End marks beginning

Well, it's finally finished.

Since Aug. 23, a handful of journalism students have met daily from 3 to 5 p.m. in a 46-page, welcome-back-to-campus issue.

Under normal conditions, with a full staff of reporters, layout people and copy people, a 46-page paper takes weeks of planning with the work divided among many people.

But there are six journalists now who feel they could use another summer vacation to recuperate from this first issue. A little pat on the back:

Steve Gale almost single-handedly sold and placed the advertising on these pages. Some readers may think he did the job too well, but Mustang Daily is self-supporting (the newspaper is budgeted to make as much money as it spends) and plenty of advertising is a necessary evil.

Some readers may notice a lack of local news. But without Tom Marshall's prolific typewriter and Keith Eldridge's willingness to track down sports news, would have been even less.

Cathy Phoenix deserves the credit for the photographs, printing and taking the photographs of most of them between classes and finals, including the front page.

Tony Santos, managing editor over the summer and in the same spot this fall, wrote stories, organised everything and handled heads putting in more long hours than a person should have to.

Complaints about layout should be directed to the editor, for that was her responsibility.

Reinforcements for the tired had done more than to show up here—many good reporters will be returning along with some inexperienced writers. All of them will share a great social life, but Mustang Daily will wheedle as much writing time from them as possible to produce a daily newspaper abreast of the latest news on campus and in the outside world.

Five pages a week, nine weeks a quarter, journalism students will put out work, time and talent to produce communication in black and white for 12,300 students. It's going to be a long year. And it looks like it's time to begin.

Programs implemented to welcome all students

ROBIN BAGGETT
All President

It's a busy, productive summer and now we're ready for more of the same this coming school year.

Last spring we made some big promises and announced we would be trying to keep them. The All office has been hopping ever since and contributing to the success of many committed individuals, many new projects have been initiated.

One of the major new projects has been Roadside— a phone service set up to answer any questions you might have regarding Poly and the community. Any question at all—call 586-8814.

Another project is our Student Housing Service—a student-oriented housing program to help you with your housing needs. If you need a place to stay or roommate, see Mark Sandy, Housing Director, in College Union 101. We also established a Legislative Review Committee, a centrally-located Tutoring Center in HSS, a new magazine for intercollegiate volleyball team and a smooth reserved season ticket program for the football games for your convenience.

It's been a good summer; but now we're ready to move into fall. The policy at the All office is open—door— we'd like to help you with whatever your needs are. If you're content with life, then come in and let us see what we can at least meet you. As I try to make it in some wise sense.

This summer the majority of our concentration has been in the area of student services. In the fall we will be moving more into the academic affairs of concern to students (faculty evaluation, grading, curriculum, etc.).

The student services we established will remain and will be the vital source of input that we use in academic matters.

Let's make this the year things really get accomplished. We would appreciate and need your help!

Mourning for humanity

by PAUL RIMON

"Man's inhumanity to man makes countless thousands mourn." The words inscribed at a monument at Attica State Prison, ample, and yet just as appropriate now as they were a year ago at Attica.

A few weeks ago the world stood afiend for an eye, is neither morally acceptable nor conducive to peace. A society bent upon revenge and the avenging of blood should not be surprised at the turns its beliefs are taken and at the form of increased violence.

I, too, have momentarily considered death to the Arab, yet I know that goes against everything I believe in. Death, certainly, is no way to punish people.

That anger is necessary because there are some, unfortunately, who would commit the same thing, or worse.

That solution appears to be an option that violence breeds violence and that in the end it is only that which is violent that is left standing. We must strike at the root of the disease and not just at the symptom.

Since Aug. 23, a handful of journalism students have met daily from 3 to 5 p.m. in a 46-page, welcome-back-to-campus issue. The All office has been hopping ever since and our community has "welcomed" during its Campus has "welcomed" during its Fall Quarters over the years.

As a group—students, faculty, staff and administrators—we constitute a unique community that has a unique goal: a goal generally termed "higher education."

Although the obligation of serving out the common good varies for each of us individually, it is for most of us a responsibility that strangely provides a sense of freedom. It is a type of freedom from a sense of trying to work together, sharing and helping.

Fee increase blocked

Foreign students appeal case

California's Supreme Court has blocked an increase in the fee that state colleges and universities charge foreign students, according to United Press International.

But, at press time, Registrar Gerald Punches was still planning to charge the increased yearly fee of $11.10 voted by the trustees in 1971.

"We haven't received information from the chancellor's attorney yet concerning that (the latest court action), so there is no official position," he said.

Several students filed a suit early this year on behalf of all foreign students in the state college and university system.

Attorney Lawrence H. Elsberg of Los Angeles, who is representing the students, contends that an increase in the fee amounts to a breach of contract since the students came to this country with an understanding of what they would have to pay—but that amount has been raised.

Fees have advanced from $20 to $200 and now to $210 in the past five years.

An injunction was issued after the students filed suit forbidding the colleges from collecting over $20 per unit or $200 for the academic year in fees.

"The original injunction applied to the State Spring Quarter fees," Punches said. "An appellate court issued a writ which expressly permits the colleges to collect $210 for the academic year for Fall Quarter, without a breach of contract."  

"What we might look forward to here," he said, "is another stay."  

The UPI article said that the students are appealing the ruling which went against them in the lower courts. The supreme court, according to Punches, will face the same gamble.

If they pay the full fee and the foreign students win the case, refunds will be forthcoming.  

However, if California wins the case and students did not pay the full fees because of the injunction, the students will owe back fees to the university, according to Punches.

Learn to lead

A special class designed exclusively for presidents of clubs and committees will be offered this Fall Quarter, according to Paul Takahage, coordinator of communications.

The instructor will be Dr. Dan Holley, director of the Chancellor's Office, and the class is listed under Psychology 381-01.

The class meets one hour a week at 11 a.m. on Tuesdays. There is no textbook, and the specifics of what you've learned while chairing your groups meetings and coordinating events and activities.

Punches had advised students to pay the full fee despite the injunction that did not require it. Students who did not take his advice will find themselves owing refunds, he predicted.

If the chancellor's office directs the colleges to accept a lower fee this quarter, in line with the most recent court decision, students will face the same gamble.

Wanted, students who will be attending here this Fall Quarter as new students during Summer Quarter will have the same first-choice privileges once again, said Gerald Holley, director of admissions, records, and evaluations.

Registration fees for this quarter range from $6 to $66 per unit or a fraction up to a maximum of $66 for 14.6 units or more. Maximum charges for Fall Quarter, $66.

Additional fees possibly incurred are a $4 parking permit for cars or a $2.26 charge for parking two-wheeled vehicles on campus.

Out of state U.S. residents are required to pay a tuition fee of $89 for each unit or a fraction up to a maximum of $1,110 units or more. Maximum tuition for non-citizens is $5,550 for the academic year.

Holley said students will be assessed temporary identification cards until the permanent ones are processed. He expects the permanent cards to be available by Oct. 23.

To assist with registration, procedures, which begin with long rows of anxious students outside the Men's Gym and eventually wind up somewhere in the depths of the College Union, 250 students were enlisted to serve as monitors.

For those who can't decipher a military time schedule and consequently confuse their respective registering time slots, late arrivals will be accepted at 1500 to 1700 hours (4:30 to 5 p.m.).

However, for students who miss the two-day registration period all together, the task of registering includes attending each class desired to be added if space permits and paying a $4-dollar late registration fee. The late registration period begins on the second day of classes, Thursday, Sept. 16, and continues to Monday, Oct. 2.

Health cards still for sale

An optional health card may be purchased at the Foundation center's office in the College Union, according to Dean of Students Everett Chandler.

Failure to have the card is Oct. 9. Price for an academic year card is $88.
Officers work on goals

by TOM MARSHALL

Student government campaign promises are usually made in the spring, only to be forgotten or neglected in the fall. However, the verbal commitments ASI Pres. Robin Baggett and Denny Johnson, vice-president, pledged during a right election last year apparently haven't slipped their minds.

Baggett and Johnson based their campaign on the slogan "working together for unity in 73-74." The number of new student services and committees (run by students to meet student needs) initiated during the summer by the two indicate an attempt to validate that statement.

"Student interest develops moment the promises are usually made in the cantor," said ASI Pres. Robin Baggett. "We are waiting to see what happens in the new coeducational dorm in North Mountain. If the school wants to compete with off-campus housing and make money, they will have to ease the restrictions in the dorms," Baggett said. "We are just waiting for school to start."

Baggett has also been working on the passage of State Senate Bill 146, which would reclaim 96 percent of the money received from parking fines and violations on campus back into the state fund instead of going to the county.

One of Baggett's main goals as center chairman of the fall quarter is to get 96 percent of the student body registered to vote in the November election.

"Our goal is to make it convenient for students to register. We're going to flood the class registration lines with registrars," Baggett said.

Another new program is the Student Financial Counseling program which will enable the student to receive information on all financial matters that concern students such as loans, grants, scholarships, and investments.

Still in the planning stages is a Student Job Coordination service, an outgrowth of the Student Financial Counseling program, which will allow the student to find employment through a complete index of jobs.

Student involvement may be an effective goal for any administration and the Baggett-Johnson administration is attempting to meet this objective, by beginning ASI Open Houses to inform students of the structure of student government.

According to Johnson, the first two open houses will be for new students who voiced interest or had questions about administration on their registration activities card.

"We will inform them about the structure of student government, how the money is spent and how it is used in the administration," Johnson said. (continued on page 6)

Baggett and Johnson programs started.

(continued from page 4)
We plan to have open houses every two or three weeks during the school year. They will be open to anyone. It will be an open house with administrators and SAC (Student Affairs Council) reps present to answer questions and educate the people about student government," he explained.

When asked how he intended to reach the returning student, Johnson replied, "John Holley and I intend to make presentations before all the clubs on campus about involvement in student government. We hope to make it in three or four club meetings, starting at the start of the fall quarter and return to each club at least once or twice during the year."

One program, which evolved during the Pete Evans' administration but never really got off the ground as a student service, is legal aid. According to Johnson, students can go to CU 216 weekdays between 9 a.m. and 5 p.m. with any type of legal problem and gain help from prelaw students who comprise the legal aid committee. The committee will answer small procedure questions, such as whether or not the student needs to go to small claims court over a certain matter.

Any questions that the committee cannot answer will be turned over to one of three local attorneys who will address the student as to whether he needs a lawyer or not.

Student Roundhouse, a new student information service, has been created this summer by the ASI. The Roundhouse will be available through the Gay Student Union litigation. "We can't put a price on a person's right to do what he wants. We usually take the word from up or on the hill as valid. But this time we are testing the power of the administration," Arrona said.

Gene Peters, from Business and Social Science, also sees the administration pressing to implement new programs.

Sanito Arrona, representative of Human Development and Education, is wary of the summer expenditures for new programs. "You have to develop a priority list for funding. Some of these new programs should be put off until they could be looked into a little more. I'm quite sure at how they are hitting contingency and officer's reserve. Robin was chairman of the Finance Committee last year and should know better," Arrona said.

"The volleyball team is an example of a new program which should have been looked into more. They will dip into the Board of Athletic Control (SAC) to fund it and SAC in the hole now and has no reserve. Volleyball, Roundhouse, etc. should have been put off until next quarter. SAC is supposed to be just for emergencies," Arrona explained.

"I was a Baggett supporter during the election and am turned off a little bit. I don't think the Evans' people will work with them unless they stop trying to railraod things through," Arrona said.

"They are doing a fine job. To open a gap between them and the school administration is more efficient." Arrona added.

Ray Bennet, from the Poly Royal Brotherhood, backs Baggett and Johnson and feels the new programs will benefit the school. "They are doing what they started out to do. They are getting it done this summer. I've never seen a guy like Denny with so much money was spent during emotional problems. The Student Roundhouse includes academic information, plus a listing of services and hours of the local merchants. Also to be included will be information concerning landlords.

SIC alizes up Baggett-Johnson

by TOM MARSHALL

Members of the Summer Interim Committee (SIC) are having mixed feelings about the Robin Baggett-Donny Johnson administration.

During Summer Quarter, the new SAC administration has implemented many new student committees, services and programs, however some SIC members feel that these new programs are being pushed through by ASI Pres. Baggett and Johnson, SAC vice-president. It is feared by these members that too much money was spent during the fall quarter and return to the normal procedures followed last year.

"I believe they are ramrods. When they get a specific program that they want, there is nothing going to stop them. They are powerful, very forceful. This will be good for the school. Robin and Donny are totally involved and give their job full attention. They have pushed a little too hard on some programs they have presented.

The meetings hopefully will be shortened by allowing SAC representatives to speak first on a subject, followed by visitors only after all SAC reps have made their comments. The visitor feels some pertinent information has not been heard.

"SAC members have priority because they are the elected representatives of the students," Johnson explained.

Baggett has appointed Paul Tukurana to the new position of Communication Coordinator, whose main objective is to build student interest in student government, and to communicate with other schools concerning student interest and involvement.

The ASI president is also trying to obtain office space for the SAC representatives from each of the on-campus clubs on campus. The SAC reps would be available in their offices during certain hours to discuss student questions and problems.

"Last year some students didn't even know what a SAC rep was," Baggett said.

"They are doing it off good" according to June Kato, from Science and Math.

"Denny is doing a good job in SAC. He has come up with some good ideas. If it's for the student, it's worth spending the money," she said.

Clay Bowling, representative from the College Program Board, feels that the "whole administration is more efficient.

"They are doing what they started out to do. They are getting it done this summer. I've never seen a guy like Denny with (continued on page 7)

Clay Bowling started," Peters said.

Roundhouse has answers for students at fingertip

Printers gain 'favorite' press

A high precision Miehs Favorite 18 offset press will be ready to roll as a new addition to the printing department this quarter.

Made in West Germany, the press is very high precision capable of extremely critical work at high speeds. It can print from tissue to heavy cardboard with speeds up to 10,000 sheets per hour.

"The offset field is growing and we are trying desperately to keep up with the field," said Steve Mott, of the printing department here.

The press itself can print books, periodicals, full color pictures without too much effort.

"The press will be used mostly for process color work," said Mott.

"We can now handle more students in the advanced offset course, and have a little more depth in the curriculum of offset.

There is more automation on this press in the way of remote control devices than any in the past," said Mott.

"The cost of the press was $20,000 paid for through an appropriation from an equipment budget allocation received by the graphic arts department.

Arrange-along-with...

Viewers throughout much of California will have an opportunity to learn more about the art of flower arranging as a result of an educational television program series produced by this campus.

Plans for airing the 16-week program series on Television Station KHDK, Channel 44, San Francisco, and television Station KCET, Channel 28, Los Angeles, were announced this week by Dr. Don M. Morris, associate dean for continuing education.

The program series, which had its premiere on Saturday, March 10, and spring on two stations in the Central California Coast area, features Robert L. Gordon, a member of the university's faculty who is widely regarded as one of the world's outstanding floral designers.

Titled "Flower Arrangement," the color program series will begin its run on KHDK on Saturday, morning, Air time for the entire series, which began its run on KHDK, is 8 a.m. The remaining programs of the series will air irregularly on KHDK, from 8:30 a.m. Tuesday, Oct. 2, will be the opening date for the series on KCET, which is the Public Broadcasting Service station for the Los Angeles area. Air time for the entire run of the series on KCET will be 8:30 a.m.

SIC sizes up Baggett and Johnson team.

(continued from page 4) as much communication as that guy's got. There has been a complete change. This is evident by just looking at the change in the ASI office," bowling commented.

Foundation sells pickups

The Foundation has three surplus vehicles that will be sold to the highest bidder, according to Jim Neal.

The vehicles, all half ton pickups, may be examined at the Auto Shop on campus during business hours.

Sealed bids must be submitted to the Foundation Business Office, OU 18, by 5 p.m. Oct. 1. Bids will be accepted for one or more of the vehicles, but must list offering price for each vehicle.

The three vehicles are a 1963 International, a 1959 Chevrolet and a 1959 Chevrolet.

For further information call Frank Blake, Foundation Accounting Office, OU 321.

Woman pirate

An 18th Century woman pirate named Anne Bonney terrorised much of California claiming to be pregnant.

Cuesta College classes

Organic class teaches basics

Jesse Arnold, well-known Cambria landscape gardener, began a second year of teaching organic gardening in Cuesta College short courses Sept. 30. There will be six Wednesday evening sessions, from 7 to 10 p.m. in the college Board Room, 1612.

Arnold says the course will provide lecture and laboratory experience in basic organic gardening techniques, including composting, mulching, organic fertilizers, methods of insect control, and basic growing techniques.

There is a $3 fee for the Community Services course. A second session will be held from April 23 until May 30.

Auto mechanics course expands to three times

The highly successful and popular short course in automobile mechanics for women at Cuesta College is being expanded to both beginning and advanced programs, and classes will be held at the main campus and in Paso Robles.

Dr. Jim Greathouse, director of Cuesta College Community Services, said demand for the six-week non credit course, will necessitate three sections of the beginning course in the fall semester, and three sections of advanced education in the spring semester.

The first section of the basic course opened Sept. 18, from 7 p.m. to 10 p.m. in Building 1000-7CD at Cuesta College, and will be held each Tuesday evening through October 24.

The second section on the main campus will begin Feb. 15, and continue through March III. John Rowe, III, will be the instructor.

The Paso Robles course for beginners will open Thurday, Oct. 5, and will meet each Thursday from 7 to 10 p.m. at the J. M. Wldman, Inc., Service Department. Jerry M. Wldman will be the instructor.

The two sections of advanced training on the main campus will begin Tuesday, Nov. 7, and Tuesday, April 3, respectively, and the advanced section at Paso Robles will begin Thursday, Feb. 10

There is a $3 fee for short courses at Cuesta College, and registration takes place in the classroom, the first night of each course.

Woodcarving class teaches techniques

A six week course for the beginning woodcarver opened at Cuesta College Sept. 18, and will be held each Monday evening from 7 to 10 p.m. in the college art gallery.

Mrs. Valerie Simpson, Shell Beach artist, is the instructor in the course which will teach basic techniques in creating simple sculpture and designs in wood.

Mrs. Simpson says that following a brief introduction to design, the student will explore the possibilities of making panels, room dividers or simple sculpture pieces in redwood or other suitable woods.

There will be a $3 fee for the Community Services Program course, and an inexpensive woodcarving set, priced at approx. 80, will be needed.

Local student vote aim in registration campaign

The Voters Registration Committee will have tables set up during fall class registration, Sept. 21 and 22. They will be located in Chumash Auditorium and in the College Union plaza.

Students can sign up to vote from 9 a.m. to 5 p.m. on Tuesday, 8 a.m. to 3 p.m. on Wednesday, and 9 a.m. to 2:50 p.m. on Thursday.

Mrs. Vanlengerbe was appointed by Robin Begetti, ASI president, to head the registration drive. She is chairman of the committee. Mrs. Vanlengerbe said that they are encouraging students to register and vote at their college addresses.

They will have information available at the tables concerning obtaining absentee ballots.

If a student is 18 years old by Nov. 7, and a United States citizen, he can register to vote.

Three tours of Hearst Castle will be included in a Cuesta College short course studying the Historic San Simeon landmarks.

Cuesta College series include Hearst Castle

"Hearst Castle: Romance, Legend, and Fact," will be presented as a seven-session short course at Cuesta College. The four Tuesday evening classes began Sept. 19 at the main campus, and will meet each Tuesday evening, from 7 to 10 p.m. in the Board Room, 1612.

There will be three Saturday evening sessions which will be tours 1, 2, and 3 at the Castle.

The course will be taught by Woodrow Yost, art instructor at Paso Robles High School, a member of the permanent art faculty at Cuesta College, and a former Hearst Castle guide.

The class sessions will include slide talks in narrative style about the romance, legend, and facts of La Cuesta Encantada (The Enchanted Hill), and the Castle sessions will be guided by the instructor.

There will be a $3 fee for the course, plus an additional fee for the castle tours.

Tourists litter now, pay later

by MURRAY J. BROWN
UPI Travel Editor

The Great Escape is in full swing with millions of Americans touring across the United States by plane, train, bus and car to enjoy a respite from the routine and marvel at the manmade wonders.

Oddly are they'll come home with souvenirs—pine cones from the mountains, sea shells from the shore and, perhaps, an ashtray or towel, or two. Certainly there will be photographs showing Mount Everest, the shore and, perhaps, an ashtray or towel, or two. The Oroat Eacape La In full

Photos won't show "Litter Landscapes"... Pop and Sia and Junior obviously.

A more down-to-earth concern of the modern traveler is not to incur the wrath of law enforcement officers who have some pretty strong feelings of their own on littering.

Not long ago, an anti-litter expert estimated that Americans dump more than 40 million tons of trash annually on our roads, beaches, parks and other public areas. If piled one-foot high, he said, that much litter would cover the highway between New York and San Francisco, or about 1,000 wipe out the deliberate litter bug.

The litter bug, however, is not a phenomenon of modern civilization. Keep America Beautiful (KAB) Inc., the national non-profit environmental improvement organization, reported that five centuries before the birth of Christ, Greeks visiting the temple of Aphrodite were admonished not to litter.

Specifically these ancient Greeks were warned to stop and eat food scraps, lest they incur the wrath of the gods and temple nymphs and risk being barred from the sacred precincts of the goddess of love.

A more down-to-earth concern of the modern traveler is not to incur the wrath of law enforcement officers who have some pretty strong feelings of their own on littering.

All 80 of the United States and countless local communities have anti-litter laws, ranging from fines to prison sentences and other penalties. Canada also punishes litterers as do many other foreign countries in Europe and Asia.

In many U.S. communities, a convicted litterbug is likely now to draw a "cleanup" penalty rather than a fine or jail term. For example, he could be sentenced to spend a number of days cleaning up litter along highways, beaches or other scenes of his crime.

Litter bugs not only despoil the environment, they also hurt the taxpayer. It cost more than 181.8 million dollars. Using litterbags, baskets and other trash receptacles saves tax dollars for everyone.

Powers added that all the laws passed and all the money spent to save our environment for the generations to come could not wipe out the deliberate litter bug. He suggested every American could help by not only cleaning up after himself but making sure others do too.

The ancient burghers of Antwerp, Belgium, were among the first to crack down on litterers. They passed a law in 1446 ordering that all pigs kept within the walls of the town be gotten rid of within 14 days because they dig into litter and spread it everywhere.

Don't you be a pig.
We know the way
a man should look.
Like a man.

Eight men and a woman will be honored as distinguished alumni during 1972 Homecoming festivities on Friday and Saturday, Oct. 20 and 21.

The university’s alumni association will honor the former students of its seven instructional schools who have distinguished themselves in their fields of endeavor and in community service.

Nine distinguished alumni will be honored by campus during Homecoming festivities

The honorees are:
—Robert J. Conkling, vice-president, Electric Welding Division of the Linde Company Division of Union Carbide Corporation, New York, is one of two men chosen from the School of Engineering and Technology. Conkling was a mechanical engineering major at this university. He also served as a part-time and full-time faculty member in the welding and metallurgical engineering department before leaving the university in 1968 to join Union Carbide.

Conkling has served as a field engineer for the corporation in the San Francisco and Los Angeles areas and, since 1961, has held management responsibility in the New York office. Active in the American Welding Society (AWS) and the National Electrical Association, he received the 1972 AWS Certificate of Merit.

—Jack K. Anderson, superintendent of Yellowstone National Park, has been named the distinguished alumnus for the School of Agriculture and Natural Resources. A native of San Luis Obispo, Anderson studied ornamental horticulture at this university from 1946 to 1948 before entering the national park service. He also attended California State University at San Jose. Anderson began his park service career at Sequoia National Park in California. His career has included many assignments—he directed the “See the U.S.A.” program, the study of the “Potomac National River, Plan,” and the study of the “Six Mile” George Washington Country Parkway, and directed the tri-state governors study team in Wyoming, Montana, and Idaho.

He has received two superior performance awards, the meritorious service award, and the distinguished service award (Associate Department of Interior award). At Yellowstone National Park, Anderson has been responsible for preparations for this year’s centennial celebration.

—Martha Elchorn, now involved in consumer and homemaking education newsletters, coordinates extension courses, and serves as the coordinator of In-Service Education, UCLA, for the Bureau of Homemaking Education, State Department of Education. As such she conducts statewide extension meetings, edits consumer and homemaking education newsletters, coordinates extension courses, and serves in management of statewide conferences, and is a director of the Educational Professional Development Act project.

As a student at this university, she was active in Ruma Economics Club work and served on the Poly Royal Buard.

—Homer Delawle, FAIA, of San Diego has been named the distinguished alumnus for the School of Architecture and Environmental Design. Delawle is a 1961 architecture graduate. He is president of Delawle, Macy and Henderson, AIA, of San Diego.

A noted commercial and residential architect, Delawle has served as the master planner and consulting architect for the Tel Aviv Zoological Gardens in Tel Aviv, Israel.

Delawle’s firm has won 18 American Institute of Architecture-affiliated design awards. He was elected a fellow of the AIA in February. He is a member of the planning commission for the City of San Diego and served as a member of the mayor’s housing appeals and advisory board, and on the boards of directors for urban coalition.

—Robert J. Wilson of Spring Valley has been named distinguished alumnus for the School of Agricultural Sciences. Wilson earned a Bachelor of Science degree in social science in 1967.

Nine alumni to be honored...

The author or co-author of 30 scientific manuscripts is a member of four honorary societies, a senior member of the Institute of Electrical and Electronic Engineers, and serves as a consultant to numerous federal agencies.

Dr. Charles W. Patterson of Middletown, Ohio, was selected as one of two distinguished alumni for the School of Science and Mathematics.

The distinguished alumni were chosen from nominees submitted by the seven instructional schools. A committee headed by Donald J. (Dutch) Van Harrewald selected the nine distinguished alumni. The San Luis Obispo resident, who graduated in mechanical engineering in 1960, was a distinguished alumnus in 1997.

The nine award recipients will be honored at a dinner hosted by Dr. Robert E. Kennedy, president of this university, and will be guests in the reviewing stand for the Homecoming parade at 10 a.m. on Saturday, Oct. 21.

Draft ceiling reaches 95

The Selective Service System has announced that the draft ceiling for alternates in the Panama Canal and the Armitage in the December period, with the majority of inductions taking place in October and November. All available men with numbers of 60 and below will be selected for induction after mid-November when the induction ceiling for 1970 will be met. All men between 18 and 30 will be called for induction after mid-November when the induction ceiling for 1970 will be met. Those who are selected will be notified by mail and will be inducted during the December period.
Teacher wants old job

by TOM MARSHALL

A law suit against the Trustees of California State Universities and Colleges, by Philip Zaraboao, and Donunde and Pres. Robert E. Kennedy has resulted from a communication breakdown between a former faculty member of this school and the administration.

Philip Zaraboao, a foreign language instructor at this school from Sept. 1966 to Sept. 1971, has filed a suit against the above respondents to have his attention, that he was the victim of promissory fraud by Kennedy, when the president allegedly promised Zaraboao reemployment as an instructor starting January 1979.

According to Petition for Writ of Mandate No. 6069, filed with the San Luis Obispo County Courthouse on Aug. 30 by Zaraboao, Kennedy advised Zaraboao that it would be necessary to take a break in service from the school from June 1971 through January 1973, due to certain irregularities made in the process of rehiring Zaraboao. Kennedy also allegedly informed Zaraboao that he would receive a "vague" letter that was only a formality and nothing to be concerned about.

The letter sent to Zaraboao informed him that all faculty members who were eligible for tenure had been reviewed by the president, and was a campus-wide letter. Zaraboao was entitled to be considered for tenure, but he did not qualify for tenure.

Kennedy also informed Zaraboao that his services with the university would terminate in June 1973.

"All President Kennedy did was to take the majority of all the recommendations made about Zaraboao being given tenure. They were all consistent," said Dr. Jon Ericson, dean of the School of Communicative Arts and Humanitites.

Zaraboao was rehired as a full-time instructor during the summer of 1973 and believed that he was still a member of the faculty.

A letter sent by Larry Vose, director of personnel relations, on Dec. 30, 1973 seems to point to a misunderstanding or lack of communication between Kennedy and Zaraboao during the initial discussion on Nov. 27, 1972.

"At both the President and I discussed with you before your separation, future employment at Cal Poly will depend upon the needs in the department and whether the department head and departmental faculty want you back. No commitment was made that you would be employed after a summer of 1973 and believed that he was still a member of the faculty.

"When and if I am伺服ed, I am obliged to follow the rules and regulations of state procedure. I will submit It to Norman Epatein, ASI lawyer Richard Carsel in a three-page memorandum, Kennedy rejected the bylaws, stating that under special circumstances and purpose of the organizations as being contrary to any recognized group or organization on any campus he knew about. Kennedy said that if the state loses, he will appeal, a court decision on the case. He further stated that the state doesn't have much legal means to deal with the problems normally encountered during the first week of school and help the students find answers to their questions.

WOW orient new students

Orientation freshmen and first year's Student Affairs Council, new environment is behind Week Of Welcome (WOW) at this campus. According to Gary Kimmel, WOW chairman.

Over 600 students participated in the Monday-through-Thursdays before the classes were designed to bring student together. Kimmel said WOW helps students become acquainted with each other, individual, and other small groups, as well as the personal and more hectic routine of solving problems during registration and first day of classes. Topics concerning majors, general requirements, registration and first day of classes. Important, percent of the hundreds of thousands of people who will meet in the next four years.

In addition to bringing people together, WOW also prepared the new students for the first adjustment period during which students will meet many of the problems normally encountered during the first week of school and help the students find answers to their questions in the first week.

Activities including the Poly Canyon Festival, Beach Day, a barbecue, and camping trip were designed for having fun and meeting people, who will become a very small, though important, percent of the hundreds of people the new student will meet in the next four years.

During this orientation week discussion groups and informal get-togethers replaced the less personal and more hectic routine of solving problems during registration and first day of classes. Raising cattle is one of many student projects offered by the School of Agriculture and Natural Resources.

Ag projects offer profit

by JOHN HANEBURY

Summers was a time of rest and relaxation for some, but for those involved in agriculture, it was work-day-every-day.

On campus the work in agriculture involves hands-on work and cooperation with the foundation, which usually involves the financing of an individual's project and the returning of one third of the profit to the foundation.

The animal science department is running its Escuala Ranch cow-calf project, involving 18 students. There are also show steer projects, test bull projects (range bulls on individual's project and that involves the financing of an foundation, which usually involves hand cooperation with the

Vincent Thomas.

These projects offer profit.

For those interested in the cow-calf operation at Escuala, James Planagan will be in charge of this project. It runs 18 months and open to students with a 3.0 GPA or better, junior or senior standing and with good recommendations. The amount of money to be made from these projects will vary and is subject to market prices.

Only one project occurred during the summer in the poultry department, which was the raising of broilers. However, this fall, broiler replacement patches and layers will be available. A broiler project will begin approximately every three weeks.

The replacement project consists of buying the White Leghorn pullets, buying their feed and general maintenance of the houses. Ten projects will be started and will run from 6 weeks to 20 weeks. Fifteen dollars to $100 can be made, depending on the age of the birds and the size of the project.

Ten lay projects are slated. These consists of 350 to 400 birds. They must be fed daily, eggs gathered and washed daily, pens maintained, litter kept stirred, and other routine chores done. These projects are nine months long and the operator can make $65 to $85 per month. Project operators do not own the birds.

The eggs are sold at the campus store.

Poultry majors get first choice for projects. Other students must be enrolled in poultry courses. Leo Bensell and Roland Pauta are project advisors.

Dairy

Dr. Herman Richardson will be supervising the dairy project. These consist of milk cow projects at Chad's Ranch. The student has to do all the work with his cow and sells his milk through the school store. This is the only project on campus where the student owns his project 100 percent — but he must furnish his own cow to begin with. The milk cow operation is open only to dairy majors beginning this fall with transfer students. Freshman must wait until Winter Quarter. Approximately $30 per month can be realized.

Berner projects in the crops department included sweet corn. (continued on page 14)

Coffee House will add pros for Fall wiles

The Coffee House will be open every Sunday night this fall with professional entertainers performing once a month to supplement the local artists.

On Oct. 8 recording artist Bora Bete will perform in concert. Bete will display why he is considered to be one of the greatest Bossa Nova performers in the world.

On Nov. 8, the Coffee House will play host to Jim Kweskin. Kweskin was the leader of the defunct Jim Kweskin Jug Band, a group which recorded during the mid 60's. Kweskin is better known for his part in the bizarre Lyman Family. Rock magazine Rolling Stone devoted two issues exploring Kweskin and the eccentric Mal Lyman in an article entitled "The Lyman Family's Holy Siege of America."

Kweskin said "The Manson Family preached peace and love and went around killing people. We don't preach peace and love. His latest album is entitled "Jim Kweskin's America" and features Mal Lyman playing harmonica.

During the month of December an "All-Faiths" will entertain the Coffee House audience. As of this time the performers names are unknown.

Since the Coffee House will be open every Sunday evening more live performances are needed. Anyone desiring to perform must audition first to the Special Events Committee. Interested artists can leave their number and phone number with Janet Winters at the Activities Planning Center in the College Union.

The Coffee House is located at the Chumash Auditorium and, as of this quarter, the price will be raised to either 48 or 80 cents. Special concerts will be $1 and $4.

Vigilante

SAN FRANCISCO (UPI) - The National Commission on Causes and Prevention of Violence says "countless vigilante groups from across the country have molded themselves" upon the San Francisco Vigilance Committees of 1851 and 1868.

Series to feature '72 political candidates; November ballot initiatives to be reviewed

by MELISSA RODRIGUEZ

Politics '72, a series of four politically informative talks, will highlight the Fall Quarter Speakers Forum. Candidates for congress, state assembly and senate and San Luis Obispo County Supervisor will speak at the forums. Two forums will deal with initiatives that will be on the November ballot.

"Politics '72 is designed to present the candidates and initiatives to students and the public in hopes of making them more informed voters in November," said Randy Donent, Speakers Forum Committee advisor.

Each candidate will present a five to 15 minute talk stating his beliefs and questions from the audience will be answered. The first political forum is scheduled for 7:30 p.m. in CU 220.

from the sale of the pigs, with the students splitting the remaining two-thirds. Ten to $12 profit per pig is the usual return. Any fulltime student in any major is eligible. Dr. Robert Hook is a fall project advisor.

Beside commercial swims projects, a few show projects are planned.

Horticulture

For the Cal Poly Department with the greatest variety of projects is the students' Horticulture department.

Large projects are:

-Portable projects. Two students are involved in planting staghorn ferns on boards for growth without soil. Other ferns are being grown in pots.

-Student serves a broken buying projects from other students and selling them to the campus. Two students have projects concerning landscape plants in garden cans.

-Another project is concerned with obtaining cans from Atascadero State Hospital and the college's cafeteria. The cans are cleaned, holes punched in the bottom, dipped in asphalt paint and sold to commercial nurseries. Students are paid five to six cents per can and are used for lawn decorations. Two students run this project.

Rentals are for use at banquets, weddings and other social events.

-Production of ground cover for sale in flats. Twenty different varieties of plants are used in this project and are for used for lawns substitutes. They are mostly sold to nurseries and landscape contractors, although some are available through the O.R. department.

-Fall bedding plants project, seed sowing and plant sales started for Christmas sale are up.

The O.R. department uses a partnership program. An O.R. major will team with a non-major on all projects. Students must have a 2.5 GPA or better and are to complete a class in nursery practice or floriculture. One project's profit was $1,979.94. Ordinary wages are paid to the students and this totals $1,757 per hour. Project operators also receive a small profit from their enterprise. O.R. projects are for the experience Jim D'Albro will be project advisor.

California road

In 1849 Capt. Randolph Hurry escorted California-bound gold seekers from Fort Smith, Ark., through the Indian Territory-then eastern Oklahoma. This route later became known as the California Road.
**Leather craze on collision with shortage**

By LEROY POPE

NEW YORK (UPI)—The craze of America's youth for leather jackets, high cut boots and broad belts of leather is on a collision course with a worldwide shortage of cattle hides.

Commerce Secretary Peter Peterson recently put restrictions on the export of American hides, holding them in the United States at a level of 18.4 million. Peterson acted after mushrooming European purchases of American hides had pushed the price up from $14 to $30 a pound, he said.

Promptly, Rep. Graham Purcell, D-Tex., whose district is in cattle country, moved to amend the Export Control Act to stop restricting hide exports. He said he feared Peterson's move would simply hold down prices on cattle hides. "The beet that can be done in the United States because of shortage..." he told United Press International.

The Tanners Council in New York said it was not embittered by its consent to retain last year's exports of 22 million hides. "We had a couple of tanneries on collision course with a worldwide shortage of leather. We had a couple of tanneries in the United States because of the resulting hide shortage," Glass said. "It is a tragedy for American shoe manufacturers to have to use American hides, making shoes at lower European labor costs and shipping them to the United States.

The disease was first described in 1944. Three of the four patients had red hair and the fourth had blond hair. There have been a number of reports on the disease since. Unfortunately none specified the hair colors of patients, Rayfield and McDonald said.

Medical scientists consulted thought the question good enough to warrant a large-scale study. But they saw "evidence of discrepancies." If blond hair is associated with the causative factor there should be a very high incidence of the kidney disease among Scandinavians, they said.

And if the factors are associated with red hair the incidence should be high among the Irish if it is really true that the Irish produce more red-heads proportionally, than other peoples. Incidence statistics are far from complete but they do not indicate high numbers among Scandinavian or Irish people.

**AnotherTheory**

On the other hand, these scientists said, the coloration of skin as well as hair is a product of the metabolism resulting from one's body chemistry as established by the gene. To them it was quite conceivable that deleterious genes responsible for inherited disorders are linked to genes that dictate coloration.

For instance, sickle cell anemia is almost exclusively a disease of blacks. Although this does not mean it is inherited through genes linked to those of blackness.

Rayfield and McDonald did their work at the University of Michigan Medical Center in Ann Arbor. They reported to "Archives of Internal Medicine" that blond or red hair was a common occurrence in the families of their patients.

The physician should look at the color of the hair of the patient he suspects—on the basis of a physical examination—of having the kidney disease they said. Red or blond could strengthen the clinical impression pending a kidney biopsy.
At about the same time Sir Adrian Boult, who had a long association with the composer, was completing his cycle also with a London Symphony for Angel and also already noted (S- 3033). Nine seems to be a magic number for composers of symphonies; Beethoven, Bruckner, and Mahler also wrote nine. Vaughan Williams wrote his Ninth when he was an octogenarian. It was played for the first time four months before he died in his 80th year and only received by the majority of the critics. Seen at longer perspective, it is a richly sounding and visionary work and looks to a future that Williams was not to see. Prevlin accompanied it with "Three Portraits" from Vaughan Williams' short film "The England of Elizabeth" completed in the last months of 1939. The Pastoral Symphony came earlier. Vaughan Williams had returned to England from France in 1919 at the age of 40 after ambulance service on the Western Front. In 1923, his enigmatic Pastoral Symphony was completed. It is a work of the tranquility, touched with sadness, of the French countryside. Biographer Michael Kennedy calls it Vaughan Williams' war requiem. On the same record is the delightful Tuhe Concerto in F minor, also a work of his last years, written in 1944. Vaughan Williams was no writer of serial or atonal music. His music is tonal, with recognizable melody and rich texture. With a few bars, it can be recognized at once. Prevlin's recordings of the Pastoral and the Ninth are excellent. RCA plans to issue an all 9 of the symphonies, already released individually, as a set later in the year. Recommended.

The idea is that Schubert's Sonata in A and Fantasie in C played by David Oistrakh (violin) and Frieda Bauer (Piano) (Melody-Angel SB 4019-L), The Great Russian violinist and his regular accompanist in a fine recording of these two Schubert works.  

Music Concert music: Williams discs

By WILBUR G. LANDREY
NEW YORK (UPI)—The musical reputation of Ralph Vaughan Williams went into partial eclipse after his death in 1958, but it has emerged brightly with the two rival recordings of his nine symphonies, both completed in this centenary year of his birth.

André Previn has just completed one series with the London Symphony Orchestra for RCA. It ended with the London Symphony's Angel and also already noted (S-3033), and almost simultaneously, Symphony No. 8 (LSC 2588), and the Pastoral (No. 3) (LSC 2581).

NEW YORK (UPI)—Sergio Mendes made with his Brasil '88 six music, having won critical acclaim and enthusiastic audiences.

But Mendes didn't want to get too deeply rooted in the past, so he began a new approach with a combination of different sounds.

What has he created is a sophisticated style that modernized primitive rhythms. His new application is "Brazil" and the first album is "Primal Roots" (ADAM SB 688), a musical treat for the audiophile.

There are only seven selections on this disc, giving Mendes room to concentrate on composer Edu Lobato's "The Circle Game," which is accompanied by passages on the flute and percussion piano. Mendes constantly builds up percussive pressure during the 14-minute session.

Mendes begins proceedings with Derivai's "Casunudo," a fine composition. But the real highlight is "The Circle Game," based on a Brazilian tune.

Rock drummer Ginger Baker is omnipresent but he is never domineering as he was during his Air Force group days. He has a formidable band on "Ye Ye De Smell" but breaks on "Ya Ve Da Brasil," and his guitar.

Mendes is a well organized outfit which is accentuated by passages of percussive pressure during the 14-minute session. His new appellation is "Brasil Brasil." Mendes begins proceedings with Derivai's "Casunudo," a fine composition. But the real highlight is "The Circle Game," based on a Brazilian tune.

Mendes begins proceedings with Derivai's "Casunudo," a fine composition. But the real highlight is "The Circle Game," based on a Brazilian tune.
Kennedy cites minority concern

Dr. Robert F. Kennedy, president of this campus, and the Mexican-American Community of San Luis Obispo and Northern Santa Barbara Counties, communicated their mutual concerns and desires during a 16-hour Aug. 3 trip which began at Paso Robles and ended at Santa Maria.

The tour was arranged by the Incorporated Mexican-American Government Employees under the direction of its president, Fred Ataila of San Luis Obispo, a member of the Industrial Relations department faculty.

It was designed to acquaint Kennedy and his wife with the problems and concerns of the Mexican-American community and to enable Kennedy to relate to community leaders, concerns expressed about faculty and staff job opportunities on this campus, educational opportunities for the young Mexican-Americans, and services which might be provided to the communities, such as tutoring, extension courses, and improved communications between the university and the Mexican-American community.

Kennedy expressed his concern for the problems of the Mexican-American community and his willingness to encourage university faculty and staff to work within the resources available to them to assist in solving the problems.

Four arrangements were made by Ataila: Oscar Quezada, co-director, Educational Opportunities Program; David Lechlan, head of the ethnic Studies department; and Leonard Gonzales, school relations director. All accompanied the President's party on the 10-hour trip.

The itinerary was developed with an assist from Frank Molina of the Economic Opportunity Commission and Patricio Flores of Santa Maria.

At all three meetings with community leaders, concern was expressed about faculty and staff job opportunities on this campus, educational opportunities for the young Mexican-Americans, and services which might be provided to the communities, such as tutoring, extension courses, and improved communications between the university and the Mexican-American community.

Kennedy also pointed out that the education department and various student groups have offered voluntary tutoring services to minority groups.

Kennedy praised the results of the Educational Opportunity Program and suggested to the community members that some version of the High School Equivalency Program would be one answer to enable more Mexican-American students to succeed at the university.

He reminded the groups that his university is contributing indirectly to better understanding of the minorities which included many who could speak only Spanish. He emphasized the Mexican-American's concern for the need for bilingual teachers at elementary school levels and asked help in dispelling the belief that there is a higher percentage of mentally retarded children among the Mexican-Americans.

In responses at the meetings, Kennedy described the university's Affirmative Action Program which is designed to increase the percentage of minority and women members among the faculty and staff.

He pointed out that under the program, a position can be filled by someone who is neither a minority race member nor a woman if evidence is produced that an adequate recruitment effort was made and there is no qualified minority or woman to fill the position.

Kennedy praised the results of the Educational Opportunity Program and suggested to the community members that some Federal loans: last means left for finance aid

If you're going to need financial aid in the next year, your only hope may be a federally insured loan.

Deadlines for the other aid programs such as grants, loans and work-study programs have passed by. Emergency aid provided in the past by federal funding was limited July 1 in what assistant director of financial aid, Mary Eyler, estimated to be a 20 percent cutback in federal support of student financial aid programs.

A federally insured loan is similar to a National Defense Loan with payments delayed until after graduation but is handled through a local bank with which the applicant must have been associated for at least six months.

All of the banks in this area, except San Luis Obispo National, are expected to participate in the program.

Basic criteria for loan acceptance, according to Mrs. Eyler, is need according to parental income, full time student status, and a 3.0 GPA.

Kennedy also pointed out that the education department and various student groups have offered voluntary tutoring services to minority groups.

Kennedy praised the results of the Educational Opportunity Program and suggested to the community members that some version of the High School Equivalency Program would be one answer to enable more Mexican-American students to succeed at the university.
The AFI Film Committee will present 13 films this fall to be shown at Chumash Auditorium.

-Coming Nov. 4, will be Sam Peckinpah’s, “The Ballad Of Cable Hogue.” “Cable Hogue” is a western set at the closing of the frontier. The film stars Jason Robards, Stella Stevens and David Warner. Another Peckinpah film, “The Wild Bunch,” will be shown in Dec. 1. Director Peckinpah is responsible for creating art out of the violent scenes seen on the screen.

The Oscar winning “Blue Water, White Death” will be shown on Nov. 17. This documentary is about four divers and their quest for the great white shark.

San Luis Obispo Savings and Loan Association invites you to invest in the following high-yielding, and insured accounts

5% REGULAR PASS BOOK ACCOUNTS
5.25% 3 MONTH CERTIFICATES WITH $500 MINIMUM BALANCE
5.75% 1 YEAR TERM, WITH $1,000 MINIMUM BALANCE
6% 2-YEAR TERM WITH $5,000 MINIMUM BALANCE

CAMPUS MOVIES

Dozen films offered

Advice to the hungry don’t eat raw bear

Here’s some advice you may or may not ever need:

-Don’t eat raw bear meat. Not even bear “jerky.” Might give you trichinosis.
-Don’t eat the livers of muskox. Eskimos have known from ancient times the unwisdom of doing so. But some polar explorers didn’t. So they suffered.
-Don’t eat the liver of Arctic bearded seal. It is even more dangerous than huskies’ livers.
-Avoid polar bear liver, too. The villain in all these livers is concentrated vitamin A which makes people sick with “hypervitaminosis.”

The advice about not eating uncooked bear meat comes from the American Medical Association AMA. Bears, like pigs, harbor trichinella organisms. No one, of course, would think of eating uncooked pork.

In people, trichinoses organisms get into the body tissue, causing muscle pain, stiffness, weakness, painful breathing, swelling around the eyes, rash, loss of weight and high fever lasting for weeks.

“Complications,” according to the AMA Journal, “include great prostration, organization and sudden heart failure.”

The journal said eating raw polar bear meat may have killed three Swedish bellowsists in 1897. In October 1970 an Idaho hunting party shot an apparently healthy black bear. They cut out this thin, narrow stripe for jerky, made by soaking the strips in brine for three days and smoking them for two days. Only one of the 12 members who ate the meat escaped all signs of trichinoses.

Three other mojerns out breaks of human trichinoses caused by eating bear jerky or rare bear meat steaks have been reported.

Popular music review covers latest discs...

(continued from page 18) and Barriemore Barlow. Barlow makes his debut on this LP, replacing Clive Bunker, regarded as one of rock’s best drummers. While Bunker will be missed, Barlow is an excellent replacement.

Highlight of the recording is the title song, “Thick As a Brick,” which lasts 16 minutes. But there is little repetition on an LP and, therefore no ear fatigue.

“Arms And The Man” starring Steve McQueen over 40,000 miles, five countries and three continents. The book sold over one million copies.

Coming on Oct. 14 will be “Lazenby,” starring Steve McQueen.

Films to be shown during the month of September will be “Faking Off” and “Pretty Maids All In A Row” will be screened Sept. 30.

“Operation Strangle” will be shown Oct. 8 while “Dusty and Sweet McGee” will be shown Oct. 20.

Coming on Nov. 3 will be “Willard.” Nov. 11, “Two-Mile Blacktop” will be shown.

The screen at Chumash Auditorium has been raised and the sound is now fixed, the film committees report.

ASI president hopes for Nixon visit

by KATHLEEN BEASLEY

When a student meets the president of the United States, what does he say?

"I told him 'We'd really enjoy having you come to our university, California Institute of Technology,'" said ASI Pres. Robin Baggett. "And he said, 'Oh, yes, I've heard of your school.'"

Baggett met Pres. Richard Nixon at the Republican National Convention last month. One of his goals in going to the convention was asking Nixon to make this university a campaign stop.

"And he said, 'Oh, yes, I've heard of your school.' And I said ASI Pres. Robin Baggett. "Almost everyone I talked to said he was there to talk to several Republican organization leaders and the possibility of Nixon speaking on campus is not such a dim one. But the announcement would not be made in advance."

"I tried to get lots of speakers-economic and domestic advisors," Baggett said. "A lot of the President's domestic policy is unknown."

Baggett joined over 4300 Californians and over 3,000 young people from all over the nation between the ages of 18 and 25 who went as guests of the delegates to the convention.

"There were kids all over the place. They couldn't believe all the people who showed up," said Baggett. "Almost everyone I talked to said he was there to show that not all the younger generation is for McGovern. Reason I went back—well, I thought I would," he said. "I didn't get much sleep, prices were high and I didn't like the weather, but I was very happy with the trip."

The young people really worked hard," said Baggett. "They really appreciated us."

Baggett later joined a group of student leaders who attended press conferences, spoke before the platform committees and went to caucuses. He found himself talking to senators, advisors to the president and important party members.

"I was impressed because they are real people, eager to help," Baggett said. "Almost everyone I talked to said they were really there to protest and not just to destroy the convention."

Baggett said $600 per delegate was spent on security. They brought in the buses Wednesday afternoon to block off streets. I didn't see anything, but the South Carolina bus got stopped. They destroyed 10 city buses—put them beyond repair," he said.

Overall, Baggett said he was impressed with the organization of the convention. He said things proceeded in an orderly manner, with a very organized air showing that Republicans "know how to get the job done.”

"It was cut and dried for the most part, following the agenda to a T," he said. "There's so many people involved, how else can you do it?"

Baggett said he would like to go to the next convention, possibly as a delegate.

"I learned a lot more than I thought I would," he said. "I didn't get much sleep, prices were high and I didn't like the weather, but I was very happy with the trip."

Robin Baggett took time off from student concerns to attend the Republican National Convention in Miami.

We know there are a lot of different ideas on student housing. Some are great and some are all wet. We think our concept in student living has a lot to offer. So

-Sunday nights this summer were devoted to Concert Under the Stars where local entertainment, like Mark Terry, played for the enjoyment of many.

A now common sight are the new campus dorms which are scheduled to be completed during Fall Quarter.

Four gold-medal champ Jesse Owens, winner campus during a two-week physical education during the 1936 Olympic Games, spoke on convention for both men and women.
The Summer Interim Committee met this summer to decide such items as funding for the new volleyball team and more money for the continuing Gay Students Union case.

of you who missed it...

The end of summer comes on and so does the football team. Daily practice for the Mustangs began in the last weeks of August.

Hot summer days were cooled off with trips to Avila Beach and water skiing on Lopez Lake.
CAPE KENNEDY (UPI)—The space agency says the space shuttle rocket plant will be safe for the environment and would be safe if launched into space. The agency reviewed all possible consequences of shuttle operations on the environment and said any adverse affects would be small, local, short-lived and environmentally acceptable.

"Acceptable" pollution

Other aspects of air pollution resulting from a shuttle launch are considered acceptable, even under worst-case situations involving a launch pad failure or low altitude abort.

The space shuttle, scheduled to make its first flight here in 1979, will create sonic booms during its climb into space and when it re-enters to re-entry of its fuel tank. The 180-foot long aluminum tank will be dropped off in orbit and later retrieved will return it to an isolated Indian Ocean impact area.

The 18-ton tank will break up when it hits the atmosphere, and much of it is expected to burn up in the heat of air friction. But some pieces probably will hit the sea and NASA said ships will be warned to stay out of the area.

While the adverse effects of the space shuttle on the environment will be small, the space agency said "environmental quality standards high on the list of potential beneficiaries of the space shuttle program.

The space shuttle, scheduled to be ready for liftoff by 1979, it is expected to average one flight a week. NASA noted that thunder storm activity in the Cape area more often than that.

"With each thunderstorm containing nearly 30 claps of thunder on the average, residents in the vicinity of the Kennedy Space Center landing site hear thunderclaps more than 30 times as often as they would hear sound booms," the report said.

"The only other possible adverse consequence of flying the space shuttle will be the recovery of its expendable fuel tank. The 180-foot long aluminum tank will be dropped off in orbit and later retrieved will return it to an isolated Indian Ocean impact area."
Some countries ban hot pants, long hair...  

by MURRAY J. BROWN
UPI Travel Editor

Hot pants, mini-skirts, beards and long hair are all part of the modern youth scene in the United States and other countries of the Americas, Europe, Asia and Africa.

But there are some governments that frown upon such attire and adornment, and even turn away American and other visitors wearing what authorities consider not enough of the necessities and too much of the nonessentials.

The Holy See has its own regulations, but Cardinal Angelo Del Tacqua, the papal vicar of Rome, appointed recently in this capacity, has been known to present the scared character of the Eternal City by wearing hot pants, mini-skirts or other immodest apparel. It may be acceptable on the Via Veneto but Vatican guards will refuse admission to persons dressed in such a manner.

...too little clothes and too many locks

what the church regards as improper clothing for visits to St. Peter's Basilica and other parts of the Holy See.

There are official restrictions on hot pants and mini-skirts in the African republics of Malawi and Uganda while long hair could pose problems for tourists to Singapore and Saudi Arabia.

A British girl tourist was deported from Malawi for wearing a mini-skirt. But the story has not been confirmed and there are no restrictions in force.

A Ugandan government official told journalists that in the Soviet capital although "hot pants are still as rare as the capital itself" there are reports that long hair is generally acceptable among Russians and girls are not turned away. And long beards never were a novelty in the Soviet Union.

Britain, France and other West European and Scandinavian countries have no objections to short shorts or shorts or long hair or beards. Nor do Hong Kong, Japan and other nations in Asia. UPI Correspondent Al Raff reported that a reverse problem in Europe may have no restrictions, but Cardinal Angelo Del Tacqua, the papal vicar of Rome, appointed recently in this capacity, has been known to present the scared character of the Eternal City by wearing hot pants, mini-skirts or other immodest apparel. It may be acceptable on the Via Veneto but Vatican guards will refuse admission to persons dressed in such a manner.

For the tutoring program teachers from the different schools in the area refer the students to Student Community Services. Each volunteer chooses the child he wants to tutor.

Tutors are needed mostly for math and English but also for colleges-bound students who need tutoring in one particular subject. They will need to enter college.

The community programs for referral includes: High School Equivalency Program (HEP) where former dropouts have an opportunity to return to school to obtain a high school diploma; "For Functional Living needs tutors to teach adults over 18 skills and help them learn to function in society.

Three other referral programs include a breakfast program that serves supervising and transporting children to a breakfast for children who frequently do not get breakfast but this one a time a week, volunteer work at General Hospital, and short term work projects which are usually weekend one-shot projects.

Volunteers are needed for these projects, persons who will be committed to the job they choose.

Volunteers are encouraged to go to the Activities Planning Center in the C.U. during the first week of school. There will be an interview to see what you want to do and an orientation Oct. 19 and 16 for tutoring and Oct. 1 for Young Generation.

There was a time when only tycoons, movie moguls and Swiss bankers owned shirts like this.

The Gant Evolution.

There's a new look in men's shirts and suits, and it's called "The Gant Evolution.

But times change and clips are now being fashioned by Gant for the followers of Gant. All it took was a little patience.

"Young Generation.

There were a variety of people at the event. Some were looking for work, others were interested in the shirts themselves. And the event was a success!"

Women's lib may lead to equally inept women

Peter Principle gives birth to prescription for move to better life

by GAY PAULEY
NEW YORK (UPI) - Not so long ago, Dr. Laurence J. Peter wrote an amusing and thought-provoking book about one of the outgrowths of modern civilization—the syndrome of incompetence.

It is, the educator-proposed that he called "the Peter Principle" that "in a hierarchy every employee tends to rise to his level of incompetence." As he sees it, "For every job that exists in the world there is someone, somewhere, who cannot do it. Given sufficient time and enough promotions, he will arrive eventually at that job and stay there, never finding himself out of his depth." Now the educator-author has carried his theories another several steps to show us how we can work our ways out of lives needlessly complicated, dug down in red tape and how not to settle for less than our full potential.

A way out

A sequel to that first book, his new one, "The Peter Predisposition, How to Make Things Go Right," provides guidelines for moving forward in realization that "your real success... is achieved through creating a better life than climbing upward into the good life...to total life incompetence." His publishers say that Dr. Peter's "modest ambition is to save mankind." Would that he had devoted more space to effects of the women's liberation revolution and the effects of our future society. But any rate, he puts "the blame on Man" only if she and her sisters fail to assume leadership in a movement toward a better world.

In two pages called "The Feminine Mistake," Dr. Peter says that "man has escalated himself to his level of incompetence, and women lack the courage, the skill, and the necessary training to throw the bunglings on the male Incompetent...or even destroy the human race...toward improvement of the total life incompetence...."

Peter Principle gives birth to prescription for move to better life

"modest ambition

- is to save mankind"

... "they will inevitably add to the total life incompetence"

Dr. Peter brings up other points bound to raise the hackles of the Establishment's "ever-upward-and-otherwise." Promoting not evil

"Escalation promotion is not an evil "in itself if it serves a survival, safety, aesthetic or humanitarian purpose," he says.

"Escalation that leads to hypertension, gastric ulcers, keeping up with the Joneses, acquisition of unused possessions and army deaths, and of excessive wealth and power is destructive of the potential..."

No wonder that a large segment of youth "unassimilated in a civilization of endless congestion and incredibly inflexible approaches to living" has tried to escape, he says.

Classical series set despite finances

Ten concerts will continue presenting the classical music series until it becomes economically unfeasible.

Randy Creament, the advisor of the AEI Entertainment Committee, called the situation sad. The ASI Entertainment Committee, called the situation sad. ASI will continue presenting the classical music series throughout the 1972-73 academic year. Despite not breaking even even in the past with these events, the women's liberation revolution and the effects of our future society. That any rate, he puts "the blame on Man" only if she and her sisters fail to assume leadership in a movement toward a better world.

Activities aide resigns; Donant fills his shoes

David Taxli resigned as program counselor this summer to start his own school. His new school in alternative education, Mandala, is for grades kindergarten thru sixth. It will be in the Reorganized Church of Latter-Day Saints on Sydney Street.

His successor, Randy Donant said that this is something "Dave always wanted to do."

As program counselor, Donant is co-ordinator of the College Program Board which sponsors films, speakers, assemblies and other activities.

He said that his job is "rather active and busy. One has to keep in mind the different types of students and their needs" when planning different events.

Students work in Navy Public Works Center

Some 15 students in the School of Engineering and Technology along with their professor participated in a summer employment program with the San Diego Navy Public Works Center (PWC).

The program had its start last year when Professor Nelson Smith of San Luis Obispo was a friendly face in the PWC operational area.

Last year Smith made a study to help determine how PWC can provide a more economical service to Navy commands served by the Center in the San Diego area.

This year he was accompanied by a group of his students from the university. The program allowed the students to get involved in industry and be afforded the opportunity to put the classroom theory into actual practice.

The end result of the combined efforts for the summer possibly resulted in a half million dollar savings to the Navy Public Works Center (PWC) operation.

A beneficial side-effect of the new dorms and cafeteria is this newly poured sidewalk stretching from Yosemite Hall to Tenaya Hall—no more sloshing through the winter muck for dorm residents.

Veteran mobile vans experiment in bringing government to people

The easy way of destroying paper—shred it

BY LEROY POPE

NEW YORK (UPI)—During the spring rumble about an "experiment in bringing government to the people," according to Gordon R. Elliott, director of the Los Angeles Veterans Administration Regional Office, the Veterans Administration, Department of Health, Education and Welfare, Labor Department, Department of Housing and Urban Development and the Office of Economic Opportunity will be represented and available to answer questions for anyone wishing information. If there is a need, other agencies will be brought in, Elliott said.

The programs began with the inauguration of Pres. Richard Nixon. Up until then veterans had to come to the Veterans Administration to seek information and guidance. United States Veterans Administration centers were set up in major cities and representatives from Federal agencies along with Veterans Administration counselors were there to offer their services.

A community assistance plan was also set up. They rented auditoriums and consulted anyone seeking federal benefits.

In Florida the community assistance program had a traveling crew go to 10 major cities. It was a natural evolution from that to the vans.

"This is an effort to bring the resources of government to people in outlying and rural areas who don't have ready access to a Federal agency," Mills said.

The first stop for the vans was Aug. 28, in San Fernando. Other cities on the itinerary are Oxnard, Chula Vista, El Centro, San Bernadino-Riverside, Barstow, Lancaster, Bakersfield, and Ventura.

The state animal of Vermont is the Morgan horse.

Veteran mobile vans experiment in bringing government to people

The easy way of destroying paper—shred it

VETERANS mobile vans are coming to San Luis Obispo Oct. 11 and 12. The vans which will set up at Palm and Morro Streets are part of an "experiment in bringing government to the people," according to Gordon R. Elliott, director of the Los Angeles Veterans Administration Regional Office.

Veterans Administration, Department of Health, Education and Welfare, Labor Department, Department of Housing and Urban Development and the Office of Economic Opportunity will be represented and available to answer questions for anyone wishing information. If there is a need, other agencies will be brought in, Elliott said.

The programs began with the inauguration of Pres. Richard Nixon. Up until then veterans had to come to the Veterans Administration to seek information and guidance. United States Veterans Administration centers were set up in major cities and representatives from Federal agencies along with Veterans Administration counselors were there to offer their services.

A community assistance plan was also set up. They rented auditoriums and consulted anyone seeking federal benefits.

In Florida the community assistance program had a traveling crew go to 10 major cities. It was a natural evolution from that to the vans.

"This is an effort to bring the resources of government to people in outlying and rural areas who don't have ready access to a Federal agency," Mills said.

LIQUOR STORES
THE STORES WITH THE RIGHT SPIRIT
By RUSS ALLEN

The daily lineup of students waiting at the ticket window of the local theater isn't just the result of youthful enthusiasm for fresh new shows. Most of them pay their dime and immediately turn to the classified ads, perusing the section under "Housing."

But the housing situation isn't as crucial, perhaps, as it has been in the past, if vacancies in housing complexes around town are any indication.

Students attending this university have a large variety of housing choices available to them, including townhouses, apartment-style housing, and on-campus housing.

Last year on-campus housing had an 83 percent occupancy which climbed to 85 percent in the spring. This year the dorms are expected to be 90 percent occupied with the only vacancies in the women's rooms.

Director of Housing, Robert Bedrom, said, "The dorms here or on campus provide an expensive living with a variety of living conditions to go along with the convenience of being on campus."

I would encourage new students, and students now residing here to come look around at the newly carpeted rooms which will cut the noise down considerably.

In the past dorms have been filled to capacity giving a student a large variety of living quarters, very little choice. The 90 percent occupancy leaves the dorms with enough vacancies to allow more bathroom space and a larger choice of living quarters.

Mustang Village is now under new ownership. One of the new owners, Herman Kophoff, said, "We are now a little over 90 percent full, and we expect to have 100 percent occupancy shortly after the Fall Quarter begins."

Last year Mustang Village was filled-up going into September, but then started losing tenants as spring came around.

The first couple of years after Bramer Glen was built it had 100 percent occupancy, but last year it dropped to about 83 percent. One main reason Bramer Glen and many others will not be full, is there are 800 new "beds" available to students here in on-campus housing.

The area is now a little over 90 percent, but last year available to students here in San Francisco and many others will not be full, students now have more of a selection leaves of housing to choose from.

Another problem stems from a limited amount of single rooms, which students are eating for. People are backing away from the double bedrooms, because privacy is what they want. They are willing to be in the same apartment, but want to have their own room.

Tropicana Village is pushing, "If we get 500 or more students, but the chances are looking dim."

Manager's secretary Janet Armstrong says, "We'd like to get 800 or more students, but the chances are looking dim."

Last year it was not much better for Tropicana Village. The area of San Luis Obispo is being built up, and students now have a large variety of selection leaves of housing to choose from.

"Illeat the book look is pushing,' Armstrong added, "Our meal plan is our big item. The food is good, no short cuts are taken in preparing it, and when you want seconds its not left over, but the same fresh cooked food you had the first time."

THE BOOK LOOK IS AT RILEY'S - UNIVERSITY SQUARE FOOTHILL at SANTA ROSA

By DOROTHY M. BROOKS

NEW YORK (UPI) - Americans, characteristically, have a fascination with the automobile.

In the heyday of many old-timers, a favorite novel, "The Shor'tstop," included a memorable episode where the impoverished would-be baseball player made his home in an abandoned streetcar. If the book didn't actually start a national fad, it touched a responsive chord.

A decade later, abandoned streetcars could be found in use across the country, both in depression-era "shantytowns" in the cities and in rural areas.

They proved a precursor of extensive industries - the first highway "trailers" which doubled as homes for migrant workers and dedicated campers, and their more luxurious descendants, the huge mobile homes of today which seldom travel. In the past decade alone, production of mobile homes rose (continued on page 8).

...tried a rcar call?

By DOROTHY M. BROOKS

Lucia Olapao. Supply is beginning to overtake demand.

A trend seems to be occurring where students want to live less in groups, and more on their own. "We've got a great selection of living quarters."

Ry DOROTHEA M. BROOKS

STANFORD, Calif. (UPI) - Open house in a Stanford University home is being held next week to give students an opportunity to become involved.

"We are going to give them a budget with, and plan their own activities."

A new Ecology Movement will be started with students doing various deeds for the local area and an area is being set up for a laboratory where students who wish to belong can do so. But no pressure will be forced on a student to join any peculiar activity.

The largest apartment complex will also be the least rented. Troponia Village expects to have 750 to 760 students out of 1,100 possible beds filled by the Fall Quarter. This means 10 percent spread out over the Valencia, Islander, and Tropiosa complexes will be empty.

Manager's secretary Janet Armstrong says, "We'd like to get 800 or more students, but the chances are looking dim."

Last year it was not much better for Tropicana Village. The area of San Luis Obispo is being built up, and students now have more of a selection leaves of housing to choose from.

Gift frost-frees orchard

Crops students on this campus will have a new concept of meeting an age old problem—guarding susceptible fruit trees from frost damage—as the result of a gift of a new orchard heating system. The system has been installed in a portion of the campus citrus orchard by Fleming-Troutner Agricultural Heating, Inc., of San Luis Obispo. William Troutner, Jr., his brother, John, and Mark Fleming are partners in the firm. William Troutner explains the system is more economical, more effective, and reduces air pollution. It incorporates a pipeline system feeding the heater sites and a new diesel fuel burner—an injection system which creates a fog or spray that burns more efficiently than the old pool of oil in the bottom of the heater. The burner is based on a design created by George Hurd of Florida and refined by the local firm. The burner and straight stack heater are custom manufactured for Fleming-Troutner in Los Angeles. The burner can also be used to convert all types of existing heaters, including return stack and lazy flames.

As explained by William Troutner, Jr., the injection of the fuel oil increases a more complete burning of the oil. The system also burns hotter in the firebox—thus putting more radiant heat out at a lower level in the orchard. In laboratory controlled tests, conducted by an independent firm, Fredriksen Engineering Co., Inc., of Oakland, results indicated a better than 99 percent combustion rate of fuel.

According to the Troutner brothers, the system not only provides more efficient heating in the orchard—it reduces labor and waste. One man can light the heaters with a match and it no longer is necessary to carry fuel oil to each heater for refilling. The burner design increases the amount of radiant heat discharged into the air at the top of the stack.

on academic probation prior to transfer, 18.4 percent were on probation during their first transfer year."

The state's 93 public community colleges currently enroll nearly 850,000 (including part-time) students. Eighty-five percent of all Californians beginning their college experience do so at a community college, statistics show.

The findings of the state study closely parallel the findings of a study conducted by the Allan Hancock College counseling office of students enrolled in a four-year institutions during 1971-1972.

Members of the Hancock counseling office interviewed 38 of the 47 students who had transferred to UCSB from Hancock College. Of the 38 interviewed, eight had made the dean's list. The mean grade point average at UCSB was 3.51 while enrolled at Hancock.

Barbecue tips

BOSTON (UPI) — The non-profit National Fire Protection Association offers the following tips for barbecue-lovers:

—Never add any flammable liquid to a burning fire; use starter fuels sparingly and only before the fire is lighted. Never use gasoline, paint thinners, alcohol or similar liquids.
—Keep fire-starter cans away from the barbecue.
—Keep youngsters at a safe distance from the barbecue.

Visual aids
director named
to committee

Clyde Hostetter, director of the Instructional Materials Program on this campus, has been named to the national advisory committee for a federally-funded Agricultural Curriculum Committee project at Ohio State University.

The instructional materials program here, a federally-funded project which develops visual aids for classroom instruction, has gained national recognition for its achievements in materials developed particularly in career fields and ecology.

The project at Ohio State will develop curriculum guidelines on careers in agriculture for use from kindergarten-through high school. Special emphasis will be placed on occupational categories in agri-business, natural resources, and environmental protection.

The advisory committee will meet twice yearly to assist a permanent project team at Ohio State in the development of the curricular information.

Welcome Back Students and Administrators From Ross Jewelers
Those Who Think of Quality First Think First of Ross Jewelers

The average service station attendant probably would not describe his job as "interesting" or "different." But those were the exact words used by the attendant at Jim Kinney's Midway station on Broad Street in San Luis Obispo.

This attendant obviously was far from the average, run-of-the-mill filling station worker. The most obvious difference? The attendant was a girl. And she was very well dressed in her red, white, and blue winter uniform.

The young lady was Yvonne Glover, head of the four girls who work at Kinney's Midway. Yvonne, who has worked at the Midway station since its opening in January, heads a team of three girls: Annette Demkey, Irene Seiben, and Nancy Tieling.

The girls, who wear hotpants uniforms in the summer and don pantaloons when the winter weather rolls around, tend to make Jim Kinney's Midway a special place in the hearts of many.

Each girl has her own special customers, or "boyfriends" as Kinney calls them, who will ask for a particular girl when they come in to fill up with gas. This, according to Kinney, is one of the major differences between these girls and the usual male attendant, who generally does not attract customers in such a way. Kinney gives two reasons for hiring girls to work in his station. First, Kinney feels that a "girl in a uniform" is much more attractive than "a greasy guy who has been out back working on his own car." Second, there is a "bigger manpower of girls available" to fill the job.

Kinney reveals that there is a large turnover at the station because of difficulties in scheduling. The girls, who are required to pump gas, wash windshields, and check oil and tires, are generally students who quit after a quarter of working.

The girls, who seem to enjoy their work, are quite proficient at the gasoline business. In short, they wash a mean windshield.

Story and photos by Dave Cherry

...and Yvonne Glover takes care of a windshield.
Rent-an-anything equipment at minimal rental cost to everyone holding All cards, the Outings Committee Scape Route opened its doors on Sept. 4.

The rental room, which will also be used as Outing headquarters, is adjacent to the bookstores (in College Union 104). Jim Kelley, Outings Committee chairman, said Scape Route will be open Monday through Thursday from 11 a.m. to 1 p.m. Hours on Friday are scheduled at 10 a.m. to noon and from 2 to 4 p.m.

"The Scape Route will rent their camping supplies at a fee only sufficient to replace and repair old equipment and purchase new equipment appearing to be in demand" said Kelley.

The service room will be run by members of the Outings Committee and throughout the summer, members have been working to build storage shelves and prepare the headquarters for operation. Last spring members undertook food drives to earn enough money to start the project and purchase equipment.

In addition to camping supplies, the Scape Route offers ideas on where to go and how to get there. The reference library is open to all students and contains a large collection of road and regional maps collected by committee members from various trips and outings. These maps, covering states, cities, and national parks, can be used within the storeroom and it is only asked that they be returned to the proper box after use.

The library features a collection of 200 mounted topographic maps purchased from the United States Department of Interior Geological Survey. The mounted area surveys cover California, Washington, Oregon, Alaska, Wyoming, and Utah; as well as specific parks and rivers.

"The Outings Committee's collection is the largest collection of topographic maps in San Luis Obispo," Kelley said.
He's man—or woman—against the elements, adventurer and the rapids, when there's just a thin canoe between the

of vacation time

Are you looking for a way to escape to the mountains for a weekend? But lack the equipment, ideas of places to go, and transportation off to the wild blue yonder?

Look towards the Outings Committee and next weekend might find you with a pack on your back trudging up China Peak in the Sierras or in a canoe gliding down the Russian River. Anyone can join Outings Committee. There are no fees or pressures to attend every outing or to be an experienced outdoorsman. It is merely a large group of students with a variety of ideas for the planned escape and varying amount of skill.

Every Wednesday evening at 7:00, all those interested in abandoning homework for the weekend congregate in the College Union for a mass meeting and sorting of ideas. Rarely does everyone decide on one expedition. Hence, two or three major trips result and the crowd divides into groups for dissemination of supplies, cost, and transportation.

Friday morning finds sign-up sheets posted in the Scape Route room adjacent to the bookstore. At this time the participants also pay their share of the food cost for the weekend (usually around three dollars) so that the food chairman can purchase and pack the rations before departure. Weight of food and cooking equipment is then equally distributed among packers. Carpools are formed with passengers contributing their share toward expenses.

In addition to weekend outings celebrating the end of the week, bigger and better plans for expeditions herald the end of finals and quarter break. In the past the Outings Committee has traveled to Bryce and Zion Canyons, Baja, California, The Tetons, and the Trinity Alps. They have also invaded the Colorado River below Hoover Dam.

This winter, members of the committee hope to find themselves on full week and weekend trips move camping in the Sierras and skiing cross-country. Destinations such as China Peak and Badger Pass are already being tentatively planned as summer edges into fall.

When the desire to escape is great but time is limited, day trips aid the campus weary. Jaunts to Montana de Oro, Port Sal, and Morro Bay, especially by bicycle, provide fresh air, relief from books and dorm or apartment life, and exercise.
**Intramurals: a little variety**

Basketball, volleyball, and football will kick off intramural sports for Fall Quarter. All students and faculty are eligible to participate in the competition. Clubs are formed and individuals are submitted to the intramural office and are then put into leagues and assigned game schedules. Rules and regulations may be obtained from Coach Dick Heaton in Men's P.E. 104.

Starting Monday, Sept. 19. Other activities available on a regular basis will be handball, weight lifting, tennis, or cross-country (including jogging), bowling, and badminton.

"Our goal this year is total participation. By this we mean not only total participation by students but total use of times and facilities available," said Heaton.

**Cross-country team has new coach at helm**

The long-winded Mustang cross-country team gets into action this fall with a new coach, Larry Breeden, at the helm.

Bridges, a graduate of the University of Indiana, came to Poly after a year of teaching health education at Wayne State University in Detroit, Mich. Besides cross-country coaching, he is also health coordinator and assistant track coach.

Bridges is coordinating a health program for fall which will work with the Health Center in setting up seminars in reference to "student-oriented problems." He has been running 18 years and believes that it is the best way to be physically fit. He has set up jogging clubs for faculty and students and teaches jogging classes.

This fall Bridges hopes to have "as many guys as we can" on the cross-country team. According to Bridges many times students are afraid they won't make the team but that is not true, he's happy to have anybody that is interested. "Anybody can come and run!"

To raise money for the team will be one of the main foci this fall and besides being one of the main foci this fall and besides being one of the main foci this fall, he is also health coordinator and assistant track coach.

**COUP provides advice, games**

Bowling can be described as both recreational and competitive. Whatever your motive, you can always use some expert advice.

On Thursday, Sept. 22, the COUP Games Area will host a clinic put on by Bill Buettner of the AMP Advisory Staff. All are welcome to attend at no charge.

Bowing, billiards, football, pinball, and table tennis are available to students and faculty in the COUP Games Area. For further information contact Qino Legari at 546-2866 or ask in the CU Recreation office.

---

**Register for Fall League**

The Recreation and Touramnets Committee (RAT) will be sponsoring various tournaments throughout the year. Intercollegiate competition includes teams for bowling, billiards, and table tennis. For further information contact Gino Lageri at 965-3881 or ask in the CU Games Area.

**Elephant sleep**

The Indian elephant lies down to sleep but the African elephant usually sleeps standing.

---

**Players hit baseball circuit**

The Mustang baseball team started practicing at a running camp Sept. 15 to 20 in the Sierra's at John Ireland. Cal Poly will host the West Valley track club, the second best team in the nation last year, in an eight-mile cross-country run Oct. 7.

Some of the other teams Poly will be competing with are University of California, Riverside, and Santa Barbara, Fresno State University, and Cal Poly Pomona.

Bridges will be meet director for the women's cross-country race, the biggest in the nation, begin held at Cal Poly Nov. 12. About 600 girls, including several athletic, will be here to compete for the title.

Meats course

by JOHN HANIBURY

When this campus says "learn by doing," it must have had Dr. Robert Vance's Meats 210 course in mind.

During the summer quarter the class slaughtered steers and hogs. The students learned the entire operation, from preslaughter preparations, through the slaughtering procedure, to identification of the various cuts.

One week the class slaughtered animals; the next week they cut the wholesale cuts into retail cuts.

The animals slaughtered were provided by the university from the Beef Unit and the Swine Unit. The foods industry course is open to all students and is usually 80 percent male and female. Students are encouraged to participate fully and if "learn by doing" is your thing, Meats 210 could be an interesting as well as an exciting experience.

Photos by

Alex Stewart

Hog is shackled in preparation for killing. Dr. Robert Vance explains to the students where to insert the knife.

After the cut is made, blood is allowed to drain from the carcass. Hogs can be stunned before killing or simply killed while in an unconscious state. Hogs that are stunned first tend to thrash around more than those left unstunned.

A student weighs the two halves. Next stop the cooler, then the retail cuts to be made at another lab—and finally the frying pan.

Saw in hand, Vance splits the carcass. The entire process took two hours.
The carcass is lifted out and placed on the dehairing machine which tumbles the hog over and over, taking off most of the hair.

Students with bell scrapers remove remaining hair.

The carcass is emersed in 140 degree fahrenheit water to loosen the bristle.

After hosing down carcass, a torch is used to singe off remaining bristle.

The carcass is cut vertically down the center. Vance points out area to begin avisceration process.
WELCOME ALL NEW AND RETURNING STUDENTS AND FACULTY

El Corral Bookstore would like you to become aware of its policies and functions.

ORGANIZATION AND PURPOSE:
CAL POLY FOUNDATION OWNS AND DIRECTS THE OPERATION OF EL CORRAL BOOKSTORE. THE BOOKSTORE’S FUNCTION IS TO PROVIDE THE TOOLS OF EDUCATION AND TO OFFER FOR SALE ITEMS RELATED TO EDUCATIONAL PROGRAMS. IN ADDITION, THE STORE OFFERS A LIMITED NUMBER OF ITEMS FOR PERSONAL NEEDS. THE SERVICES OF THE STORE ARE LIMITED TO STUDENTS, STAFF, FACULTY AND GUESTS OF THE UNIVERSITY.

STORE HOURS:
DURING NORMAL PERIOD OF OPERATION THE STORE IS OPEN MONDAY THROUGH FRIDAY FROM 7:45 A.M. TO 4:30 P.M. DURING THE FIRST WEEK OF EACH QUARTER THE HOURS ARE 7:45 A.M. TO 7:30 P.M. MONDAY THROUGH FRIDAY, AND 7:45 A.M. TO 4:30 P.M. ON SATURDAY. THIS STORE REMAINS OPEN ALL DAY SATURDAY DURING POLY ROYAL AND HOME COMING.

SALES POLICY:
WITH A FEW EXCEPTION, MERCHANDISE IN THE STORE IS PRICED 10% BELOW GENERAL MARKET PRICES FOR THE SAME OR SIMILAR ITEMS. ALL NEW TEXTBOOKS ARE SOLD AT THE LIST PRICE SET BY THE PUBLISHER.

CHARGE ACCOUNTS:
The only charge accounts are those for students whose bills are paid by a sponsoring agency, budgeted groups or ASI, student organizations recognized by ASI, and state and foundation departments. BankAmericard is accepted in lieu of charge accounts for students, faculty and staff.

DISCOUNTS:
NO DISCOUNTS ARE ALLOWED.

REFUND POLICY:
FULL PURCHASE PRICE WILL BE REFUNDED ON ALL TEXTBOOKS FROM THE FIRST OF THE QUARTER TO THE LAST DAY TO DROP CLASSES, PROVIDED EACH BOOK IS ABSOLUTELY CLEAN AND UNMARKED AND ACCOMPANIED BY A SALES SLIP. AFTER THE LAST DAY TO DROP CLASSES, WITHOUT PENALTY, IN ADDITION TO THE SALES SLIP, AN ADD-DROP SLIP MUST BE PRESENTED. NO REFUNDS ON GENERAL BOOKS AT ANY TIME.

USED BOOK PURCHASES:
DURING FINAL EXAMINATION WEEK THE BOOKSTORE WILL PURCHASE USED BOOKS THAT ARE BEING USED DURING THE FOLLOWING QUARTER. THE BOOKSTORE WILL PAY 50% OF THE CURRENT SELLING PRICE FOR BOOKS THAT ARE TO BE RE-SOLD IN THE STORE. BOOKS NOT PURCHASED BY THE BOOKSTORE MAY BE SOLD TO A USED BOOK WHOLER-SALER WHO BUYS FOR RESALE TO OTHER COLLEGE STORES. THE WHOLER-SALER PAYS FROM 10% TO 25% OF THE CURRENT SELLING PRICE. AFTER FINALS WEEK THE STORE WILL CONTINUE TO BUY FOR THE WHOLER-SALER FROM 1:00 P.M. TO 4:00 P.M. EACH DAY.

SPECIAL ORDERS:
THE BOOKSTORE WILL SPECIAL-ORDER ANY BOOKS FOR STUDENTS, FACULTY, OR STAFF. A DEPOSIT IS REQUIRED. DEPOSITS WILL NOT BE REFUNDED ON SPECIAL ORDERS THAT ARE NOT PICKED UP. A 10% HANDLING CHARGE WILL BE ADDED TO ALL BOOKS ORDERED FOR WHICH THE STORE DOES NOT RECEIVE A TRADE DISCOUNT.

GRADUATION CAP AND GOWN:
DURING SPRING QUARTER FINAL EXAMINATION WEEK GRADUATING SENIORS WHO HAVE PAID A CAP AND GOWN RENTAL FEE CAN PICK UP THEIR APPAREL FROM THE BOOKSTORE AT A LOCATION TO BE ANNOUNCED.

CHECK CASHING:
CHECKS MAY BE WRITTEN FOR $5.00 MORE THAN THE AMOUNT OF A PURCHASE AT THE BOOKSTORE REGISTERS.

OTHER SERVICES:
OTHER SERVICES, FOR WHICH THERE IS NO CHARGE, INCLUDE A NOTARY PUBLIC AND GIFT-WRAPPING.

BOOKSTORE PROFITS:
THE BOOKSTORE PAYS $40,000.00 A YEAR TO THE COLLEGE UNION FOR THE USE OF THE BOOKSTORE FACILITY. THE BOOKSTORE ALSO PROVIDES THE CASHIERING SERVICE FOR ASI AND STUDENT ORGANIZATIONS. ANY ADDITIONAL PROFITS IN EXCESS OF REQUIRED OPERATING CAPITAL AND RESERVES ARE EARNED FOR USE BY THE COLLEGE UNION.
Sports publicity man takes to the field

Wayne Shaw-a dedicated man on and off the field.

Wayne Shaw plays role of summer baseball ump

He had just returned from a convention for West Coast Sport Information Directors in Oakland. After the long, hot drive he pulled up a stuffed chair and sat back for a couple of beers.

No, he quickly donned the uniform and hurried across the street to the San Luis Obispo Baseball Stadium in time to bark "play ball" at the Northern California State Babe Ruth tournament in July.

Wayne Shaw, sometimes referred to as hot pants on the field and sport information director for this campus, has been umpiring in organized baseball for over 16 years. He takes pride in this extra-curricular activity that keeps him in direct contact with the sport.

Shaw's dedication and enthusiasm on the field are hard to surpass. His vocal expression is in a class of its own. A coach once got booted from the game when he hinted that a stampede of hogs would be charging any minute in response to Shaw's vocal effects on close plays.

The man's uniform is a real sight. It wouldn't be proper to divulge any trade secrets, but let's just say you would never find an exact duplicate of his outfit. He is still using the same pair of metal-toed shoes that he bought for the job 16 years ago.

His colleagues get a real kick out of Shaw, who has patented his unique style. He became known as the hippie ump by his partners, recently when he invested in a pair of flared pants—an action that set a precedent among local umpires.

Shaw's history in umpiring has had its ups and downs. He once was calling a game in which he took a foul ball in the right ear that sent him to the hospital for stitches. He soon recovered and learned not to turn his head away from the plate during a pitched ball.

Maybe he's no Shag Crawford, but Shaw has made it through 16 years, and don't be surprised if you see him on the field 16 years from now.
the aardvark

stationery

all manner of cards, notepaper, tablets, etc. for the him or her (or them?) in your life

what a spread!

- Indian import
- Sized for single & double beds, also kingsize water beds
- Solids 4.95 6.95

5¢ to 95¢ a package

bike bags
12 plain
25 embellished

wooden spoons and whisks

pillows for your pad
4.95

several scented soaps...shampoo too.

san luis obispo
This is the site of the seating extension at Mustang Stadium. The 1,540 seats are ex-spectators.

**Stadium now seats 1,540 more**

Arrival at the stadium two hours before the big game with a box of chicken, a large cushion and the anticipation of getting a seat on the 30-yard line, or getting a seat at all, should be somewhat remedied this fall by the expansion of Mustang Stadium which took place during the summer.

**Gap bridged**

PITTSBURGH (UPI) — The first wire cable suspension bridge in the world, spanning the Allegheny River at 11th Street in Pittsburgh, was opened in May, 1914. The bridge was designed by John Roebling, who also built the Brooklyn Bridge.

The new 1,440-seat steel bleachers were built by Fred Walsh Incorporated, and are all prefabricated materials. The work has been done at a cost of $107,040, which includes rerouting the east side lighting, improving the east side sound system, and painting the existing steel grandstand.

Current state regulations prevent the use of tax funds for competitive athletics so the funds needed for the addition came from other sources. Pres. Robert E. Kennedy requested $30,000 of the State Share Reserve, primarily used for agricultural functions, from the chancellors, and $30,000 came from the ASI. The balance, loaned by the Foundation, will be repaid by the income from the additional seats.

Additional expansion in the future is hoped for through funds available and funds generated by the use of the stadium.

Mustangs run for fourth title

by KEITH ELDRIDGE

The ball rests on the two-yard line with time running out. The Mustangs could win if they could just get across that goal line. The quarterback calls the signals, takes the snap from center, hands off to his star fullback and...fumble.

This was not an unusual occurrence last season as the Mustang football team was constantly being plagued by fumbles at key moments. Whether or not this will happen in the future remains to be seen.

Coach Joe Harper and his crew will try to overcome their past mistakes as they take on "a very large and very physical Montana State" this Saturday night at 7:30 in Mustang Stadium.

This season the locals are striving for their fourth straight league championship in the California Collegiate Athletic Association (CCAA). The 1971 Mustangs captured the crown with a 3-0 league mark and a 9-4 record overall.

Additional expansion in the future is hoped for through funds available and funds generated by the use of the stadium.

**4th quarter options**

Return to a team that has 16 returning lettermen. Wide receiver and free safety Mike Ameo, defensive end Tom Chamley, line backer Tom Duggan, and center Ian McPhee are all returning.

The defense appears to be the strong point of the team headed by Chanlier and Duggan. Wayne Robinson, Jeff Van Dyke, Dave Quick and John Mikias will bolster the defensive line-up.

Offensively, the Mustangs have two talented running backs in fullback Mike Thomas and tailback Mike Foley. As far as the signal calling duties are concerned, senior John Pettas has the edge over freshmen quarterbacks Rick Robbins and Ken Ecki.

On the offensive line McPhee along with transfer Frank Swart and tackle Pat Young will be counted upon to protect the passer and open up holes for those touchscreen runs up the middle.
