Mustangs receive Camellia Bowl bid against North Dakota

BY JOHN TEEV

The latest plans and progress reports have been issued concerning the status of capital outlay projects at this school. Eight significant expenditures have or will occur in the next few months.

The new $1 million residence halls, located north of Yosemite Hall, will provide residence space for 900 single students. The current completion date is January, 1973.

A $1 million dining facility complex, located on the former site of the Ornamental Horticulture Unit at Grand Avenue and Mountain Drive, will open at the start of Winter Quarter. When completed, it will provide a 300-seat cafeteria, a 120-seat restaurant and a 17-seat counter area.

Construction on a library extension will begin in 1973. The proposal calls for a 300,000 square foot, five-story building which will be north of the present library. This project will provide a permanent library for the university.

A new entrance road to campus is to be constructed later this year. Essentially, the project provides an additional entrance road to the campus, originating at State Highway 1, adjacent to Highland Drive. The road will proceed easterly through the site of the now vacated tennis courts, terminating at the Southern Pacific railroad overcross in the west corner of the academic core.

Lastly, a project which involves the reworking of existing parking lot 8F, which is located south of the Presidential Poly House, will begin being built in 1979 and will replace the old Crandall complex. This facility will be located west of the Men's Gymnasium and will cost in excess of $1 million.

OUTLAY PROJECTS

Construction on campus

BY JOHN TEEV

The regular football season ended for the Mustangs in fine style—an undefeated record of 8-0-1, a fourth straight CCAA title, and a national rating of third on both the AP and UPI wire service polls.

And now, perhaps the sweetest of all feats, an invitation to play in the Camellia Bowl in Sacramento Dec. 8.

The Mustangs will be ranked sixth in North Dakota, according to NCAA selection committee chairman Rex Grossart, who made the official announcement. Rumors prior to the Cal Poly Pomona game last weekend had it that if the Mustangs could come out with a win, the bowl berth would be theirs. The 12-14 victory took care of that prerequisite.

North Dakota, despite being rated below this school’s team, should provide plenty of tough competition and certainly the biggest test of the season. The North Dakota Sioux boast a record of 6-1 and have run up some considerable point totals in outings thus far this season. They averaged close to 40 points per game in rolling to a North-Central Conference co-championship. Their only loss of the year was to North Dakota State, by a score of 58-17.

The win came against South Dakota (presently ranked fifth in the nation), Montana State, Montana, Augustana, Montana, Northern Iowa, Mankato State and the University of Nevada-Las Vegas.

The Camellia Bowl falls on a date not exactly favorable to a student preparing for the quarter’s end. The Saturday game will break up a four-day Fall Quarter final exam period.

The Student Roundhouse will sponsor a trip to the game at a cost of $18 round trip (cost of game not included). The trip is expected to take approximately five hours and will return immediately following the game, because of final exams.

Chi Gamma Iota, the campus veterans club-service organization sponsored a Thanksgiving dinner for seventy underprivileged children from the San Luis Obispo area, Sunday, November 19. The event was staged at the Veterans Memorial Building for the second year. The group plans to make the event a lot a tradition.

When completed, it will provide a 300-seat cafeteria, a 130-seat restaurant, and a 17-seat counter area.

Injunction might delay day care center opening

BY JOHN TEEV

The campus day care center may not open Winter Quarter after all.

Student Jurisdiction was ex pected to consider freezing the campus Children’s Center funds Monday night, according to ARI Chief Justice John Langa.

The hearing to decide whether or not the court will issue an injunction was set after Greg Williams filed a petition Thursday.

Williams requested an injunction “to hold up the use of ARI funds for the financing of the Cal Poly Children’s Center.” He listed three grounds for action. He alleged that natives to the campus-funded child care center were withheld from Student Affairs Council last year, that the child care center policy is an unlimited business arm from the last year; and that questionable procedures were taken on BAC’s policy decision.

Celilia Dundon, secretary for the day care center was appointed by Student Affairs Council last year, and the child care center is an unlimited business arm from last year; and that questionable procedures were taken on BAC’s policy decision.

A new Women’s Gymnasium will begin being built in 1979 and will replace the old Crandall complex. This facility will be located west of the Men’s Gymnasium and will cost in excess of $1 million.

Beginning Winter Quarter, all students who register will have their ID-activity cards validated with a “hot-stamp” impression signifying that they currently are enrolled at the university.

According to Robert J. Miller, university accounting officer, the quarterly impressions will take the place of registration receipt cards which students now must present with their ID-activity cards validated with a “hot-stamp” impression signifying that they currently are enrolled at the university.

All that will be required for use of such services under the new policy will be a single validated ID-activity card.

Students will have a brand new impression of the university in January when they register for classes.

He added that “damaged or otherwise mutilated” ID-activity cards will not be accepted by the validation stations and must be replaced beforehand by contacting Elva Parkey in the ID card office, Room 121 of the Administration Building.

Questions concerning the new validation policy should be directed to Richard Hall of ARI in the Administration Building, Room 131A or by calling 965-5777.

A validation station will be maintained on a year-round basis in the university accounting office in order to make available the hot-stamp validation service to late registrants and to students who may have lost or misplaced theirs.

‘Smoke and drink your way to better education’

Throughout the United States for the fiscal year 1972, the fifty state legislatures appropriated a total of $17 billion for higher education. These are state tax funds to operate colleges and universities.

Guess who’s top on the totem pole? Yes, California— a state with 11 million higher education students. The universities and colleges throughout the state, put forth some modest proposals for helping their campus to better education. For example, the University of California, in the spirit of his campus, undertook to build a non-credit course for the students who are not going right to the source of the funds. To quote a writer stated, there was a great deal of seriousness in what Jesus Christ was talking Christ was talking about. Then, the idea of a college campus is represented in one of the most popular and grueling off-road races—The Baja 500. The idea of a college campus becoming a non-credit course for the students who are not going right to the source of the funds.

Editor: It is unnecessary to say that the world of automobile racing is an area familiar to a vast number of Cal Poly students. This can be taken from the conversations around campus about the trip to “Seac Valley” or to Riverside, or the numerous races and autograph sessions which take place in our community. Do these students realize that their campus is represented in one of the most popular and grueling off-road races—The Baja 500? The idea of a college campus

Reassessment of allegiances

Editor:
The front page article on Nov. 17 pointed out foreign students face a squeeze-out-at this university due to increasing student tuition. Why should we native American students worry about foreign students dropping out at Cal Poly? The idea of a college campus becoming a non-credit course for the students who are not going right to the source of the funds.

Collective bargaining

Recent news reports concerning the attitudes of faculty on this campus about collective bargaining were clarified in a statement issued Monday by Provost Robert E. Kennedy.

Kennedy said the results of a faculty survey conducted by the Academic Senate indicated that 71 percent of those responding favored collective bargaining—an accurate assumption as far as the statistics go.

Concerts in the Los Angeles area: Linda Ronstadt at UCLA on Dec. 3, George Carlin at Santa Monica Civic on Dec. 5, Grand Funk at the Forum on Nov. 30, the Hollies at Santa Monica Civic on Nov. 29, Loggia and Mestiza at Santa Monica Civic on Dec. 19, Seals and Crofts at the Santa Monica Civic on Nov. 28, Stephen Stills and Manassas in Anaheim on Dec. 9, and Ray Charles at the Valley Music Theatre on Dec. 8.

Hanes Everyday stretch pantyhose.

Free.

Right now just buy one pair of any Hanes pantyhose (including Hanes Everyday) and pick up a free specially marked package of Hanes Every day.

This is stretch pantyhose the way Hanes makes it.

Pantyhose that comes in your size with a stretchy fit that hugs your legs all day.

So hurry down and pick up your free pair of Hanes Everyday today.

Just buy one pair of any Hanes pantyhose and get Hanes Everyday...free.

“Do you have to design an original mounting for one you helped design in our store?”

RUDY SILVA

“Of course. We provided one in our store to give the girl peace of mind in this matter. It’s a policy written by Jewelers Mutual Insurance Company tailor-made for this purpose.

A colored stone for engagement can provide a strikingly different ring. Especially if we may design an original mounting for one you helped design in our store!”

RUDY SILVA

“ insured it.”

We've been asked if questions in this column were limited to discussions on Diamonds. Not at all! It's naturally my favorite subject, but the entire subject of gems provides the subject matter of this column. Ask away!

Here's a recent question: "Do you have to choose a Diamond for your engagement or can other stones be used?"

Ann B.

"Omer stones certainly can be used! We've made up engagement rings using Emeralds, Sapphires, Rubies and even Peridots. They do not have the hardness of Diamonds, however, so they must be worn with a bit more care. An insurance policy is a must, of course. We
