One writer begins each column with "Things you'd never know if you didn't open the mail." It is not surprising that week after week he produces a variety of facts from his mailbag interesting enough to hold any reader's attention for the mail that newspaper staffers receive at the very least offbeat and usually unique.

How many of you have received an advertisement from the Adam and Eve Figleaf Company? It's a small company, judging from the mimeographed materials advertising their unusual product.

For $60 the reader may purchase an Adam or Eve. The price jumps to $4 for a Super Adam. The product? A figleaf. "En- 
dored by artists for centuries," the height of fashion. A multitude of tiny hooks attaches the figleaf firmly but gently to the public hair.

Easy painless removal is promised.

"In the past few years there has been a dramatic growth in the number of cases of human louse infestation in the United States..."

Guaranteed and a special feature, I'm told, is that one phone call to a lawyer. Another company is interested in the revival of the snuff habit. Two samples came with the advertisement—cherry and jasmin—and with the complete history of snuff and how to use it. The too sweet odor dominated the editor's office until some kind soul made off with the samples.

Unsolicited and unwanted information arrives each morning from the Mills Advo- cacy Board, the Sierra Club, San Francisco State College, MIM Publicity Department, German Information Center and New Products, Inc. Norciff Laboratories was only too happy to send a complete file of information on live lice.

"Which insect infests human beings is primarily of three species: the body louse, the head louse and the public or "crab" louse. In the past few years there has been a dramatic growth in the number of cases of human louse infestation in the United States. We will be pleased to supply complete city-by-city figures on the growing incidence of louse infestation." Of course they would--their latest product is a liquid that kills lice on contact.

But every now and then something comes along in a mailbag curious enough, such as an pamphlet from the Campus Studies Institute in San Diego. It asked, "If you are interested in action from the newspaper—but you only have a tiny piece of mail that looks very fine in a quill, how..."

"Ridson didn't bitch about darkness. He told me to keep quiet and asked me how I felt."

"Feeling the need for change...

"Families will not be stopped by people carrying pistols in a parade. Families will be stopped by those men who try to snuff other people."

Ford didn't demand laws in handkerchiefs. Ford didn't hustle against late letters. Carver didn't demonstrate against spotted ulcers. And the Wright brothers couldn't file a class action suit against gravity.

"Instead of using their in- 
dividual initiative to solve problems they may have...lobbied, petitioned, pressured, organized, demon- 
strated, demanded, threatened, coerced or otherwise applied political power to win govern-
dment legislation.

"Can you imagine what the world would be like if they had?"

Simply stated, a reminder that great accomplishments come from individual genius. But what is the point? Why print an ex-
pensive brochure and mail it to editors of campus newspapers? The answer came in small print at the 

"Families will not be stopped by people carrying pistols in a parade. Families will be stopped by those men who can make nitrogen cheaply at low tem-
peratures and low pressures and bring nitrogen fertilizers to the world; by the chemist who can be able to breed plants with high lysine, tryptophane and methionine content in their protein."

"And the Wright brothers didn't..."

"...stop the world with their small white way."

Fashions, banquet for black week; Fred Astaire look to be highlight

Black Ecstasy '73 is the theme for this year's black heritage week. As the concluding event for this university's observance, the Black Student Union is sponsoring the Black Heritage Week Fashion Show and Banquet, on Feb. 18, at 6 p.m. in Chumash Auditorium.

Five clothing categories will comprise the fashion show. Highlighted in the Soul Express category will be the Fred-Astaire look, featuring the wide lapel coat and the wide legged, cuffed pants. Dashikis and other forms of African wear will round out the African category. Lingerie and lounge apparel will conclude the program.

The menu for the banquet will include baked ham, fried chicken, black-eyed peas, collard greens, corn bread, and sweet potato pie.

Presiding over activities will be the queen of Black Heritage Week, Melva King, a freshman home economics major from San Bernardino. Her court consists of Cecilia Goosby, sophomore math major from Compton and Buda Hankerson, child development freshman from Inglewood.

Tickets are available at the EOP Hillcrest office on campus or from members of the BSU. They are priced at $5.00 for adults and $1 for children. The public is invited.

Lone Ranger at Aero

by GORDON ROSE

A Ranger spacecraft—the kind used in the 1960s by the United States for studying the lunar surface—has been donated to the Aeronautical Engineering Department by Jet Propulsion Laboratories in Pasadena.

According to C.P. Davis, head of the Aero Engineering Dept., the Ranger is being shipped here part by part and will be assembled by an Aero 240 class as a project.

The entire spacecraft, when completed, will weigh approximately 400 pounds and be about 12 feet high and 10 feet across with its solar panels extended. The Aero Engineering Dept. hopes that the project will be completed and on display by Poly Royal this April.

The spacecraft is not a replica but is one used by Jet Propulsion Laboratories as a life-test vehicle; it is a functional spacecraft.

Jeff Spira, a student in the Aero 240 class, sees its importance in light of "being the most updated piece, in the last 20 years of aeronautics, that the department has.

The Ranger project originated in design studies conducted in 1959 at the Jet Propulsion Laboratories, which was operated by the California Institute of Technology for the Army Ballistic Missile Agency, the National Aeronautics and Space Administration (NASA) authorized the Jet, Propulsion Laboratory to proceed with the project in 1960.

Between August, 1961, and March, 1962, a total of nine Ranger spacecrafts, broken down into three blocks, were launched from Cape Kennedy by modified Atlas rockets combined with a second-stage rocket.

The first block, consisting of two flights in 1961, was intended to test new concepts of launching, navigation, and attitude control. The next block consisted of three launches in 1962 and sought to test a lander on instrument package on the moon. The purpose of the final series of flights in 1964-65, which the Ranger being re-assembled here is from, was to provide information for planning the unmanned and manned lunar missions that were to follow; this objective was accomplished.

Ranger VII transmitted back to earth 1,486 excellent photographs.

"The Passion Adventure" had seven nominations, "Lady Sings The Blues" drew five and "The Godfather" four.

Alaskan pipeline delay surprises U.S. officials

WASHINGTON (UPI)—Federal officials, obviously surprised over a court ruling further delaying construction of the controversial trans-Alaskan oil pipeline, were undecided Monday whether to appeal to the Supreme Court or ask Congress to change the law.

The U.S. Appeals Court for the District of Columbia late Friday ruled that the 778-mile-long pipeline from the Arctic coast oil fields could not be built because the width of its right-of-way exceeded limits provided by federal law.

Interior Department officials, who had expected the ruling to deal with environmental issues, were left uncertain which direction to take.

They could appeal to the Supreme Court, or they could ask Congress to amend the Mineral Leasing Act of 1920 to permit a wider right-of-way across public lands.

But Congress already has been asked to rewrite the entire 1920 act which limits private rights of way across public lands to 14 feet; the pipeline would need 300 feet and this is certain to require a long time.

Also, it seemed unlikely that the Supreme Court would overturn the appeals court in view of the fact that the right-of-way limit did not appear to involve a constitutional issue.
The Art of Outspeaking

It's tournament day. You've got about five minutes until it's your turn. Your palms are sweaty, your knees are shaking, and you're beginning to wonder why you didn't think to buy some antacid tablets. It's your turn. You know that if you fail, there's no one to blame but yourself.

Perseverance, courage and the ability to withstand a hell of a lot of strain. That's what you have to have in order to be a good public speaker.

Why knock yourself out?

Jeff Swanston, a Graphic Communications major who likes to debate, says he does it because "I'm out spoken anyway. I like to argue and it's a good vent for that."

Last quarter, Swanston had plenty of opportunities to do just that, for the debate squad had a tight schedule. They competed in Los Angeles at the University of Loyola and at Cal State. They also traveled to Sacramento, University, the University of the Pacific in Stockton, and UC Santa Barbara. Active participants in the debate squad receive one unit for that.

By the way, the debate squad does not boast limited membership. In fact they're looking for recruits all the time. If you like to talk, Hensley would like to hear it at 945-3018.

Repayments of loans:
you can't get away

by RICK GOULART

Securing a college education can be a very de­pressing financial event, especially where part-time jobs are not too plentiful and student costs keep rising with the end of it all far from sight.

According to this campus catalog, the "typical" drain on a student loan is estimated to be about $7,000 per quarter.

Since 1967 the government has provided federally-insured student loans allowing the beginning college student to borrow up to $10,000 a year, payable with interest beginning nine months after graduation.

Still, a diploma in hand is not always assurance of food on the table, especially in a world where good full-time jobs are scarce. Repaying the loan can then be a trying experience.

Since the government's program began about 450,000 loans have been taken out in the state of California alone. They have amounted to $800 million.

The addition, which will form an L-shape with the Health Center, will take about two years to complete, according to campus architect Peter Phillips.

The design of the facility features a stairwell with a glass ceiling and five waiting areas with clear story lighting. A clerestory is a vertical pane of glass which spans the difference in height between a split-level roof.

Another feature of the new wing is its increased capacity. A new bachelor's degree program designed to help prospective elementary school teachers meet requirements of the Ryan Act has been slated to become effective in September at this campus.

The Bachelor of Arts degree in liberal studies will emphasize multiple subjects for elementary teacher preparation as outlined in the Ryan Act.

According to Dr. Carl C. Cummins, dean of the School of Education, the degree should not be confused with a degree in liberal arts.

Cummins said four of the university's schools will participate in the program: the Schools of Communications Arts and Humanities, Science and Mathematics, Business and Social Sciences, and Human Development, as well as the School of Education.

Dr. Allen Miller, who has been appointed coordinator of the new program, explained that the interdisciplinary curriculum has a two-fold objective.

The first is to offer a liberal studies program for students wishing to teach in the elementary school, it is expected to provide an opportunity for interested students to develop an interdisciplinary approach to study.

Applications from entering students or transfers who plan to major in education may be accepted in the program. Those with a two-year associate degree in education emphasis of the net first year are expected to come largely from underclassmen already studying in teaching-oriented programs.

Commenting on the teacher preparation of the new degree major, Cummins characterized it as one designed to meet the needs of students for the multiple teaching credential and yet flexible enough to allow students to coordinate their studies with their professional goals.

As designed by a committee composed of the university's Arts, Education, English, History, Math, and Physics Departments, it includes 126 quarter units of study in the four academic areas listed in the multiple teaching credential requirement: math and the physical sciences, English and speech, social sciences, and the humanities and arts.

In addition, the curriculum also includes 11 units of professional education course work, 9 units of elective courses, and 13 units of lower division general education.

Miller, a member of the Math Department's faculty for 12 years and chairman of the committee which designed the new program, said all students in the program will carry a teaching assignment in that area.

A graduate of Iowa State University, where he earned three degrees including a doctorate in 1963, he taught at the high school and college level in Illinois, Iowa, Nebraska, Wisconsin, before assuming his duties here in 1970.
Diamond men earn shut out

Ace pitcher Mike Krukow opened the Mustang baseball season on an impressive note as he hit and pitched his way to a 6-2 win over St. Mary's College last Friday. Pitcher Krukow held St. Mary's to two hits and belted a three-run home run to supply himself with enough runs to win. Krukow was in complete command of the game as he struck out nine in route to his first win. He had a perfect game going until the fifth inning and later gave up his first hit in the seventh inning. The Mustangs scored the only runs they needed in the fourth inning when Bailey walked with the bases loaded to force in a run. After his first game coach Hardy Harr said, "I was very pleased with our defense, especially the fact that we made no errors. I was also pleased with the way catcher Doug Redman handled balls in the dirt and his good job of receiving and spotting pitchers." Coach Harr had very high praise for pitcher Krukow. Krukow's ability to keep the number of pitches to a minimum was important in controlling the tempo of the game," he said.

Grapplers top Berkeley, 30-8

Though rated No. 2 in the state, Cal Berkeley was no match for the top-ranked Mustangs. Saturday night as the wrestlers smashed the visitors, 30-8.

The match was billed to be the championship of California, but it was no contest from the beginning. En route to the easy win, the Mustangs recorded two pins and a superior decision.

Highlighting the match was Steve Gardner’s lightning quick pin over Larry Cohn in the 110 bout. Gardner took just 11 seconds to take the Golden Bear down and 2 more seconds to pin him.

Glenn Anderson followed Gardner’s heroics with a pin over Berkeley’s Bill Bernard in the 138 bout. The pin came with 39 seconds left in the second period. Anderson had built a 15-5 lead before the pin with three takedowns and two three-point near falls.

Another key match followed in the 167 bout where the Mustangs’ Allyn Cooks decisioned Chris Hurchanik, 6-1. Hurchanik was the state’s top-rated 167-pounder while Cooks was the state’s best 166-pounder.

Keith Leland at 100 won his rematch with Cal’s Kirk Thorburn, 6-4. Thorburn tarned the Mustang, 1-4, in the Arizona tournament in December. Leland had a takedown, an escape and a riding-time point.

Freshman Mark DiGeralamo made a successful home debut by topping Frank Cuthbert, 6-4, in the 118 bout.

Gary McBride at 138 recorded a superior decision over Cal’s Buddy Miller, 11-0. McBride had three two-point near falls, a reversal, takedown and a riding time point for his 11 points.

Larry Morgan at 145 continued his winning ways with an 8-0 win over Steve Wheebee. Morgan overpowered the Bruin en route to his win with a pair of takedowns and a two-point near fall.

For the first time since its beginning in 1984 the livestock judging team returned home with a championship from Fort Worth, Texas. The five man team won the reserve champion honors recently losing to Oklahoma State University by a narrow one-point margin.

From a field of 46 competitors, Rich Mensch and Bill Tebbe placed in the top five in overall placings of beef, sheep, swine, and horses. Mensch was third overall while also winning third in swine species competition. Tebbe was awarded fourth high individual in the contest. Tebbe’s brother, Bob, won a second place in sheep judging. Also leading the team to victory were judges John Cooke and John Wesseloh.

These five individuals won the team championship in sheep judging and were the reserve champion beef species winners.

“The team did an outstanding job and were very consistent throughout all of the species judging,” according to Richard Kemptt, team coach. “It was a good contest and many of the teams represented were the best from their respective areas.”

This was the second contest for the team as the new year began in January at Denver Colorado. There the judges consisted of Mensch, Bill Tebbe, Harvey Biedgott, Pat Casey, and Bill Mattie. They won the swine judging championship.

The next contest will be held in Los Angeles during the Great Western Livestock Show in April. Contests will follow at Twin Falls, Idaho, Ogden, Utah, Portland, Oregon, and San Francisco.
