Housing director airs views on radio show

Residence hall problems were discussed by Dr. Robert Bostrom, director of residence life, on waiting, on Wednesday night during KCPK's Study Break program.

Annual license for residence halls, sign-in and sign-out policies for visitors, lighting in the halls, room checks and water leaks were among the topics discussed by a caller and Bostrom.

The major issue discussed by most residents is the signing-agreement policy. Due to a large number of thefts and two attempted rapes on campus this week, Bostrom believes that this is an issue only a safety measure, a restrictive measure. Although his measures do not prevent theft, the policy makes them realize what they are being watched more closely, Bostrom said.

One caller asked Bostrom about room checks and if the room inspector has the right to open drawers or closets. According to him, the room check does not involve opening drawers, closets or other closed compartments.

Bostrom thinks that the college has the right to search if there is just cause and he said the last room search was night eight years ago. This cannot be done about the approval of the dean of students or Bostrom.

Bostrom used the example of a blinking red light outside of a woman's dormitory, and the problem is involved. When North Vietnam makes a settlement, the White House was toward negotiations involving South Vietnam in any peace settlement, the White House was highly conciliatory toward Thieu.

When North Vietnam makes a settlement, the White House was toward negotiations involving South Vietnam in any peace settlement, the White House was highly conciliatory toward Thieu.

White House praises Thieu

WASHINGTON (UPI) - The White House warmly praised President Nguyen Van Thieu of South Vietnam today and said he would take the leading role in political questions involving Saigon's future.

With Thieu expressing continued irritation over statements by Secretary of State William P. Rogers and other Washington spokesmen about U.S. flexibility toward negotiations involving South Vietnam in any peace settlement, the White House was highly conciliatory toward Thieu.

Gerald L. Warren, deputy presidential press secretary, said Thieu's agreement to resign this month advance of any new elections "represents a personal decision of unparalleled generosity and patriotism." Thieu's resignation was part of an eight-point peace plan outlined by President Nixon.

When North Vietnam makes a formal reply, the administration will respond after "close consultation" with Thieu, Warren said.

Council representative, said the recommendation was written as a "gentlemen's agreement with a little latitude.

The recommendation also outlined the board's regulation of TGIs - before, during and after the functions. Compromised regulations were restrictions on the advertising, hours, and size of the campus.

SAC approves travel expenses for this year

by DE RUSSELL

Consideration of travel expenditures appeared to dominate the Wednesday night session of Student Affairs Council, as both approved two measures to send one student and a sports information director to New York.

The first measure concerned a request by Sports Information Director Wayne Shaw that SAC approve an expenditure of $14,000 which would enable him to travel to New York in order to report this college's competition in a National Collegiate Athletic Association wrestling match.

John Brown of Finance Committee explained that the measure was not a very costly request but rather a request to use an amount of over-donations which Shaw had earned during the last year. Shaw's projected success as sports information director is $4,000 and the total increase last year provided the college with approximately $8,000 or $6,000 over the set projection.

A debate ensued in which Assistant Press Pete Fenech expressed an opposition to the request. If this expense is proposed only to alleviate the pain of rallying news (of the wrestling match), then I oppose it," he said.

SAC finally voted 14-0 in favor of the travel expenditures.

A second measure involved a motion from last week by Frank Smith of Science and Math who asked that SAC send one student to the National Student Athletic Council to be held in New York on March 17-18.

The motion included a provision in the form of tuition from students who are attracted here to participate in on campus.

SAC's travel expenditures were justified as a "gentlemen's agreement with a little latitude."

The recommendation also outlined the board's regulation of TGIs - before, during and after the functions. Compromised regulations were restrictions on the advertising, hours, and size of the campus.

Grain warnings

The situation seems obvious enough. As we increase the yield rather than the acreage, blank doffs could show reduction per acre in the future. Thus another Bible prophecy would be fulfilled.

The warning is in the words of Jesus: Matthew: 24:45.

"The he who is silent for you do not know which day the Lord is coming." But, he did say "there will be signs."

Barnes Johnson

Speaker defends own discussion on topics 'challenged' by reporter

Editor: In reference to the report of the panel discussion and speeches made on Monday, Feb. 7, I would like to state that the reporter Paul Tokunaga has vilified the content and the intent of my speech. He is not to report, that I "challenged" Western intellectuals. I did no such thing. There is no difference between challenging someone and stating that something (a theory in this case) is utter nonsense. I said, "In answering this question (why the peoples of Africa are poor while the continent is rich in human resources and man-power) the intellectuels of the Western world would like us to believe that it is because we are an inferior race-and or because of "different" geographical conditions in Africa that has made it impossible for progress. This is utter nonsense." Paul, this is not a challenge.

Further on, he stated that I "claimed" that "many...people of the Western world would like us to believe that it is because we are an inferior race-and or because of "different" geographical conditions in Africa that has made it impossible for progress. This is utter nonsense." I never said such nonsense. In fact, I firmly believe that the peoples of the U.S. and those of Africa share common aspirations. I said, "There are also other devices that are used by the imperialists in the process of exploiting resources." The so-called peace corps, for example, are nothing but the Dar es Salaam weekly. Vignon Africa, Point, Saturday, and others. "I know which day the Lord is coming," I did no such thing. Therefore, I believe the reporter to make It impossible for progress. This is utter nonsense."

Pete Burks

Plutonium costly waste

Editor: Does Warner Chabot really expect anyone to believe that the Diablo Canyon Power Plant is going to dump 300 tons of plutonium 239 a year? Plutonium 239 is one of the most valuable materials known to man. It, along with uranium 238, is the most widely used fissile isotopes. However, it being thrown out as waste! If Chabot would pull his head out, take a look at the Morro Bay Power Plant, and consider its effect on the ecology, then he might have second thoughts about nuclear power plants.

Forum

Now, anyone who subscribes to a thesis like this is either a fool, an ignoramus of the history of mankind; Apparently, Men (Ms) and women has never bothered to investigate Western philosophy in general, or its epistemology in particular. It isn't perfect, of course, but of those that has really related certain truths. Among these truths is the concept of man as a fallible and corruptible being, and that, epistemologically speaking, one can use history as a device to demonstrate the logical conclusions of ideas to form of empirical evidence.

History tends to refute, if not confute, the tenets of socialist theory. Indeed, in any society where a central government has emerged with the kind of power she wished to imbue ours with (thus, redefining the Constitution, which is ineluctably, not to the benefit of the many, but to the aggrandizement of a few). To realize this pernicious theory in action one need not pursue the history of the Third Reich during World War II Germany; and the rise and fall of the Nationalist Workers Party (NAZI's), and its successor. (Or currently the public corporate, federalized, and semi-famous only for misery and fear. Through the milliner the path is clear.

The arguments of the Socialist Workers Party are by no means the ultimate blueprint to the future, to spirit, they are indistinguishable from the cries vents dally by the leftist- imperialists, for example, are nothing but the Dar es Salaam weekly, Vigilance Africa, Point, Saturday, and others. "I know which day the Lord is coming," I did no such thing. Therefore, I believe the reporter to make it impossible for progress. This is utter nonsense."

Daniel Tavares

Jenness not forgotten; thesis criticism aired

Editor: Well, Linda Jenness has come and gone; but she is not forgotten. For in her wake she has left an assurance of convert to the "cause" which you know. I mean they've got this theory and platform they call "peace propaganda."

Jenness and Co. are going to become the face of the nation, an entity that has made it impossible for progress. This standpoint, see, where they will institute this benevolent Central Authority who will at once be both omnipotent and omnipresent, and will always be the will of the people etc., etc., etc. I thought I was going to vomit.

Now, anyone who subscribes to a thesis like this is either a fool, an ignoramus of the history of mankind; Apparently, Men (Ms) and women has never bothered to investigate Western philosophy in general, or its epistemology in particular. Australia: popular topic

by KATHLEEN BEASLEY

"Fair go means giving a good taring, or as you say in America, an even break," said Phillip Saarcy.

Unfortunately, the going was not so fair for the Los Angeles Australian consul general when he spoke before over 150 people Wednesday night.

Sitting on tables and window ledges, seated also deep in the door, and listening from an adjoining room, people crushed together and around a room designed to hold 50 students to hear Saarcy speak about Australia.

The white-haired speaker wove a tale of a young land of variety and innovation.

Almost half the people in Australia are under 35, according to Saarcy. A high standard of living puts Australians number four among car owners of the world and second only to the United States in air travel, said Saarcy.

Saarcy emphasized that there is no discrimination by race, creed or color in Australia. "No one can point a finger at us and say we're not looking after our aborigines," he said. The government spent $3 million last year to improve the housing, health conditions, education and employment situation of the 140,000 aborigines in Australia today.

"Figures are only a part of what is happening in Australia today," said Saarcy, rattling off a list of social, scientific, artistic and sports achievements.

Acknowledging the sponsoring Ops Club field of interest, the consul general described the country's agricultural possibilities. A wide range of climate, topography and soil types limit cultivated land to only about eight percent of the total area.

Despite the greater emphasis in days of industry, Saarcy said Australia is still a great producer of primary products.

Leading the world in wool production, Australia is presently plagued with low prices and poor markets.

Foreign investment in Australia, Saarcy said, is greatly encouraged through the stable political and economic situation. There is no harassment or restriction on the percentage of ownership by foreign companies.

Proposal going to council.

(Continued from page 1) TGs. The volume of music was controlled and a deadline to stop all musical entertainment was set for 8 p.m. Limitations on the age of guests, donations, and TG parking were also outlined. Permits for organization which fail to comply with the TG directives were included.

Another item presented by the subcommittee, its general findings and recommendations, received the commission's approval. The three statements included in the separate items are also on the Monday study session agenda.

The first statement commend the city residents for tolerating TGs. City ordinance 347 - a stringent, TG proposal council postponed — was disfavored in the second recommendation, and others were suggested as TG facilities in the last one.

SAC approves travel

(Continued from page 1) experiences upon returning. The motion was passed by a close vote of 8-4.

Other Wednesday night action included a proposal by Brown that a new category entitled Executive Program Reserve be initiated into the college budget. Brown asked that SAC approve the new category which would make available to the incoming administration funds for executive-directed programs. The reserve would be under SAC authority.

The Council decided to postpone action on the proposal until next week.

Evans and ASI Vice Pres. Marianne Dosh requested that the various council of the college invite them to attend their meetings to establish better communication.

Evans introduced the establishment of a Student Legal Services Committee in which he asked that SAC members participate. SAC approved several committee codes including those of Educational, Club, Poly, Children's Center, Human Development and Education, and Housing Services.

Do you need day care?

Mustang Daily is interested in determining the need and need for a child care center on campus. How many students will be in a position to use such a facility?

Funding for a day care center is being considered by Student Affairs Council. Give us a hand in determining the need by filling out the form below and dropping it off in GA 228 in the student union or in ASC Box 41. Please sign your name to insure the validity of the response.

Income tax service free from volunteer students

Along with the first whiffs of spring comes the busy forms of the Internal Revenue Service. If you're discovering that these forms can be pretty confusing but don't think your problems are big enough to take to an accountant, there is a service to suit your needs.

Low income taxpayers throughout the county are getting free help filing their 1981 income tax returns from a team of six business administration students.

The VITA offices will be located at eight separate communities throughout the county on eighteen occasions before the April deadline. On April 16, the Mustang Lounge in the UC from 1 p.m. on through. Volunteers, Feb. 13 and 26, and April 8.

Term paper production

(Continued from page 1) instructors simply make the assignment at the beginning of the semester and forget about it. Probably a preferable way is to have the paper developed thru conferences between the student and the instructor.

Grant said there is also the possibility some students do not understand the implications of plagiarism, but he added "I suspect generally students understand what it is."

Everett Chandler, dean of students, is vehemently opposed to commercial papers. He said it is "gross" to purchase a paper.

The term paper companies are not above defending themselves. Their position is they save the student time and offer better research facilities than would normally be available.

Another argument spokesmen for the "new industry" say assignments students receive are meaningless. Some go so far as to claim a commitment to educational reform.

"It appears that the assignments handed out in college classes are remarkably mundane and emphasize trivial aspects of a topic, not the questions that shape serious thought," said Larry Burck who is a partner in Dix Paper Mill which also does business in Southern California. What a group of teachers would like to do is take such firms to court. Here in California (George) Durst, chancellor of the state colleges, said in his annual report to the Trustees his office was exploring legal remedies.

When you first walk into a meeting of the Student Affairs Council, you wonder where you are and what it is you're doing there.

Around the large conference table you see the familiar faces of Pete Evans and Marianne Doshi, but who are all these other people? They seem to have no unity, no common ground.

"So that's my voice in government," you say to yourself, "Wait a minute, I don't even know this guy." But as more time expires, you realize all these people are responsible and serious students donating their valuable time to represent you and your interests.

Suddenly you're fascinated, you feel a part of what is going on. You now have the confidence and knowledge to voice your own opinion when you see fit. You become a part of the whole.

From total confusion to a clear idea of what the governmental council is doing is the road you travel, if you have the stamina to last a couple of meetings. The road is a long and foggy one at first, but the enlightenment is well worth the wait if you try. Student government grows on you. Get involved.

Familiar faces?

Photos and Story by

Max Boverl

John Brown of Finance Committee reports on that group's progress and recommendations.

Business takes time-consuming consideration, here—as a contemplating stretch by ASI Pres. Pete Evans demonstrates.
Iron is stored in the liver, possible death from a little known flour would expose thousands of that its proposal to double the 100 doctors have warned the Food Agency, Power and Ministry of the wind... Visual prison cutout ones mm Q UICLLAMA ... Hart's presentation dealt with his connection with political campaign spending, and no contributions and no contributions over $600. A student in the group said that big business essentially controls political parties, who in turn control the environment. He concluded that all we need to do is control big business because it is they who use loopholes to ruin the environment. Hart is optimistic about the environmental crises we face today.

Since a good deal of farmland is located near growing metropolitan areas, farmers need protection from land developers who might expand onto their land. By virtue of the Williamson Act, a different tax structure is placed on this land in relation to their income. Property value also increases in these areas to discourage developers from buying out the farmland.

One of the students commented that the act isn't necessarily helping agriculture because farmers can make so much profit by selling their land for high prices. Hart said that "houses should be put on land where they will interfere with agriculture."
Gifts

Do-it-yourself valentines

by CLAUDIA GALLOWAY

Each time a holiday approaches, are you asking, "What shall I give him/her?" Gifts, or something else? This Valentine's Day is no exception. Instead of stealing someone's only heart and flowers, why not break from tradition this year on your valentine and give something you made yourself? As the saying goes, "All we call ourselves inventors, when the gifts we know cost us a single provocation" At Valentine's Day probably more than any other time, it seems people would want to give something that is part of themselves. Some idea then: you and your valentine can give each other and the Earth a new gift that will be very appreciated by planting a tree. Inexpensive young trees are available in local nurseries. You can plant them in your yard or in a park somewhere. (Hint: if you are planting the tree on your own property, better ask the owner first. Believe it or not, not everyone likes trees.)

From another nice thing you can do: plant your tree is to add another attraction. Write both your names, the date, and a secret message you want to convey on a piece of paper, encase it in plastic, and slip it into the ground near the tree. If future generations find some reason to save your tree (parishioners will probably like it), they will find the "time capsule" and know the tree's history.

Getting down to more personal gifts, there are a variety of items you can create for that one special individual. If you can't come up with an idea of your own, don't fret. Most major magazines carry a "make it yourself" section each month, and you can add to your ideas bank from them and adapt the ideas as you see fit. The originality of the Campus attacks

Cleveland, Ohio (UPI) — Oregon State University officials said two students at the school's campus to all but students and faculty in the wake of four-student shootings, one of them the fatal shooting of a coed.

ST. MARY'S HERE IN BASEBALL OPENER

by WILLIAM RUSSELL

The Mustang baseball team opens its 62-game slate today with a game against Saint Mary's University at 3:30 p.m. on the Poly Field. The two teams will also meet in a double header to start at 11 a.m. tomorrow.

This year's Mustang team, led by Coaches Augale Garrido and almost entirely different outlook than last year's ballclub, which finished second in the California Collegiate Athletic Association with a .762 record and gained third place honors on the college poll last year.

"With only seven returning letterman, the baseball team will be working hard to establish their own identity this upcoming season," said Garrido.

According to Garrido, the ballclub will have their whole infield back, which should form the nucleus of the team. Returning will be all CCAA letterman Dave Snow from Cerritos JC. Snow will be stationed at third base where he batted .375 and led the club in runs batted in with 31 last year.

Also returning will be the all-CCAA keystone combination of junior Dave Snow at second base and senior Steve Mcarland at shortstop. Oliver, who gained all-CCAA honors last year.

Cagers try for last chance at title

Two must-win games face the Mustangs tonight and tomorrow night as they face conference foes Cal State Fullerton and San Fernando Valley State in the Men’s Gym.

Freshman games at 8:45 p.m. will precede the 9 p.m. tip-off both nights.

This weekend proves to be crucial in deciding a champion of the California Collegiate Athletic Association. Tonight, conference co-leaders UC Riverside and Valley State clash at Riverside while Fullerton State will fight Fullerton to stay one back of the leaders.

Tomorrow night Riverside will try to avenge its one league loss against Cal Poly Pomona while Valley State challenges the Mustangs. Possibilities are endless and a three-way tie might exist after this weekend-end. But for the locals it is clear that Valley State must defeat Riverside and then lose in the Mustangs who must win both games.

But the Mustangs cannot afford to look toward their thaw with Valley State. Fullerton State will go on the road against all the hands as the Titans have improved in recent weeks. Their latest accomplishment includes a 97-87 win at Fresno State, a team that smothered the Mustangs 105-86.

According to head mentor Ralph Neale, the Titans’ biggest asset is quickness. “They are a tremendous outside shooting team and their 3-4-1 zone press is difficult to crack,” he commented.

The two teams have split their previous matches, with the Mustangs winning the last one in conference play, 91-84. In the earlier loss to the Titans the Mustangs blew an 8-point load.

Saturday’s game with Valley State should bring back some not-so-fond memories from last year. Recalling last year’s pressure-cooker on the Mustang’s court, much of the same situation.

Although the game will not necessarily decide the championship, it will have a lot of bearing on who will be the champions.

In the earlier meeting this year, Valley State took a heart-breaker in the earlier meeting thus year, but it’s a new year with much of the same situation. The conference title was on the line. This time the game will be different, but it’s a new year with much of the same situation. Although the game will not necessarily decide the championship, it will have a lot of bearing on who will be the champions.

In the earlier meeting this year, Valley State took a heart-breaker.

from the Mustangs with an 85-83 overtime win. In that game the Mustangs were down for most of the game but rallied to tie the score and send the game into overtime. Then the Mustangs jumped off to a four-point lead only to watch the Mustangs rally for seven straight points to capture the game.

“In our previous meetings with Fullerton and Valley State their guards really hurt us with their scoring,” Binner pointed out.

In earlier meetings, the Mustangs have been hurt by at least one player that has scored well.

“The defensive work of our guards in the series this weekend will be critical,” continued Binner. But sophomore Pinky Williams is coming off his best game defensively against the University of San Diego when he stopped Stanley Washington well below his average.

The big key for the Mustangs will come from the scoring punch of Billy Jackson, the conference’s leading scorer. Jackson is on his way to breaking the total point record set by Mike LaRochelle in 1966-67. For his efforts last weekend, Jackson was named the CCAA Player of the Week. In career scoring Jackson ranks ninth and is expected to move up to the sixth position after this weekend.

Against Fullerton in the first league meeting, Jackson scored a career high of 36.

Pinky Williams is shown defending Stan Washington in the Mustang-University of San Diego game last week.
