Call for help comes from handicapped

Fifty yards from the Grand Avenue entrance to campus, children are in need of help. The children are at the Chris Jaspern School. Chris Jaspern is a county school for multiple handicapped children. Volunteers are urgently needed to help the children develop their muscles through exercises and other activities.

Robert Bonds, Coordinator of Student Community Services, said, "The children may lie in simple, unless volunteers help. We desperately need 60 people who can spend two or three hours a week."

The school is in need of both men and women who have a desire to help the children. Bonds said that volunteers don't need to have any experience in helping the handicapped.

Bonds urges students to walk over to the school to help, whenever they have free time. He said, "The school can devise a work schedule to fit a student's class schedule." The school is open Monday through Friday from 8:30 a.m. to 3:30 p.m.

The only requirement for volunteers is that they fill out an application form and obtain a tuberculosis clearance.

Aid available for Japanese

Any student of Japanese ancestry permanently residing in this country, and members of the Japanese American Citizens League (JACL) needing financial aid may apply for the JACL Robert A. Grant, a 1916 alumnus of the Abe Haglowara Awards.

Grants, ranging from $100 to $200, are based on need, motivation, and potential.

Application and information are available from the National Headquarters, Japanese American Citizens League, 4343 E. 86th St., Chicago, Ill. 60619.

Awarded will be notified by mail, and all applications will be evaluated.

Scholarship and funds result of memorial grant

The transportation engineering program has gained widespread attention in the three years following its establishment. Concerned with state and national transportation problems, the program offers over 120 majors.

The growth and depth of the transportation engineering program resulted in Cal Poly being the first recipient of a $5,000 memorial grant honoring the late president of the Automobile Club of Southern California, Joseph R. Havener.

The Joseph R. Havener Memorial Grant will be used for transportation television and to purchase laboratory equipment said Dr. Andrew Jones, head of the Transportation Engineering Department.

The check for $1,000 was presented to Dr. Robert Valpey, dean of the School of Engineering and Technology, by John W. McDonald, the Auto Club's director of engineering and technical services, on Friday, Oct. 8.

Havener was an active member of the engineering profession. In 1941 he received a "Certificate of Transportation" from Yale University. He joined the staff of the Auto Club's Public Safety Department shortly afterwards and began his career in that organization. Becoming chief executive officer in 1964, he was appointed to the executive office of president early in 1973.

Havener's sudden death in March resulted in the creation of a $10,000 memorial to him, of which $2,000 was granted each in honor of higher learning.

The Auto Club has for the past two years joined with students on this campus in displaying lowercase vehicles and alternative-fuel engines during Poly Week activities.

In those 38 years television hit, for many, taken on the proportions of a religious ritual, with nightly hours of worship between 7:30 and 11 p.m. Except for momentary retreats to the refrigerator, the most devout viewer stayed glued to the screen, came commercially or high water.

Twenty-five years of television have also created a less devout viewer, who irreverently refers to television as the boob tube, a vast wasteland or an electronic baby sitter.

But in those early years, when television was in its infancy and audiences were far from jaded, TV was truly a marvel to behold. Just as early movie audiences were content with watching anything that moved, early television viewers were satisfied with watching wrestling matches and cooking shows on their 13 inch round screen.

In the 1940s television screens expanded, and so did programming. Viewers were deluged with countless situation comedies, variety shows, westerns and melodramas.

Milan Berle was television's father figure. "The Texan," the vaudeville comedian, set the tone for those weak and wonderful early years. Berle was followed by Jackie Gleason, Red Skelton, Groucho Marx and many others who kept the nation laughing through the Eisenhower years.

Then, as now, family situation comedies dominated television. In those pre-World War II years it was acceptable to believe that "Father Knows Best." Today Archie Bunker proves that Father only thinks he knows best.

During the 80s, Sunday nights without Ed Sullivan was unthinkable. Sullivan was a great showman and a master of the industry as a whole.

Coulson questionable for Hayward-St. game

The Mustangs will be going after their seventh straight win this weekend at Hayward State, but they may be doing so without the use of quarterback Mike Coulson. Game time Saturday is 1 p.m.

Coulson, who shredded the same Lombardi Trophy in last week's game with Fresno State, has been held out of practice this week and is questionable for Saturday. The senior from Pleasantville reportedly worked out lightly Wednesday, but his activity was limited to non-contact throwing drills.

In the event Coulson is not healthy come kickoff time, the No. 9-ranked Mustangs will be led by sophmore Jim Johnson. Johnson, seeing limited action this year, had completed 17 of his 27 passes for a commendable 8.7 per cent average, 871 yards and two touchdowns.

The Hayward team the Mustangs will face is presently 3-0 on the year, having recorded wins over Sacramento State, Humboldt State and UC Davis, while losing to Idaho State, Santa Clara, Northridge and San Francisco State.

Hayward could well have quarterback worries of its own Saturday, following a recent injury to talented Junior Mike Jenkins.

Should Coulson sit out, his team will be without its second leading receiver and the CCAA's third leading passer. He is also third in the conference in total offense.

In last week's showdown, Rick Glimba led all runners with 197 yards on 16 carries for an average of 12.3 per carry. With five touchdowns to his credit, he is the team's second leading scorer behind place-kicker John Losaw.

Soccer team to face Loyola

The Mustang soccer team will host the Loyola Lions this Saturday in a 1 p.m. contest.

The Mustangs defeated Chapman College last Saturday by the score of 3-0. Earlier in the season, Loyola beat Chapman 2-0. Loyola used Fresno Pacific College for the Southern California Intercollegiate Soccer Association title last year.

Mustang coach Carmen Salazar says that it will take "initiative and desire to win the game. If they want it, they can do it."
