Judiciary backs down on freebie cards issue

by Liane Luchetta

Student Judiciary has voted to withdraw an unanimous injunction concerning issuance of green and gold cards after ARI Pres. Robin Baggett's insistence that there was no basis for the injunction. The green and gold cards are to be issued to San Luis Obispo senior citizens for free admission to university activities. Injunction would have prevented issuing the cards "until such time that SAC considers their motion to issue those cards to the public.

Program Board Chairman Clay Bowling urged the judiciary to rescind the injunction at their Nov. 13 meeting because of the financial impact and the fact that Finance Committee and Program Board had not been consulted. Bowling said he asked for the injunction because he thought the cards would be sent before he had a chance to bring them up for discussion at the next SAC meeting. Bowling said SAC had moved the cards from a discussion to a business item in one night, so that there was no chance to oppose the measure. He also pointed out that "some performers contract for a percentage of the gate so their contract will stipulate that only 60 free passes be allowed.

Baggett said that the SAC could not move fast enough to issue the cards during the two weeks between meetings. He said that SAC was within its legislative powers in deciding the matter without consulting the Finance Committee or Program Board. Baggett said the injunction was not necessary to place the question on SAC's agenda again. Bowling said he would bring the matter before SAC. Baggett maintained that it was within proper procedure for SAC to move from a discussion to a business item at one meeting. He claimed that the cost of printing the cards would be minimal and there would be no financial impact. Bowling said the cards would be a precedent that will create a precedent that will cause a financial hardship for the student body through loss of income from the sale of tickets to paying spectators.

SAC rehashes day care

by Tom Maramball

An attempt to freeze campus Child Care Center funds until a special election can be held to decide the program's fate was defeated at Wednesday night's Student Affairs Council (SAC) meeting.

With the roll call vote standing at 4-4 with one abstention and needing a majority approval to pass, ARI Vice Pres. Denny Johnson cast the deciding "no" vote. The motion failed 0-4 with two abstentions. The motion was defeated for the second time in one week.

A public hearing is scheduled for 7:00 to 9:00 p.m. Wednesday in Room 239 of the College Unions to air opposing sides involved in the petition to freeze child day care center funds.

Presentations representing both sides of the issue will be given. The hearing open to everyone wishing to express opinions concerning the child day care center.

VOTE EVENED

The vote president has the power to make or break a tie. The motion failed 0-4 with one abstention.

According to Johnson, he voted "no" because a freeze of $2,000 would destroy much of the work done by students to establish the program, plus eliminate the chance of a $2,300 grant (from the state).

The motion was the second part of a two-fold proposal introduced by Greg Williams, agriculture and natural resources representative. The first section was a formal presentation of a petition opposing the use of ARI money to fund the Child Care Center. The petition was formally received by SAC.

According to Williams, a total of $10,000 to $15,000 was spent on travel expenses to the Camellia Bowl. The money will be taken from an expected $12,000 from the bowl game.

According to Music Board of Control Chairman Tim Paritch, the band was not invited to perform at the bowl game. Paritch explained, "We want to go to support the team. The Camellia Bowl Committee will not yield any time for us to perform at half time."

Mike Benson from business and social science reminded SAC members of current financial deficiencies.

Benson said, "We're going to have to start taking a close look at our funding." Tiny Lester, engineering and technology representative voiced the opposite opinion. "They (the band) have contributed an outstanding service to the ARI and I'd like to see the band go," Lester said.

In a related action, SAC voted 10-4 to allocate $1100 to the pep squad for travel expenses to the Camellia Bowl. The money will be taken from the income received from the bowl game.

In other action, SAC voted by consensus to organize a subcommittee to decide the standards for the use of Green and Gold Cards. These cards are to be issued to senior citizens in the community for free attendance at ARI events on campus.

In other action, SAC rejected the approval of the new ARI seal 0-0 with two abstentions, after approving it last week. The new seal was the result of a voting procedure discrepancy last week which invalidated the vote.
Pure Ronald moralizes

Editor:
If it weren't for such pure people as Mr. Gorham to remind us of our basic dearest, I am sure his niece and other nice girls like her would have been raped. I am one youth who applauds Mr. Gorham's incisive, analytical comments about this society's moral decay. Indeed, how could we allow Marjorie to be shown? That film was an unfair comment on today's highly moral evangelists. What if Billy Graham makes a little money on the side? Isn't he entitled to profit from our sins? Isn't the least of our economic system? I am sure Christ would admire such economic utility.

How can colleges pass cut birth control pills willily silly? Everyone knows the pill is a no-no. Indeed, we must penalize those who obstinately believe that proximity breeds impatience. Mr. Gorham, I have pondered my peril. I have saved myself. Every time I see a snarled ankh, I tell myself that it is dirty to gape at it. I was even shocked to see that "Bambi" was rated X. With all those naked creatures trampling around it should have been rated X. Your niece is safe.

Letters

as long as there are people like you and me to save her from hurting lusts. Her tender bosom shall never be despoliated by me. I even find it hard to write the word bosom. Oh, if only there were more people like Mr. Gorham. The world would be free of vice. We would have no such Billy books as Ulysses; no dirty movies like "Romeo and Juliet."

Yes, fellow young people, turn your back on licentiousness. Hide your heads in shame! Save yourselves. Mr. Gorham has shown us the way. Hallelujah!

Gifts are made by love not empty pocket books

Editor:
Words like "meaning" and "relevant" assume great importance as Christmas approaches. When we feel poverty, hatred, and environmental degradation hanging on our shoulders, we often feel the need to become "Christmas activists." Especially when we find that Americans spend billions a year on Christmas. If just some of us spent some of our money into constructive channels and focused "commercialized gifts" meaning and relevance would be added to our Christmas consciousness.

Think of the world as 100 people living in a global village. Of these 100, 80 live in substandard housing, over 70 can't read, over 50 suffer from malnutrition, and only one has a college education.

Six living in the global villages are Americans, but they control half the village's income while the other 94 exist on the other half.

What can be done to limit exchanging needless, commercial gifts and help fellow men at the same time?

Make homemade gifts which show your true love. Borrow clothing, framing pictures, renovate old possessions and even planting bulbs are all creative gifts.

Give non-material gifts like a camping trip or music lessons. Organize a toy swap or offer to paint a room (what else can you do for a friend?). Help a child make something.

Make your own Christmas decorations and buy a live tree. Consider ideas for gifts which focus on conserving rather than consuming, as gift giving may symbolize life—not death. Give something that doesn't use up Earth.

Instead of the usual holiday gifts, send checks to worthwhile groups working for love, peace, relief, and environmental organizations in a friend's name. Buy cards from these groups what did Hallmark ever do to raise your consciousness?

Among the many are: 1) Fellowship Reconciliation, Box 371, Napper, N.Y., 19600; 2) Universal, 540 Lake Street, San Francisco, and 3) Friends of the Earth, 800 Commercial St., San Francisco, 94111.

The campus Ecology Action group recently bought gifts that help save the unique, environmental and educational Fremont Forest in Mendocino from the California Institute of Man in Nature, Box 293, Berkeley, 94701.

During this time of the year, we must realize the great potential of good will. Remember, if you aren't a part of the solution, you're a part of the problem. Invest your money this Christmas for constructive change—or it won't and done. Martin Luther King said, "I believe that what self-centered people have torn down, other-centered men can build up."

Have a joyous Christmas.

Holiday trees to choose and cut

by BOB McENTEE

The thought of buying a Christmas tree often brings a discouraging glare and possibly a few utterances of "capitalist." That is if you're from an area that doesn't see many green trees. In that case, a seventy-five-foot Douglas Fir could go for the incredible sum of $15 to $20.

But, after minimal research and driving, local residents will be happy to discover good Christmas trees can be had at very reasonable prices.

The most popular lots seem to be the "choose and cut." In this arrangement, the customer selects among growing trees until he finds one to his liking or price range. Then, the tree is cut down at the base, ready to be carted home.

Starting in Nipomo, potential buyers have three "farms" to choose from. The Holloway farm, at 900 South Oakglen, contains 800 Monterey Pine trees at $12.50 a foot. According to Delmar Holloway, trees may be purchased starting Dec. 1.

The second tree salesman, David Duran, is located down the road from Holloway at 944 South Oakglen. This is Duran's first year selling trees. He says he has between 100 and 125 eight-foot Monterey Pines at $12.50 a foot. Duran says that his farm is open now for early shoppers.

The last lot in Nipomo, at 154 North Oakglen, is run by A.F. Marsala. Four-thousand Monterey Pines are on sale now. Every tree at the farm is $4.50. He said shoppers should arrive after 3:30 p.m. for assistance. The farm will be open seven days a week until all the trees are sold or until Christmas, which ever comes first.

Halcyon boasts of the Grell's Christmas Tree Farm located off Highway 1 at 1609 Elm Street. The 50-year-old Grell has been in business for 16 years and reports he never uses chemical sprays on his trees.

"They're all organically grown," Grell said. He seems to have the widest selection of trees. Monterey Pine, Douglas Fir, Sierra Redwood and Cypress. Grell is open every day and sells every tree at 4.

In Arroyo Grande, the Clayton's Christmas Tree Farm is at the end of Corralitos Canyon on the way to Lopez Lake.

The last of the choose and cut farms can be found in San Luis Obispo.

The Rice Tree Farm is selling their 500 Monterey Pine Trees at $2 a foot. This farm, located at 500 Mountain View, is open from 10 a.m. until 5 p.m. Tuesday through Sunday. The Rice farm is equipped to flock or flameproof their trees for 30 cents per foot.

The last of the choose and cut lots is operated by Richard Clayston, head of the Department of Welding and Metallurgical Engineering. Clayston has 5,000 Monterey Pines selling for 80 cents a foot.

Finally, two "choose and cut" farms can be found in San Luis Obispo.

The Rice Tree Farm is selling their 500 Monterey Pine Trees at $1 a foot. This farm, located at 500 Mountain View, is open from 10 a.m. until 5 p.m., Tuesday through Sunday. The Rice farm is equipped to flock or flameproof their trees for 60 cents per foot.

The last of the choose and cut lots is operated by Richard Clayston, head of the Department of Welding and Metallurgical Engineering. Clayston has 5,000 Monterey Pines selling for 80 cents a foot.

The Jewish holiday, Hanukkah, will be celebrated from Dec. 14. The campus Jewish Student Union (JSU) began the celebration with a party on Thursday.

Hanukkah, often called the festival of lights, is a time to rejoice the miracle God performed in the victory of the Maccabees over Antiochus of Syria in the first century B.C. The Temple at Jerusalem was recaptured by the Jewish tribe and all pagan idols were destroyed. According to Henry Gross, JSU president, the Jews had only enough oil in one lamp to last one day. God answered their prayers by causing the oil to last eight days, which gave the priest enough time to prepare new oil untouched by pagan hands, he said.

The miracle is celebrated by the lighting of the menorah, a candelabrum. Each night one additional candle is lighted until all eight candles plus the center one used to light the others are lighted.

The exact number of Jewish students on this campus is not known, but Paul Scheffer, JSU advisor, said about 200 religious preference cards filled out at registration indicated the Jewish faith.

There will be a party and ceremony of the festival of lights at the Congregation Beth David in San Luis Obispo today.

Although Hanukkah is not the most important religious holiday to the Jewish faith, it is the most widely celebrated, said Adler. Rosh hashanah and yom kippur are the most important holidays.

Music Club assists merchants’ downtown yule tide decorating

Downtown trees in San Luis Obispo will light up in honor of the Christmas holiday. The San Luis Obispo Chamber of Commerce, in conjunction with the campus Music Club, is working with local merchants to decorate the trees in front of their businesses with lights.

Fred Johnson, head of the committee, said the project is coordinated by the Chamber of Commerce but a service club actually installs the lights. Music Club Pres. Tim Patrick said they would be putting up and taking down the lights. The YMCA Wise Men’s Club originally planned to decorate the trees but Johnson said they ran short on manpower.

Participating merchants buy the lights and then pay for having them put up and taken down each year. The price for one string on one tree is $2.50.

Johnson said there are about eight new participants this year, bringing the total to about 30. Businesses with trees in front are approached, if there isn’t a tree in front they usually decorate the nearest one, Johnson said.

“The last year there were a few dark spots,” he said, but the program was a success.

Poinsettias and miniature roses are for sale at Cal Poly’s O.H. Unit.

Sweater dressing:
A great way to round out the look with new cuffed or palazzo pants.
A traditional Christmas with family, good food and lots of lighted candles to symbolize Christ's birthday is how Dr. Robert Kennedy will be celebrating their first Christmas in the Poly House.

Mary Kennedy, wife of the university president, expects about 10 guests for Christmas eve festivities. The Kennedys have four children, two sons and two daughters, and seven grandchildren. The youngest son lives with them here.

Mrs. Kennedy said when the children were younger the family sent out cards with their pictures. In recent years they have used Mrs. Kennedy's poetry to create personalized cards of their own. Each member of the family has a green and red hand knitted Christmas stocking with his name on it. Mrs. Kennedy said they were all made by Rosalie Davidson, whose husband is head of the music department here. Each new addition to the family gets his own stocking.

As a special gift to Mrs. Kennedy one son-in-law prepares an Italian style dinner at Christmas, she said that because the family is so large the adults draw names for gift giving.

Except for the vacuuming Mrs. Kennedy does all of the housework. She spent four days of Thanksgiving at the kitchen sink.

Most of the furniture is the Kennedy's own except for one room in the front of the house that once served as a conference room. Mrs. Kennedy said that is why it looks so "clubby" in there.

Poly House is 47 years old and served as a project for architecture students here. The furnishings are primarily brown, gold and burnt orange.

A graduate of this university who is now a designer in San Francisco planned the colors. Mrs. Kennedy said the architecture students used her as their client in planning the house.

Mrs. Kennedy says she enjoys campus life and doesn't mind the lack of privacy. She said their other house was very close to the high school and they could always hear noise from the dances and other activities.

She said she likes the constant movement of people walking around the house. A window near her desk overlooks an inclined drive and she watches the faces of the students climbing the hill. She says she likes to think she can read the hope and aspiration in their faces.

MANDALA

Flexibility excels dogma

Mandala School is a private alternative elementary school with goals for the emotional as well as academic development of students. Dave Taxis, former Program Counselor on campus and Coordinator of Mandala, said the school was formed because "young educators were dissatisfied with public education."

"We believed the most important idea to public schools, conformity and academic learning were, in fact, not real in fulfilling the needs of children," said Taxis.

City officials look back on unusually soggy 1969

If someone told San Luis Obispo citizens three years ago that they did not have a flooding problem, they would have been shot, locked up or both.

In 1969 the rain gods showed no mercy. Water fell incessantly.

Three men involved with city planning seem to feel, however, that the 1969 disaster was a unique occurrence — the only real flooding problem San Luis Obispo experienced in recent history.

David Romero, San Luis Obispo city engineer, said Marsh, Cherro, Broad and Nipomo streets have flooded many times, but not too seriously.

The city engineer said these streets have flooded several times because "the storm drainage system is too small."

"We have requested funds from the San Luis Obispo city council to improve this system, but they have never complied. They always had other ways to use the money," he said.

Romero explained the main problem in the 1969 flooding was San Luis Obispo Creek obstruction by mud and debris. He said when this happened, the creek overflowed.

"The creek is just not big enough. The creek channel must be widened. We have talked to the city council, but there has been no action," says Romero.

Romero said the city engineering department considered bulldozing the creek channel and constructing a concrete reinforcement to prevent mud slides "but we thought that this would be going against the ecology movement."

Ron Young, city planning director, dismissed the creek as being the culprit: "The creek is not responsible for flooding. I don't agree that the debris and trash obstruct the channel."

Young, however, agreed that flooding is not a pressing problem.

"The downtown area doesn't need that much. In 1969 the bridge structure in the creek designed up, and this created lots of flooding that wouldn't have occurred otherwise," Young said.

Keith Gunne, San Luis Obispo City Councilman, also feels that the downtown area has never had any real trouble with flooding, except in 1969.

He pointed out, however, that "there have been several floods in the Los Osos Valley."

He said that much of the flooding in 1969 occurred because "the culverts in the creek were too small. The debris stuck inside and created dams."

Gunne agreed with Romero and Young that in 1969 San Luis Obispo may have experienced a Haley's Comet incident within the Mision city.

"This year there have been several floods, raising and a $76 a month tuition, which is lowered according to the need of a family.

The students will have a booth at the Christmas Fair in the Mission Plaza, Dec. 9 and 10, where they will sell misl什麽, God's eyes and other projects they have made. Money from this will be used for scholarships for needy families.

According to Taxis open communication with parents is an essential part of Mandala.

Mandala School is a private, tax-exempt, non-profit corporation and exists on money from fundraising and a $76 a month tuition, which is lowered according to the need of a family. The students will have a booth at the Christmas Fair in the Mission Plaza, Dec. 9 and 10, where they will sell miscellaneous, God's eyes and other projects they have made. Money from this will be used for scholarships for needy families.

According to Taxis open communication with parents is an essential part of Mandala.

The school, with one adult to every five children, begins a day with children sharing, discussing any problems, and planning activities for the day. The rest of the day is used in following out the plans made, whether they be spending time in the library, taking field trips, or crafts.

The children are grouped according to their age and intellectual and emotional maturity.

Taxis said that the school was "humanistic, teachers are concerned about the emotional needs of the children, the kids are not protected from society's evils or indoctrination into a value system that is not flexible or irrelevant."

He told of one boy who had been called an idiot by his teachers, and made fun of by other children in his classes. Working slowly with him on a one-on-one basis at Mandala, Taxis said that the boy is "starting to overcome his experiences." Taxis said the boy is now interested in learning and "he realizes that the past experiences were not his fault, but someone else's."

HEP seeks tutors for migrants

by LINDA HARTER

Tutoring can be a fulfilling experience, but tutoring migrant students is much more than that. The High School Equivalency Program (HEP) on this campus offers students a chance to help migrant students who are enrolled in the program. No pay is involved, but students who sign up for a special class can receive two units of credit for tutoring. According to Ponce Ruiz, coordinator of the program, anyone interested in tutoring can sign up after first discussing the project with him.

The HEP program is in its second year of operation here and so is the tutoring program. According to Ruiz, HEP was developed to deal with the inefficiency of the educational system to teach migrant students.

"The migrant families move around a lot, and it is hard for the children to get an education," he said.

Forty-two migrant students are enrolled in the program here, but according to Ruiz, this figure doesn't begin to encompass all the students who need HEP. The average HEP student is usually in the program for five months before graduation. During that time he lives and eats on campus and is subjected to a culture that is alien to him.

Ruiz said it is hard for the migrant student to adjust to this new culture, and he feels the tutors play an important part in helping the HEP student feel at home in the new environment.

The tutors who receive the two units of credit must contribute three hours a week to the tutoring program. They schedule their own hours, and once their schedule is set, it is important that they follow it.

The classroom situation in the HEP program is different than the traditional classroom environment and the tutors are a vital part of the individualized type of instruction. One of the main clauses taught is grammar. Nancy Blotter, who received her teaching credentials from this university last spring, is the grammar instructor. In her classes, the students work with their tutors on an individual basis. Miss Blotter does not lecture to her classes.

"If I feel it is important for them to work individually because that gives them the opportunity to work at their own rate," she said.

How do the tutors feel about HEP?

According to sophomore English major Janice Reay, tutoring for HEP is helping her prepare a future in teaching. "Not only do they learn from me, but I learn a lot about their culture from them," she said.

Miss Reay is a grammar tutor and so is Paul Verdon, a junior social science major. Verdon started tutoring this quarter and said he has found his experiences in the tutoring program very rewarding.

"We learn a great deal about their cultures and it gives us a good chance to get together," said Miss Reay.

Next quarter, more tutors will be needed to help with four main classes, math, science, literature and grammar.

A class will be offered under the Education Department for the tutors in which they will participate in an occasional lab. Attendance is entirely voluntary. Again, two units will be offered.

Students who really want to experience a different kind of fulfillment may contact Ruiz to sign up for the HEP tutoring program.

Prtday. Daoambw 1. 1ST*
Shop for an original gift

by MELISSA RODRIGUEZ

There is an alternative to buying grandma another fancy lace handkerchief or Aunt Matilda her 34th apron for Christmas this year.

The Mission Plaza Arts and Crafts Show may provide that special gift and put originality back into Christmas presents. The craft fair is scheduled from 10 a.m. to 4 p.m. on Dec. 9 and from noon to 4 p.m. on Dec. 10, in the Mission Plaza Mall downtown. If it rains, the show will be transferred to the Recreation Center on the corner of Mill and Santa Rosa Streets.

"We decided to hold the art show for three main reasons," said Linnea Phillips, one of the show organizers.

"First there are many craftsmen in the area who have no outlets for selling their crafts. Second, we wanted a way of making Christmas giving more personal by providing a place for people to buy handmade gifts. Third, the show will provide a pleasant place where people from all environments can come together and have a good time Christmas shopping," said Mrs. Phillips.

The show's theme is "Old-Fashioned Market Place" and merchants selling their wares plan to wear costumes from the early 1900's.

Crafts to be sold at the fair include leather goods, metal works, bask, clothes, ceramics, hats, jewelry, toys, quilts and wreaths made of pine cones.

"One of the 35 booths is called "One's Own Place" and will have a variety of individual items in it," said Mrs. Phillips.

"The country store will be made up of one of a kind items—crafts that people do in their spare time just for the fun of it," she said.

Shoppers who work up an appetite may wish to try a variety of foods from throughout the world that will be on sale. Hot chestnuts, the traditional French Christmas treat, will be only one of many foods vendors will be shouting about. Homemade breads, jams, jellies, and popcorn balls will also tempt shoppers.

"We are hoping the show will be a fun place for people to come at Christmas time," said Phillips.

Besides food and crafts, shoppers will be entertained by a variety of music ranging from elementary and high school singing groups to the Country Band to the Walling Modern Marching Orchestra, an all male band.

Folk dancers will perform in the mall and Christmas readings will be done by people from the San Luis Obispo Little Theatre. Robin Lake, speech instructor at this university, plans to present a puppet show.

"The idea for the Christmas show was the joint effort of Mrs. Charlotte Haggard, weaver, Mrs. Dabney Everett, batik crafts-woman, and myself," said Mrs. Phillips.

"After the success of our July 4 show held in the mall we decided that Christmas would be an ideal time to try to bring people together," she said.

"We are hoping the show will be a fun place for people to come at Christmas time and we want people to be entertained while shopping," said Mrs. Phillips.

A search for meaning in Christmas

by PAUL TOKUNAGA and

Marilyn White

"After 35 years of working with youth and his youth for Jesus, I have watched movements come and go. I've always felt the Jesus movement was only temporary," Boswell says.

"A Jesus person is one who believes Jesus is God," says Barry Johnson, head staff member for Campus Crusade for Christ. "That his death paid for our sins, that all who receive Jesus into their life will receive eternal life." Johnson is not a theologian, he says, "but a layman who has been involved in this movement for some time."

"I believe the emotional content is over, that youth are seeking simple answers will turn back to other means such as alcohol," he said.

But some think the bright lights are not completely dimmed. Much of the Nazarene youth movement has toned down, but there are still remnants of the fervor that began to shake during the late 70's. Mike Rich, pastor of the Church of the Nazarene, defines a Christian as one who has repented of his sin and has received Jesus into his life as savior and Lord...he is not on a trip. He is experiencing a new life.

"Jesus Christ Superstar," a musical based on the biblical story of Jesus, opened last week at the Monterey Playhouse. It is a retelling of the biblical story of Jesus in a modern setting.

"When we put our trust in him," Johnson says, "You are a successful evangelist. You have to have that knowledge of what to do when you are a successful evangelist."

Pastor John Boswell of Grace Church says yes. "The Jesus Movement was, in my opinion, a beliefism."

"I believe the emotional content is over, that youth are seeking simple answers will turn back to other means such as alcohol," he said. But some think the bright lights are not completely dimmed. Much of the Nazarene youth movement has toned down, but there are still remnants of the fervor that began to shake during the late 70's.

More Than Just A Gift

An elegant and lasting momento of love and affection, a Keepsake will be cherished for a lifetime.

SAM LUSO Obispo Theater

For a study break from exam cramming, the San Luis Obispo Little Theater plans two weekend productions of Neil Simon's "The Last of the Red Hot Lovers." The box office (543-4954) will be open from 7 to 9 p.m. after Monday for reserve seat tickets.

About his efforts to expose himself and other evangelists as frauds, he said during the interview, "I'm satisfied that it is a representative and, representative of what goes on..."

The local movement differs from the national one. Overall, it isn't flashy. The Christians are seen more concerned with the welfare of fellow students than mass evangelizing the world before lunch break. The light is more subtle, binding, harsh and fluorescent, but more of a warm, soft glow. Of course, the change is not all-inclusive of the university's Christian community.

However, the message remains the same. The delivery is just different. That's Halley's, that's the Salvation Army's, and that's the Salvation Army's because we love you.

Simon comedy featured

The cast includes Ed Plaxo, San Luis Obispo theater manager and speech instructor here, and Nevada Barr, a speech major at this university and active student thespian. Diana Daughters and Plaxo's wife, Debbi, also appear in "Lovers."

Carl Daughters, pre-school instructor at Mission-Nativity School, is the director.

In "Lovers," Simon focuses on a 40-year-old Barstow Cashman (Pinson) who decides to join the sexual revolution before it's too late, explained Rotherham, who serves as executive vice-president for the community theater group and is a speech instructor here. With no experience in adultery, Cashman's three attempted seductions do not work out.

The young woman pressed the "open" lever, and entered the elevator. There was complete silence as the elevator lurched downward. The elevator reached the end of the shaft and the doors opened again. The young woman cautiously walked down the large and well-lighted passageway she had been directed to follow. She wondered where her destination would be and where her destination would lead her. She followed the passageway which curved in a few places and came to another elevator. The doors opened and she entered. The elevator moved upward this time quite to her surprise, but she had faith in her boss's assignment. The elevator came to a jerking halt. The young woman cautiously walked through double doors and into the kitchen. Yes, the young woman is a new employee for the cafeteria and her mystery assignment was to find the fuse from the cafeteria to the kitchen behind the Chumash Auditorium stage.

The underground system on campus runs between the cafeteria and was connected to the College Union system during its construction. The utility tunnels are more common in the campus. Gerard referred to them as "crawl ways" and their primary function is to house utility lines or provide access for maintenance crews. The utility tunnels usually measure four by four feet. Engineering East and the Science Building have rather complex tunnel systems. Each wing of the Science Buildings has a tunnel, all of which can be reached from the middle. The tunnels are encased with concrete and have lids to enable the maintenance crews to enter them. The tunnels under the Business Administration and Education Building are used for underground heating and steam lines. "In the 1900s it was quite apparent the campus would grow," said Gerard, "and when a new steam plant was to be constructed the university appealed to the state for a complete underground system to house all utility lines." The tunnel network was denied, most probably due to the great cost. Gerard said many other state universities have extensive tunnel systems and he felt it was short-sighted of the state to deny this request, because there is great cost involved in servicing the utilities on this campus. The tunnels protect all lines from corrosion, water, soil nutrients. The campus underground is not filled with suspense or intrigue, but it does help in the maintenance aspects which are so many times forgotten.

Season's first

The campus Home Economics and Crop Club will be the first to observe the holiday season with pre-Christmas bash today at 6:30 p.m. Admission is 80 cents for club members and 81 for non-members. The faculty and family members are invited. Tickets and additional information are available in the Math and Home Economics and the Agriculture concerted Building.

Carol singing to combine old with new tunes

Classical and popular Christmas music will be combined in the 1973 Christmas Concert Party scheduled at 7:30 p.m. on Saturday in Crandall Gym. The public is invited to attend and to sing along with the circle. Admission will be free.

The Music Department's Concert and Symphonic Bands will be joined by choral groups in the traditional yule event sponsored by the Music Club.

The Majors and Minor's, the Men's Quartet, and the Women's Quartet will join the two bands during the evening's festivities, which will include a visit from Santa Claus.

The community singing portion of the program will include such favorites as "Winter Wonderland," "Rudolph the Red-Nosed Reindeer," "Joy to the World," and "It Came Upon a Midnight Clear."

CHRISTMAS SPECTACULAR

20¢ OFF SALE

This December you can get 20¢ off on any "DAIRY QUEEN" Royalty. The "DQ" Banana Split, Hot Fudge Brownie Delight, Fiesta Sundae or Sundae Supreme. With this great sale, it must be your day to go to the "DAIRY QUEEN."
For many people, studying overseas is a lifelong dream which never materializes. For Midge Upahaw, a senior majoring in home economics here, a poster attracted her attention and apparently was enough motivation for the pert coed to pursue this dream.

"I saw a poster in the Econ Building that said 'Study Europe in Europe' and I thought 'Wow,'" she says.

At that moment, a personal interview was set up. The purpose of the interview was to establish character, capability in new environments, and a 3.0 grade point average or better in at least 40 quarter units at the College system to enroll in the International Program. Miaa Upahaw was established in 1968.

Miaa Upahaw was more than willing to persue through her experiences in Sweden with Mustang Daily.

---

Be the first on your block to wear our raft and down our Mountain Freah Rainier Beer, water and have a crlap clean taete that we call Mountain Freah.

Oat youraelf blue T-ehirte.

---

For Midge Upahaw, a coed in the Econ major, making the decision to go to Sweden was a personal enlightenment and growth.

"I felt that home economics was a woman-oriented profession, and that the more people I could come in contact with, the better home economist I would make."

What struck you immediately upon landing in Sweden?

"The Swedish airport didn’t look like an airport at all. I think down, and all we could see was trees—there was only one way we could see, and it was rather small. It was right in the middle of the forest, and... we were all frightened, I think."

What about the Swedish environment?

"We had been on the planes for some ungodly number of hours, and we were really tired, but excited at the same time, and really not knowing what to expect. But we could see that it was very green and forested. That’s one thing that hits most people, I think, is the amount of trees—just beautiful!"

Is it a clean place to live?

"I didn’t see any littering. I had to hunt to find a litter basket. The Swedes are very conscious of other people and their property. They respect the law—they don’t litter. You don’t find big trash barrels on the sides of the streets there are just little ones on the bus stop signs."

What would a typical Swedish menu consist of?

"Four milk, pickled herring, hard bread and cheese... I learned to eat and enjoy everything, but the pickled herring. But if you eat it with enough sour cream and potatoes, it’s not too bad. Sour milk is very typical for breakfast. I put milk and sugar on it and it was great. "I found food prices extremely high compared to California. We’re all spoiled because we can get fresh fruit and vegetables all year long. Their fruit and vegetables are very expensive but the prices for cheese, milk and dairy products are pretty similar to California."

---

What type of music is popular in Sweden?

"The American musical revolution comes to Sweden about three months later. The majority of the population actually seems to dig accordion music. It drove me up the wall, because I would turn on the radio to one of Sweden’s two stations and they would play just a whole lot of country-type accordion music. It was kind of tiring, but most of the students have stereos and they buy British and American albums. But the records over there are much more expensive— at least a couple dollars more per album."

Is there much emphasis on sex in Sweden?

"Only the Americans in Sweden put emphasis on sex. The Swedes can separate the body from sex. "They have a lot of ads for sauna baths, with a whole family in the sauna, nude. Swedes can look at the picture and think ‘sauana’. Americans look at it and think, ‘body’, ‘sex’, ‘woman’, ‘bed’, or whatever. So it’s all these outsiders who come in with their own cultural attitudes. It’s these people who go back to their own countries and bring a misinterpretation of Swedish sexual attitudes."

Did you feel there was a congenial social atmosphere in Sweden?

"I feel like the friends I made in Sweden will be my friends for life. That’s not always true here. You have different friends each year in different classes, and you may keep in touch for several years, but then it dies away. I know that I will have my Swedish friends for the rest of my life."

Do you think you’d like to live in Sweden some day?

"I’m afraid that one of the things that made it so fantastic for me was that I was a student. I could reap all the benefits from the socialized government, the free schooling and the practically free housing, and yet I didn’t have to pay the 10 percent income tax."

"If I went over there to live there would be a lot of considerations I would have to make about those things. But I had a good time."
One of the off-field surprise plays of the Mustang football team this year has been the fake field goal, which has gained repeated success. On this play, in the first quarter of the Cal Poly Pomona game, quarterback John Petitas fired a flat pass to fullback Mike Thomas (38) who took off on a 23-yard sprint down the sideline. The innovative play is also used on point-after-touchdown situations, as Petitas attempts a two-point conversion by either run or pass. It would surprise few to see the play attempted in the Camellia Bowl contest next weekend.

Although he has proved able to run the option well and win the games this season, Petitas' aerial statistics have not been good. The coaching staff claimed his receivers could not hold on to the ball, and in many cases this seemed to be the case. But in the Fullerton game the passes were simply off the mark.

In the Fullerton game there was considerable improvement and against Pomona it was as if Petitas had reached the top of the mountain. He hit 10 of 14 passes for 184 yards. Many of the doubts were then dispelled.

To beat North Dakota both offensive games will be needed. Defensively, North Dakota uses a five-man front with two linebackers and four deep backs. This unit has given up an average of 30.1 points per game.

In the Northridge game the passes were simply off the mark. But even if the defense does come through with one of its characteristic performances, the victory will not necessarily be in hand for the Mustangs. The offense must put points on the board. The game could very well rest on this.

Harper will not attempt to surprise North Dakota with new offensive formations but feels that, in order to win the game, his team must have a good day of execution. "We'll have to be able to run and throw well," he admitted.

The running game has been the strongest suit for the Mustangs this year and the total offense figures largely in the ground game. The passing of John Petitas has been held suspect by many.

Those wishing to travel north to see the Camellia Bowl game may purchase tickets at the College Union Information Desk. Prices are $2 for general admission and $5 for reserved seats.

Plenty of bus space is still available through Student Roundhouse, the $9 round-trip pri­ciple does not include tickets, but they can be purchased at the same time.

Also, for those who prefer to drive to Sacramento themselves and would like to obtain direc­tions to the stadium, Roundhouse is making maps available, ac­cording to director John Holley. The Roundhouse office is in Room 217B of the College Union, phone 2118.

The game will be broadcast into the San Luis Obispo area at 1:30 by the ABC Television Network, from KEYT-channel 8 in Santa Barbara.

**Camellia Bowl Here we come!**

One thing that may have been easy for Mustang football fans to do upon announcement of the Camellia Bowl selections was to sit back and regard the match-up lightly.

"They're ranked sixth; we're ranked seventh; we've lost a game; they beat us by 10 points," said Harper. "They caw run the ball potent offensively, according to me. They are co-champions of the North Central conference."

From tackle to tackle, North Dakota averages 208 pounds. That tight end Harper mentioned stands 6'6" and weighs 210. Both wide receivers are 6'3"; one weighs 220, the other an even 200. Both running backs are 5'10"; the fullback weighs 210 and the tailback 206.

This meaty offense has accounted for an impressive average of 39.1 points per game in a season that saw the Sioux lose only one game in ten outings. They are co-champions of the North Central conference.

Using an I-formation, North Dakota appears to be very potent offensively, according to Harper. "They can run the ball well and they pass, too," he said. "Statistics will back up these assumptions. The Sioux have rolled up over 4,000 yards in total offense this season and that total was divided almost evenly between running and passing."

"The Mustang defense provides the North Dakota ground-gainers with a formidable test. It will be a tough battle between an offense that is scoring close to 60 points a game and a defense that is allowing only nine." But even if the defense does come through with one of its characteristic performances, the victory will not necessarily be in hand for the Mustangs. The offense must put points on the board. The game could very well rest on this.

Harper will not attempt to surprise North Dakota with new offensive formations but feels that, in order to win the game, his team must have a good day of execution. "We'll have to be able to run and throw well," he admitted.

**Season Record**: 9-1-0
It was preview night for the Mustang basketball team—the annual variety rout of the freshmen.

Those who made it to the game were anxious to see a varsity squad that was billed to be one of the best in years. The guards in the back court were rated high and the front line boasted height and quickness.

But when the game got under way, some of that height and a good deal of that quickness was sitting on the bench, still fully attired in warm-up sweats.

The name—Billy Jackson.

Despite having that coveted asterisk by his name in the program, indicating a member of the starting five, the senior superstar from Monrovia was lounging back in his usual manner to watch the game with everybody else.

By the end of the first half people were asking what had happened. Rumors in the bleachers had it that Jackson was being held out as a disciplinary measure because he had shown up late at practice.

As yes, that's Billy. But don't look for a trend this year.

He entered the game at the beginning of the second half, and what had been a rather sluggish varsity squad caught fire and began to pull away. Billy seemed to make the difference.

He played with his usual nonchalant, easy-going style and dropped in 13 points in that second half.

It was not an unfamiliar sight. Billy Jackson began his varsity basketball career here two years ago as a sophomore and was a starter from the start. He's turned a few heads over the past two seasons with his point and rebound totals, all-conference selections, and particularly his playing style.

Watching Billy Jackson play is like witnessing a fluid motion demonstration. He glides down the court and in underneath for a shot without any apparent effort and is a deadly outside. Ever seen someone fake three times in midair before sinking a jump shot? On and off the court the manner appears to be one of "don't push me, it'll wait."

This year is the final season though, and he is ending it on a talent-driven note. It's definitely "let's win the conference" time.

"The only thing I don't like about it is that we only have a few games," he said. "Rick (Reed) got 20 points."

When they do relax keep your eye on number 80. Jackson got 20 points himself in that game. And with a pair of forwards like Lamar Anderson and John Parker on the bench behind him you can bet he might be a little job-conscious.

But don't expect any drastic style changes from Billy Jackson. He was asked how he felt about the schedule stretching into the Christmas vacation.

"The only thing I don't like about it is that we only have a few games and all we do the rest of the time is practice," he said. "Games are fun. Practice aren't." It's good to have you back, Billy.

CAHPER net

tourney to pit
8 prep teams

by TOMMY PARKER

Short practice periods since the close of the 1971 football season are making it almost impossible to predict the eventual champion for the 12th annual CAHPER High School Basketball Tournament. Competition will take place today and Saturday, December 1-2, in the Men's Gym.

The tournament, sponsored by the student chapter of the California Association for Health, Physical Education, and Recreation, will have two divisions with two champions this year. It will be the first season of the season for most teams and should provide a preview of the type of basketball fans can expect from these teams this winter.

Topp of the first game of the tournament will be at 6:30 p.m. today as Morro Bay High (14-0 last season) encounters Salinas High School (14-0). Sal Catholic, first year coach of Morro Bay, is a former basketball player from this university.

Cassiligia High School and Atascadero Union High School (18-1) will meet the Royals of San Luis Obispo High School (17-2) in a 7:30 contest. Atascadero, a well-seasoned squad, has nine seniors on its list.

San Luis Obispo High School will meet the Royals of San Marcos High School in Santa Barbara in a 7:30 contest. The game should be a good one, however San Marcos figuring to be lacking due to the absence of its starting players who are still on the Royal football squad.

In the final battle of the first night Lompoc High School will meet Arroyo Grande Union High School at 9 p.m. The Eagles have only four returning lettermen who will attempt to cope with Lompoc's all-league player of last season, Dallas Riley.

In the second night of action on Saturday, the game times will be the same. The losers in each division will compete at 6:30 and at 6 with championship action commencing at 7:30 and 8.

The tournament will be open to the public. General admission tickets, priced at 79 cents for students and $1.00 for adults, will be on sale at ticket offices in the Men's Gym prior to and during each game.

Wrestlers in Arizona for top competition

by RICK KNEPP

The top 10 teams as listed in the annual Pac-10 wrestling rankings are:
1. Oregon State
2. Washington State
3. Arizona State
4. Stanford
5. Cal Poly
6. UCLA
7. Washington
8. USC
9. New Mexico State
10. Arizona

Second in the rankings are the Mustangs, who will be seeking their third straight conference title. This year, the Mustangs are ranked second in the nation, behind only Oregon State. They will be looking to prove their worth in the Pacific Division.

Mustang basketball team prepares for big games in long holiday slate

by MIKE SMITH

For most of us, getting closer to that time for finals and then the Christmas Cheer will be on us before we know it, but for coach Ernie Batch, the Mustang basketball team should be doing a little different for the holidays.

To start off a real tough schedule of games, the Mustangs will take to the air and travel to Idaho State University where things should get a bit tougher. Last year, the Idaho team took second last year in the Big Sky Conference and is expected to win it this year. Last year they were 16-12 for the season.

The Idaho team will consist entirely of returning players including 6’10” center Dan Spenlove. At the forward positions will be 6’6” Ev Pogna an All-Big Sky Conference player who averaged 23.3 points last year, and 6’1” Jim Anderson. The guard will be taken by 6’8” Edson Magid, who was also an All-Big Sky Conference man, and Gary Rhode at the other guard position.

Next on the schedule for the Mustangs will be Colorado State University. Colorado could be an easy match for the Mustangs as the big Western State Conference team lost their season opener to Utah State 68-64, which could have some effect on their team spirit.

Colorado will be starting with their big center, 6’8” Chaim Puchowitz, who will be a six-footer, Paul Bell and Mark Williams. At forward will be 6’7” Gary Rhode.

The Aggie Invitational will be the next big event for the Mustangs and look ahead Eastern Oregon, California State College, Sirona and California Lutheran College there Friday and Saturday, Dec. 8 and 9.

The Mustangs then leave the following weekend to play in the Fresno State Classic. This tournament will feature Fresno State, Oklahoma and San Francisco State College and will be played in Fresno’s Bellieni Arena.

The Mustangs will then come home again to meet California State University of Bakersfield on Monday, Dec. 11.

This should also prove to be a tough game for the Mustangs as Bakersfield will be bringing a very big team consisting of two 6’8” players, Ray Scott and Bob Barnard.

Then the Mustangs travel to Bakersfield to meet University of the Pacific, where they will look to 190 to gain experience at that weight class. Hitchcock stated: "Keith has more strength than Tony Kline, our only NCAA university division champion, had. What Keith needs now is the polish and confidence that only top competition can bring."
