ASI directory to be published

by ROB GRANFATIEN

The Student Directory, containing student and faculty names and phone numbers and student addresses, will be available by mid-November after a year-long absence according to All President John Holley. The directory, formerly the Hardbook, will be published by AIE.

The Hardbook was formerly published by the agricultural university Alpha Beta AIE (AIE but became defunct during the 1971-72 school year because of a lack-up in the printing of names of students who wished not to be included. Another problem ocurred when students' class levels were mistakenly included. Insurance salesmen and other entrepreneurs were interested for using such lists to contact seniors who might be prospective clients.

The administration in 1971-72 AIE President Pete Evans for the inclusion of the unwanted names and the class levels, and was forced to print a second Hardbook. This second publication netted the fraternity a $1,000 loss.

Leo Hancock, AIE advisor, at the time of the controversial printing, attributes the financial loss to Evans' request about the Hardbook. "When the (Evans) came out with his statements, our money was out in cold. We had already thrown 1,300 copies away."

An AIE official decided that a breathing spell was needed to determine whether or not the directory was a money-making potential. Profits from the Hardbook were used to establish a scholarship fund, primarily for agriculture students. Holley now says that the directory will be a non-profit student service. He estimates the printing cost, including a computer print-out of student names, to be $4,000. AIE expects to receive about $1,100 in advertising revenue and $2,000 in sales of the books (selling at 20 cents per copy). After paying the advertisement a 10 per cent commission, AIE will be left with an insignificant margin.

When All was published, it was reported that the directory would change for several hundred

PITS OVER PARTIES

Extra hours go for drugs

by ROBERTA PROVER

While some students spend their extra hours partying and bringing at local taverns, Gary Montgomery spends his previous hours on the race track working on a first class Top Fuel dragster.

Owned by John Blanchard of San Mateo and driven by Dave Uyehara (affectionately known as the oldest living kamikaze pilot) the dragster was the fastest in the sport. It holds the record from Fremont with a time of 5.93. The quickest official time is 5.84 and is held by Bob Bentley. Bentley recently beat Don Garlits, world's best-dragging driver of the American Hot Rod Association at a drag meet in California at a distance of Jerry Ruth by 0.02 seconds.

Gary started working on the dragster in February of 1971 and has been with them ever since.

"When I started originally I had no comprehension of what drag racing was all about. But you pick it up as you go along", said Gary. "There's as much glory as there is work! Between each race the entire engine is removed and dismantled."

The car was designed by John Blanchard and put together by Dave Uyehara.

The group went against one important drag racing tradition in building the car—it was finished in less time and for less money than had been expected. Construction time was

The phantom Jets, which were the U.S. model fighter-bombers used in Vietnam, are the heart of the Israeli air force which they claim to be in control of the air.

Money flows for Israel

Millions of dollars poured in, Monday to emergency fund drives set up by American Jews to finance the defense of Israel. Israelis said they had "many others" from volunteers to fight in the war against the Arabs.

The United Jewish Appeal, the national Jewish fund-raising organization in the United States and Canada Monday night, Jewish leaders planned fund raising drives while thousands of demonstrators thronged outside the United Nations headquarters in New York in support of Israel. Mass meetings were called in several cities across the country, including Pittsburgh, Boston, Omaha, Neb., Minneapolis, Minn., Columbus, Ohio, and New Harford, Conn.

An emergency Israeli bond drive was made, after 100 sales meeting in Miami, and the organization announced it was raising to collect $18 million in one week.

The Chicago chapter of Mayor David Adelson, the Israeli equivalent of the Red Cross, said it had collected more than $5,000,000 of a targeted $10,000,000 to buy blood plasma kits

In San Francisco, Israel

Talcott and Camacho visit:
test student pulse for support

A test of popularity among students was made over the weekend by the winner and the loser of the 1971 31st congressional district race.

Congressman Burt L. Talcott, and the man he defeated, Julian Camacho, were in the San Luis Obispo area Saturday and Tuesday to sell their respective candidates. In the House of Representatives in Washington.

Talcott, currently serving his 11th year in the House of Representatives, is expected to receive the support of the California Republic without a fight, according to AIE President John Holley, and Vice President John Ranoa.

In between handshakes, Talcott spoke of his work in various congressional committees, including the House Appropriations Committee, and the Veteran's Committee. Talcott and also been active in non-proprietary legislation known as the California Desert Protection Plan, which will provide immediate and long range protection, development and administration of California deserts.

Julian Camacho, defeated last year by Talcott to the 18th congressional district race, was in town Saturday night to address a group of students,
Students asked to write reps

Editor:
This letter is to voice my support for the “domestic repression” lawsuit brought by the American Civil Liberties Union. On October 3, 1973 the ACLU released the following statement:

"There is now substantial public evidence that President Nixon’s participation in high crimes and misdemeanors and...these acts have violated the civil liberties of the people of the United States and the rule of law." The resolution developed by the ACLU says that Mr. Nixon:

1) Personally approved a plan on July 18, 1972, for "domestic political surveillance and espionage by such methods as burglary, wiretapping, and electronic eavesdropping, mail covers and tapping on airlines.

2) "Usurped the warmaking powers of Congress" by banning Cambodia, and "substituted the bombing" from the Pentagon.

3) Established a "personal secret police line in the White House, the agencies, and the law, which engaged in criminal activities: burglaries, wiretaps, espionage and perjury.

4) Along with a personal aide "referred a high federal post to the presiding judge during the Ellsberg trial and, for a prolonged period, he withheld from the court knowledge of the burglary of the office of Dr. Daniel Ellsberg’s psychiatrist.

5) Interfered with the administration of justice by his effort to limit the scope of the FBI’s investigation of Watergate.

6) "Perverted and attempted to pervert the operation of various federal agencies, including the Department of Justice, the National Security Council, the Secret Service, the Justice Department and the Central Intelligence Agency by engaging them in political surveillance in the falsification of information made available to the American people.

Nixon has sidestepped the American system of justice by hiding behind the shield of executive privilege. Impeachment proceedings would force the president to face that the American people. I urge all those concerned to write their representatives immediately.

Thad Yen.

Rugby Club’s organizational meeting tonight

Members of the Rugby Club are urged to attend a meeting tonight at 7 p.m. in the Men’s Gymnasium.

For further information contact Jeff Jensen—phone number 544-3999.
Mid-November deadline set for directory...

Editorial policy

Letters to the editor are welcome. Letters typed should be signed. Bring letters to Graphic Arts 239 and put them in the editor's mailbox.

Milions aid Israeli defense...

Three months instead of four, while costs totaled $600 rather than a claimed $8.00. (You just don't do that!)

There are no real restrictions in building a top fuel dragster as long as it conforms to rigid safety standards. Contrary to popular belief, accidents for accident seeker cars are safer. This is due to the professional preparation which must go into graduate students on 44 campuses in this field.

The maintenance work and safety checks vary between 10 to 60 hours per week. Cars, tires, fuel, clothes, and bearing is budget minded fellow's nightmares, are all too often in need of repair or replacement. This is where the sponsors are born to about come in. They either share expenses by donating their products outright or by charging them at cost. The car Gary works on is sponsored by Ricardo Suh, Valvoline, MAF Tire, and Vic Johnston speed shop in Hayward, California.

The average student spending $10 to $20 on their gas tank, and left for a quart of oil would bring in the amount of money needed to fix every race car of this caliber. (Try $7.00 a gallon for fuel alone!)

Gary is a senior in the Mechanical Engineering program. He does have plans to build his own car someday, probably a lower class however.

"You can't start at the top.
Gary's not sure yet whether he will go professional. I'd like to

BOEING
Getting people together.

Come rap with Boeing.

From the 737-300 have passed the 1000 mark. We've said 700s to China. The 747 continues to be queen of the sky. And now the 747SP. We're also looking into a new jetliner now labeled the 777.

Boeing is involved in a number of defense programs, space projects, development of a short takeoff and landing (STOL) aircraft, and missile and helicopter production.

Boeing Computer Services, Inc., is concerned with general business and financial systems, medical systems, automated manufacturing techniques, inventory management, scientific and engineering problem solving techniques and computer operating system.

We have also started programs on: 1) people movers to help solve traffic problems in cities; 2) hydrofoils to move people and freight over water faster; 3) reduction of airliner noise; and 4) pollution control processes that have application in desalination and the treatment of industrial waste. We are also at work on programs that can lead to a better understanding of this planet's natural resources.

If this sounds like the kind of equal opportunity employer you're looking for, please stop by your placement office and sign up for a personal interview.

Our interviewer will be on campus next week interviewing AB, EE, IE, ME and CO graduates.

Ski meeting

The Ski Club will hold its first meeting of the quarter tonight at 7:15 p.m. in Chabot Auditorium
Young runners beat Nevada

The young Mustang cross country team proved itself again last Saturday as the Mustangs pulled a lapidated victory away from three teams in a four-way meet at the University of Nevada at Las Vegas.

Scoring 19 points against Nevada's I, Cal State Dominguez Hills II and Chapman College's II, the Mustangs proved their strength and speed under the 65 degree desert sky.

The fast mile course proved to be a stimulus rather than a deterrent to Warrick's running, docking in at 4:44, only seven seconds ahead of Nevada's Dale Campbell. Rose and Rick Wallin, as tight as any brothers could be, took fifth and fourth, respectively, at 4:46 and 4:47.

Dale Horton, Tony Nunes, Dave Joseph and Randy Myodelle all completed the race within thirty seconds of each other and before any opponent runner, proving the Mustangs' depth.

The age factor is important when viewing the Cal Poly team this year, among the scoring five for the runners and the average age is under 20.

"This (age factor) is not Coach Bridges' especially in California. We get a young team, if it's any help to coach them. The coaching is providing the polish to this rough gem of a team."

MUSTANG CLASSIFIEDS

Announcements

JON OH, 23, M, white, 5'8, 140, last seen at South Gate Boardinghouse, 1887 Saticoy St., Los Angeles. Reward: $100. 484-3578.

WANTED: Commercial Charities in Los Angeles and vicinity. Call Coaches Larry or Pat in Track and Field Building, Phone 484-3578.

Trebond, 1300 S. Broadway, Los Angeles, CA 90015, has lost valued photograph and personal possession. Reward offered.

Lost and Found

Contact Capt. Roger MARLOW and Ssgt Harvey BAILEY between the hours of 9AM- 3PM on the 8th and 9th of October in the student cafeteria.

Loa B Found

What's in the PLC for me?

$100 a month

You can learn to fly free. And you can earn a Marine Corps Commission.

You can earn $100 a month each month of the regular school year. It's like a $800 annual scholarship!

You can learn to fly FREE. The Corps pays the entire cost of civilian flight instruction...worth about $900.

You don't lose any academic time. All PLC leadership training takes place during the summer. And when you graduate from college, you're a commissioned Second Lieutenant!

Contact Capt. Roger MARLOW and Ssgt Harvey BAILEY between the hours of 9AM- 3PM on the 8th and 9th of October in the student cafeteria.
