**SEC directs vote veto**

by MALCOLM STONE

This week's ASI election may have been invalidated as a result of a vote by the Student Executive Cabinet (SEC) Wednesday morning.

The vote was taken by the ASI Press Pete Evans to veto Student Affairs Council's earlier decision to hold new elections for ASI president. It would take a two-thirds vote of student Affairs Council to override the veto.

ASI bylaws grant SEC the power to direct a presidential vote of SAC actions.

The veto was expected to be placed upon the agenda of SAC Wednesday night. A two-thirds vote must be reached before the vote and substantiate the current election. Failure of the override would result in a recertification of the election and consideration of approval of Robyn Baggett and Harmony Johnson.

John Lange, Chief Justice, was the only ASI officer on Wednesday who took charge of student government this summer.

The meeting started with a review of the proposed budget, but Glenn McCullough, Publishers Board representative, said most of the people at the meeting were concerned with the election issue.

He said it was "better to take up the business that concerns 13,000 students."

Two points discussed at length were whether SAC had acted properly in handling Elections Committee's report and what effects actions of student government in recent weeks had on student opinion of it.

Some members of SEC and SAC thought Elections Committee had not been given an opportunity to finish its report. Jim Smith, the committee's chairman, said the group had prepared two recommendations but decided during the meeting not to bring up the second one.

Mariann Debbert was against the veto. She said the group should give consideration to the decision.

"Talking about something that's in process now," she said, "It looks very bad to override the recommendation of the group that was responsible for the election."

Dave Web, Board of Athletic Control representative, said the recommendation should be passed.

He said the motion in SAC for a new election was a "ramrod job" and SAC's actions were "way out of line" since Elections Committee's second recommendation was not heard.

The second recommendation was that the election of Baggett and Johnson as ASI president and vice president last fall run again.

Curt Laster, acting as Baggett's proxy, moved that Elections Committee read the original recommendations at last week's meeting and, and he moved the motion carried.

**Students and staff turn handwork into profits**

by JANIS GLOCKNER

The Cage offers a variety of wares for sale, including jewelry, leatherwork, pottery, clothing and many other items. The Cage, included are graphics which consist of silkscreening, photography, paintings, and sketches.

"The response has been better than we expected," Miss Neuman said. "Sales have really picked up in the last week or so."

"Many people come in for ideas first, and I think they enjoy being able to look at things they can't afford to buy right now."

Bill might ‘self-destruct’

In recognition of his “long unselfish service for the benefit of California agriculture,” Harold Wilson, administrative vice president here, was one of three Californians to be named an honorary member of the Agricultural Commissioners Association of California. Wilson was commended and awarded the life membership and resolution during the annual rural-urban barbeque of the San Luis Obispo Rotary Club at the Tar Springs Ranch near Arroyo Grande last week.

Before coming to this school, Wilson was the vocational agricultural instructor at Exeter High School in Norwalk. He started teaching here in 1936 as an animal science instructor specializing in ewe classes.

He has been a member of Alpha Zeta, the honorary and service fraternity of agricultural students in colleges and universities, since 1932.

The People’s Lobby has taken it upon themselves to show what a bad bill the act really is. When you listen to their arguments you find that instead of appealing to your intelligence by presenting the merits of the act, they Instead appeal to your emotions by asserting that big business is spending slot of money to defeat the act. Just remember, a vote for Prop. 9 is not a vote against big business, it is a vote against the environment.

Internship alternative replaces 'dull' projects

The Social Science Department has devised a replacement for the often-dull senior project - an internship.

The project involves working with the district attorney, public defender, county assessor, administrator, and other county offices, giving students the opportunity to make worthwhile contributions to the community and gain experience for future jobs.

Dr. George Clucas, social science instructor, devised the department, Dr. Allen K. Bilt and James Candidate, student coordinator.

Twenty-five students were chosen from 16 applicants and assigned to offices to work under the direct supervision of a county department head.

Students are completing their projects in about one quarter and, although the program is still in its experimental stage, it may be extended to two or three quarters in the future. Because of the enthusiasm expressed, more time may be devoted to this type of work to increase the average 12 hours each week for 16 weeks. Of those who were chosen, Tina

Baseball field result of class

A senior seminar class in construction engineering from this campus has created a new baseball field for the people of Santa Margarita.

Under the supervision of Jack Lewis, seminar instructor from the School of Architecture and Environmental Design, the 15-member class began March 31 with the designing of the new field, preparation of cost figures, scheduling of work, and the arrangement for the necessary equipment.

The campus student chapter of the Engineering, Grading, and Contracting Association cooperated in providing land moving equipment needed in the project.

The baseball field was built under the auspices of the Santa Margarita Civic Association on the northerly side of Highway 38 at H Street in Santa Margarita.

The association raised $8,000 for the new field, and then found that their funds did not even come close to the actual cost of construction.

The college students, using borrowed equipment, excavated, graded, and prepared the site for the ball diamond. They also designed backstops and grandstands to be built at a later date.

Lewis is working in the County Personnel Department researching various acts passed four years ago dealing with negotiations between employer and employee in San Luis Obispo County.

A policy of record retention for the Office of General Services is being set up by John Kwan to help determine how, where and which record should be kept or destroyed.

Peggy Carroll and Elaine Hassenzamp are working for the county library in predicting demands for library services within the 50-branch system.

Through interviews and meetings, Thomas Kahoe is investigating the administrative side of the Police Department including how cases are handled. Aldie Anderson is helping with the female parole case.

Students are also involved in other departments which include Local Agency Formation Commission, assessor, agricultural commissioner, and county airports.

Active seniors to reap rewards

It is time for all seniors who have been actively involved during their college years to reap their final rewards.

According to Nancy Peterburgh, Awards Committee chairwoman, any senior graduating by September 1973 with 100 activity points qualifies for Gold Key Awards.

Activity points are cumulative from participation in college clubs, committees, athletics, offices, counsel, or any other college activities.

Applications are available in the Activities Planning Center in C.U. 117. Completed forms are due in ASI box 22 by Friday.

Those seniors who are eligible will receive a certificate and a gold key medallion at the senior banquet.

For further information contact Nancy Peterburgh at 841-411 or Bob Walters at 946-8747.
Power project explained

The broad expanse of the Kalparowita Plateau in southern Utah, above Lake Powell, may not know it and yet, it is the planned site of "the largest power project ever undertaken in the U.S. or the world," said Robert Currie of Southern California Edison.

Currie, project manager of the "Kalparowita Project", spoke here last week as a part of a continuing series of seminars on power systems sponsored by the Electronic and Electrical Engineering departments.

Construction of this mammoth project is scheduled to begin in May, 1974. By June, 1975, the first unit of 1,000 megawatts will go into operation. By 1980, all six 1,000-megawatt units will be in operation, said Currie.

Slides of a drawing of the project portrayed six smokestacks as 700 feet tall with boilers 250 feet high. Water drawn from Lake Powell will be used by cooling towers to cool the water at the project. He said that there is a half-mile of coal in the area.

"Over the life of this project we would burn over half-a-billion tons," he said, later adding that the planned life span of the project is 30 years.

Of the author decides which will be entitled as exhaust, 80 percent of it will be collected and buried, he said.

Currie mentioned that the first phase of the project will cost over $800 million, and 30 percent of it will be used for pollution control. The Kalparowita Project is the combined effort of the Edison Company, San Diego Gas and Electric, Arizona Public Service Co., and Salt River Project.

"New developments in power systems" will be the subject of the last in the series of seminars on power systems sponsored by the Electronic and Electrical Engineering departments. The meeting is scheduled for College Hour Thursday in C Sc 291. Sam Aboulhosn, exchange faculty member, will be speaking.
