The academic Council is considering a proposal that, if approved, will allow the college to make fuller use of the quarter system. Council President E. F. Findley student representative to the Council.

The council is made up of students, faculty and staff of the college. It studies plans and advances changes in the college before their final decisions.

One of the proposals now being considered is to expand the number of units offered for certain General Education and freshman courses, meaning that a three-quarter-credit unit of these courses would become a two-quarter series for eight units. As an example, a Freshman Composition, English 103, 104, 105, which now take three quarters, will be reduced to two quarters.

The mechanical part of the proposed change deals with reducing the number of units for each course, re-assigning the curricula of the various schools and re-scheduling the academic Council to make fuller use of the quarter system.

One of the proposals is that a number of units for Individual courses would become a two-quarter series for eight units.

The academic Council is expected to review the proposal and to make final decisions by the end of the quarter.

The academic Council is expected to review the proposal and to make final decisions by the end of the quarter.

The candidates from the School of Education, Social Science, and Fine Arts, and for the Free Society, are in favor of the proposal. The candidates from the School of Architecture and Environmental Design have not been recommended for the proposal. The School of Architecture and Environmental Design have been recommended for the proposal.

Finance posts need approval

(Continued from page 1)

what they thought they could contribute to the committee. Generally the replies were cautious as the applicants felt their way through the screen. The common view was that if appointed they would represent the interests and desires of the student body in deciding budget priorities. The replies of former members were less guarded. Evans asked Miss Spencer how her opinions had changed since she was seated on the committee in Fall Quarter. Miss Spencer said she had questions both about the "validity of student government" and its "effectiveness." Several of the former members were asked if they thought the selection process should be changed, and what body should have final authority over the budget. Evans asked Gross if he had an ideal system for selecting members. "I don't see anything wrong now," he said. "You only have two choices, either you select through screening or you elect them." He also felt that Finance Committee recommendations should be binding on SAC. Laster said SAC should be doing the interviewing, and he added, "I think an elective process for Finance Committee would be a force." Laster and SAC must have the final say on where the money should go after they've been appointed by the president and approved by SAC," said Laster.

Wisconsin fills primary ballot

Madison, Wis. (UPI)—A special committee picking the candidates for Wisconsin's Apr. 1 presidential primary ballot chose 13 Democrat and three Republicans Tuesday, none of them surprises except for Rep. Patay Minn. D-Haiw.

Social change depends on involvement

by WARNER CHABOT

There's a student community of 12,000 people living within the San Luis Obispo area. Our reasons for being here are as varied as the people that attend Cal Poly. Some were here before and have rejected the lives of urban America to live in this special place. Some of us came to Cal Poly for simple economic reasons and some came because it was the only college which accepted their application. For some, it was an escape from the chaos of metropolitan city colleges.

But we are all here and hopefully — for good reasons. We do not live primarily to escape or to destroy but to create. We recognize the social limitations of the urban complexes, that enormity breeds conformity, and we choose to live in a society where we can lead our lives and our neighbors can lead theirs, with cooperation at the personal, not institutional level.

We are part of an ever changing social structure and we cannot predict the final destination, although each of us has personal guidelines that will collectively shape our new society. With all of our causes and ideals, many of us think that life is truly a time of great change in the country. Yet perhaps in 50 years, our grandchildren will read about this era and it will be contained within a short paragraph in a history tape. For the present, we are all building, creating, and sharing. In no way are we simply escaping the problems of urban America, for we are building a new society. Feudalism did not end but because the arts and political philosophy but believing In yourself enough to become In­

Black Heritage Week near

Black Heritage Week will begin on Feb. 16 in Chumash Auditorium. Two showings of the satirical film, Watermelon Man, will be shown Feb. 11 at 7 p.m. and 9:30 p.m. in Chumash Auditorium. The college theater will be the site of another film, Right On, to be shown Feb. 14 at 8 p.m. Black Heritage Week, sponsored by the Black Students Union and the College Program Board, will conclude its activities with a banquet and fashion show on Feb. 18 at 6 p.m. in the San Luis Obispo Veteran's Memorial Building.

The single most important issue facing San Luis Obispo's City Council — half of whose 28,100 constituents are related in one way or another to the college — is determining which direction city growth will take.

This is the view of City Clerk Jean Fitzpatrick, who spoke last week before a class of journalism students at this college.

"The city is going to grow," he said. "We call it government, but the city should take the initiative on such matters since they are the elected representatives of the people.

"The City Council acts much in the same way that people do," he said. "They usually do not act upon a matter until it directly affects them."

Fitzpatrick, who has been involved with City Hall since its opening in 1962, believes that one of the biggest problems with American government today is that no one is really in charge of anything anymore. He said it is very difficult to "pin anything down" to any one person or authority.

Applications for admission to the 1972 Spring and Fall quarters at San Luis Obispo are still being accepted as well as ones to the other California State Colleges, according to Chancellor Glenn S. Dumke.

While the initial application filing period ended Nov. 30, 1971, the campus will still accept applications in a few specialized majors for the Fall quarter while Spring quarter is still open in most majors.

Late applications to the state colleges, says Dumke, have been accepted since Dec. 1, 1971, and will continue until the necessary quotas are filled.

Loss of revenue for state
New residency changes

by BOB MUNZER

On March 4 of this year, everyone in California between 18 and 21 will legally become an adult.

Among changes expected by administrators at this college will be the change in residency requirements for students from out-of-state. These students previously had to wait until they were 21 before starting to establish residence here.

However, with the new law, these students will now be able to start fulfilling their residency requirements at 18, and hence may become residents at 19, according to George R. Davies, II, admissions officer here.

This presents the problem of a loss of revenue as students qualify as residents, and so stop paying tuition, at 18 instead of 21.

Director of Business Affairs James R. Landreth said, "This change will have an impact on the college's budget, but it won't be disastrous." He said the impact will depend on how many students qualify for residency.

Davies said only 81 out-of-state students registered here for the Fall Quarter. He said he does not expect this number to change much "because California residents are given admission priority anyway. We've had few out-of-state students lately."

Landreth said the loss of revenue can be compensated for in one of two ways, "either by picking up revenue from some other unplugged source, which is highly improbable, or by cutting the overall budget by the amount lost."

Landreth said he believes the real impact of the new law will be felt by the California higher education system as a whole.

He said state institutions at the junior college, college, and university levels all will be affected to different degrees. When all the pieces are added up, it will come to a sizable loss for the budget the state allots the higher education system.

Davies said that many students don't qualify for residency right away because they fail to fulfill all requirements.

He said the residency requirements are physical presence in California for one year and the initiation of certain manifestations that would show intent to be a resident for the overall budget by the amount lost.

Davies said examples of acts that would indicate this intent, which must take place the student be at 21 before residency can be obtained, are registering to vote in California, payment of state income tax, possession of a California Motor Vehicle license and license plates, ownership of property in the state, carrying on business here, membership in service or social clubs, and presence of spouse, children, or other close relatives.

He said that no one factor is decisive, but that all the pros and cons are weighed.

"If the applicant does not like our decision, we send all the information to the legal section of the Chancellor's Office and give a recommendation," said Davies. He added, "Every one in a while get overturned."

Davies said that it is the people under 18 that the new law will affect. Time before March 4 cannot be counted for people that become adults at that time, and people that have become adults before that but that will not affect year from the time they became an adult.

Davies suggested any student planning to apply for residency check with the admissions office in room 806 of the Administration Building.

Egypt hopeful

(Continued from page 1)

These schedule changes mean
that many lectures will be daily
with no break in the week to catch
up on homework or review material.
They would also make it difficult to schedule lab and activity classes to correspond with the lecture sections.

Findley said changes not only
will be forced on classes offered also on classes required by departments. With the changes, curriculum programs that require certain classes and have little room for electives would suffer a reduction in the extent of information covered.

The School of Architecture and
Environmental Design and the
School of Agriculture and
Natural Resources are two such
programs. Without great
curriculum reforms, according to
Findley, these schools will have to
drop some support courses from
their schedules.

All of the products of the proposed change are not bad, Findley contends, stressing that students should examine the benefits as well as the problems when they offer suggestions on the proposed larger unit courses.

With more hours per week for fewer classes, for instance, there would be more time to study topics in detail. Teachers would have more time to improve their courses material through research. They would have more time to read class work and to get to know students. The council'sfindings contend that it would be easier to study a few related courses at a time than the average seven or eight courses per quarter student now takes.

Since the change to more units is based on two-course-progression instead of three, there would be a new cycle every two quarters instead of beginning in the fall only. Transfer from semester-oriented courses is easier with the proposed structure because it would be easier to figure equivalencies between courses at this college and others. Such a change should also make it easier to get classes because classrooms will be used more efficiently.

Findley wants more student participation in deciding on the proposed unit values. The committee claims that it must act on the plan, either in favor of or against it, before the end of this quarter. As one student representative to the Academic Council, Findley desires others to find out about the changes and add their own ideas to those being discussed by the committee.
Revelations

The $50 writing awards are being offered to students attending any college or university in California by the editors of Spectrum, the literary magazine of the California State Colleges Office of International Programs.

One award will be for the best unpublished poem or prose fiction. Another will be for the best unpublished prose fiction. Contact deadline is Feb. 14 and manuscripts with return addressed stamped envelopes should be sent to Spectrum Prize Contest, P.O. Box 14800, University of California, Santa Barbara, 93107.

Two writing awards are being offered to students by three instructors from this campus. The group, sponsored by College Abroad of Tempe, Arizona, will travel to Rome, Florence, Switzerland, Paris, London and have nine days of free travel time. The tour will go from June 31 to July 18 or June 27 to August 3. The basic cost, $119, includes insurance, transportation, accommodations, meals, guides, tours and tickets to plays, concerts, ballets, and operas.

Keith Nielsen of the speech department, Bernard Duey of the art department, and Robin Lake of the drama department will be teaching a humanities-oriented program in the fields they specialize in. "I guarantee that anyone who goes will learn more during the six weeks in Europe than they will taking a course covering the same material for one full quarter here," said Lake, assistant professor for the instructors.

"The students who have been on the tour say that it is one of the most fantastic educational experiences they have ever had. "Until credits for the classes will not be accepted at this college, though," said Lake. "Call Cal Poly is not connected with the program at all. The only prewritten travel and study programs sponsored by this college is the regularly-offered program for enrollment. There are no students conducted by the California State College Office of International Programs."

Anyone interested in participating should contact one of the three instructors.

Air pollution solution: students riding horses

Help stop air pollution, buy a horse! Whether this would stop air pollution or not, many students have brought their horses to college with them and it looks like a growing comeback for the four-legged hay eater.

Approximately 80 horses are boarded on campus at a cost of $15 a month for stabling and $20-25 a month for feed. No survey has been taken to determine exactly how many students bring their horses to college with them, but it has been estimated that at least 300 students board their horses on campus.

Horses were allowed on campus when the college first opened in order to help with the cattle only. Later, in 1941, the arena was built and more horses were brought in to be used for the rodeos. Now students bring their horses to school for the rodeos, horseback riding, horse husbandry, horse shows, and riding classes taught on campus.

This college was one of the first to have rodeos on campus and now about 150 colleges and universities sponsor the Inter-Collegiate Rodeo Association (NIRA). Three to four rodeos are scheduled during the year and the Poly Royal rodeo draws some 500 participants.

Ten years ago three and a half million horses populated the nation. These are about seven and a half million horses in the United States today, and it has been estimated that in another five years the number will be up to 11 million.

Transportation of the future may be a mustang of another color.

Fury continues

Dublin (UPI) — Anti-British fury swept the Irish Republican Troubadour for the second successive day. More than 1,000 children and Union Jacks in Dublin.

The second clinic will be held Sunday in the Crandall Annex, next to Women's P.E. building. Singers will meet from 8 a.m. to 1 p.m. Yell leaders will meet from 7:30 p.m. to 9 p.m. No one will be accepted for tryouts after this second clinic. Tryouts will continue every Sunday until Feb. 27. Final judging will be March 4.

A member of the California Veterinary Medical Association will be available for discussion in SCI 45 at 11 a.m. Thursday. Dr. Robert Johnson will discuss with students the educational preparation for the field of veterinary medicine and give information on financial aids for minority and disadvantaged students.
Volleyball team pushed out of bounds

Without equipment, transportation, a coach—without any finances at all—the Cal Poly volleyball team has meagerly existed for about six years. The team has had to pay all the bills: United States Volleyball Association membership fees, tournament entry fees, traveling expenses (gas, food and lodging), and equipment costs, to name only a few.

Last season the volleyball team was forced to practice from 6 to 9 a.m., because the gym facilities could be allotted to "volleyball" at no other time. This made it very hard for the players to keep up with their competitors, and their studies.

The most evident deficiency that the team faces is the lack of encouragement displayed by the athletic department. Awarded no letters, given no publicity, and offered no assistance, the team finds it hard to keep its wheels turning.

With a growing interest for volleyball on this campus (displayed by the 300 people enrolled in volleyball classes and the overcrowded conditions in the intramural program), it seems that something would have been done by now to meet this popular demand.

But the conditions remain the same and this season the volleyball team has been given only two days a week in which to practice. The team must work alongside volleyball classes 9 to 11 a.m. on Tuesdays and Thursdays and occasionally give demonstrations to these classes in order to earn their keep.

The team has entered two tournaments so far this year. It has won one and placed second in the other. Needless to say, the ability is there, but the encouragement and support lag behind. Many hope to see this change.

Up high for the block, Glenn Graff and Jack Jantz demonstrate that volleyball is an exciting spectator sport.

Exhausted after a match, Mike Brawlick gives all he can yet receives nothing in return.

Pre-dawn workouts keep Jack Jantz in top physical condition.
**Linemen first in draft**

New York (UPI) — National Football League clubs passed up 14 quarterbacks in the opening stages of the annual player draft. Buffalo Bills, 6-1, 250-pound defensive tackle from Oregon, was the first lightweight taken, going to Green Bay, New Orleans took offensive guard Royce Scott of Georgia and the New York Jets grabbed the wide receiver-tight end Jerome Barquin of Jackson State. The first linebacker taken was Jeff Broom of Stanford, who was chosen by Minnesota, and the first quarterback was Jerry Tagge of Nebraska, who was taken by his own hometown Green Bay Packers.

**National sales tax considered**

Washington (UPI) — The Nixon Administration is considering a "value-added" tax of about 13% to relieve property taxpayers of some of the cost of school finance, the White House said Tuesday.

Ronald J. Ziegler, President Nixon's press secretary, said no decision had been made yet on financing a "revolutionary" property tax plan that Nixon promised in his State of the Union message Jan. 30.

But Ziegler told reporters, "We hold a positive attitude about a value added tax." The "value added tax," often referred to as a national sales tax, is imposed at each stage of production of a product and ultimately refunded on exports, the tax can be imposed on imports and refunded on exports.

Advocates of the plan argue that the tax can be imposed on imports and refunded on exports, thus improving the competitive position of American goods both at home and abroad.

The Treasury has been studying the tax, widely used in Europe, for several years. Advocates of the plan argue that the tax can be imposed on imports and refunded on exports, thus improving the competitive position of American goods both at home and abroad.

**Mammoth ski trip set**

After many successful ski trips already this year, the Ski Club is hoping to sponsor the best trip yet this quarter. The club is offering 3 days of excellent skiing at Mammoth Mountain, raised as one of the East ski areas in the United States.

The date of the trip is February 19, 20 and 21. For the low package price of $198.00 you will receive an entertaining ride in a chartered coach with reclining seats, restroom facilities, stereo taped music, cheese and bread, and refreshments.

After your arrival you will have two nights lodging in the newly completed condominium complex Chamonix, located at the base of Lift 7 and 8. Each unit features beds for 8, fully equipped kitchen, skis, ski lockers and recreation facilities.

Included within the complex is a heated pool and jacuzzi, seacoast baths, ski lockers and recreation facilities.

Two dinners will be served on Sat. and Sun. nights and are included in the package.

The club is expecting approximately 60 to make the trip. Anyone interested in making the trip is asked to contact Russ Gillman at 463-2521. A $20 deposit is required from all those making reservations.

**Baseball starts Sunday**

The Mustang baseball team opens this year's campaign this Sunday at 3:30 p.m. in the Steinbrenner stadium with a game against the alumni.

Seven of the top players from 1971 are returning again this year. Included is all-conference second baseman Dave Oliver, a junior from Stockton, who has led the Mustangs in hitting the past two years. He finished with a .377 average, 30 stolen bases, and batted .306.

Returning sophomore include first baseman Gary Knuckles from Richmond who hit .318 last season and flashed .892. Also, pitchers Les Ohren from Davenport, Alberta, Canada and Mike Krukow from San Gabriel. Ohren compiled at-1 record and a 1.38 earned run average while Krukow finished his first year as a pitcher with a .64-4 record and a 3.59 earned run average.

The only other returning lieutenant in senior catcher Dennis Wallin, a two-year reserve from Fullerton Junior College, and Dave Brunswell from Cerritos Junior College, who were both chosen as the most valuable pitchers in their junior college leagues at Carl Hathaway from Hancock Junior College.

The Fredman on the mound are Steve Copeland from Valley, and Paul Gengler from Richmond.

According to Coach Angie Garrido, this squad is "working hard to establish his own legacy. What we did last year has had bearing on this season. We will play the type of game that complements our abilities."

Cal Poly opens a regular-season series coming off a 4-1 record last year with a three-game series against St. Mary's on February 11 and 12.
