Moratorium put on facility use

by BRAD BROWN

Pres. Robert Kennedy clarified his intent in imposing a moratorium on the use or commitment to use at a future date any state-owned facilities on this campus when admission is charged (or contributions are solicited) and the activity is one in which students registered at this campus do not constitute 10 percent of the participants."

Tuesday in an interview for KCPR News.

Kennedy emphasized that "two things (admission charge and student participation) constitute the basis of the moratorium."

Concern over the state-owned facility use originated from two sources. The Holler Games of March 18, in which a "lion's share," in Kennedy words, of the profit went to the two professional teams and the university sponsoring the event.

An exclusive pre-recorded interview—Robert University President Robert Kennedy will be aired on radio station KCPR at 11 tonight.

The interview will cover the State-owned facility use moratorium imposed April 18 and its intentions.

The interview, originally, was for the state, as in past instances, to bear most of the burden for maintaining the state-owned Mustang Stadium. But, according to James Landreth, director of the state affairs, campus interpretations of state policy have been in error. The change in maintenance policy of 10 years ago did not affect new facilities exclusively, as thought, but also old facilities that were not directly related to the "educational thrust of the administration."

"This surprise insight created a stir in the Student Affairs' and President's office and left the student participation) constitute the basis of the moratorium."

"There are many factors in the transportation problem, and I want to be ready to get the program going Fall Quarter."

Some day this will be a walk-on campus, and we should begin to gear up for that now.

"I think that once students see that they will save money that would have gone to parking stickers, fines, and gas, they will support the program. Car pools are another solution that we are going to encourage." said Holley.

Attending organization meetings to encourage communication between students and student officers is another activity Holley said that he plans during his administration.

The communication problem department is a big with us. I am going to do all I can to find out what students think. I am going into getting office space and office hours for SAC reps, and try to improve communications between SAC and the student body.

Ronce said that he is looking forward to working with both the Summer Intern Committee and the Student Affairs Council.

"I have no plans to change drastically the way SAC meetings are conducted."

According to Bob Waller, advisor to the election committee "voting will be held at the university Post Office, Agriculture Circle, "promptly at 5:30 p.m."

Paul Isreal is the only person running for "ASI Secretary.

Mark Zachary, Jeanette Hiatt, John Buck, Nancy Donovan, Sandra Oen and Donna Kaufman are all candidates in the election."

Finance Comm. vacancies now require filling

Finance Committee Chairman Mark Meiring announced at Monday night's meeting that interviews of prospective members for the 1975-76 school year will be held at 9:30 tonight.

Meiring said applicants must have at least a 2.5 grade point average, be willing to sit on their school council and have an interest in the financial aspects of student government.

One more time—ASI elections for secretary

ASI Elections for the ASI Secretary and the Human Development and Education Council Representative will be held this week.

According to Bob Waller, advisor to the election committee voting will be held at the university Post Office, Agriculture Circle, "promptly at 5:30 p.m."

Paul Isreal is the only person running for "ASI Secretary."

Mark Zachary, Jeanette Hiatt, John Buck, Nancy Donovan, Sandra Oen and Donna Kaufman are all candidates in the election."

More information on the Human Development and Education Council Representative.

plague Sky Lab mission

NEW ASI OFFICERS

Planning begins for fall

Two new ASI executive officers are planning a quick release from the starting block when they take over the student government on June 10. ASI President-elect John Holley, and Vice President-elect John Ronce are appointing next years committee personnel now and enlisting them to com­mu­nicate with present com­mittees to see how things work. This orderly transference of duties will provide continuity to the ASI programs, according to Holley.

Equipment malfunctions plague Sky Lab mission

HOUTON (UPI)—A series of major problems began besetting the Skylab space mission almost from the moment of launch.

The malfunctions, most of them interrelated, began only 10 seconds after the huge earth­ orbiting lab lifted off atop a Saturn • rocket from Cape Kennedy Monday.

Problems with electrical, thermal and attitude control systems cropped up throughout Tuesday night, keeping flight con­trollers constantly busy to sustain the flying lab and try to get it ready for a visit by astronauts Conrad, Dr. Joseph P. Kerwln and Paul J. (+t.+

The difficulties, In order of occurrence:

- The accelerometer shield protecting the aft end of the spacecraft, apparently was ripped loose by vibrations or vacuum gas 60 seconds after liftoff. The shield, designed to protect the workshop from punctures by micrometeorites, also provides protection against overheating from the sun's rays.

- Circa 12 of the few solar cell panels on the side of the workshop tried to deploy about 15 seconds later, much earlier than planned.

- Ground controllers tried to deploy the other panel a few hours later and found that it, too, would not work properly.

- The lack of the solar panels pointed almost immediately to a reduced workload mission and possibly a shorter flight since the amount of available power was out almost in half. Four other solar panels on the Apollo Telescope Mount were working perfectly.

- The absence of the aluminum weather shield, although the thickness of a piece of paper, caused no problems so long as kept in mind considerably. Temperatures inside the living area of the craft climbed over 100 degrees.

- Several small gyroscopes in the craft's attitude control system which keeps the spaceship pointing the right direction were faulty. Engineers said enough of the nine gyroscopes were performing fine and the situation was not critical enough to make the craft tumble like the Soviet Soyuz space station which was lost last month.

- A computer, which analyzes the data from the gyroscopes and is a "vision," the "eyes" that may be faulty, gave information three times that other gyroscopes were faulty when they were not. Engineers believed the computer programming might be at fault.

- Soon after, a small section of the attitude control system which controls the mirror was faulty when they were not. Engineers believed the computer programming might be at fault.
Freedom for a few?

Editor: I would like to respond to the article written by Pete Evans concerning Begatt and Johnson. I am new to Poly this quarter, so I am not familiar with these young men other than by name. Why is it that some people want freedom for some and not for others? These same people deny others to have a different point of view. It would have been all right if these people had supported liberal candidates, yet, they are being charged by Evans for supporting the candidates of their choice.

I would hope that more of us on campus and in the country would be more politically active in our support, whether it is liberal or conservative. All sides should be represented whether you agree with the point of view or not. It is anyone’s prerogative to campaign freely for a candidate of their choice. I tend to be liberal, myself, in many respects. Yet, I do believe in freedom for all to express their points of view and support it, whether verbally or helping out in a campaign. And I respect them for it. Yes, an AII officer should be concerned and active in student affairs, but what makes certain students believe that student opinion is one sided. It is most definitely multi-sided. Also, when a student is active in student government, should he be ostracized or by the world around him? I hope not.

Pete, let there be freedom of expression for everyone, not just certain segments of your choice. Where were you in the campaign? I hope you were out supporting the candidates of your choice actively.

HEP tutoring ‘humanly rewarding experience’

Editor: The High School Equivalency Program (HEP) has been educational as well as humanly rewarding experience for me. The HEP program is a special school on this campus for young adults, primarily of ethnic minorities who were high school drop-outs and have decided to revive their quest for high school diplomas.

I have been involved with the program since the beginning of the year, and feel that I have grown as has the program itself. I feel a certain dedication toward helping and relating to the students, along with the teachers, coordinators, and counselors.

As a result of working in the program, I have a better understanding of the cultures and regions from which many of the students have come. I believe that many students attending Cal Poly and raised in a sheltered suburban environment, like myself, could learn a lot from the HEP student who has usually had a bit rough, to say the least. In terms of tutoring, each student is a different ball game. When I first entered the program, I acted like I was on an ego trip, out to prove myself, and treated all the students in a similar high-handed way. I soon found that the abilities, motivations forces, comprehension, and optimism learning pace of each student is unique; let alone his personality, frame of mind (mood) and character. I feel that I have become more flexible and understanding of and thus more likeable and appreciated by the students.

I get a lot of satisfaction when students pass their math exams for their General Education Diploma, but what is gained in tutoring, can be minimized to dealing with some orgsnutations, on or off campus and is all the students in a similar high-handed way. I soon found that the abilities, motivations forces, comprehension, and optimism learning pace of each student is unique; let alone his personality, frame of mind (mood) and character. I feel that I have become more flexible and understanding of and thus more likeable and appreciated by the students.

More mature response requested

Editor: Regarding Dennis Johnson’s article in response to Pete Evans: I am not Johnson prefer to respond to viewpoints he differs with using simple insults.

Mr. Evans presented some very good points about our top-ranking AII officers and an intelligent, mature response more becomes a Student Body president would have been more appropriate.

A letter rebutting or denying what Mr. Evans claimed backed up with some facts would have given the students more trust in the people who are supposed to represent them. If what Mr. Evans stated is true, the students have been cheated in not receiving what they elected those two people to do for them.

Mr. Johnson, I suggest you get more mature and think why Mr. Evans is bitter.

Mike Wylie

Editor’s Note: Mr. Johnson’s article was inadvertently printed as a poem. The Mustang Daily will not be printing any poetry.

Chandler says Alpha Zeta does not haze

Editor: In an article relating to hazing, the Mustang Daily reporter asked several questions including one concerning the activities worn by Alpha Zeta during their initiation process.

Although I responded that this was perilously close to hazing, no one should be under the impression that this kind of situation is in any way to be compared to those activities that cause or potentially cause physical harm. When I say perilously close, I do not mean that it is hazing.

The juxtaposition in the article concerning the death of a student at Pierce College last winter would easily cause a conclusion that Alpha Zeta was doing something really serious and harmful. It is unfortunate that this conclusion exists because the two situations can in no way be compared.

I am concerned that there may be some organizations, on or off campus, associated with activities that are hazing. If that is case, these students certainly better take the warning, which has been provided by the Trustees and by the courts for one can readily see that serious liability would be reclaimed an organization involved in hazing.

Ride bike for clean air

The Ecology Action Club is sponsoring a Bike For Life this Sunday in which riders obtain pledges from friends and businesses for each mile ridden. The money is for the People’s Lobby to help clean California’s air and government. Please read on to find out how this pollution-battling group works.

The People’s Lobby operates under the leadership of Ed Kogpal who said used cars until he started hitting the industry that fed him. Now he’s pushing clean air. His battered attache case is decorated with bumper stickers like “There’s no emergency. Governor, people are dying just to irritate you.” From a cluttered office in the heart of Hollywood, staffed entirely by volunteers, the People’s Lobby conducts a running assault on the polluters. Since its formation in 1966, successes have been many. A lawsuit against the L.A. and Bay Area Air Pollution Control Districts, which charged the districts with deliberately deceiving the public, forced a change in air pollution reports and initiated surprise “smog raids” on local industrial polluters.

(If it is worth noting that the LAAPCD officials pleaded in court that under the First Amendment they had the right to lie to the public! But you always knew that.)

In other efforts to provide rigorous enforcement of statistics already on the books, People’s Lobby charged Standard Oil with fraudulent advertising of P-310 (I think they should put Beall Carpenter in the clear balloon next time) and won petitioning rights in shopping centers and the right for students to register to vote where they live at school.

Just this month, The People’s Lobby obtained a Public Utilities Commission hearing concerning the safety aspects of the San Onofre Nuclear Generating Station (the fireworks from that later). Why the bike ride? The purpose is to raise funds to help quality and pass two new initiative measures in the June 1974 elections (and also to have fun riding through some of the most beautiful country around San Luis Obispo). The first initiative is a campaign reform act (Clean Government) that would end corrupt campaign practices relating to financing, activity of lobbyists, access to public records, disclosure of sources, limiting expenditures, restricting use of public funds, and governing access to public records. This bill has the support of Sen. Edmund Brown, Jr., and a similar measure passed in the state of Washington by a 4-1 margin. A rough draft is available in Union 101.

The other initiative will be a new clean environment act revised with extensive input from a scientific advisory committee and interested people.

Bike for Life goes a long way towards financing the initiative drives. This bike ride is one of six in the state on the 50th. Why not do your share and pick up a Bike Card in Union 101 across from the bookstore. Call me at 344-0666 for information or riders to sponsor if you are unable to ride.

Greek Week

Greek Week activities ended Sunday afternoon as Delta Chi drank its way to a fourth straight championship.

Delta Chi won the last event of the week as they out-drink the competition in the crew race, a beer drinking relay. The Greek Olympics were also won by Delta Chi as their team competed in the long jump, high jump, shotput, 80-yard run, 400-yard relay, 100-yard dash, 100-yard swim and the mile jump.

Marijuana bill goes to pot in state assembly

The latest in a series of marijuana bills was killed in Committee last week at the state legislature in Sacramento. The bill was introduced by Assemblyman Waxman of the 16th district, Los Angeles. Waxman's bill would have decriminalized the private use of marijuana by an adult. It would have made legal the use only in the privacy of your own home.

Credentialed Plan begins second stage of review

The Cal Poly Ryan credential plan, titled "Developing Competency in Teaching: A Professional Preparation Program," has received its first review from the staff of the California Commission for Teacher Preparation and Licensure.

Following a second-stage review now in progress, the plan will be studied by the teacher Education Committee of the Commission. The committee will make its recommendation to the total Commission late in the spring.

Dr. Walter P. Schroeder (Head of Education Department) anticipates the campus will be informed early in July regarding Commission authorisation for this university to proceed with teacher preparation in the multiple (elementary and single (secondary) subject credentials.

A great deal of serious involvement has occurred both on and off campus through an extended period resulting in the plan which was circulated this week to persons closely associated with teacher education on the campus.

La Fiesta '73

La Fiesta activities will begin at 8:00 tonight with the coronation of the 1973 La Fiesta Queen in the Veteran's Memorial Building. The price of admission is $1.50.

The Coronation Pageant will prelude four days of San Luis Obispo's annual celebration of its heritage. Shortly after the beginning of the pageant, the eleven contestants will be presented and the five finalists will be announced. The queen finalists were determined by the amount of Fiesta tickets each contestant sold during the weeks preceding La Fiesta.

A panel of four judges will rate the finalists on beauty, poise, grace and personality, to determine Miss Fiesta, 1973. At the conclusion of the pageant, the reigning 1972 La Fiesta Queen, Heather Lawrenz, will yield her crown to the newly chosen queen.

Tickets for the Coronation Pageant are available at Gene Ingle's, Bridle and Saddle Shop, Owens Music Co., or at the door. The public is welcome to attend.

No Concerts This School Year

There will be no more concerts for the remainder of this school year. With the recent moratorium placed on all state facilities by Pres. Robert F. Kennedy, the Men's Gym and football stadium have been ruled out for the present time as far as possible concert sites.

The reason the moratorium was placed on these facilities was to give the appropriate people time to evaluate and possibly draw up guidelines for their further use. The dilemma has grown out of the apparent misuse of Rattlesnake Stadium in Fresno. For a number of years, this stadium has been overcrowded, thus incurring damage and overall depreciation. Because of this, Kennedy feels that by placing some restrictions on their use, these local facilities will not become run down and misused.

Chumash Auditorium is not affected by this moratorium because it is technically owned and operated by the A.S.U. Small shows, such as Boa Scaggs, will still take place this summer, however, the availability of the Men's Gym for future big concerts still remains in doubt.

Russell Raps

Bill Russell, the ex-Boston Celtics basketball great and ABC sportscaster, will appear in the Men's Gym May 21 and will speak on race, politics, and athletics.

On race—"If someone could find a way to make a profit out of better race relationships, it would be solved in four or five days, or a couple of weeks at the most."

On politics—"This is a great, great country—it can be even greater...For this country to be as great as it can be, I would die..."

On athletics—"Players react to different stimuli. Some guys you berate, some you praise. If you happen to have a team of guys who need to be yelled at, well, you yell at them and you hope your manner is convincing."

Russell, who was named Sports Illustrated's Athlete of the Decade and who has been called "the tallest, the straightest, the most forthright basketball analyst in broadcasting— not the best 'color' man in any sport," will appear at 9 p.m. Wednesday, May 21, in the Men's Gym. Student tickets are $.75 and general admission is $1.

SPITRITS OF THE DEAD

"SPIRITS OF THE DEAD" is a macabre trilogy of tales loosely adapted from the writings of Edgar Allan Poe. Included is the Barbaras pleasure-seeking head of a medieval family of lords who finds herself irresistibly drawn to a mysterious black stallion in which resides the soul of murdered brother and a British actor moving from a life of idleness to a night of delicious terror climaxed by one of the most chilling moments in horror ever seen.

In 'TWIN OF EVIL', orphaned identical twins, living with their aunt and uncle in a curse-haunted village, come under the spell of mysterious count who runs a vampire cult with beautiful young girls.

Tonight, 7:30 CHUMASH AUDITORIUM only 60c.

WARUING: DON'T GO ALONE!

RYAN'S DAUGHTER (PG)

Featuring Sarah Miles who's married to a nice, dull middle-aged schoolmaster, Robert Mitchum prefers to collect wildflowers rather than loving Rosy. She falls passionately in love with the real-life equivalent of one of her fictional heroes. Opened to C.P.U. community only.

SATURDAY, MAY 16th 7:00 and 10:20 P.M.
CAL POLY THEATRE only $1.50
This summer the Moss Landing Marine Laboratories, located 10 miles north of the City of Monterey, will be offering limited enrollment in marine science courses.

The laboratories are situated at the junction of the Monterey Submarine Canyon, the deepest in the world, and the estuarine ecology. The school is for the support of field-oriented instruction and research.

Students interested in participating in the program should contact David Montgomery, Biological Sciences Department, for the support of field-oriented instruction and research.

Space at Moss Landing is very limited. In order to insure the reserved space in classes, students interested in participating in the program should contact David Montgomery, Biological Sciences Department. Reservation forms should be sent to the Director, Moss Landing Marine Laboratories, P.O. Box 333, Moss Landing, California 95039.

The meeting started out quite orderly. A film was shown by members of the committee which described the personalizing effect of technology on instruction in our society. Part of the platform for saving the old building is the "warm personal attachment" students have for it. At present it is being used as a lab building.

The meeting got re-organized. After associating the Ag Ed controversy with the larger problem of energy and space conservation, and stressing the importance of "the voices of students in a democracy," Baer received an ovation.

From that point, apologies were made for some of the prior behavior, and several points were finally established. First, what speaker Bruce Reid described as a "negation of misconception" was publicly clarified. "We don't want to stop construction of the new building, as many people think," he said, "we just want to save the old one." Second, the students clearly gained faculty support from Baer, and were pledged $3,000 for their efforts from Dean Hasslein.

The third constructive result of the meeting was that Hasslein made suggestions to the committee about the presentation. He told them they would have to "outline and present clear facts," if they are to succeed in saving the building.

He explained that the power was "not with the Board of Trustees," but with the governor of California. He also stated that if a plea to the governor failed the students could "seek private funds." After the meeting Reid said he thought the Ag Ed Committee had gained some support and had "partly accomplished" what it had set out to do. A table with the addresses of Senator Donald Bransky and the Board of Trustees was set up in the auditorium so the audience could send letters directly to the governor.

Reid said the next step for the committee would be a presentation to the Campus Planning Commission. The old Ag Ed Building, which has now become a symbol of the struggle for "symbolic anecdote to technology," has stimulated many developments on the campus. Students have placed signs on it which read "Save Me!"; posters have gone up all over campus in defense of the building; letters, stories, and even poems have dotted the pages of the newspaper; T-shirts with incidentals on them; and, after the affair Monday night in Chumash Auditorium, even short wars have been waged.

Correction

The variety show for handicapped children will not be held at the Cal Poly Theater, as noted Tuesday in the Mustang Daily. It will be held at Chris-Jepson School at 1:30 p.m. A second showing will be held on campus June 8 at 8 p.m. in the Cal Poly Theater.
Furious action it was, as the Judo tournament unfolded, with various clubs and teams from throughout Southern California competing in the Sunday afternoon tournament.

Oardana, with local representation from San Pedro, West Covina and San Gabriel, local representation from Cal Poly, Santa Maria, and Vandenberg Air Force Base, each vied for victory with local competitors.

The first portion of the tournament featured the matches of the Yonan division, which is comprised of boys 18 years old and below. Next came the Shonen division, which is made up of boys between the ages of 18 and 18. The young competitors in these two divisions took their matches quite seriously as they battled to knock down or pin their opponents.

First place in the Yonan division was captured by Bill Walla of the Saint Anselm club, John Armstrong from the American Legion Post in Pompton took second, third was awarded to Spencer Horvitz of West Covina with Greg Haywood of the Saint Anselm club taking fourth.

In the Shonen division first place went to Greg Kim from the Hollywood YMCA, Steve Keyana from Santa Maria took second, Gary Tubritze of the Coastal club placed third, with Hugh Dohi from Santa Maria in fourth.

The young competitors were joined by their parents who watched in the bleachers as the Yonan division paraded onto the mat. Saint Anselm is the division which is composed of Judo students who are 18 and older. The three subdivisions in this category are the white, brown and black belts, with various degrees of proficiency and experience in each.

The novello award went to Ron Wilson from the University of California at Santa Barbara. Brown belt was taken by Keith Abrahamson of San Pedro, who scored a number of points against the Cal Poly team. Steve Peaburn of Cal Poly was awarded the black belt trophy.

The Dojo trophy was presented to the team with the most points in the Yonan division competition. Tournament chairman of this event was Alpert Iwane, who is the vice president of the Cal Poly Judo Club.

Meet The Bug Werks-

"I am Keith Woerle. My partner Jim Fisher and I own the Bug Werks on Santa Rosa Street. Both Jim and I have worked in the service departments of several Volkswagen dealerships in Southern California, and Jim had his own repair shop in Hollywood..."

"We started out one day heading North in our VW to find a better place to set up shop. Before we knew it, we were in Eugene, heading South again, with no place to start our new business repairing Volkwagens. We drove into San Luis Obispo to get gas, and almost ran into the building where we now have the Bug Werks. 'The future Bug Werks!' I shouted...

"That's how we got started in this city. And we've glad we did-it has done our heads a lot of good to be in such a friendly place as this..."

"We have a special repair program for Volkwagens-the $25.55 'Tuff.' We lube and oil your VW with the finest Central or Pennzoil oil, change the points and plugs, repair the valve cover gaskets, adjust the valves, check the battery and lights and more for this one price-and this includes parts, labor and tax. It's hard to believe, but we know how to do it-and that's our secret..."

The Bug Werks offer a variety of services including: Independent VW Parts and Service, Corner Santa Rosa and Marsh, 544-8177.
Fitness and sports from Swedish point of view

Residents of the Central Coast area who are interested in physical fitness are invited to a special program and clinic to be presented today in the Men's Gymnasium.

Planned for 11:30 a.m., it will feature a demonstration and talk by Berti Brattnas, an attache with the Royal Consulate of Sweden in New York and former member of Sweden's parliament.

Tomi Bard, president of the campus chapter of the California Association for Health, Physical Education, and Recreation, will conduct the program.

Both younger and older are invited to attend and participate in the free program.

Schedules to join Miss Brattnas for the clinic are Larry Bridges, a member of the Men's Physical Education Department faculty.

Powerpuff football win

Behind the superb running of Debbie Machado, the Cal Poly True-Grill powerpuff football team defeated Cal Poly's other powerpuff team over the Cuesta College team, in a game played Friday in Mustang Stadium.

True-Grill, which is composed of freshman and sophomores, girls from this university, had complete control of the game as backup star Debbie Machado scored two touchdowns.

Friday, May 18, the Cuesta powerpuff team will play host to the Junior-Junior Cal Poly squad which may be the name of "Adire Mothers." Kick-off is scheduled for 3 p.m. and the contest will be held on Cuesta's football field.

The average Navy Pilot isn't.

No man who has mastered the flying skills it takes to fly and land on a ship at sea can be called an average pilot. And the sense of accomplishment and satisfaction that he enjoys are also above the average. Only for him. For the man who would go places as a Naval Aviator must pass through the most challenging and demanding training program to be found anywhere.

From Aviation Officer Candidate School through Flight Training to the day his golden Navy Wings are awarded, he is tested; driven; pushed and tested again. And for good reason. The Navy has learned that without the will to succeed, no man can be successful.

Which brings us to you. Do you have what it takes to fly Navy? Talk with your local Navy recruiter. Or, call him at (805) 543-6101.

Volleyballers take fifth in championships

Jack-in-the-box devoured the Mustangs. A hungry Jack volleyball team, composed of two former all-American collegiate players, filled its stomach and silenced the lion's roar by defeating the Mustangs.

The Saturday, May 18 lunch of Mustang with a side order of volleyball took place at the 1975 Regional Championship held at El Camino College.

The bonus burger squad entered the tourney as an open team and then proceeded to shut the door on the Mustangs. The combination of hitter Mike Jackson and setter Ken Preston was not enough to stop Jack during their quarter final game, but the Mustangs did manage to spike a fifth place finish in the 33 team tournament.

Down 1-4, with its back against the grill, the Mustangs rallied back to tie the game at 13-13.

Unfortunately, Jumbo Jack then ordered up two points worth of secret sauce and ended the game 13-15.

Rodeo team ropes win in Pomona competition

The Mustang rodeo team made an outstanding win at the Cal Poly Pomona hosted rodeo last weekend with the first-place men's team earning 370 points and the ladies' team with 350 points.

The all-around cowboy award went to Cliff Happy with 407.5 points and John McDonald placed second. Colleen Breze took the all-around award for the women's division with Dacie Richards in third place.

Happy nabbed first place in the calf roping and shared first and second placed in the saddle bronc riding with Jim Erickson from Yavapai Community College in Arizona. Happy also earned second place in bull riding and ribbon roping, and third in the bareback bronc.

John McDonald grabbed first place on the bareback bronc and third in the ribbon bronc. Dave Clark won first place in the steer wrestling, Charlie Castle took second on the bareback bronc and Lee Rosser placed third in the saddle bronc.
