Poor planning made hearing lecture difficult

Editor:
I find myself compelled to write concerning the "Street of Hell" article in last Thursday's Mustang Daily. I feel that the Computer Center was unjustly misrepresented in John Tevea's article and would like to make a brief reply.

First of all, turnaround time has yet to reach 24 hours this quarter as a quick glance into the machine room will tell. I could guess that 6 to 10 hours would be a good estimate of average turnaround time this week. Furthermore, the fact that other universities within the system have shorter turnaround times is masked by the fact that we process several times as many jobs ($10,000 last year) as they do.

Any comparison with other state universities must also reflect that fact that Cal Poly is unique in its instructional philosophy of streaming practical experience whenever possible. The Schools of Science and Mathematics, Engineering, and Architecture, a couple of which aren't even represented at some other universities, have accounted for over 80 percent of our total computer usage this quarter. Cal Poly simply requires more computer time than any of the other 10 state universities and colleges.

Perhaps Mr. Tevea should have asked one of our almost 60 computer science majors if he (or she) would be willing to trade our IBM system for a Control Data 3100 with fewer compilers, fewer canned programs, and less core. Only someone familiar with both computers would escape how ludicrous such a trade would be.

Editor accused of ignorance

Editor:
Miss Beatley, your ignorance is only surpassed by your naivete. You seem to be extremely ignorant as to the nature of this war and very naive as to what happens during war while waiting for the "important difference."

I shall start this lesson by going back to 1964 to see who wanted peace. The U.S. took full command of this war after France was defeated by the Vietnamese people. Throughout those early years it was not Hanoi that signed and supported the Geneva Agreement. It was the U.S. who came to support Diem thereby taking on the position of aggressor and not allowing free elections to take place. It was the actions of the U.S. that has caused this last 18 years of war.

Next, as for the change in attitude situation it is not Hanoi that has changed attitude about peace. This peace should have been made 14 years ago and therefore four years ago we should have never been in this war. There was nothing stopping us from making peace four years ago. Just as nothing is hindering us from signing a peace treaty today.

Finally, Miss Beatley, your important difference worth waiting for is nothing more than the dead bodies of my brothers and sisters that have been killed in this inhumane, unjust war. In the four years you talk about, the American power play has costed countless millions of human beings.

Let Catch 22 catch you

JEANNE WILES

Catch 22 again. Not the book and not the movie. This time it's the information system. You saw the movie and dug it...read the book ages ago. Did you understand what it was saying?

If you did, you understand the reason for Catch 22's existence on this campus. For those who didn't see the movie or read the book, just what is this information system-Catch 22?

Let's answer that by asking this. Have you ever tried to get up a fund-raising activity for your club? Or asked why a certain instructor couldn't be fired? Or wondered why you must pay a $0 parking fee each quarter?

If you've ever actually asked about some of these things, you know the usual answers. "Well, that's what CAM Section 3S.8, page 2 states"..."You can read it for yourself in the trustees' ruling, the State law, chancellor's directive, Government Code section and procedures pertaining to your question, there's no time left to put a proposal in proper order..."-to work on the activity itself.

Another common pitfall along the search for a particular document is you may be distracted by so many interesting sections of manuals to read that you never make it to the page you were looking for. In all, it's a big waste of time and energy to go pawing through all those scattered documents when all you wanted was one little answer to one little question.

Enter Skip Kelley. Skip has been through the run-around with the theme being "What is the information system more commonly known as Catch 22?"

He understands how the entire state university system works a little better than most students. Skip is not a student now, but he has been enrolled here before. On May 31, SAC authorized Skip to design and assemble a systematically indexed "information library" for the administration, with the theme being "What is the Student Government section that contains every public document having relevance to anyone within the Cal Poly or even the state university system."

The monumental indexing project necessary to make the 33 volumes usable is what we are going to talk about now. When completed, the project will enable anyone, within five minutes to locate all laws, policies, rules and procedures relating to a question he may have about what's possible at Cal Poly.

For one person, the referencing task would be astronomical. For ten people it would be a big job. For 25 people it would probably take about two weeks of steady work. For 50 people it would only take a week of work. This is what is needed if Catch 22 is ever to become a workable reality.

Training sessions for those willing to help with the project will be offered this Thursday at 7:00 a.m. and this Sunday afternoon. Further details can be had by contacting Skip Kelley in the Activities Planning Center or ASI offices.

Bostrom to defend rules

Robert Bostrom, Director of Housing at this university will be a guest on "Open Channel" on KCPR Thursday night at 7:00. Mr. Bostrom and the housing office came under fire on a previous "Open Channel," according to Steve Rognlie, a moderator for the program.

In an interview Mr. Bostrom said that although he didn't hear the first program he understood that some of the topics were refrigerators in dormitory rooms, visiting hours, and room checks.

"Open Channel" is a call-in program. Craig Hines, KCPR Station Manager said he especially urges dormitory residents with problems to listen and call in this week.

Government fellowship applications are offered

Students interested in a career in public administration in national, state or local government are offered an opportunity to apply for a fellowship to study at one of three universities: Alabama, Kentucky or Tennessee.

Candidates must be American citizens who have completed or will complete a bachelor's degree with any recognized major such as political science, social science or journalism by June of 1973. Each fellowship for single men has a total value of $4,400. The stipend is $3,500 and the remainder of the grant consists of the remission of fees and tuition at the three cooperating universities. Each fellowship for married men has a total value of $6,000. The stipend is $5,700 and the remainder of the grant consists of the remission of fees and tuition at the three universities. Beginning this June, man will serve a 10-week internship either in a department of the state government in Alabama, Kentucky or Tennessee, or with a federal agency in the South Dakota area. At the end of the academic year, they will take graduate courses in Public Administration at the University of Kentucky and either the University of Alabama or the University of Tennessee.

Completion of the 12-month training period entails men to a position in public administration. They can be awarded a master's degree at the completion of the academic year attended upon passing a final comprehensive examination. In addition to fellowship applications, students should apply for the internship immediately to the educational director, Southern Regional Training Program in Public Administration, Dr. W. C. B. Farns, University of Alabama, 35436. Deadline for submitting applications is March 1, 1973.

Radio editorials...

(Continued from page 1)

are used by an irresponsible minority to taunt the majority into an action the majority does not choose to take. "I am the most overt reference to editorial policy guidelines," said Hines. Then asked about the possibility of the station facilities being used by a minority to "taunt the majority" into a debate they did not care to participate in, replied that the possibilities would be slight.

"I have constructed a detailed plan for an editorial policy board with three students and two faculty to oversee editorial ventures by the station in order to prevent such an occurrence," said Hines. Another former station manager, Woody Coulart had perhaps the clearest picture of the situation. "I knew that other radio stations in the system were editorialising, San Jose state for one, but my efforts to get editorial privileges resulted only in a chase up and down the administrative levels. Each official felt that another had the final word and passed the decision on to him."

It remains then for the station manager to discuss with the administration, as suggested by Chandler, the actual legal policy and guidelines to be followed in the institution of an editorial policy by the campus radio station.

Foothill Intersections are being widened

Work began last week on the widening of Foothill Intersections at Broad and at Chorro. Walter Brothers Construction of San Luis Obispo will widen the intersections and install interconnected traffic signals. The project is being financed by the federal government under a traffic safety program with participation by the city and state for proportionate shares of the cost. Total cost of the project which will provide additional traffic lanes and a sophisticated traffic signal system will be approximately $143,000.

Christmas celebration offered by craft center

The Craft Center, located in the College Union, is preparing for its annual "Christmas Craft Celebration" according to Maggie Wall, head of the center. By filling out an application and registration list students will be able to display their handmade items. Students set their own prices with 30 per cent going to the Craft Center.

Exhibitionists display wares

Exhibitionists at this school now have an opportunity to display their virtues. On Thursday the RAT Committee will present the first annual "Hairy Chest Contest." Six male divisions will be highlighted with an added feature for the female population. The celebration will be held on Dec. 7 from 9 a.m. until 5 p.m. in the craft sales area.

CUBG still wonders
What's in a name?

The Julian A. McPhss College Union may be in for a name change, but student input is needed for the decision.

When this institution became a university in June the College Union Board of Governors (CUBG) voted to change the name of the College Union to Student Union.

University Pres. Robert E. Kennedy thought the decision on the name change had been made hastily and asked for reconsideration of the issue. This fall, members of CUBG have been discussing the issue. They want student opinions. Anyone who wishes to cast a vote for one of these names or has one to suggest a new one can call Roundhouse or go to the information desk in the CU, BU.

To improve your self-understanding and interpersonal relationships, attend the Human Relations Workshop Nov. 10, 11, and 12 at Lake Cachuma. It is being sponsored by the Human Relations Committee for any interested students.

The workshop, according to Bob West, publicity chairman, is a weekend of structured exercises within small groups "aimed at helping a person create greater awareness of himself and his relationships with others." Main emphasis is on communication, decision making, and leadership.

Randy Donant, committee advisor, says the workshop helps a person determine how group pressures will affect him.

The Human Relations Committee grew out of the former AIL Leadership Conferences in March 1973 with the objectives of utilizing the psychology of human relations involving groups to improve individuals and campus organisations.

The committee also arranges workshops for any campus organisation. The workshops are designed to help the club work more effectively by establishing order and revolusating its goals. For more information contact Bob West at 844-8812 or Leslie Griffln, advisor, at 844-2881.

Cost of the Lake Cachuma workshop which will be in session from 9 a.m. Friday Nov. 10 until noon Sunday Nov. 12, is $7.50. This fee includes lodging, food, and the price of the workshop and must be paid upon sign-up at the CU Information Desk.

Maybe the way to change the world is to join a large corporation.

We don’t make a lot of noise, but this is where it’s really happening. You see, a large corporation like Kodak has the resources and the skill to make this world a little more decent place to live. And we intend to do what we can to see that this is exactly what happens.

Take our home city, Rochester, New York for example. We cut water pollution in the Genesee River by using natural bacteria to dispose of unnatural wastes. We cut air pollution by using electrostatic precipitators as a new combustible waste disposal facility. We helped set up a black enterprise program in downtown Rochester, and we’ve been experimenting with film as a way to train both teachers and students—including some students who wouldn’t respond to anything else.

And we didn’t stop with Rochester. Kodak is involved in 47 countries all over the world. Actively involved.

Why? Because it’s good business. Helping to clean the Genesee River not only benefits society... but helps protect another possible source for the clean water we need to make our film. Our combustible waste disposal facility not only reduces pollution... but just about pays for itself in heat and power production and silver recovery. Our black enterprise program not only provides an opportunity for the economically disadvantaged... but helps stabilize communities in which Kodak can operate and grow. And distributing cameras and film to teachers and students not only helps motivate the children... but helps create a whole new market.

In short, it’s simply good business. And we’re in business to make a profit. But in furthering our business interests, we also further society’s interests.

And that’s good. After all, our business depends on society. So we care what happens to it.

Kodak

More than a business.
Powder puff tonight
The powder puff gridiron season will resume tonight when the junior-sophomore team meets the freshman-sophomores for the final action in Mustang Stadium. Kick off time is 7 p.m. for the contest and an admission of $30 cents will be charged.

The gridiron team has been in training for several weeks now and the services of Kent Landis, Kirk Hubbard, Dick McMath, Lee Paton and Don Weller were recruited to get the team into shape (or at least out of shape). The freshman-sophomores are responsible for teaching the participants the ins and outs of the intricate game of football, and have indicated they think their team is ready for a good clash.

Although the game is played with flags to keep score the action often gets heated and rough, providing the spectators with plenty of excitement and a laugh a minute.

The game will be carried on campus radio KCCPR (81.3 FM) beginning at 7 p.m.

Rodeo season to begin Saturday with Arizona

by JERRY TOMSON

After spending a frustrating week in Bozeman, Montana, this summer, the national Intercollegiate Rodeo Association finals, the Mustang rodeo team starts a new season this month in Tucson, at the University of Arizona.

Hungry for its first win of this school year, the six members of the men’s team and the three members of the women’s team will travel south seeking tough competition from Hartnell J.C., Pierce JC, and from the host team, U. of A.

The rodeo team lost only one regional rodeo last year to Hartnell at Hartnell’s home rodeo in Salinas. The Mustangs have won the regional title for over ten years in a row.

High hopes were the condition as the team rolled into Montana last June. Their hopes were dashed as the University of Montana came away with the final crown. The women’s produced the only bright light as they came in second in team points.

Several of the team members got in some good practice at the Grand National Rodeo at the Cow Palace in San Francisco last weekend. Lee Rosser, a returning veteran, and Cliff Happy, a transfer from Hartnell, both competed at the Grand National, aside from traveling the regular rodeo circuit this summer.

The top three remained the same in the UPI small college ratings but the rest of the list shuffled around considerably.

The Mustangs of this school repeated in third place following their byes weekend.

Delaware continued on its domination of the No. 1 spot with a 167 victory over Villanova while second-ranked Louisiana Tech had little trouble with Northern Arizona, 4-16.

But fourth-ranked Minnesota State fell to Northwestern Louisiana by a score of 16-19 and dropped out of the top ten entirely. Tennessee State moved up to fill the spot following their 26-14 over Morris Brown.

Another top ten team disappeared from the list as Bucknell handed n. a. i. s. i. a. 26-10 defeat.

South Dakota, seventh-ranked last week, played North Dakota (10) Saturday and had an easy go of it, winning 56-1. North Dakota (8) meanwhile moved up to such with a 48-14 whitewashing of Montana State.

Ashland had little trouble with Wayne State and came away with a 6-0 defeat, to move to the seventh spot.

Newcomers to the top ten this week are Tennessee Tech, Grundling and Drake.
