SAC sets up priority plan for budgeting
by JOE SANCHEZ

Tentative endorsement of a renumbered list of criteria to be used in priority budgeting was given Wednesday night by the Student Affairs Council.

The budget criteria, in order of importance, are active participation, spectator participation, educational benefit, national recognition, financial stability and community benefit.

Final action on priority budgeting was postponed again for one week pending more student input and approval by the school council.

The priority budgeting proposal, drafted by the Budget Committee of the Associated Students, Inc., establishes a standardized set of guidelines for determining money allocations to ALL-funded groups.

Under the budget proposal, allocation of ALL funds to a group would be determined according to how the organization ranks in the six criteria: high-priority groups would have their needs budgeted first, and low-priority groups' needs would be budgeted last.

According to Finance Committee Chairman Mike Mating, "need" is the key word in the new budget proposal. He said that under the new system, every group's budget was cut in order to spread the limited ALL funds among all the budgeted organizations.

The results of this policy of cutting each group's allocation was that "need" was preserved all the money that it needed. According to Mating, $300,000 to $500,000 in legitimate budget needs were not alleviated last year.

According to a standardized set of guidelines for determining budget allocations, Mating said (continued on page 23)

Candidate talks about '74 race
by MARK LOOHER

Opposing the legalization of marijuana and favoring the impeachment of Vice-President Nixon, Santa Cruz supervisor Phil Harry brought his campaign for the Democratic nomination for the 18th Congressional District to campus yesterday in an appearance sponsored by the Political Action Club.

The 46-year-old lawyer is challenging Julian Camacho for the Democratic nomination in June but stressed his belief that he is running against Republican incumbent Bert Taloosh and not so much against Camacho.

"I believe I can beat Camacho because of my record and because I can appeal to a broad spectrum of Democrats, which will be necessary to beat Taloosh," said Harry. "I will, of course, support Julian if he wins."

On the question of legalizing marijuana, Harry said, "I'm opposed to the legalization of it based on the studies I've seen but I believe people should go to jail for it either. I think there are other ways to deal with this problem. One answer might be a school, such as drunk drivers are sent to."

"If evidence is found to show that marijuana is not harmful then I say let's legalize it. However I don't believe the studies will show this to be the case."

Regarding abortion, Harry pointed out that "As a Catholic, I have to follow the teachings of the church. As a politician, I would like to see it that it's up to the people to decide for themselves what they want to do."

Distasteful waiting frustrates student

Let's devote this column to a response to one of our questions received in the Mustang Daily question box, located in the Health Center lobby. It read: "Whllo waiting for an appointment at 10:30 for an appointment at 10:30 A.M., I was delayed at 11:30 A.M. on other occasions 15 minutes. Maybe an appointment system which requires a bit of plannings involves trying to work.

We offer no excuses. An apology, and an explanation is in order. We do have an appointment system, designed for students returning in follow-up in the event of a condition initially cared for in the Mustang Daily quacket box, located In the Health minutea. Maybe an appointment system which requlrea a bit of offices, and the medical assistants are watching for these arrivela.

A M., I waa helped at U:S0 A.M., only to see the doctor for two day are by appointment, ror theae, there ahould be very little waiting, the time he estimates will be necessary ror the follow-up procedure, oaae requiring minor surgery, while two or three pationta returning for lab results may be appointed in the same ten or fifteen minute time in the prosonoo of the physician. Receiving the word that the infirmary under the care of a physician who has appointments gone Into the development of systems to avoid loss of time and wasted".

The occasional delay in this appointment system usually occurs due to unplanned staff absence (we have no reserves of people power, although we are flexible and do shift duties when necessary). Otherwise, the appointments system is functioning in the infirmary under the care of a physician who has appointments scheduled, on- and off-campus emergencies taking priority over other activities of any readily available physician and, rarely, medical conditions requiring considerably more time than anticipated among those of their peers.

If unavoidable delays are described as advance, an effort is made to reach the patient by phone, but of course this procedure is not infallible.

Waiting is distasteful to almost everyone—especially to patients who come by choice. The student's time is no less valuable than that of the Health Center staff. Much thought and effort have gone into the programming of systems to avoid loss of time and wasted motion. The new family expansion, when put into operation, will provide more efficient office hours, reducing time of traffic lanes and seating, for example. But, we have no illusion of losing the personal touch, even if it means some human imperfections go with it.

The talk centers around a book—the remaining part is made of those without appointments. People with acute illnesses and injuries or perhaps only acute concerns. Again we have a rather intricate system of handling this, but it is the best we can do to provide a personal seeking attention. After years of operation, we still find that the peaks and troughs of the day are coterminous. Our staffing, time, and space must be predicated on the average, so sometimes one wait. Probably not as much as "downer," but we'll work on it.

We do appreciate your Health Center, for your health education and your medical care. And we are well aware when we fail to measure up.

If you are interested in more detail of our patient flow system, ask at the lobby desk for further information.

Evolution process to be discussed

A one-day seminar, concentrating on the idea of a convergent evolutionary process, will be given tomorrow.

The talk centers around a book written by Pierre Teilhard de Chardin, Philip M. Peace, a Help Hotline

Notice, the emergency information desk, is in need of volunteers to man its lanes in order to provide help or providing a leaflet to interested persons, 18 years and older. Interested, call 555-4444 for information.

Volunteers handle calls relating to emergency medical "tragedies," according to staffer Ellis W. P. and provide man the Posa lines for one hour per week. Training will undergo a six-week training session beginning at the end of

Africa is subject of Cuesta lecture

Richard Leakey, the son of the world famous anthropologists Dr. L.R.B. and Mary Leakey, will speak on anthropology and paleontology at 1:15 p.m. on Tuesday, February 16 in the Cuesta College Auditorium.

The 45-year-old Leaky, a native of Kenya, Africa, has always been drawn to independence and the African Bush. At age 16 he assisted in his first recapture of lions that had escaped from a Kenya national game park. Later he set up a successful photographic safari business.

Leakey has worked the past nine years documenting the existence of leaf making man. He has published more than a dozen papers since 1968. His most recent paper on new fossil evidence on the evolution of man was sponsored by the American Museum of Natural History and the American Geographical Society. Another recent publication is on mammals, and primates from East Africa.

Leakey's Cuesta College lecture will include his most recent film, "Man from East Africa.

Tickets are $3 for adults and $1 for students and children. They are available through the Cuesta College Community Services Office.

Soaring enthusiasts may flock to local mountains

The possibilities of starting soaring classes in San Luis Obispo will be discussed Tuesday night when Robert G. Roberts of Waveline and discussion of wave soaring.

Mr. Al Yeomans of Coastal Airlines has offered permission for Roberts to fly over the San Luis Obispo County Airport, and training classes in soaring will be offered. According to Yeomans Coastal Airlines will offer a glider program to give enthusiasts a place to fly.

The film colored was produced by "Waveline, Inc., at Colorado Springs, Colorado, and will be shown at 8:00 p.m., Friday February 16 at Security Pacific National Bank at 1144 Monterey Street, San Luis Obispo. "My Changing Shape" is a film which shows in simplified form the way different types of soaring is developed. According to Roberts, Colorado
It's always nice to bring down the wall of the attic, to reminisce the good times by slipping it over your shoulders. It's still very warm and cuddly and you tend to overlook the hole in the coat, Irrespective of its faults, it is a nice way to keep warm.

The student-faculty play, "A Cry of Players," is scheduled to open at the Cal Poly Theatre on Saturday evening, Feb. 11. Performances will run from 8 p.m. to 11 a.m. every night through Feb. 14.

The play, which will be directed by Robin Lake of the Department of Theatre and Dance, is a re-creation of William Shakespeare's "Henry V." The play is based on historical events and features parts in the picturesque period settings of Shakespeare's time.

Performance tickets, which will be available at the door, are $10 for students and $13 for the general public. Free tickets will be available to the public without admission fee, due to the three day vacation.

The play will highlight Shakespeare era organizations from the community as well as activities of clubs and organisations.

KCPR begins new talk show

An informal talk show designed to stimulate interest in the activities of the community as well as activities of clubs and organisations from the university was aired for the first time last night on KCPR.

The show, which is hosted by Mr. Murphy, is called "That's Happening." It will alternate Thursdays with the "Open Channel" talk show.

Murphy explained the objectives of the show. "It seems like people don't know what's going on with different clubs and things around campus. We want to let people know what's going on both on and off campus and how things are related."

Free lecture on ceramics to be given

A unique lecture and workshop on ceramics will be given at Cuesta College Tuesday, Feb. 18, at 8 p.m. in the science center.

The program will be open to the public without admission fee.

Mr. Katsuki Nogasawa and Jean Biagio, both residents of Japan, will demonstrate various Japanese and Korean techniques.

A slide show of their techniques will be shown, and a discussion will follow.

The program is sponsored by the Japanese Student Association and the Japanese Language Club.

Math meeting is canceled

Due to the three day vacation, the Ge Club will not meet Monday, Feb. 18. The next alternate meeting is scheduled for Wednesday, Feb. 25, at 7:30 p.m. in Room 150 of the Business Administration Building.

Swimmers meet tough competition

by ROBERT DRUMMOND

The Mustang swimmers will push their suits and head south this weekend to meet two top conference teams.

The Poly team will meet Cal State Northridge today and then tangle with Cal State Fullerton on Saturday.

It will be the last tune-up for the Mustangs before the NCAA swimming championships in two weeks.

Northridge is and has been the powerhouse swimming team in the league. The Mustangs are the NCAA champions and promise to repeat again this year.

Northridge is the strongest team in the league. They have the young talent this year," said assistant coach Charlie Hauser.

The Mustangs boast two fine young swimmers in John Larson and Robert Gass. Larson is a speedster who swims the 100 and 200 yard freestyle races. Gass is a backstroker.

"It will give our swimmers a chance to test themselves against the nation's leading champions in different events. It will also give some of the younger people a chance," Hauser said.

The Mustangs will meet the Fullerton Titans should be a close meet. It could be the closest meet of the season according to Hauser.

"We will be going at them at full strength and try to beat them," Hauser said.

The Mustangs will be led by John Raynolda, "the Lou Gehrig of the pool" according to Hauser. Raynolda is the top point winner for the Mustangs this year.

The big sophomores earn four hour swimming records and a NCAA record in the 500-yard butterfly.

The 900 fly is Reynolda's specialty and is one of the giltiest races in the sport. John has already qualified for the NCAA championship in the fly.

"Reynolda could be the best all around swimmer in the conference," said Hauser. The Fullerton meet should provide a classic matching of two swimmers in the butterfly. Both Reynolda and Titan John Austin are tied for eighth in the nation in this event.

The Mustangs have produced a successful swimming program and is one of the elite teams in the nation.

This year's championship will be March 5th in Long Beach. Friday, Northridge Hauser feels that the Mustangs have a decent chance at a second place finish in the league. He predicts a battle between Poly and Cal Lutheran for the runner-up honors.

Last week the Poly Rugby team had an easy victory of 46 over the California Rugby Club.

If the Mustangs are to earn a victory, they will have to stop the Mustangs, a team which is for the backfield. The Mustangs are a team which is for the backfield.

Five members of the varsity team were not able to make the trip for the Mustangs. This was probably because of the fact that the "B" team lost by 16 to 16 against the Mustangs.

The team uses two offensive plays which are part of the "little" things that make up the game. The first is the scrum slip-play. This play is only used when close to the goal line like students. It is usually about five yards from the goal line. Again, the Mustangs are a team who can slip the ball to an offensive man in front of the goal line. The defense will go after him while the lead man passes to a man behind him.

Another play that is used for the same purpose is the "hooker". This is usually about five yards from the goal line. The "hooker" is a defensive player who is in the middle of the wall. The "hooker" is a defensive player who is in the middle of the wall.

When the ball is in the wall, the players are a team who can slip the ball to an offensive man in front of the goal line. The defense will go after him while the lead man passes to a man behind him.

Another play that is normal for the "B" team is the "tunnel". This is a similar play to the "hooker". The "tunnel" is a defensive player who is in the middle of the wall.

When the ball is in the wall, the players are a team who can slip the ball to an offensive man in front of the goal line. The defense will go after him while the lead man passes to a man behind him.

The Mustangs will go after him while the lead man passes to a man behind him.

When the ball is in the wall, the players are a team who can slip the ball to an offensive man in front of the goal line. The defense will go after him while the lead man passes to a man behind him.

When the ball is in the wall, the players are a team who can slip the ball to an offensive man in front of the goal line. The defense will go after him while the lead man passes to a man behind him.

Big weekend for batmen

The Mustangs ready for nationals

by FRED VULIN

The Pacific Northwest road trip is part of the past, but the memory lingers on. Coach Kent Harr's visiting team was defeated in a four-game series in Oregon. Coach Harr's visiting team was defeated in a four-game series in Washington and Oregon. The team's four-game series was against a team that had not won a single game during the season.

The Mustangs lost in the University of Washington (1-0), Portland State (1-1), and Cal State Fullerton (0-0), with a total of 1-1 in the series. The team's four-game series was against a team that had not won a single game during the season.

As a result of the four-game series, Coach Kent Harr was unable to match the team's four-game series against Idaho, Washington State, and Oregon. The team's four-game series was against a team that had not won a single game during the season.

The road trip left us well-prepared for the competition. We had a good start in Washington. We were prepared to face the challenge.

As a team we are ready to perform our best. We are prepared to face the challenge. We are ready to perform our best. We are prepared to face the challenge.

It's a great start to the season. We will continue to work hard. We will continue to work hard. We will continue to work hard.

This caused the Mustangs to lose an automatic six points; or as equivalent as a tie. In wrestling it's hard enough to win when one guy on the team has been pinned. But it's even harder when the entire team has been pinned.

Hitchcock said all of the reasons Hitchcock was selected as the head coach were that he had a good grasp of the game and the team. He had a good grasp of the game and the team. He had a good grasp of the game and the team.

Another disappointment came against Oregon State. The team was held to a 2-2 tie after a 2-2 tie in the game. Hitchcock turned the official's decision on the basis that Oregon State had not been able to score. Hitchcock turned the official's decision on the basis that Oregon State had not been able to score. Hitchcock turned the official's decision on the basis that Oregon State had not been able to score.

The Mustangs believe that a home crowd influences a referee anywhere from three to six points for the home team. Two wrestlers may be on the mat and the crowd will shout out, "Rally, Rally, Rally, Rally!" Hitchcock feels that the Mustangs sometimes doesn't even think about a violation, as in this case, until he hears the crowd. The coach also believes that if an official has some doubt about a controversial call he is about to make, he will wait until the crowd lets him know the way he should decide.
