The fourth annual Trane-on bicycle race was a screaming success that led up to the announcement of the Homecoming queen. The three-wheeler race started Homecoming off to a notably the extensive pit crew for modified, and custom-modeled steering devices.

Plaza at 11 a.m. yesterday were entries under stock, which caused a horrible problem for the Midnight gkulkor motorcycle trailer with training platform, "They're screwing our campus for the Old Timers. *

"Nixon bunch" charges made

The position of Publisher's Board chairman remains vacant as the result of action taken by the Student Affairs Council (SAC) Wednesday night. SAC rejected the appointment of Glenn McCullough as Publisher's Board chairman by a roll call vote of 6-0 with five "no votes" and one abstention. The term "no vote" is used when the motion is not understood or the representative feels he can not make a decision due to lack of information. Abstention is the forfeiture of the right to vote due to conflict of interest.

The legality of McCullough’s election last spring was carefully scrutinized by SAC. As the History Club’s representative to the Communicative Arts and Humanities Council last year, McCullough was elected as that council’s representative to Publisher’s Board.

McCullough’s lack of attendance at council meetings resulted in the council removing him as History Club’s representative last spring; however no vote was on the table. As History Club’s representative to Publisher’s Board, McCullough failed to attend any council meetings this year. He has not attended any council meetings this year. "I don’t think Glenn is a responsible representative of the students on this campus," said one council member.

"Queens don’t bet on ‘whupping’"
FROM THE EDITOR

What's the right answer for tomorrow?

"Last year—this year. The question is what about next year?" intones one political advertisement run repeatedly on television.

It's a good question. One can check into what a politician did last year. One can hear what politicians are promising this year. But the truth about what will happen next year lies somewhere in the never-never land between actions and promises.

Perhaps the most accurate barometer of how a person will react in the future to a new philosophy, which guided his actions in past events.

President Richard Nixon, despite some disparity between policy and promises, has shown an aggressive leadership in meeting four year's problems—an aggressive leadership that American surely needs for another four years.

Under Nixon, Americans are paying 82 billion less in federal taxes and corporations are paying 8 billion more. When Nixon took office defense spending totaled 48 per cent of the budget and money spent on human resources only totaled 32 per cent.

In a complete reversal of priorities, the projected figures for 1973 show defense spending down to 31 per cent of the budget and human resource funds up to 48 per cent.

Nixon implemented wage and price controls, an unexpected and undeniably strong move from a Republican who is more conservative than liberal. While the controls have not halted inflation, they have cut the inflation increase in half during a time when the gross national product is rising by almost 10 per cent each year.

Crime was growing by 10 per cent two years ago and today has slowed to one per cent. Federal spending on the environment has increased by 500 per cent. In 1973, $8.5 billion is allocated for health care and research.

Nixon has been the most impressive in his handling of foreign policy. A man who has always taken a strong stand against Communism, Nixon made unprecedented trips to Red China and Russia, opening closed diplomatic channels and concluding a Strategic Arms Limitation Treaty. He steered America clear of Middle East entanglements.

The one rotten apple in the foreign affairs barrel has been Vietnam. Though he has not ended the war, Nixon has moved closer in that direction than any president since Eisenhower. Troops have been cut back. Nixon proponents use a figure of $30,000 Americans in Vietnam

Share the love

All students are welcome to come and share love at the inter-Varsity Christian Fellowship meeting Friday at 7 p.m. in College Union 230.

Pastor Melvin Rich from the Church of the Nazarenes will speak on the responsibility of love in friendships.
Backpacking: try it, you just might like it

PAUL SIMON

Right to dissent

I have just to laugh sometimes at the insane methods by which people illustrate inanimateness to the opinions of others.

Last week, for instance, I read a letter to the editor in a local newspaper in which an irate reader cancelled her subscription to the newspaper because of someone's editorial statement (not the editor's).

Of course, that lady couldn't resist throwing in a few choice offerings of her own before announcing her cancellation.

Didn't someone once say, "I disagree with what you say but I defend to the death your right to say it?"

I've even seen people cancel subscriptions because someone was jealous of them.

Can't reasonable people have differing viewpoints?

Apparently, some people expect others to agree with them 100 percent. I'm afraid to ask questions. I've seen people cancel subscriptions because someone else was jealous of what they were saying. I've even seen people cancel subscriptions because someone else was jealous of what they were saying.

I'll defend to the death your right to say it.
Traditional fete dying for a change

by Liane Lucietta

Like many college traditions, Homecoming may be another institution about to fall by the wayside for lack of originality.

Dr. Dan Lawson, director of the Activities Planning Center, says that although he is not really pessimistic about the future of Homecoming he feels that “Unless changes are made, Homecoming will die for lack of relevance.”

It seems unusual that an administrator/lawman, presents the relevancy issue, usually brought forth by students. As director of the Activities Planning Center, Lawson and his staff work with the committee planning Homecoming. He said “The students who plan Homecoming year after year assume that it has to be the same way each year. There have been practically no changes in the past 30 years. The challenge is to get some unique ideas.”

Dr. Robert Kennedy, president of this university feels that the student body is still enthused about Homecoming because, “Each year it’s obvious that the students put in what appears to be fantastic amounts of time developing floats in the parade and it is a spirited activity.”

Robin Baggett, ASI president, said, “Maybe it’s not the rah, rah, atmosphere anymore, but there is still the concern as evidenced by the large turnouts. The expressions of enthusiasm:

“There have been practically no changes in the past 30 years. The challenge is to get some unique ideas.”

I might have used in the crowd, but I think the interest is still there.” Some people have no real nostalgic feelings to associate with Homecoming, such as Margaret Ballantine, human development and education representative to Student Affairs Council. “I realize that for a lot of people it’s very important and they get a lot of enjoyment out of it. It’s one of the traditional things that I’d just as soon do away with.”

“Homecoming is really for the alumni. I think the whole purpose of Homecoming is to get the alumni to come back to the institution to see what changes have occurred,” Kennedy said. Former ASI Pres. Peter Evans has said, “The Alumni Association is one group considered often in making any decision on this campus and I think that’s wrong.”

1972 Marshall is announced

In 1964, Lew Litte was a member of the first architecture graduating class here. This year, 22 years later, he will lead the Homecoming Parade as Grand Marshall. Although it has been a long time since graduation day for Litte, he hasn’t forgotten his alma mater. Twice a year, he manages to get away from his own architecture firm in Franco, Lew Litte and Associates, to participate in Homecoming and Poly Royal traditions.

Steve is a微socineiitf our
national legislature. SAC must
answer questions, establish
policy and meet tbe needs of its
constituents." Johnson said.

"SAC is the board of directors
of ASI. ASI provides an infinite
amount of services, entertainments
and instructionally related programs.
Not every student may realize
that SAC controls virtually every
extra curricular activity on this
campus, such as athletics,
speakers, concerts and national
conferences. Anywhere the
students go, it's ASC out. SAC
controls the mandatory fees.

According to Johnson, student
interest in student government is
a must. "Student support and opinion
are essential. It is up to the SAC
to get other students and the
media to educate the student," he
said. "The goal of SAC is to meet
the needs of the students by
establishing policies for now and
the future." Johnson is optimistic about this
year's SAC. "We are already
working well together as a body.
Opinions are given by all sides
effectively. We are trying to
eliminate personality conflicts and
get down to issues at hand,"
Johnson said.

In Johnson's opinion, SAC
should be more concerned
with the issues on campus and the
surrounding community, but not
ignore national and international
events. He summed up his hopes for the
coming year as SAC chairman by
saying, "I am optimistic and
confident that SAC will be an
effective, efficient body in
meeting the needs of the
maximum number of students
without ignoring the minority.

Ideally representatives from
each of the seven schools at this
university comprise this core of
student government.

"I personally would get very
involved. I'd try to show my
feelings about certain programs
that are getting funded. Dorm
shoulders also affects many
students," Lester said.

Lester hopes SAC will present a
better student government image
to the student this year. "I hope that this year SAC
instead of showing a split, will be
able to accomplish a goal to
increase SAC's image as a better
student-community
relationship, plus better
budgeting practices. We want to
show students that student
government can work
efficiently," he explained.

Lester has two goals for the
coming year: "Office space for SAC members and
equal parking privileges for both
faculty and students."

"Office space is needed for
SAC guys to better open
themselves up to the student," he
continued.

"Parking is a problem. Only
quarter of students have the
campus to find a parking space.
Students and faculty should be
equal. I intend to propose to
the SAC a resolution to that effect."

Brad Leater, architecture and
environmental design
representative, believes SAC
should take a more humanistic
stand in its policies and decisions.

"If it has to do with the
students' well being, you have to
take a humanistic stand, not
financial. We have an obligation
to help them. A lot of people
miss the boat. SAC's duties
are more than just managing
money," Issacson said.

"It's hard for a SAC member to
vote without getting input.
Otherwise, he votes for himself,"
Issacson said.

The representative suggested
that a SAC Forum be formed to
allow students to come to
SAC. "It would be totally open to
the students to ask questions at us,"
Issacson explained.

When asked what SAC is doing
after these meetings, Issacson
replied, "We are working on the
affairs which are necessary
before any operations can get off."
...finds spending myriad

(Continued from page 7)

We are setting the stage for the year. "Engineers and technology representatives are SAC as 'a channel for input from the student,'" WEAT said. SAC represents the student. Weere selling the representative Chria Weat aeea the atudent."

We don't need a campus of experts on student government, but we do need a campus of students who know how to express their desires," Simon explained.

Ron Martinelli, human development and education representative, believes the biggest discouraging element in ASI government is that the "student does not know how to put SAC to his own use.

(Continued on Page 11)

...
Batonette works hard, too, working up routines.

Strikin’ up the band...

...In addition to daytime marching hours.

After 14 plus hours of weekly toil, band members always readily await for that moment to shine—the grand finale.
William Johnson, band director, is the man who coordinates with expertise the abundant student enthusiasm and energy.

by BECKY THOMPSON

"This year's band is without a doubt the most enthusiastic group I've ever worked with," said William Johnson, director of the Marching Band. Johnson, who has been here for seven years, said, "The kids are more dedicated to performing with perfection and sophistication than any band I've ever worked with. They're quick and smart and they've got an uncanny ability to learn the new and complex routines we've been working on. We only had one week of practice before the Humboldt game, and they were fantastic!"

"There are about 60 members in the band, most of which are freshmen, and they are tremendous," continued Johnson. "They came in with a great deal of enthusiasm and are eager and quick to learn. They also brought with them a lot of talent which makes everything a lot easier too. There is a definite sense of group solidarity between the band members, and that makes their working together easier for sure.

"The students seem to be receiving the band with a great deal of enthusiasm at the games, which makes the band members very happy and eager to continue to perform as well as possible. I think the students can see the quality of the performances and are proud of their band," said Johnson.

Johnson is optimistic about the Homecoming Game show the band has been working on. "Doc Levinson was supposed to come down and we had planned a show around him, but he cancelled out in August, so we've worked out a new show and have come up with some pretty exciting arrangements."

The show will begin with the band playing "Sign of the Times", the theme of Homecoming, and adapt the tune to be played while they perform a precision drill.

The show will continue with a tribute to the Olympic Games and will feature the theme of the Olympics. The band will display the flags of the United Nations and the Olympic flags during their drill. There will also be a runner who will enter the stadium and light a flame as is done during the games.

The band plans to follow up with "Brandy" by The Looking Glass, which will feature an alto saxophone solo by Cary Liwanag, the president of the band.

The finale will include "Saturday in the Park" by Chicago and will feature the Trombone Quartet with Charlie McCaw, Tim Ford, Steve Dowd, and Harry Holmes.

There are 120 members in the block band, that is members who play instruments. In addition to that, there are two drum majors, eight letter girls, and one twirler.

"This is the largest band that Poly has ever had," said Liwanag. "With that many people, it takes a lot of cooperation and hours of practice to get everyone performing together and giving a quality performance. But the attitude of the members is real good, and we work together well and get good results."

"The new members are great. They are all good musicians and they learn a lot faster than new members have in the past," he said.

"The band practices about 14 hours a week and everybody shows up. We want to work hard so the performances are good. We enjoy what we do and get a lot of personal satisfaction in knowing we have done a good job," said Liwanag. "The members are really spirited too, and spirit is what makes a good band. We're excited about our music and marching and our excitement shows in our performance."

Photos by
Henry Gross

Wayne Lewis is a freshman this year and is a new member of the band. When asked how he likes playing with them, he replied, "The whole thing is just great. Everyone's attitude is fantastic and we like to play well and show we're the best college band in the country!"

"Mr. Johnson does a great job," said Lewis. "He's pleased with us because we are performing fantastic shows that are some of the hardest he's ever planned. He tells us that he's impressed and we try even harder to please him and ourselves."

"It's an honor to be a part of a group like this. They're the finest kids in the world," Johnson said.
Budgeting gets 'hectic' 

by DAVE CHERRY

Acting in a strictly advisory capacity to Student Affairs Council (SAC) is the job of the ASI Finance Committee, according to Mike Meirling, committee chairman.

The committee is delegated with the responsibility of advising SAC, to put it simply, in how to spend ASI funds. Finance Committee, since its advice to SAC is usually taken, is therefore in control of the $250,000 ASI budget, Meirling said. The committee has a "direct effect on every student. Everything a student touches in his four years here, practically, is controlled by Finance Committee," Meirling said.

Meirling stressed the strength of a Finance Committee recommendation. SAC, according to Meirling, usually follows Finance Committee recommendations, except in policy decisions concerning the budget.

An example Meirling cited was the Gay Students Union case. "Finance Committee did not even want to make a recommendation on that," Meirling said.

The job which "consumes the largest part of the time of the Finance Committee," according to Meirling, is setting up the ASI budget each year. Work on the budget begins in February and is usually completed in time to go into effect for the next school year.

Towards the end of the Spring Quarter, a Finance Committee member's job gets hectic. Members have been known to neglect homework altogether and work until the late hours of the night to concentrate on the give-and-take budgeting process.

Finance Committee consists of two representatives from each of the University's seven schools, as well as a chairman who is elected from the previous year's committee, a dean's representative, the university business manager, and ASI program manager.

Members are chosen for the committee by the committee itself, through a process of interviews. All candidates must receive SAC approval.

Members are chosen on the basis of their apparent interest in university affairs and in what the people from their school want, rather than on the grounds of budgeting knowledge.

"You learn how to work with a budget very fast," Meirling said. Problems often confront the Finance Committee. " Probably the hardest thing to do is to take new programs into the budget and allot them money," Meirling said. "The budget remains fairly stationary and this allows little room to add new programs.

The solution to this problem, Meirling suggested, was to decide "which program benefits the most students".

an unusual selection in two historic adobes . . . antiques, art, gourmet items at the courtyard.

964-970 CHORRO STREET, SAN LUIS OBISPO, CALIFORNIA

VILLAGE MOTEL

Charles Long
Manager
145 South Street
Tel. (805) 543-1056
San Luis Obispo, Calif.

Bend a little every day. It's a good habit to pick up.

Imagine what would happen if every man, woman and child in San Luis Obispo picked up just one piece of litter each day. Think how much cleaner our town would be. Now imagine what would happen if everyone picked up two or three pieces of litter every day.

All of a sudden, the litter problem wouldn't be the problem it has been for so long. It's that simple.

But let's face it. We'll all have to bend a little. Every one of us. Because anti-litter slogans haven't stopped the litterbug. Thugs of a fine haven't stopped the litterbug. Words simply haven't worked.

It's time to stop talking and to start picking up litter.

The Pepsi-Cola Company of Santa Maria would like to help in the best way we know. By starting at home. We're asking everyone who works for us — drivers, secretaries, executives, everyone — to pick up litter. Not just pass it by.

Bend a little yourself. It's a good habit. In time, even litterbugs may pick it up.

Brought to you as a public service by the Pepsi-Cola Bottling Company of Santa Maria, California.
When this 25-year-old researcher wanted to investigate a possible cancer treatment, we gave him the go-ahead.

We also gave him the right to fail.

At Kodak, it's not unusual for a 25-year-old like Jim Carroll to win the title of senior research physicist. Like any company involved in a lot of basic research, Kodak has felt the pressure of modern technology and the need for young, fresh thinking. So we hire the best talent we possibly can, and then give them as much responsibility as they can handle, whatever their age.

We have departments and divisions, like any company. What we don't have are preconceived ideas about how an expert scientist's time should be spent. So when we received a request from the medical community for assistance in experimenting with lasers as a possible cancer treatment, we turned to 25-year-old Jim Carroll, who is deep in laser technology, and gave him the go-ahead. He built two half-billion watt laser systems, one of which Kodak has donated to the National Institute of Health.

The lasers proved unsuccessful in treating cancer, but we'd make the same decision all over again. We entered laser technology because we have a stake in business. We let a young researcher help the medical community look for a means of cancer treatment because we have a stake in the future of mankind.

To put it another way, we're in business to make a profit. But in furthering our own needs, we have often furthered society's. After all, our business depends on our society. So we care what happens to it.

Kodak

More than a business.
San Luis Obispo is a nice place to live. That's why many graduates from here decide to live and work in San Luis Obispo or the surrounding area. Quite a few recent graduates from the School of Engineering and Technology. Jobs in these fields aren't exactly scarce. In fact, they can be found without too much difficulty. Some people don't want just any job. They want to enjoy themselves at the same time. This sentiment is shared by most who stay here—that San Luis Obispo is an enjoyable place. I get job offers from companies in San Francisco and Los Angeles with a high salary guaranteed," says Neil Koelliah, a June, 1971, mechanical engineering graduate. "But I couldn't stand to live in either of these places. The money just wasn't worth it." Koelliah took out a loan and bought a local automotive shop. He said his main reason for going into business on his own was to stay in San Luis Obispo for a long time. He is buying a plot of land to build a house on.

Jacbro Brar, another mechanical engineer, was graduated in June, 1972. Originally from India, he works at the Diablo Canyon Nuclear Center and plans to stay until construction at the site is completed. "I decided to take the job in San Luis because I liked the area. My wife, Judy, was still going to school at Poly and she didn't want to quit," Brar said. "So I own job and plan to stay with the company after the job is done, and transfer around the country so I can see the United States. "About 97 percent of the guys I know—and I know most of the guys in my graduating class—had jobs before they got out," said Brar. "So it was for lack of opportunity that I decided to stay in San Luis. I stayed because I like it here."

A December, 1971, mechanical engineering graduate, Glen Albright lives in Morro Bay and works there in a marine repair shop. "I stayed in the area because I wanted to work in the field of marine engineering, and that was a good job for me right here," said Albright. "I've worked for corporations before, for summer jobs, and I don't like it at all. "I'm not sure what I'll do in the future as far as staying in San Luis Obispo County is concerned. But if I do decide to get a job in a more specialized field of marine engineering, this job will be good, practical experience," he said. Matthew Phillips, who has a senior project to complete, worked in a local machine shop as foreman and now plans to work at the Diablo Nuclear Center. He hopes to graduate in December in electrical technology with a concentration in welding. "I've decided to stay here in San Luis because I really like the quiet and it is a great place for me to enjoy my hobbies which are scuba diving and motorcycle riding," said Phillips. "I plan to open a small business of my own when the job at Diablo is finished."

Evaluating the available entertainment in the area, Phillips said, "If I can't find anything in the big city for a good time, I have no trouble driving up to San Francisco for a weekend. But I don't get the urge too often.

SAC goal: spending to please...

(Continued from Page 7) "There is potential only on controversial issues," Martellini said. Martellini says his biggest goal this year is "to get the parking situation straightened out and let the student know that he is stopped. All the money from the parking fees are going downtown, when we should get 50 percent. I'd like to see the students on this campus run the parking situation."

"I want what the average student wants," Martellini explained. "The more people that jump on my back, the better I feel. At least I know where they stand. The people on SAC are doing their duty. I wish more students on campus would write letters and open their mouths. I plan to continue in my efforts to alleviate some of the pains the bookstore has caused on this campus."

Robert Chappel, engineering and technology representative, feels that this will be "a very productive year for SAC. "My main goal is to get more money for engineering. Money makes things roll. This year's BAC will try to satisfy the majority of people on campus on the decisions we make. I hope to get things passed for students," Chappel said. Gray Williams from agriculture, and natural resource hopes SAC can have a unifying effect on the school this year.

"We are trying to unify the school back together again. I ran this year to continue to represent the attitudes and opinions of the students of agriculture in student government. Last year's BAC was real unorganized and lacked direction due to lack of leadership. Meeting guidelines have been set up a little stronger for SAC with the students involved," said Williams.

Another representative from the School of Agriculture and Natural Resources, John Deighter, intends to "make students in the School of Agriculture more aware of BAC and what the officers have to offer them in terms of services and programs."

"This year's student government is more aware of student needs on this diverse campus, but people are still able to speak out on issues," Williams commented.

Steve Depper, representative from business and social science, visualization student interested as passive—except when a controversial decision by SAC has direct effect on the student.

"The only time they realize where funds are going is when money is not allocated to the group they are in," Depper said. Depper hopes to have a beer and pizza parlor on campus. He said he would like to see the student lobby in Sacramento overturn the law which prohibits liquor on this campus.

"A beer and pizza parlor would really be a money maker," Depper explained. "Plus it would solve the TO problem."

"I'm interested in getting freshmen and sophomores involved in my council. It's hard to talk to them because I don't have their classes," said Depper.

According to Geognanni Hays, communication arts and humanities delegate, ASI Prez Bobbi Baggett and Johnson are the core of student government right now because they have had a full summer quarter to initiate new programs and services. Whereas SAC has only been in existence for three weeks and most of the business at these meetings was left from last year's or this summer.

"Right now the two officers (Baggett and Johnson) are the core of ASI government. They have initiated the new programs during the summer. A program can't be initiated alone. We'll be rolling on Catch 22 pretty soon. We're still tying up ends from SIC and SAC from last year. Once we get going, we'll get a lot done," Miss Hays said.
Archaic idea reversed
by JOAN CAMPBELL
Sugar and spice and everything nice is what Nevada Ray Harr is made of. Well, then why is the devil she meandering around with a whip and snails and puppy dog tails?
Wait a minute. Maybe that's what sugar and spice and everything nice is made of. Well, then why is Nevada Ray Harr meandering around with a whip and snails and puppy dog tails?
Miss Harr, a drama major masquerading in the Speech Department, has undertaken the role of 12-year-old Arthur in the campus play, "King John," which is scheduled for 8 p.m. on Nov. 9, 10, and 11 in the University Theater. That's quite a switch, Shakespeare. I thought you said that men played women's parts. And if any woman is suited for the part, Miss Harr is.
From a high school consisting of 60 women and only 20 men, Miss Harr is well-acquainted to acting out the antics of little boys. For that matter, she's just plain, well-acquainted to acting.
Not only has she played more male parts than female, but also she has been in at least one play every year since she was six years old. Her experience ranges from "Jack Frost" in the third grade and "The Brave Little Tailor" in a play (in "The Characters in Search of an Author"), a nun in "The Killing of Sister George," an ingenue in "Charley's Aunt," and a little girl who goes crazy ("The Crucible").
Miss Harr seems excited about her part in "King John" because she says it represents a different sort of challenge.
"You really get in a rut playing ingenue roles," she said. "You get tired of looking sweet."

Enthusiasm and diverse activities are Agriculture Council attributes

Accounting for the numerous agricultural clubs in the Agricultural Council, one of the largest councils on campus. Members of the council feel this is attributed to the great amount of enthusiasm displayed by students in this school. The council is to help clubs become more organized and to help them organize coming events such as Poly Royal. It is a linking body between the AAI, the administration, and the clubs, which try to communicate between the AAI officers and club members. In the past there has been a lack of communication between the AAI and the clubs— all clubs. A good example is the committee to which the council is a liaison between committee representatives of the School of Agriculture and Natural Resources, three executive members from different representatives. Chairman of the council is a national function to orient urban and city people with agricultural. The council usually places window displays in local stores and sponsors hay bucking and cow milking contests in Madonna Plaza along with farm power demonstrations. The council's end-of-the-year activity is the Agriculture Leadership Banquet, which is co-sponsored with Alpha Zeta, the honorary agricultural fraternity.

College Union: all in a name

"A rose by any other name would smell as sweet," What about a College Union? After the college was named a university, the College Union Board of Governors (CUBG) voted to change the name of the Julia A. McPhee College Union to Julian McPhee Student Union. The change had to be approved by University Pres. Robert E. Kennedy. Kennedy thought the decision had been made too hastily and asked for reconsideration of the issue.

The issue is before CUBG once again. The members are checking over various names and would like more student input on the subject.

Many names have come up—from University Center to Student Union—seide from not changing the name at all. If you have a name to suggest go to the information desk in the CUBG and submit it.

CUBG consists of 10 students and representatives from the Faculty and Academic Senate, the Administration and the Foundation.

Pleasing the crowd isn't that easy

Planning an entertainment agenda that appeals to 12,300 students isn’t easy. Especially when eight committees try to fit their activities into a limited number of non-conflicting days. But those are just two of the problems ASI Program Board attempts to tackle during everyday business.

The board encompasses eight different committees: Speaker Forum, Fine Arts, Films, Dance, College Union, Craft Center, Recreation and Tournaments, Assemblies and Outings.

The purpose of this board is to provide a diversified program of events and entertainment to the student body and university staff,” according to Randy Donant, the board’s advisor. Donant explained that it is a good learning experience in leadership and tact. All the groups must deal with each other in programming their events, so tact and consideration are important techniques to remember. But, no matter how skillful the members are, problems do arise.

According to Donant, the biggest problem for the board is recognizing an Ethnic Program Board which programs similar events. The Ethnic Program Board schedules events throughout the year such as heritage week festivities. Trying to juggle activities around each committee’s agenda is a problem too. This explains how more than one event occurs on one day, such as a concert and movie. Overextending events will always be a problem; there are only so many dates to work with.

Money is always an important factor to consider. Last year the Program Board experienced a deficit of $11,000. This year the board must try to correct it in order to receive adequate ASI funding next year. Donant seems confident this year saying, “The people in charge are doing a good job and I feel that we’ll make up the $11,000.”

The ASI Program Board meets at 6:30 p.m. every Monday in CU 216.
A porta-factual project

by DAVE CHERNY

Catch 22, the non-controversial cross reference system, was among the main discussion items at the President's Council meeting Tuesday. The system, which was designed by Skip Kelley, student at this university, was intended to be a fast, easy way of finding facts needed by any student governmental organization. The system would be in the form of a portable library used in finding by-laws and legal documents quickly when needed, rather than spending valuable time in researching the pertinent facts. Kelley, who along with ASI President, Rob Mogel, presented Catch 22 to the President's Council, expressed dissatisfaction with the way the system was being handled. Kelley said that he was "asking for a little cooperation" from the Council, but that "nothing was resolved at the meeting" concerning Catch 22.

On the other hand, Dr. Robert Kennedy, University President and head of the President's Council, said, "My interest was in seeing that the program be given as much administrative support as we could give it."

Kennedy expressed a concern that "potential future expansion of Catch 22 may entail a lot more expense that is now realized."

According to Kelley, administrative cooperation will require "a resolution passed by SAC (Student Affairs Council) formally requesting cooperation."

Roundhouse has grown in a few months from a busy parking lot to a student information service which is now handling 60 calls a day.

Shane Roundhouse Director John Holley said, "Basically, it is "on the phone. If you have a question regarding anything, give us a call at 543-1941 and we'll try to help you out."

Roundhouse is designed to answer students' questions and problems concerning the campus, community, or anything else they care to know.

According to ASI Vice-President Denny Johnson, "Any questions students can't answer—how to change majors or a grade, hours different businesses are open, who delivers, who gives student discounts—Roundhouse will either have the information or find it."

The program, which borrows its name from round stations used to repair automobiles and get them back on the right track, has been described by Holley as "a lot of roads leading in to a central location which will put people on the right track—an information service that is easily accessible to students."

Community merchants were concerned with business hours, student discounts, merchandise handled and services offered. Their reply is now compiled part of the growing file containing answers to frequently asked questions.

Student volunteers man the phone to answer questions and complaints. A form is completed for each call received. A quick look at the large stack of completed forms reveals the diverse interests of students here. Although designed to answer questions such as drafting, counseling, campus procedures and student government, Roundhouse has become a thorough information center. Washing instructions, travel times, watered care, zip codes, occasionally, even homework answers have been provided through the service.

In addition to being a central information center, Roundhouse is now coordinating rides for students who want to go home for the weekend.

A large map of California is mounted outside the Roundhouse office in the College Union. Pets on the map indicate desired destinations, while cards posted next to it provide information concerning departure and return times.

The board is maintained by a service fraternity, Theta Chi, while Roundhouse serves as a coordination point.

According to Johnson, over 100 calls were received during the first three days of the program. Student seeking transportation outnumbered 1 to 1 by students offering rides. "Be sure you can drive, just call," said Johnson.

Brotherhood, communication and cultural awareness are the keys to the Ethnic Program Board, a new group designed to meet the needs of campus ethnic and cultural groups.

Fred Johnson, board chairman, said that in the past different ethnic groups were not represented on campus or included in many campus activities. The board was formed to remedy that situation.

Ethnic Program Board, an independent arm of the ASI College Program Board, includes students from many cultural backgrounds—Chicanos, Chinese, Japanese, Native Americans and Blacks.

According to Bob Bonds, board advisor, students from different ethnic groups have a common factor—they experience the same basic social problems.

Bonds said the board offers an opportunity for people to get acquainted with other cultures.

"Hopefully there is a removal of stereotypes and a deeper respect and brotherhood for the people involved."

The Ethnic Board plans to bring the racial awareness of diverse interests to a central point on campus.

The board sponsored an Asian week here that included films, demonstrations, speakers and exhibits.

Other activities the board plans to present include a concert featuring "War" (the former backup group for Eric Burden) on Feb. 18, Black Heritage week in February, Native American week in April, and a M.E.C.H.A. (Chicano) week in May.

The board meets every Tuesday from 5 to 8 p.m. in CU 218.

TIED OF FIGHTING THE TRAFFIC, PARKING & RAIN IN GETTING TO YOUR CLASS WE OFFER YOU TRANSPORTATION ANYWHERE ON CAMPUS "The Tropicana Bus Is the Student Chauffeur"
An exact definition of the Student Executive Cabinet (SEC) would probably be just about as complex as the group itself is.
SEC has shifted its emphasis each year since the cabinet was formed. But the group really isn’t wishy-washy.

The student-elected ASI president serves as chairman and, monitor. SEC usually redirects its duties, authority and jurisdiction each year to agree with ASI president’s philosophy. The cabinet’s degree of involvement, for the most part, depends on him.

The cabinet can also direct SAC to consider a specific resolution, appoint special committees of study and make recommendations on ASI business projects.

This year SEC meets weekly on Tuesday afternoons. ASI Pres. Hoblin Baggett chairs the meetings and plans to make SEC a responsible and active organ in the student government. "The greatest challenge for SEC this year will be the revision of the ASI bylaws," Laura Lampson, ASI secretary and SEC member, said. Inadequacies and poorly defined bylaws have caused many problems in the past.

The members of SEC will work on providing a truly workable set of bylaws in addition to their other duties.

**Ski Club film**

"Remember-a-Cumming," a film on skiing, will be shown at 7:30 p.m. Tuesday in CU 307. The film will be screened at the Ski Club’s regular meeting.

According to Bud Gaver, spokesman for the club, members also plan to talk about their recent trip to Utah and the second annual ski swap.

The student-elected ASI president serves as chairman and, monitor. SEC usually redirects its duties, authority and jurisdiction each year to agree with ASI president’s philosophy. The cabinet’s degree of involvement, for the most part, depends on him.

A high-sounding definition of SEC can be found in the ASI bylaws. The purpose of the cabinet, the bylaws say, is to: “execute the affairs of the Associated Students, Inc., within the framework of the Bylaws, the Bylaws, the Bylaws, and the policies of the Student Affairs Council.”

More simply expressed, SEC advises the ASI president, has final say on scheduling events, tries to resolve conflicts in the schedule, revises budget allocations, directs the president to veto any particular SAC action, recommends to SAC a budget, and provides an annual audit.

The cabinet can also direct SAC to consider a specific resolution, appoint special committees of study and make recommendations on ASI business projects.

SEC has 11 voting and four non-voting members. The cabinet’s standing committees are awards, Homecoming, Intramurals, executive staff, rally, spring king, finance, leadership conference, and personnel.

This year SEC meets weekly on Tuesday afternoons. ASI Pres. Robin Baggett chairs the meetings and plans to make SEC a responsible and active organ in the student government. “The greatest challenge for SEC this year will be the revision of the ASI bylaws,” Laura Lampson. ASI secretary and SEC member, said. Inadequacies and poorly defined bylaws have caused many problems in the past.

The members of SEC will work on providing a truly workable set of bylaws in addition to their other duties.

CROSS COUNTRY

Team depth gets wins

by CHUCK SAMS

The NCAA Cross-Country Championships in Wheaton, Illinois, are coming up next month on the 11th and the Mustang cross country team hopes to be there.

The Mustangs need to make a good showing in the conference meet to be held here Nov. 4th. Most of the competition will be coming from the defending National Champions, Cal State Fullerton, and coach Larry Bridges feels that if they can at least get second in the conference they get to go.

Great team depth and good competitive spirit has been the trade mark of the team thus far this season. The hurriers have been out three times running distances of six, eight and five miles. In the six-mile race against: Fresno, the Mustangs placed second, third, fourth and fifth.

The eight-mile run in a home meet was against some nationally ranked runners and the Mustangs impressively placed third, fourth and fifth.

In the last outing they heavily defeated UC Riverside and Cal State Bakersfield while placing second, third, fourth and fifth.

Members of the team that have been doing very well thus far this season are Dale Horton, Jeff Niland, Rich Walline, Russ Walline, Terry Lamb and Terry Unstead. Others that have worked hard for the team are John Beaton, Don Carlson, John Burns and Eric Olson.

Horton was the number one runner for the Mustangs last season and has continued to show this ability this season. He has run a 13:50 three mile and a 4:10 mile. Niland is the best freshman to have ever come to this school according to Bridges, and while attending San Luis Obispo High School ran a 9:30 two-mile.

Bridges is very happy with the way his team has been responding to the competition, "distance running is ninety percent concentration," says Bridges. He explained that it is an unusual trait to have but the distance runner must be able to think of nothing else but one thing while running and if he lets his mind wander he will slow down.

His team works out two times a day and runs about 120 miles a week. "This is the part of being on the team that they really enjoy," said Bridges. "They look forward to going out and running".

WATER POLO

Aquamen get tough test

by MIKKEMITH

After starting the 1972 water polo season with a win over Hancock College the Mustangs, now holding on to a 3-5 non-conference record, have had their share of tough competition, including three matches against Pac-10 teams like Stanford, and UC Berkeley.

In their second game of the season against Hayward State University, the Mustangs took only a hard 0-10 loss, but lost their junior ace Bill Stanton, who received an opponent's elbow in his cheek which required eight stitches to close. Teammate Al Anderson was also on and off the bench as the result of a knee injury.

JV Football

Junior varsity now 1-1

by JOE BARNES

After bowling to a highly regarded University of California JV football team 10-7 at Berkeley, the Colts stormed onto their home turf and trounced Cal Lutheran 28-0 last Friday.

Led by a superfront line which has yet to yield a touchdown on the ground, the Colts have yet to yield a touchdown to a ground attack in two games.

Meanwhile the Colts have averaged over 160 yards rushing in those two encounters.

A tight secondary has picked off seven passes for the locals.

Mustang soccer team boasts star returnees

by STEVE GREENBERG

Yes, Martha, Cal Poly does have a soccer team.

The only trouble is, it was almost totally shrouded in obscurity until this year. The Mustang team this year is one of the most strenuous sports in existence, and all players on any soccer team must endure punishing workouts to keep in top shape.

The Mustangs are no exception. Bacon, commenting about the team's pre-season training schedule, said "good conditioning takes a lot of time."

The Mustangs are new to the university. Instead, NCAA rules now allow for JV teams, where young players can gain game experience, seasoning, training and learn fundamentals without forfeiting a year of eligibility.

Water polo team...

(Continued from page 20)

Jan. 11.

Last weekend the Mustangs went to Pomona and came away with the last of three tough Pac-8 schools. UC Berkeley. The Bears won the contest, 10-3.

The next game with San Francisco State University was probably the most exciting for the Mustangs.

With a 9-9 tie score, the game went into overtime, but neither team could score more than one point. The overtime ended in a 1-1 tie. The game then went into sudden-death with big Jim Breck scoring the winning goal, giving the Mustangs the 1-0 win.

With a 9-9 tie score, the game went into overtime, but neither team could score more than one point. The overtime ended in a 1-1 tie. The game then went into sudden-death with big Jim Breck scoring the winning goal, giving the Mustangs the 1-0 win.

The next game with San Francisco State University was probably the most exciting for the Mustangs.

With a 9-9 tie score, the game went into overtime, but neither team could score more than one point. The overtime ended in a 1-1 tie. The game then went into sudden-death with big Jim Breck scoring the winning goal, giving the Mustangs the 1-0 win.
A couple of hours before the Boise State game, while you were throwing down your steak and working on your fourth beer, there was quite a bit of activity going on over at the campus.

What would anybody be doing at five in the afternoon on a Saturday at the school?

Well, the members of the Mustang football team were beginning to prepare for a very important game with the Broncos from Boise.

It began with a team meal, followed by a walk-through session in the gym, the long process of taping up, uniform check-out, a time for dressing, and a walk down to the stadium.

Phil Bromund was behind the scenes with his camera to catch a bit of the general mood. Before the game the feeling is quiet and tense. And then, after a tight wire finish and an electrifying victory, all is let go.

running, the guys work out from 3 to 6 every afternoon, which amounts to 10 hours every week. They run 2 to 3 miles each day, and they also run wind sprints,” Sacco said. “But before any soccer team can ever hope to be successful, it must drill long and hard on ball control. The object is obvious, and there are very few rules to force a halt in the action every time one is violated. There is almost perpetual motion.”

Second, a well-played soccer game offers something which many rebellious people who have rejected baseball and golf are looking for—hard physical contact. It is often the order of the day. It may be true that our boys are off to a slow start this season, but with the potential for a strong comebacks, not to mention a popular assistant coach capable of providing moral inspiration at the right times, they are not to be overlooked. Besides, it’s not whether you win or lose, it’s how you play the game that counts, right?!! The team has, frankly, outdone itself to guarantee a good show. 

The Mustang football team opens its CCAA season this Saturday when Cal State Northridge (formerly San Fernando Valley State) comes to town for a 1:30 p.m. game. The Matadors have been off for a week after a 41-39 loss to Cal State Fullerton the previous Saturday. Since only one game has been played in the conference thus far, Northridge sits at the bottom of the list with a 0-1 record, while Fullerton is at the top at 1-0. But simply because Northridge occupies the cellar of the CCAA it does not mean the Mustangs will have an easy afternoon.

Head coach Joe Harper was quick to point out the attributes of the Matador team. “They lead the conference in team passing, offense and scoring,” he said. “They also have the individual total offense leader and the two leading pass receivers. They’re pretty potent offensively. They’ve only lost one game so far this year (the one against Fullerton) and they didn’t lose that one by very much.”

The three Northridge wins came against Oregon Tech in the opener, followed by victories over San Francisco State and Cal State Hayward. The Fullerton game was their fourth outing and they have spent the past two weeks preparing for this weekend’s contest. Last season the Matadors finished third in the conference with a 1-2 record behind the Mustangs and Cal State Fullerton. They were 6-7 overall. The Mustangs will go into the weekend game the conference’s leading ground team, with the leading scorer—Mike Thomas.
