Proposals would reduce contingency by $500

More than $5000 in contingency requests passed through the hands of Finance Committee at their Monday meeting, with continued hearings for next year’s budget.

The contingency requests will be referred to Student Affairs Council tonight for final action. The Engineering Council’s request for $1500 to build a car to enter a Baja race was approved.

The Educational Opportunities Program (EOP) request and reserved $2000 to provide a band for a rally to support the EOP program.

Alternative, a campus literary magazine, will be allowed to publish another issue before Poly and $1000 for approved for their budget. It was stated in the motion that $500 must be received from this issue of the publication.

SAC agenda to cover GSU

A discussion of the Gay Student Union (GUS) proposal and whether to now have state reserves, are scheduled to be on the agenda for the upcoming Student Affairs Council (SAC) meeting.

The second issue to be considered on Monday will be the second reading of the remaining candidates according to the plurality system.

The third Issue concerns the precautions and student body in the special election to decide on the proposal as the final verdict will be made at the April 12 meeting.

The candidates with the least first choice votes is eliminated.

Other issues to be discussed will be a new publisher’s board representative to SAC, and Catch 22, Skip Kelly’s computer and their relation to state documents.

The salary request for a full-time secretary in the ASI office was approved for the rest of this fiscal year. ASI Pres. Pete Evans said that the secretary would cost ASI $5000 for the remainder of the year.

The request from the Museum Department for $2500 for their new art awards was denied. The debate of art awarding traveled to Chicago with the help of $2500 that was approved to help their expenses. The request for $1100 from the faculty for the Advancement of Management will allow a maximum of 10 people to attend a conference in Arizona.

All the requests that were approved by Finance Committee will be presented before Student Affairs Council tonight for final approval.

Ground rules were laid down in Sacramento for university name change negotiations that could mark this week as the beginning of a new application to the Board of Trustees.

The name criteria ‘is met’

Students here will get to vote next Monday on how they think they should be called.

One of the three items to be approved, or disagreed by, the student body in the special election to be held next Monday is whether or not ASI officers should be elected by the majority vote system.

Currently ASI officers are elected by means of the plurality system. According to John Smith, Elections Committee chairman, and Steve Greenberg, who recently resigned the same office after two years, the system works as follows:

Voters mark all the candidates in order of choice. Then the ballots are processed and arranged by first choice candidate. The candidate with the least first choice votes is eliminated.

The second issue to be considered on Monday will be the second reading of the remaining candidates according to the plurality system.

The plurality system was started about five years ago, with one of its mandatory being to prevent run-off elections. According to Smith, It currently takes a special election whenever there need not even be any run-offs if a candidate secures majority of votes during the first election.

The second issue to be considered on Monday will be the election for S.U.C. members. According to Greenberg, the first time S.U.C. representatives were elected five years ago, and last year was the first time they were voted on by the student body as a whole.

The election on Monday, he said, will determine whether or not the plurality system will be used for electing representatives under the plurality system, the person with the most votes wins, either or not they have a majority.

Martines said, “This was not originally part of my Bill, but I go along with it because it’s too much trouble any other way. Most of the schools have more than one representative, which requires mailing to several people at one time.

The third issue concerns the time of elections. According to Smith, the students should take a special election whenever the time of elections or any other way, which could mean just too many run-offs.

Another condition listed by the committee is to have the students with the most votes wins, either or not they have a majority.

Martines said, “This is not originally part of my Bill, but I go along with it because it’s too much trouble any other way. Most of the schools have more than one representative, which requires mailing to several people at one time.

Non-discrimination poll promises a joyous toll

Editor:
We are happy to announce that there is no discrimination at Cal Poly. During the past two quarters we on the Student Discrimination Committee have been trying to uncover cases of discrimination on this campus on the basis of race, sex, religious beliefs, color, or national origin. Aside from a few cases which were dealt with, there had been no feedback from the students or faculty here.

Congratulations Cal Poly—the only non-discrimination, non-racial institution in this society. Apparently we have at Cal Poly have accomplished what the rest of the world cannot.
Auto class for women to be offered by Cuesta

If you are a woman who is tired of being asked whether or not you are out of gas when something goes wrong with your car, or if you are just interested in learning more about the car you drive, Cuesta College offers classes in Automatic Mechanics for Women beginning April 11.

The six-week, non-credit course is held from 7 to 10 p.m. at Cuesta College, Building 100-N, and will be instructed by John Rows, III. Rows said the class will include the basic principles and laboratory experience relating to the internal combustion engine and its components.

How to change a tire, insurance information and guidelines for the assessment of garage bills are also covered he said.

The second series is being offered because of the overlap of students from the initial sessions at Cuesta College, said Rows.

A $2 fee for the course will be required. Registration is scheduled during the first class meeting.

Cuesta College is offering a six-week short course on the techniques of leadership beginning today.

Marcia Duke, instructor of the course and personnel director for the California Division of Highways, says the course is designed to aid those who want to improve their effectiveness as leaders on the job and in organizations.

MENS DEPARTMENT

MENS SPORT SHIRTS Short sleeve, solid colors. Denim and cotton by Arrow. Sizes S-M-L-XL. $5.50

SPORTSWEAR SEPARATES REDUCED All from regular stock. Includes skirts, pants, and tops. Patterned acrylic knits in red, white, and blue. Regular 8.00 to 18.00. Sale ½ price
Construction of dome sets

Construction of a geodesic dome will be the feature at the Mach Club meeting at 11 a.m. on Thursday, April 1.

Jacob Feldman, from the School of Architecture, will speak on the "Mathematics of Geodesic Domes" during College Hour in EW 208. Geodesic domes, a term coined by Buckminster Fuller, a famous architect, are now used for everything from houses to rodeos for rodeo.

Feldman received his Bachelor's degree and Master's degree from the University of Delaware. He has served in the Peace Corps in East Africa before working in the Missisquoi and Saratoga Division of General Electric, and at Simpson and Bratza, a San Francisco architectural engineering firm. Feldman also here as an instructor in September, 1971.

ASL lawyer

Confusion of interest draws debate

This modern society has been attacked as one in which people talk too much and listen too little. This characteristic may be at the root of current grumbles about the ASI lawyer.

A few members of the Student Affairs Council (SAC) have expressed concern because they were told attorney Richard Carsel would not be an instructor here after Winter Quarter. Carsel is still teaching two classes in the business department.

Richard Carsel

When contacted about the agreement, Carsel said, "That's not the way I remember it." He said he did not want to be a full-time instructor, but he enjoyed part-time teaching.

"We were very concerned about the conflict of interest," Pollack said. "We wanted to be sure that in the event of anything that would be reasonable request that this would be free to serve our needs."

"My allegiance is to ASI," he said. "My relationship to the college is employee—attorney. I am the attorney for ASI period, and I protect them, period. If a conflict developed I'd quit."

Carsel is currently teaching two classes. He said the day after he became the ASI lawyer he went to Pres. Robert Kennedy with his resignation.

He said Kennedy's response was something like, "Teach your courses if you want. As long as you're not full time and making your living somewhere else, I don't see any conflict of interest."

He said Kennedy and all of us agreed that if I were a full-time faculty member then I would owe him some loyalty. It's my general recollection that I was not going to be the administration's boy period."

Carsel said he had not received any pressure from the administration at this time.

"It just hasn't been a hassle."

New plans create creek fight

Conflict of interest draws debate

A major conflict between city officials and environmentalists appears to be in the making after San Luis Obispo city engineer Dave Romero unveiled proposals for updating flood control structures at San Luis Creek.

The proposal came at Monday night's city council meeting and were expected to bring much controversy in a battle to preserve the creek's already threatened ecological framework.

Romero's proposal called for three possible alternative changes in water temperature, increased erosion would all net a reduction in the survival of the steelhead trout which inhabit the creek.

Elimination of vegetation, changes in water temperature, loss of insect population and increased erosion would all net a decreased chance of survival for the fish.

Romero also cited the council resolution two years ago to maintain the status quo of the creek. Since that time he pointed out, one mile of direct building has been done on the creek and another additional mile affected in the process of the work.

Action taken by the council was limited to passing the public displaying of aerial photography, among other things, were purchase, rezoning or annexation of the county-controlled land above the creek to prevent expected construction.

The possibility of check dam above the creek was also suggested. This would require a joint venture with the county.

It will be 60 to 90 days before the council will begin serious consideration of the subject because of budgeting concerns to be dealt with beforehand.

March of Dimes:

The March of Dimes is recruiting volunteers for a 16-mile Walk-A-Thon on Saturday to raise funds for birth defects research. Last year's walk in San Luis Obispo involved 100 people and raised $8000 according to Everett. California State March of Dimes Youth Chairman and a student at this college, "I hope there will be more people this year."

Volunteers collect pledges from sponsors to pay them a set amount per mile. Everett said. During the walk they are checked at check points along the route. Then they go back to their sponsors to collect the money.

The walk will begin at Mitchell Park at 9 a.m., following registration at 8 a.m. Everett said. The walkers will travel from Santa Rosa and Highway 1, turning at Cuesta College and following O'Connor Way to Foothill. Going down Foothill the walkers will be treated to a free lunch donated by McDonald's. The route concludes by traveling down Chorro and back to Mitchell Park.

"CONSUMERISM"

Home ec confab date set

"Consumerism" will be the topic of the spring conference given by the Southern Section of the American Home Economics Association.

The conference will be held in Chico State, April 27-28, from 9 a.m. until noon. Admission will be limited to Home Economics majors and one dollar per person.

The class meets every Tuesday from 7-9 p.m. at the Health Center in the CU.

STA structure removed from CU by directors

STA, Gersten asked him to take down the structure on the outside of the building. When Dewing did not comply, Ruthenberg placed a ladder against the outside of the building and tore down the structure, Ruthenberg then left.

Dewing said that STA had not been previously informed that the structure was going to be removed.

Gersten said that the reason for tearing down the structure was because STA had no authority to build on the outside of the building.

Photo contest extended

One to five black and white prints taken by campus students may constitute an entry and be submitted on conventional 16 by 20 Inch boards. Five prints of $40 for first place, $20 for second place, and $10 for third place will be awarded, as well as honorable mention.

All prize prints will be retained as property of the Health Center to be used in display of health education.

SAC approves suggestion box

Student complaints about book and supply fees, library problems, and any other problem in which Student Affairs Council may concern can now be aired through the use of suggestion boxes.

According to Pete Evans, ASI president, SAC has approved the use of 8x10 for the design and construction of six suggestion boxes.

Conceptual designs are needed and students having any ideas should submit them to Evans in his office anytime.

The boxes should be inkbond, water proof, and free-standing.

Lengthy meetings

'Major flaw in SAC'

The extreme length of Student Affairs Council meetings, compared with the minimal amount accomplished during that time, is a major flaw in student government, according to two former members of that organization.

Jim Weedman and Kurt Hoffman, both of whom have left their positions on SAC in the past year, feel that the efficiency of SAC meetings is seriously impaired by vast amounts of time spent unproductively in the Wednesday night gatherings.

Two former SAC members, Jim Weedman and Kurt Hoffman, expressed their views on the minimal accomplishments at extremely long SAC meetings.

Kurt Hoffman, formerly a SAC representative for the School of Business and Social Science, said SAC meetings are "circus-like." Hoffman said that too much time is spent in small, inconsequential matters.

Many of the programs undertaken by SAC are of little use because the programs are often instituted at the wrong levels of student government, according to Hoffman. He decried the use of secret meetings in the past by some of the members of the committee to sway the vote of a single member.

Hoffman, who resigned his position voluntarily when he was elected president of the Society for the Advancement of Management, said a stricter adherence to parliamentary procedure during the meetings would be helpful in advancing the efficiency of SAC.

"It would," he said, "keep people from stomping out of the room, and things like that." In reference to student government in general, the former SAC member cited the considerable student apathy on campus as the biggest hindrance to sound student government.

Another former SAC member, Jim Weedman, who represented the School of Engineering and Technology while in office, was vehement in his discussion on how SAC meetings are handled.

"SAC is ridiculous. They argue over nothing, and never come to conclusions." In reference to student government in general, Weedman said the considerable student apathy on campus is the biggest hindrance to sound student government.

For the Advancement of Technology, said a stricter adherence to parliamentary procedure during the meetings would be helpful in advancing the efficiency of SAC.

His efforts to graduate and work part-time, seriously hampered by the lengthy meetings, were also reasons for his withdrawing from the committee.

Abortion leads feminist...

(continued from page 2)

Weedman cited Chairman Gusenike and Doug Skilling as "chief sources of irritation."

"If she wanted to hear what somebody said, usually because they were going to agree with her, she would recognize them whether they had their hand up or not, often times at the expense of someone who had his hand up and should have gotten to speak."

Weedman said the massive meeting time of meetings with little in the way of accomplishment, and the underhandedness of the proceedings were the chief reasons behind his submitting his resignation.

His efforts to graduate and work part-time, seriously hampered by the lengthy meetings, were also reasons for his withdrawing from the committee.

That’s the way the old ball bounces

Tom Martin attempts recovery after landing on a long reach.

by KEITH ELDRIDGE

Only three chances are given the Mustang tennis team to prove their prowess of the sport over the offerings of the rest of the league. The first opportunity arrives swiftly as the San Fernando Valley State Matadors host a three-day California Collegiate Athletic Association tournament Thursday through Saturday.

The locals don’t expect much competition except from the hosts of the round robin affair. Cal State Fullerton and UC Riverside haven’t shown to be strong in the past and Cal Poly Pomona will not field a team.

"It looks as if Valley State has to be the favorite since they edged us out of the title last year and I don’t see much of a change in the two teams," said coach Ed Jorgensen.

The Mustang personnel has changed, however, as only three out of the six-man squad are returning lettermen. Two of them are National Collegiate Athletic Association college all-Americans.

Sophomore Dan Lambert, an architecture student from Arroyo Grande, received his status by putting fifth in the singles of the tournament held last year in Greensand, Indiana. He and teammate Tom Martin paired-up in the doubles category and progressed all the way to the semi-finals giving Martin his all-American standing.

A senior majoring in physical education, Martin coupled with Lambert gives "the strong one-two punch that is all important for a team to be successful," said Jorgensen. "Those were the two responsible for giving the Mustangs their sixth place finish in last year’s nationals," he added.

Aside from the top two spots, the netters have strengths to rely on. "Along down the line we have a good amount of ability giving this year’s group the potential to be the best in this school’s history," said Jorgensen.

The line consists of only the other returnees, junior Kent Coble; the new face, In this quarter’s line-up, Harold Ertelt; junior Dennis Scullion, and senior Jack Lodick.

The other two conferences that will be similar round robin tournaments. One to be held at Cal State Fullerton and the other here. The league title is decided by these three encounters.

The home teams enter tomorrow’s league opener after a disappointing defeat in the hands of the University of San Diego here on Easter Sunday, 4-4. This marred the group’s record with the 5th loss in 18 attempts.

The four home victories were collected by Lambert, Martin, Scullion, and the doubles pair of Coble and Ertelt in the matches that lasted over four hours. Martin’s singles match dragged on for nearly three hours.

Coble, Ertelt, Lodick, and the duo of Lambert and Martin along with Scullion and Lodick all came up on the short end.
