Cox, a native of Cincinnati, to take songs everyone else is performing and make them sound like his own personal songs.

Vice president reviews goals

(Continued from page 8)

over your precarious position in this education industry. You are a very expendable commodity these days.

Cassett: Go Quietly

“But you cannot expect us to go quietly,” Mrs. Doshi continued. “We have sympathy, but ours is a different route. We have seen too much. Our generation has been told to fight a war for freedom and returned with the blood of children on our hands. We have watched the leaders of our country exposed as deceivers, profiteers, and power-driven men gambling with our destinies.

“We have borne witness to a generation so afraid of its own youth that it meets them with guns and tear gas. We are not interested in guns and we are not interested in profit and we will not be sidetracked from the goals of freedom and brotherhood. You are welcome to join us.”

Tropicana Village

Tropicana—Islander—Valencia
Dear Student:

Stenner Glen is pleased to announce the availability of a large number of private sleeping and study rooms, grouped in suites with fewer people.

We have also revised our rates for the fall. Some single rooms are now offered to you at lower cost.

Many of you have indicated that privacy and price are the prime considerations in your housing needs. This extra privacy advantage and lower cost, along with our location adjacent to campus, make Stenner Glen an outstanding housing value.

Our new Director of Student Development will be joining the staff from Oregon State University. He brings additional experience from Humboldt State College in one of the most successful and satisfying student housing programs in the country. We expect that he will help make this an exciting year at the Glen.

Please write, call, or drop by for a new contract if you are interested in any of these different accommodations.

P.S. If you are planning to live in an apartment next year, watch for our announcement of new meal plans for non-residents in the fall. The prices will create low-cost options and flexibility for persons who want occasional ample, tasteful cooked meals — as a supplement to their own apartment fare.

Sincerely,

Jeff Bynes
Manager

1050 FOOTHILL BOULEVARD, SAN LUIS OBISPO
BY STEVE GALE

Despite their 15 to 14 loss to Boise State last weekend, the Mustangs have nothing to worry about as they look forward to a promising season.

Senior quarterback Steve Breanahan made a strong showing with his aerial attack against the Broncos, one of the top-rated college teams in the nation.

Teammates believe the Mustangs will be far more successful this year than last season.

Restricted backfield prospects nationally. Head coach Joe Harper has some comments on this year's schedule.

"This is the toughest schedule the staff has faced at Cal Poly. In Hayward and Montana we're meeting conference champs while Long Beach (Pasadena) and Montana (Camelina) were bowl participants," he said.

"Our basic attitude in approaching the season is that the 1971 schedule will be a difficult undertaking, but if we're successful we will have achieved considerable status as a football team. Our squad and coaching staff is looking forward to meeting this outstanding competition."

First after-game dance scheduled for Saturday

An after-game dance—the first dance of the Fall Quarter—will be held Saturday from 9 p.m. to midnight. The dance will be held in the Men's Gym.

The event is being sponsored by the Week of Welcome Committee, although attendance is open and not restricted to WOW participants. The dance will feature music by "Sarrah" a musical group from Los Angeles.

Admission price for the evening is $1.00 or free with WOW card. Everyone is invited.
