Now that spring has arrived, flowers everywhere are in bloom. At Cal Poly this means that the Ornamental Horticulture is very busy not just preparing plants and flowers for their public display but also preparing for Poly Royal. The highlights of their daily display are the two characters pictured above. The scarecrow (left) has no name, but does look familiar. The guy on the right is simply called the walking fireplace. The display is open every weekday afternoon and all day Saturdays.

FBI arrests

Iranian: trial to be in L.A.

An Iranian student here was arrested by FBI agents Tuesday for allegedly sending a threatening letter to a mathematics professor.

According to Joe D. Jamieson, FBI Assistant Director in Los Angeles, the arrest of Rezvan Mostafa Mosavali was based on a federal grand jury indictment returned in Los Angeles March 11. It accused Mosavali with threatening bodily harm last December against Associate Professor Howard Steinberg. The reason for the alleged threat was not disclosed, but Jamieson said that sending such a letter through the mail is "a violation of the federal mailing statute."

A sheriff's department spokesman said 27-year-old Mosavali, a native of Tehran, Iran, was released on a $5,000 bond Tuesday morning before appearing in federal court. According to Steinberg, it has been five years since the Academic Senate Constitution and By-Laws were adopted. "It is time for a major review and perhaps an overhaul of the Senate structure." We want to assure the best possible organisation to effectively represent the faculty in the governance of the University."

The committee, which will begin its deliberations immediately and continue into the 1975-1976 academic year, is inviting all members of the University community to contribute suggestions to aid in its study. Specific areas of concern that the committee will study include the organisation and effectiveness of the Senate, the relationship of the Senate to other campus bodies, the Senate committee structure, the possibility of a Senate newsletter to the faculty, the terms of office of Senate members and the membership of the Senate, including the appropriateness of administrative membership. The members of the ad hoc committee are: Robert Alberts (Counseling Center); chairman; Richard Burton (History); Olaf Jevnathan (Business Administration); Corwin Johnson (Head, Crop Science); Thomas Johnson (Architecture); Stuart Larsen (Aeronautics Engineering); Leon Mahboudian (Computer Science); Robert Valpey (Mechanical Engineering and Technology); Barbara Weber (Home Economics); A11 Prov. Robin Baggenstoss and student John Holley.

New computer science masters' degree added

The start of a Master of Science Degree program in Computer Science has been announced by Dr. Clyde F. Fisher, Dean of the School of Science and Mathematics at this university. To be offered by the School of Science and Statistics, the new curriculum will become available to students for the first time during the 1975 Summer quarter in June.

Dean Fisher said the purposes of the new graduate degree program are to prepare students for graduate-level positions in industry, government and business; to prepare students for further graduate study; and to provide training for future community college teachers in computer science.

A highlight of the new graduate curriculum, according to Dr. Rubles, will be a special practive program. In addition to the new graduate program and statistics Department, the new curriculum will involve a group attack on an important problem of particular interest to both business and industrial organisation.

Academic Senate

Future role is studied

The future role of the University Academic Senate, to be studied by an ad hoc committee according to Dr. Barton C. Olsen, chairman of the Academic Senate. According to Olsen, it has been five years since the Academic Senate Constitution and By-Laws were adopted. "It is time for a major review and perhaps an overhaul of the Senate structure. We want to assure the best possible organisation to effectively represent the faculty in the governance of the University."

The committee, which will begin its deliberations immediately and continue into the 1975-1976 academic year, is inviting all members of the University community to contribute suggestions to aid in its study. Specific areas of concern that the committee will study include the organisation and effectiveness of the Senate, the relationship of the Senate to other campus bodies, the Senate committee structure, the possibility of a Senate newsletter to the faculty, the terms of office of Senate members and the membership of the Senate, including the appropriateness of administrative membership. Robin Baggenstoss and student John Holley.

Parade film

"Movie Memorials" will be shown in shining color tonight, bringing back memories of the 1973 Tournament of Roses Parade.

The film will be shown at 8 p.m. in the University Union 230 by the Rose Float Committee and ad

Thieu arrives

WASHINGTON (UPI) - President Nguyen Van Thieu of South Vietnam arrived Wednesday to a warm welcome on the second leg of his U.S. trip for talks with Vice President Spiro T. Agnew, administration officials and members of Congress on support for Saigon in the post-war period.

On April 17 San Luis Obispo city residents will decide between seven contenders for two city council seats and over the mayor's position.}

Jury declares

Leary guilty

Timothy Leary, the high priest of LSD and hallucinogenic drugs, was found guilty of escape Tuesday evening by San Luis Obispo County Superior court.

The jury only required two hours and one ballot to find Leary guilty, which ended a four-week trial. After the verdict had been announced, each juror was polled individually and confirmed their belief that Leary was guilty as charged.

Judge Richard F. Harris advised Leary's counsel that any motions regarding a new trial could be made April 26, which was set as the date for Leary's sentencing. The defense said that a motion for a new trial would be forthcoming.

Leary's counsel had maintained throughout the trial that Leary was in an "unconscious state" and "voluntarily intoxicated" during his escape from the San Luis Obispo Men's Colony on the night of Sept. 18, 1975.

The prosecution, headed by Deputy District Attorney Robert Lilley, said that Leary was in fact capable of realising the consequences of his escape. He said that the fact that Leary had himself admitted the escape, and that he had fled to several foreign countries before his arrest in Kabul, Afghanistan by a special U.S. narcotics agent.

Lilley seemed adamant in his contention that Leary should be tried under the same conditions as other persons. "It was not for Timothy Leary the philosopher or Timothy Leary the neurologician, not for Timothy Leary the High Priest of LSD, not for Timothy Leary the psychiatrist; it was for Timothy Leary the escapee and he's going to be found guilty of escape, and the law was made for him as well as everyone else."

Annual Hawaiian luau dinner tickets on sale

A Hawaiian band from San Luis Obispo, Reuben Editorial and his bandmates, will be providing the music for the luau. Included in the luau will be traditional Hawaiian drum and dance that will be doing authentic hula dances.

The luau will consist of some dishes as Kala pig, Lomi Lomi salmon, haupia, poi and chicken lua.
This week we are starting a "Flunkiest Department" for ecologically unsound products. Send your ideas to Box 188, Activities Office.

We tried the black brand Hair-White dressing styler. You know, the one which gives your hair the "Natural look." The control group, for some reason, got just as many for some reason. The half which got your ions, despite the fact that their hair didn't look "Natural." The control group died their hair with towels and used the ordinary comb.

The power companies forecast massive power shortages within the next few years because power consumption is outstripping the population increase by eight to one. And now, power-hungry appliances with dubious practical application are being pushed by Madison Avenue to worsen the situation. Don't buy these things.

The actual energy crisis is one of learning to conserve energy and develop alternatives to current energy sources.

The major areas of energy waste include transportation, construction, and inefficient appliances. Automobiles, with their 40 percent use of our petroleum products, are the most wasteful. And what does it get us? Auto traffic in central cities moves at an average of 12 miles per hour, the same speed as horse-drawn carriages 100 years ago. The day of the high-horsepower, low-efficiency car is past.

Energy saving can be made as simply as shipping by rail instead of truck, with rail being four times as efficient. With increased human labor in the future of large buildings, up to 80 percent of the material used in construction could be saved. Increased insulation in homes and buildings could reduce energy consumption as much as 40 percent, with the same trended costs covered many times by lower fuel bills.

Student says campus is responsible for job ads

Editor:

Posted around campus are tablets of order forms advertising summer jobs. I assume there are many students, like myself, who read the ad and sent a money order for $4 to U.S. Auto traffic in central cities moves at an average of 12 miles per hour, the same speed as horse-drawn carriages 100 years ago. What's happening, people? How many times have others and sisters heard that phrase and replied, "Nothing," or, "You got it." Well, let’s think about it. Because even if it may seem, things are happening here at Poly. One thing all the ethnic groups are into is the Ethnic Studies-sponsored tutoring class. The class is called Education 322, and involves the tutoring of students from kindergarten on up to college ages. The class seems very helpful, and is a service to the tutor as well as the student being tutored.

The Asian students, aside from their separate student organisations, are contributing their efforts towards Poly Royal. Poly Royal has been a climax of the school year since its conception, and its sure to be even more climactic with the Chinese, Japanese, and other Asian people working on it. The Black students are getting their thing together in a very satisfactory manner. They start with the sweet sounds of their recently formed gospel choir. The choir sings traditional gospel tunes in a beautiful melodic, rhythmic style that surely must remind a great many of us of home. The choir has made several appearances and has been known to "get down." The Black students have also found another way to express themselves musically and physically. It’s called "Shimora," and is a two-week-old dance group. They are red, and we should be hearing from them sometime in April.

Our brown brothers and sisters also have a talent for expressing themselves. One of the many activities they are now undertaking is theatrical and dance group. The group does an excellent job of communicating thoughts and ideas, and is very representative of the feelings of its talented innovators. Yes, it's a beautiful fact that we all can do our various things well.

Campus blood fund up...

Luau Friday...

(Continued from Page 1)

Tickets are $4 for both students and the general public. They are available at the University Union Information desk and at Brown's Music Store in downtown San Luis Obispo.

Food and Drug Admin. makes label restrictions

WASHINGTON (UPI) A Food and Drug Administration FDA report recommends Wednesday that nine antacid products be removed from the market and said most others should change their labels so consumers won’t think they’re getting help for much but indigestion.

The long-year review of non-prescription antacid products said the ingredients in most brands—including Alka Seltzer, Bromo Seltzer, Tums, Rolaid, Gelusil, various kinds of milk of magnesia and dozens of others—are safe and potentially effective. But it said Alka Seltzer and Bromo Seltzer and others which combine aspirin or another analgesic with the antacid should specify on their label they should be used only for relief of headache and indigestion—and not, for example, to treat an ulcer. In addition to the nine products which it said should not be allowed, the study singled out nine ingredients present in at least 17 brands for which it said there was inadequate evidence of effectiveness.

The report also laid down a laboratory test to which the manufacturers of all antacids would have to submit their products. It requires the antacid ingredients to work within a 15-minute time span.

There you are, a $9.95 bill and $1.38 in your pocket. The merchant eyes you suspiciously: uh-oh, another no-cash kid.

You smile to yourself as you whip out a Bank of America College Plan check (only $1 a month, no more than $9 a year, and all the checks you can write!). He hesitates, he still doesn’t know you. So you reach in your wallet and pull out your ace—your Student BankAmericard:

The merchant relaxes, Thank you sir, come again.

Your credit’s established, thanks to BankAmericard and College Plan Checking—welcome company just about everywhere.

Be known by the company you keep.
Polycanyon cleanup scheduled this Sunday

Polycanyon is dirty, so let's clean it up! Those are the words of Ecology Action Club member Tony Nicca. Nicca said the club is planning a clean-up day on Sunday, April 8, because "this is our canyon and it is our responsibility to keep it clean!"

Those wishing to participate should be at the entrance to the canyon at 11:30 a.m. According to club President John Forster, "it's a good way to spend a Sunday." Participants need bring only themselves and a sack or bag to hold the collected garbage.

A future project scheduled for May 20 is the 'Bike for Life' drive, which will hopefully raise money for the People's Lobby, Forster said. The Lobby was responsible for last year's Green Clean Environment Act, and is actively working on the Environmental Act of 1994 and the Campaign Spending Initiative.

Pianist Nadas to play Friday

The Fine Arts Committee of the Associated Students Inc., will feature pianist Istvan Nadas in the first annual Spring Quarter Classical.

The program will take place Friday, April 6, from 8 to 10 p.m. in the Cal Poly Theater. The program will begin with "31 Variations on a Waltz of Diabelli" by Beethoven. The second piece will be "Bach Piano Sonata" by Prokofiev.

Nadas is a specialist of the complete keyboard works of Johann Sebastian Bach and of the 38 Beethoven piano sonatas.

Tickets for the performance are now on sale at the Information Desk of the University Union. The cost is $3.50 for students, $5.50 for the general public.

Exhibitors seek sexy assistants to prove chemistry can be fun

With Poly Royal just around the corner, the Chemistry Department is realizing the needs of the people. During Poly Royal, they will try to prove that chemistry can be fun.

Dr. Philip Bailey is realizing the needs of children of all ages. Combining his knowledge of chemical compounds and an imaginative process of chemistry magic show will be presented. At the moment, Dr. Bailey is still in need of a few very sexy magician's assistants, but the show will go on even if he can't pull them out of his hat!

Dr. Robert Chichakli is realizing the needs of the first and second grades in elementary school. A playroom should be in operation in which children can try their hand at making nylon, toothpaste, and work with natural indicators.

Many important everyday applications to chemistry will also take place during Poly Royal. Students will conduct tests on water samples brought to the lab during Poly Royal.

The photo-lab will be in operation, showing how to enlarge a negative. A special reel-coated paper that dries in 30 seconds will be used. The contents of tin cans and metal toothpaste containers will be tested through a process known as atomic absorption. It is found last year that some toothpaste brands contained as much as 33 parts per million of lead.

Laboratory glassblowing students will attempt to construct lab equipment and maybe even make a pyrex animal or two.

The Pant Works PRESENTS FREE Pants

That's Right! At The Pant Works, you buy a pant at its regular price and you get another pant Free. We've sold over 1000 pants from our regular stock in a fantastic range of sizes, colors, and styles for you to choose from. Your choice of Male, Liberty, Campus and Charlie. They're all at their regular price and P.W. will give you another pair Free!

The Pant Works has it all for free. Patch pockets and slit pockets. Corduroy, brushed corduroy, denim and brushed denim. They button up, zip up, and wash up really fine. A special treat will be the seconds with recapped zipper. They're new, they're special, flown in from Fire Island. But they're not! These pants are all regular, in stock goodies.

What could be better than a pair of pants free and fighting off 100's of people. It's gonna be great and it's gonna be a lot of fun especially with only 6 dressing rooms. So come on and get your pants at the Pant Works. Run down, fall down, slide down, or float down to the Pant Works at 117 S. Broadway in Santa Maria, or 778 Higuera, in the Network, in San Luis Obispo.

BankAmericard • Master Charge • Open Monday through Saturday 10 a.m. to 5:30 p.m.
Open Thursday nights till 9:00 p.m.
Mayor Kenneth E. Schwartz seeking third term. Photo by Scott Harrison.

Third city mayor term
Kenneth Schwartz’s goal

Mayor Kenneth E. Schwartz will seek his third term when the polls open April 17. If re-elected, he intends to play an active role in San Luis Obispo’s transformation from a town into a city.

Schwartz, an instructor in the School of Architecture and Environmental Design at this university, was a member of the city planning commission for eight years (1969-77), the last five of which he served as chairman. He was elected mayor in 1980 and again in 1981.

“Four years do not provide sufficient time to get programs moving,” says Schwartz. “It takes so much time. You have enough time to dedicate to programs you feel strongly about.”

According to Schwartz, the implementation of the General Plan will include the updating of ordinances, strengthening of the park and recreation program, evaluation of the traffic system, and an examination of the city’s water system’s capability to handle storm runoff.

“Some people have been in the city too long,” says Schwartz. “There is a ‘get out of the city’ sentiment, hopefully even unique, that there is a pleasant, handsome, beautiful community.”

Schwartz’s overriding objective is “to create a city environment,” says Schwartz, “that is an enjoyable place to live and provide the services needed for a pleasant, handsome, beautiful community.”

Master’s cap for computer...

Incumbent councilman Myron Graham feels his experience on the city council and his past performance on the job will be factors in his re-election campaign. Graham is a long-term local resident and is a proponent of using revenue sharing funds for flood control.

High voltage workshop begins today

The Corner

5th Anniversary

The Corner has been understanding the contemporary girl and woman in San Luis Obispo for 5 years, and we’re celebrating this entire month of April. You can celebrate with us and, at the same time, win a $100 wardrobe FREE! Come by now and register through the week of the 8th through the 14th. Each week we’ll have a new drawing and you can win a $100 gift certificate to buy your favorite wardrobe. The first drawing will be April 10th. Come celebrate at our 5th Anniversary!

Pants:

- Fifi: brushed cotton, 30 inch bell, drop & taper front, in red, yellow, orange & white. Sizes 5-8 through 12, 14.
- Miss Hi: brushed cotton, red or blue. Sizes 4-6 through 12, 14.
- Raspberry: stretch cotton, size 8 through 12, 14.

Jewelry:

- Victorian Bouquet Flower
- Bluebell and Ring

Top:

- Cotton blend in navy and red.

Animal farm

By popular request, the Cal Poly PPA Chapter will repeat the animal farm at Madonna Plaza on Saturday, April 7. The farm will include baby pigs, lambs, calves, puppies, a burro, chicks, and a rabbit. All of the animals, except the burro and the puppies, will be from the hands and flocks maintained at Cal Poly.

Roundhouse

Questions? Problems?

Call Roundhouse at 648-8014 or drop by CU 2178.

The Day the Rain Came

"The Day the Rain Came" is available now at the information desk of the Union.

The booklet is packed full of pictures of scenes extending from Cal Poly to Lower Higueras Street. These pictures depict the effects of the January 18 flood on businesses, residents, roadways, and the cars attempting to travel them.

Mrs. LaVerne Schneider, treasurer of San Luis Obispo's Environmental Center, Richard Schmidt, reporter from the Telegram-Tribune, and Mrs. Martha Welty, a volunteer at the center, are responsible for assembling the flood book.

Contributors to the booklet include the Morro Bay Bulletin, Telegram-Tribune, Mustang Daily and photographers at large. Besides the Union, booklets are available in town at Hill's Stationery Store, City Hall, Gabby Book Store, Kwan Yin Book Store, Blake Printery and the Telegram-Tribune to name a few.

"The proceeds from the sale of this booklet will go to the San Luis Obispo Environmental Center to promote the understanding and appreciation of the natural environment of San Luis Obispo County," said Mrs. Schneider.

The books are being sold for $1.

Barbecue set to aid baseball
An all-you-can-eat barbecue, sponsored by the Mustang baseball team, will be held Sunday from noon till 6 p.m. at the Moose Lodge located at 1130 Orcutt Rd. in San Luis Obispo. The dinner consists of an unlimited amount of beef, beans, bread, and salad.

Here's a personal calculator that's different.
It's got what students need...
square roots, scientific notation, and more...
...at a price you can afford, $149.95.

The new Texas Instruments BR-10 makes studying faster and easier. Saves time, eliminates errors. Instant, accurate answers. Anywhere. Anytime. That's power. Power you can use to make your study hours more efficient. Learn more in less time. Free from the numbers drudgery.

And now there's a calculator that's different. The Texas Instruments BR-10, it's got the functions you need, at a price you can afford. It's one of the best investments you can make in your education.

Check these features:

• Square roots, squares, reciprocals - at the touch of a key — as well as addition, subtraction, multiplication, division.
• Exponential numbers. From 0.000000 to 9999999 x 101.
• Full-floating decimal — you place it in the problem, it's automatic in the answer.
• Fast-recharge, long-life NiCad batteries — and you can use the BR-10 while it recharges from a wall outlet.
• Reliable operation. Made by Texas Instruments, the world's largest manufacturer of solid-state components and integrated circuits.
• Guaranteed for one-year, including parts and labor.

Easy to use
From simple arithmetic to complex equations, the BR-10 is easy to use — even if you've never used a calculator or slide rule before. Just press the keys the same way you say the problem.

Order direct from Texas Instruments
Order yours now. Don't settle for less, and don't pay more. No other calculator offers you more for your money than the BR-10 — and it's built to last, by the leader in the industry. Get yourself an SR-10 and get the most out of your studies. Then use it the way you'll use your other educational investments — in your career. An SR-10 will serve you well for a long time.

Texas Instruments (Incorporated)

No risk 18-day examination period
Send coupon and enclose check, or money order for $149.95 plus 63.95 for shipping and handling. Please add state and local taxes where applicable. Use the BR-10 for 18 days, then if you decide not to keep it, just return it in original carton with all accessories for full refund.

Tennis team makes bid

by KEITH BLDRIDOE

In search of its second consecutive league crown, the Mustangs are determined to win the first leg of its adventure today.

The first of three stops is California State University, Northridge, where the Matadors will host the initial California Collegiate Athletic Association (CCAA) Tournament Saturday through Tuesday.

To successfully defend their title, the Mustangs must survive through this initial competition and two other similar events. The other stops include (May 3-5), and the finals at California State University, Fullerton (May 17-18).

Announcements

ISU Crusaders (Northridge) will host the tournament. The first round will begin at 10 a.m. on May 5, and continue until 2 p.m. The second and third rounds will commence at 11 a.m. on May 6, and conclude at 5 p.m. The championship round will take place on May 7, with the first round beginning at 10 a.m. and concluding at 2 p.m. The second round will commence at 11 a.m. and conclude at 5 p.m. The final round will begin at 10 a.m. on May 8, and conclude at 2 p.m.

Services

The ISU Crusaders (Northridge) will host the tournament. The first round will begin at 10 a.m. on May 3, and continue until 2 p.m. The second and third rounds will commence at 11 a.m. on May 4, and conclude at 5 p.m. The championship round will take place on May 5, with the first round beginning at 10 a.m. and concluding at 2 p.m. The second round will commence at 11 a.m. and conclude at 5 p.m. The final round will begin at 10 a.m. on May 6, and conclude at 2 p.m.

Travel

The ISU Crusaders (Northridge) will host the tournament. The first round will begin at 10 a.m. on May 3, and continue until 2 p.m. The second and third rounds will commence at 11 a.m. on May 4, and conclude at 5 p.m. The championship round will take place on May 5, with the first round beginning at 10 a.m. and concluding at 2 p.m. The second round will commence at 11 a.m. and conclude at 5 p.m. The final round will begin at 10 a.m. on May 6, and conclude at 2 p.m.

MUSTANG CLASSIFIEDS

At Northridge the losers open against Fullerton today at 1:30 p.m. Northridge gets a shot at the champions Friday at 9 a.m. and newcomer California State University, Bakersfield, gets its chance that afternoon at 2 p.m. University of California at Riverside closes the doubleheader at 4 p.m.

Leading the defense is all-American Dan Lambert, a junior from Arroyo Grande. The architecture major will be vying for another singles championship in the No. 1 position. In 1973 he went undefeated in the CCAA tournament and teamed with former Mustang Tom Martin to win the No. 1 doubles event.

Senior Harold Ertelt returns for his second year after taking the No. 4 singles crown last season. Now in the No.3 spot, the veteran science major from Monterey Park will try to fill the shoes of defending champ Martin. Ertelt took the No. 4 singles crown in 1972.

The only other returning 'netter, Dennis Jorgensen, moves up from sixth position on the ladder to the third rung. Last season he paired with former Mustang Jack Leduc to win the number-three doubles first place.

Rating off the line-up are sophomores Pete Lambert (brother of Dan), sophomores Jim Martin (brother of Tom), freshman Dan Thompson, and junior Ron Denve.

Though the changes could be considered the favorites, "It is really going to be a toss-up," said Mustang head coach Ed Jorgensen. "I would give credit to Northridge, Fullerton, and Bakersfield." The Northridge roster looks very impressive with five of the six-senior team returning off of last year's second-place squad.

"Fullerton kind of worries me considering the fact that their ladder has changed somewhat compared to last year," said Jorgensen. "The Titans have moved former number-two player Alan Foster to number-three, and former number-four player Dale Grigor to number-five. Moving into the top spot is former Pomona ace Oscar Meyer.

Bakersfield is basically an unknown, but being in their first year of conference play. The Roadrunners, however, are coached by professional tennis star and Davis Cup captain Dennis Ralston.
