In-the-round production highlights Spring play

by JOAN CAMPBELL

Within the past decade, words like "energy crisis," "fuel shortage," and "depletion of natural resources" have become increasingly important to the American citizen. Theories deriving into the prospective use of space and the possible conversion of solar energy to electrical power are tossed about while each day we come to realize more heavily on foreign sources to supplement our shortages.

While our resources have rapidly dwindled, another problem has been created. The atmosphere is polluted. What's to be done with our waste products? How can we curb pollution?

During Poly Royal this year, a machine which allows students to make their own waste, was presented on May 10, 11, and 12. It's called a Methane Gas Generator, and the principle behind it is simple enough for a child to understand.

The generator simply captures exhaust from gas cans which were cast aside. It literally takes organic fuel products ranging from coffee grounds to potato peels, and converts them into usable energy. The product is gas which can be used in a boat's engine.

This process is by no means new or different. In the 1920's, gas generating plants were peddled to ranchers. In 1953, Handsel Baker, a 1984 graduate of this campus, now living in Los Angeles, remembers the generator his family had on their dairy farm in Washington. He said their's ran on sawdust.

The Europeans have used this process for recycling waste for quite some time. It is illegal to own a garbage can in Zurich, Switzerland. Waste is deposited in plastic bags to be picked up and recycled. The city's office buildings are heaped by the buckets.

Cement canoes race at Laguna

Students from several universities expect to prove the old adage that cement does not float too well, when they meet in San Luis Obispo for the third annual West Coast Perro-mento Festival at Cal Poly.

The race will take place at 10 a.m. on Saturday, May 11, at Laguna Lake in San Luis Obispo. It is being sponsored by the School of Architecture and Environmental Design at Cal Poly.

Four races will make up the competition. There will be men's crew races over a 100-yard course, a 10-year-old women's race, and a faculty or mixed race over 180 yards. An added attraction is an open-class race planned over a 200-yard course. In the open race, power for the canoes may be derived from any source (excluding engines), including swimming, pulling and pushing.

Farm-cement is new to the boating world, especially in making canoes, according to Jeff Jacobson, who heads the student committee in charge of arrangements for the races here. Jacobson explained that until recently only boats of 90 to 100 feet were made from cement, but a maximum length of 50 feet has created a challenge for the student design. The Cal Poly entry is 18 feet long and 18 inches wide.

Hull thickness is three-eighths of an inch. Participating students are funding the $600 cost.

Beside Jacobson, Cal Poly construction students are planning the canoes, while the engineering seniors, who are working on the canoe are Richard Peskin, Doug Schell, and Richard Hohouts. The Outstanding Senior in Animal Science Scholarship was awarded to Leslie Sanderson, John Reiter, and Marilyn Lewis (not present), Mark O’Rale, Lee Potts, and Poppy.

Past President of the California Taxmen's Association, Ed McPhee, has promised to supply the students with special printing to supply the definition of farm cement. The presence of a total male canoe in the play was a surprise to Poly when he said, "it's well known that every production has had a total male scene," but Lake had no other comment other than that it was "a directorial and artistic decision" whether it would be included.

Advance tickets for the play may be purchased at the bookstore prior to the play. Advance ticket sale on April 30 at the Information Desk of the Julian A. Leary sentence: six months to five years in state prison

Dr. Timothy Leary was sentenced to six months to five years in state prison last week. Dr. Michael Harris ordered the term prescribed by law to be served consecutively with a 20-year sentence for possession of marijuana. Leary has also been convicted of smuggling in Laredo, Texas and charged with经销ing marijuana.

Leary has been at the Men's State Prison in Chino since January 18 arrest by Orange County Deputies after being released from San Quentin in January 1973. He is a jury of 11 women and one man April 27.
Student thanks ban on sex

Editor: I am so relieved to note that once again, our steadfast Institute of high learning, has put us fledglings under your arm and protect us as we grow up. Lord only knows that I might have been one of those unstructured fledglings who would actually make the sin against humanity. Gracious, what about the beautiful things in life, such as Vietnam, assassinations, murder, pollution, etc., I am as the movie if I didn't want to. It didn't interfere with my rights, I am so relieved to note that I can't tauntingly tempt me. But thank goodness the devil someday I too can be as American as you.

Philip Floyd

Irritated by ‘sexism’

Editor: I hope I am not the only person that is becoming increasingly irritated by the rhetoric, exaggeration, and the “misleading: the markeness” of most people who join in the controversy, on either side, that surrounds feminist accusations of sexism. Particularly when that controversy centers on how men and women behave or should behave in various social settings. Like passing on the street, meeting in a bar, sharing the batting, or ultimately uniting themselves in combatible roles, not necessarily in that order. My belief is that the huge people set their own stage for the kind of situations they encounter in this seemingly inhuman world. But most of us naively claim to be victims of new kind or another, victims of situations over which we claim to have no control.

The guy who bumps down the sidewalk without a brus and is embarrassed or angered by the so called standard reaction of whistle, grunt, etc. That girl is as much a producer of the reaction as the brute who gave it expression.

The guy who meets a woman in a bar and tries to strike up an “intellectual conversation” when he’s really digging on her cleavage—he’s only got himself to kick when she turns her festeriing eyelashes to Mr. Monomylatable with the bronze-bot that just walked in the door.

The girl who continually says “no, please,” to the entreaties of her imprisoned boyfriend, she is making him into such a big thing that no small wonder they are disillusioned when they finally indulge in “the real thing.” And he must be some kind of stupid masochist for spending so much energy in a relationship with such a poor reward per cost ration if that is what he wants.

Most people I know spend a fair portion of their time and energy in some kind of sexual game, the hole-word, and the innocent young “no, please” misses the hard “liberated chicken,” the studious and timid gird who hides behind his books and all the less-stereotyped stereotypes.

My point is that anybody has the ability to be selective in his appearance or behavior in order to optimize his or her chances of meeting and being with people who play his or her game.

I’m signing this only with my last name, to saveresponders the pitfalls of mentally labeling me sexist-pig or feminist bitch, if they haven’t already figured it out. If anything, label me irritant-cynic.

Gas generator speeds decay...

(continued from page 1) generation of methane gas from this waste.

The antique generator that will be displayed this weekend, has been the topic of much discussion. Demonstrations have been given at the Bradley Elementary School and the Jurupa Mountain Cultural Center, City, county, state, and federal representatives were present at another demonstration held in Paso Robles on March 17th.

The demonstration appeared, and behavior situation, it works. Improvements, in materials and design, could make this process a feasible alternative to fossil fuels.

Mustang Daily

For the session starting Fall, 1973, the European Medical Students Placement Board, Inc., will assist qualified American students in gaining admission to recognized overseas medical schools.

And that’s just the beginning.

Since the language barrier constitutes the preponderate difficulty in succeeding at a foreign school, the Euromed program includes an intensive English language course, mandatory for all students. Five hours daily, the course is given in the country best the student will attend medical school.

In addition, the European Medical Students Placement Service provides students with an 8-12 week intensive cultural orientation course with American students now studying medicine in that particular country, serving as counselors.

Senior or graduate students currently enrolled in an American university are eligible to participate in the Euromed program.

Perhaps most important, the Euromed Program helps the student attain his career goal in the medical profession.

If I would like to thank you for providing me with the opportunity to fulfill my goal of becoming a doctor. I believe that your program holds a great deal of hope for the future... in opening doors for many young Americans... and in aiding U.S. in its critical shortage of doctors.*

*from a letter from a Euromed participant

We have helped place a number of qualified American students in recognized medical schools overseas.

Light blue Ghia ‘ripped off’ and ‘bashed’ by a ‘guilty party’

Editor: On April 17th I returned from my morning classes to find the left front fender of my light blue Kurzmann Ghia bashed in and the chrome ripped off. What a sight. It’s enough I’ve put so much money into the upkeep of my eight year old car, but now I get to look forward to laying out more money to fix the fenders caused by some ‘accident’. If you are the guilty party, believe me I know accidents can happen, but just stop and think for a minute. You are the cause of a lot of misery to me as well as damage to my car. I realize the cost of repair, which is estimated at $108.68, is a lot of money out of your pocket, but did you stop to think what it means to me, the innocent party?

You could have been decent enough to leave your name and your insurance company but I guess running away (I mean driving away) from problems is one way of avoiding any cost to you.

I don’t want to beg you to pay for the damage done to my car, I wouldn’t want to lower myself so far. All I can say is thanks for nothing.

Carol Chadwick

Guzski, Manitoba

Karmann Ghia bashed In and the chrome displayed this weekend, has been given at the Bradley Elementary School and the
P.E. award to senior student

The 1973 John F. Kennedy scholarship, from the California Association for Health, Physical Education and Recreation (CAHPER), was awarded to senior student Thomas Barnhart, a P.E. major here, last Monday. The $50 award is one of three such scholarships in this state. According to Barbara Ford.

Swords needed on loan basis by drama dept.

A desperate cry has come from the Speech Communications Department for a gift or loan of two or more swords to use in their upcoming drama productions. The swords are needed by the first of May for the production of "Thomas Paine." The actors need a period equipped with weaponry to establish their techniques, before the May 9 opening night.

"We just might come across a pair of very scarce complementary tickets for someone who can donate a sword" Smith said.

Anyone having information about swords that may be available is invited to contact Robin Lake or Murray Smith by phoning 544-4847.

Awards given to outstanding members

(continued from page 1)

Awards were made by club advisor, Mr. McNeal. Margaret Cummings was recognized as being the outstanding freshman member. The Outstanding Club Member Award was shared by Cathay Harris and Roy Miller.

The Cutting and Reining Club President Dave Smith presented Nancy Wilson with the high point trophy for the 1972 horses season. Miss Wilson earned the highest total number of cumulative points in intercollegiate competition.

Meeting set for guitar club

A group of people who are into classical guitar—either as musicians or listeners—will meet next week to organize a new club called the Poly Guitar Guild.

According to Ron Hansen, one of the group's founders, the Guild has already held one meeting and approximately 30 people attended.

"It was very successful," Hansen said, "however, the group is still looking for people who want to learn about classical guitar music.

The Guild plans to hold a general membership meeting Wednesday, April 26, in BA and E at 7 p.m.

Although still in the embryonic stage, the group has begun to plan a number of activities. According to Hansen, the Guild will sponsor a classical guitar workshop with David Grinman, a professional guitarist, sometime in mid-May.

For more information about the Guild or its scheduled activities, call Ron Hansen at 844-1976 or Dr. J. Barron Wiley, group advisor, at 544-6187.

Help needed at Poly Royal by ag club

The Boots and Spurs Club needs volunteers to assist in preparing booths and displays for Poly Royal. The club sponsors the stock show; a concessions stand, and displays agriculture related exhibitions in the Ag building.

According to club advisor, Lyle McNeal, assistance is needed in the form of hostesses, laborers, stock handlers, clerks, and people to work the concessions stand. The concessions stand is an important function of Boots and Spurs since it pays for the trophy awards and supplies donated by the club.

Those interested may sign up early, by Mr. McNeal in room 326 of the Erhart Agriculture Building.
These petty young things are ready to bust powderspuff game to be played in Mustang for Friday's Stadium at 2 p.m.

Track rivals Fresno

Mustang track coach Steve Simmons heads today's meet with arch rival California State University, Fresno, looking forward to a repeat of last year's victory, but still expecting a very competitive meet. The action is set for 9 a.m. at Ratcliffe Stadium in Fresno.

"We will be dropping some of our sprints and quarter-milers, such as Nieta Kahal, down into the sprints and bringing up some of the sprinters, such as John Haley and Kerry Gold, into the middle distance events," commented Simmons.

Simmons is expecting improved performances from his 440 and mile relay quarters and hopes that his sprinters will run their best races yet.

Fresno State boasts one record setter in hammer thrower Keith Thes, who has thrown 186 feet. Fresno should also be strong in the discus and the hurdles, according to Simmons.

The Mustangs will counter with a very fast team and deep阵容, featuring top class performers.

P.E. courses get new names

A new numbering system for the physical education courses will appear in the 1976 Catalog Bulletin. According to Dr. Buccola, a member of the physical education department, the change will be in effect starting the Summer Quarter.

Under the new numbering system for the classes concerning codes, men and women will be identified by a certain number.

All coed classes under general activities will be listed from 100 to 104. All coed classes under academic courses will be listed from 180 and above. All men's classes in general activities will be listed from 108 to 109. All men's classes in competitive will be listed from 114 to 115. All men's classes under professional activities (majors and minors only) will be listed from 120 to 129.

All women's classes under general activities will be listed from 160 to 164. All coed classes under academic courses will be listed from 165 and above. All men's classes in general activities will be listed from 170 to 171. All men's classes in competitive will be listed from 174 to 175. All coed classes under professional (majors and minors only) will be listed from 180 to 189.

For more information on the physical education classes, contact the physical education department.
