**SEC stumbles on aggie board**

by ROBERT TERRILL

Controversy concerning the establishment of a Western Programming Board erupted at the Student Executive Cabinet meeting Monday night.

Clay Bowling, ASI Program Board chairman, moved for SEC to reject the concept of a Western Programming Board and notify the Student Affairs Council of the rejection. The motion failed.

"Adding a new board to compete with the existing Program Board does not make sense. We already have the mechanism for arranging concerts and speakers. We have established relations with agents, and if we form a board it will be a waste of time which will deal with the same areas, those relations will be damaged." 

"We have no objections to forming a committee for rodeo and agricultural judging teams; there would be no red tape. We are conducting these activities. I think that these areas can successfully organise under the committee concept," said Bowling.

ASI Vice President Danny Johnson supported the new board.

"The Western Programming Board could tap new sources of money, and perhaps in five years greatly reduce the SEC subsidy in the four agriculture programs. The committee concept would not be as effective as a board, and the Aggies don't want to be lumped under some other board, as they would in that concept," said Johnson.

Lee Pitts is heading a committee which will submit the Western Programming Board codes to the Codes and Bylaws Committee within a week, according to Johnson.

In other business, SEC cut the budget of the Educational Opportunity Program and Ethnic Program to $10,000 and $8,000, respectively.

In defending the two programs, Fred Johnson, Ethnic Program Board chairman, said that Caucasians on campus were "told" by the Ethic Program.

"We are here to get an education, not for some people, and to get to know others." 

**KCPR adds listener power to Poly Royal**

Campus radio station KCPR has extended its broadcast day to 24 hours during this week for complete coverage of Poly Royal activities.

KCPR coverage on Thursday and Friday will feature a remote broadcasting station located next to the Union Information Desk. At various times during the day, listeners may also tune in to remote coverage of selected Poly Royal activities.

The staff of KCPR will also be hosting tours and displays throughout the main control room, located in Graphic Arts 302.

**Daily goofs**

To correct an article in Mustang Daily's "Poly Royal Edition, the Cer- nal Dance will be moved from March 17 to March 18, and the Men's Gym.

**Last chance on Friday for English test**

That Freshman Composition class is thinking of finally taking may be a waste of time, if you are already well in the complexities of English grammar.

The State University and College system, in cooperation with the College-Level Examination Program (CLEP), is providing for the first time, an English Equivalency Test to earn college credit for English skills previously acquired. The application deadline for the test is Friday.

The English Equivalency Test is to be given once only on May 13 at 8 a.m. at colleges across the state. It will be held here in Administration Building 31. College credit received in the test, nine quarter units of English or six semester units, will be transferable until the end of 1974 at any California State University and College campus. Some University of California campuses will join later.

The test will run about four hours with a one hour break. It is divided into two nine-minute segments. The first will deal with 100 multiple-choice questions on compulsory passages supplied in the test. No previous knowledge of these works is necessary. The second part of the test consists of two essays on various topics, completion, and multiple-choice questions throughout the State University and College system.

Scores will be recorded as either "pass" or "fail" with no grade points awarded. To pass, students who have taken Freshman English must be met. The essays will be graded, and only quarter units will be entered on records automatically. If the test is failed, it will be invalid and not held against you.

Applications can be picked up at the Counseling Center and the Admissions Office in the Administration Building. A $10 registration fee is required to be mailed with the application or given to Mrs. Clara Frogstt, Adm. 311.

**Water samples will be tested at Poly Royal**

The Chemistry Department will offer free water analysis during this Poly Royal weekend.

Water samples will be analyzed to determine in parts per million, the amount of calcium and magnesium contained in the sample. The testing will be conducted by members of the Chemistry Department. Soft water samples should be at least one gal.

Soft water samples will also be analyzed. These samples should be taken from a hot water tap.

**Construction of an air-supported structure began yesterday**

In front of the Library by members of an Architecture 470 class. The structure is a master thesis by Jim Montero using a special computer program. The costs are Montero a $1,000 grant for the project. According to Montero the money is "almost gone" on a project he was told couldn't be done.

**PLAYROOM 'WONDERLAND'**

Chem display for kids

When Alice fell in the rabbit's hole, was she really holding a test tube?

According to Dr. Robert Chuchwalt, chemistry professor, she will be, at Poly Royal during the first chemistry playgroup geared for youngsters from four to eight years old.

Named "Alice in the Chemical Wonderland," displays and demonstrations will feature chemical relationships for youngsters and their parents. While Mom and Dad view the displays, the youngsters can make water molecules from a crystal garden, and change the colors of certain solutions.

The playroom will be on the West lawn of the Science Building and will be open on Saturday from 8 a.m. to 6 p.m. Lifestyles characters have been constructed to add to the realism of the setting.

Among the displays for adults will be chemical problems that were encountered during Lewis Carroll's time. One such problem arose with mercury.

Mercury was used in manufacturing felt hats, thus chronically exposing workers to mercury poisoning. The tremors which developed became known as the "hatter's" shakes and the mental change produced led to the expression "mad as a hatter".

**Math contest will draw state-wide contestants**

The 1st annual Poly Royal Mathematics Contest will be held here Friday at 9-10 a.m.

Volmar A. Fosse, a member of the Mathematics Department, said, "There will be 800 students from high schools throughout California who will be entering the contest."

Fosse said, "The soul purpose of the contest is to recognise the scholarships high level for education."

The top three individual winners in the contest will be awarded cash prizes in the amounts of $800, $500, and $300 respectively. The money will be donated by the Monarch Insurance Brokers of San Luis Obispo.

The high school team which wins top honors will receive a traveling trophy-side rules and drawings of "Poly Royal Mechanics" books will be awarded to the top contestants and members of the winning team.

There will be two written examinations, one for the contest addition to examination, the contest will feature a "chalk talk" competition in which high school juniors will participate in oral presentations.

**Archives premier display**

The department of Landscape Architecture will host visitors during its first Poly Royal display.

A continuous slide show, refreshments, and guided tours through the "Landscape Laboratory" will be from 11 a.m. to 3 p.m. on Friday and from 6 a.m. to 2 p.m. on Saturday.

The displays will encompass the school's first year of existence. Solutions to hypothetical problems and their application towards the development of a workable environment will be the key themes of the display.

The new Landscape Architecture lab is located in the old post office building on the corner of College Avenue and south Perimeter Road, across from the stadium.

**KCPR adds listener power to Poly Royal**

Campus radio station KCPR will be on the air in Poly Royal for 24 hours this week for complete coverage of Poly Royal activities.

KCPR coverage on Thursday and Friday will feature a remote broadcasting station located next to the Union Information Desk. At various times during the day, listeners may also tune in to remote coverage of selected Poly Royal activities.

The staff of KCPR will also be hosting tours and displays throughout the main control room, located in Graphic Arts 302.

**DALLY GOOF**

To correct an article in Mustang Daily's "Poly Royal Edition, the Cereal Dance will be moved from March 17 to March 18, and the Men's Gym.

**Water samples will be tested at Poly Royal**

The Chemistry Department will offer free water analysis during this Poly Royal weekend.

Water samples will be analyzed to determine in parts per million, the amount of calcium and magnesium contained in the sample. The testing will be conducted by members of the Chemistry Department. Soft water samples should be at least one gal.

Soft water samples will also be analyzed. These samples should be taken from a hot water tap.
The Fantasticks will be presented in the campus theater at 8 p.m. Wednesday through Saturday, April 14-17.

The Fantasticks, we have been told, is one of off-Broadway's longest running musicals. After The Fantasticks, we have been told, Is one of off-Broadway's 'Fantasticks not so hot reviewing It at the next to last longest running musicals. After the rehearsal, I wondered what it was running from.

The plot is a combination of classic poses. A boy and a girl fall in love over a high brick wall which their fathers have built between their adjoining gardens during a feud. It develops that the feud is a fake designed to cause patching things up. The morning after the rescue, the fathers get the bill from the villain and 'tease up. The boy and girl get upset and fall out of love. Entirely predictable? It gets worse.

The boy goes off to see what the real world is like. The villain moves in and steals the girl's heart (as well as her necklace). They plan to run away together to see the world. The boy comes back singing of the despair of the world (during the love scene, no less) and the villain takes off. The lovers are re-united and live happily after.

The acting is not bad. All the fight scenes are dandles. Negative emotions appear very familiar to the actors, who seem to show just how they would respond in the situation.

Not so for the love scenes. Here the cast has substituted how they think love ought to be played for what is your kind of play. Reverse psychology lovers, this is your kind of play.

The fathers decide to hire a villain (who also is the narrator) to stage a rape in which the boy is the hero rescuing the girl and giving the fathers an excuse to patch things up. The morning after the rescue, the fathers get the bill from the villain and 'tease up. The boy and girl get upset and fall out of love. Entirely predictable? It gets worse.

The qualities of old Ag Ed are many. The building is well used and liked by its current archie Inhabitants and food patrons, with an increasing respect for beautiful historical buildings that reminded us of the character and values of yesteryears, many people see Ag Ed. as a refreshing perspective on our heritage.

There has been hell-raising the last few weeks because the old Ag Ed. building is scheduled to be destroyed this June to clear the site for the new architecture building. Many interesting proposals have been put forward that deserve our discussion.

The new building should be exemplary of the standards asked of others. Remember, P. 0. & E. tell us that power shortages will shortly be upon us with attendant blackouts, blueouts, etc. So why are we designing new buildings that are excessively power-hungry?

Students from every department must encourage an integration of the new building to coexist with the old. Also, in a university where you have a school of construction engineering, a school of architecture, a school of agriculture—outfitted with many types of heavy equipment, and large supplies of sheep labor, certainly the technicians exist to bring up old Ag. Ed. to the Field Act earthquake requirements.

A thorough consideration of alternative proposals is needed now. A cost-benefit analysis is being made to estimate the cost of bringing old Ag Ed. building to earthquake standards using the full resources of the school in this educational endeavor.

The crux of the problem deals with who should make the decisions that affect the interest and welfare of the students and community. Should we rely on ‘wisdom' that was incorporated into a ‘master' plan six, 16, 30 years ago? I don’t think so. Or should we incorporate changing realities?
Cows get dressed up

A Dairy Heifer Dressing Contest is one of the activities planned by the Los Lomas Dairy Club for Poly Royal. The contest will be held Saturday in the Dairy Judging Pavilion at 11 a.m.

According to Dr. Harry Marten, Los Lomas advisor, the contest is open to any student, and clubs are encouraged to enter as a team. The number of entries available for the contest is limited, so those interested are urged to enter as soon as possible. Entries are available in Agriculture 114 or the Activities Planning Center.

For further information contact Dennis Edland, Dairy Heifer Dressing Contest Chairman, 844-7180.

Diamond team to host Chico

Ranked 15th in the Associated Press college division poll, the Mustang baseball team will try to improve its overall record of 35–19 today as it host California State University, Chico, for a noon doubleheader at Poly Field. Right-handers Doug Alderman and Dave Brunell are slated to start on the mound.

With first place on the line for the California Collegiate Athletic Association crown, the Mustangs will host Cal Poly Pomona in a do-or-die series this weekend. The Mustangs must win at least two out of three games from the Broncos or they will finish in second place for the third year in a row.

Deadlines on Application

April 19, 1973

William F. Schilz, Assistant General Manager

TO: Interested Applicants

FROM: William F. Schilz, Assistant General Manager

DATE: April 19, 1973

SUBJECT: Job Opening for Resident Assistants

THIS MEMO SENT TO YOU FOR ACTION □ INFORMATION □

Overview:

A Resident Assistant's primary responsibility will be to his assigned building. He assists residents in meeting their physical, social, interpersonal and educational needs relative to their living situation. The Resident Assistant will be responsible for keeping his building in good operating condition by making the housekeeping and maintenance staffs aware of areas that need attention. He will be responsible for carrying out administrative tasks relative to the residents of his building (i.e., inventories, rosters etc.) as assigned and required by the Director's office. He will put in his assigned on-duty hours during weekdays, evenings, and weekends. He will participate in a continuous on-going training program throughout the year. Part of the initial and on-going training program for Resident Assistants will be direct cross-training in all areas of residence hall management. The design will be that all Resident Assistants fully understand all staff functions. In conclusion, the Resident Assistant will have significant responsibility to participate in operating a physical environment which is highly conducive to comfortable living and which creates a climate which encourages involving and responsible contact among the residents.

Minimum Personal Qualifications:

1. Completion of at least 30 units of accredited college work with an overall G.P.A. of 2.5.
2. Presently enrolled at Cal Poly.
3. One year of living experience in a student residence hall.
4. Must not need to hold an outside job.
5. Willingness to give of yourself to both residents and staff.
6. Willingness to reside in the unit.

Compensation:

1. Full room and board for the academic year.
2. Telephone connection charge plus monthly service charge.
