RECEPTION HONORING PRESIDENT MCPHEE SCHEDULED THURSDAY AFTERNOON

All members of the college faculty and staff who can arrange to do so are invited to take part in a coffee/refreshment hour for retired Cal Poly President Julian A. McPhee, being planned for Thursday (August 4), from 2:00 to 4:00 p.m., in the Staff Dining Room.

Planned as a drop-in affair, Thursday’s activity is expected to give Mr. McPhee’s many friends an opportunity to wish him a happy and eventful retirement. Such an event was being planned, but had to be cancelled when Mr. McPhee’s illness caused cancellation of his activities prior to July 1.

CAL POLY FOUNDATION ELECTS OFFICERS FOR 1966-67

Robert E. Kennedy, administrative vice president of the college, was elected president of the Board of Directors of the college's non-profit foundation corporation during the board’s meeting held last month. Other officers of the board elected for 1966-67 were C. O. McCorkle, vice president; Dale W. Andrews, treasurer; and Harold O. Wilson, secretary. McCorkle is dean of the college at Cal Poly’s Kellogg Campus, Dr. Andrews is vice president in charge of the San Luis Obispo Campus, and Wilson is executive dean at the San Luis Obispo Campus.

The California State Polytechnic College Foundation, Inc., incorporated in 1940, is a non-profit corporation which operates certain auxiliary services at the San Luis Obispo Campus, the Kellogg Campus, and the Voorhis Campus. Included in the services performed by the foundation are operation of the college’s student housing and food service programs, the campus farms, and other agricultural project operations.

Eugene Brendlin, a former college teacher, high school vocational agriculture instructor, and San Luis Obispo County farmer, is the full-time manager of Cal Poly Foundation operations at the three campuses. John Francis, an attorney and former college teacher of business administration, is assistant manager with responsibility for operations at the Kellogg and Voorhis Campuses.

Members of the Cal Poly Foundation Board of Directors are now planning for eventual separation of the college's San Luis Obispo Campus from the Kellogg and Voorhis Campuses as authorized by Senate Bill 45, passed by the 1966 Legislature. That bill authorized the Trustees of the California State Colleges to establish and administer the Kellogg-Voorhis complex as a "polytechnic college" separate from the San Luis Obispo Campus. The legislation makes the separation legally possible after October 6, 1966, when and if the trustees act.

When the separation has been accomplished, it is expected that a newly-formed corporation at the Kellogg Campus will assume responsibility for operation of the auxiliary activities of the Kellogg-Voorhis complex, which are presently handled as branch activities of the San Luis Obispo Campus foundation.
SUMMER ENROLLMENT CONTINUES UPWARD CLIMB

Registration for the second term of the Summer Session at the San Luis Obispo Campus, completed last week, continued an upward trend of enrollment at the campus, according to information released by the office of Registrar F. Jerald Holley. The 208 students who signed up for second term classes combine with the 1,618 who registered for the Summer Quarter and the 308 who attended classes during the first term, to give the campus a total of 2,147 registrants for its combined program this summer.

Holley pointed out that the revised calendar format being used by the college for the first time this summer, makes direct comparison of registration with past summers impossible. The 1965 Summer Quarter, which included consecutive four- and six-week terms only, saw a total of 1,541 students register for classes. On the other hand, the present summer finds the college with a full 11-week Summer Quarter in addition to the Summer Session of two consecutive four-week terms, which run concurrently with the quarter.

The only statistical breakdown available is that for the current Summer Quarter. It finds the college with 1,257 men students and 361 women to equal the total of 1,618. It also includes 151 freshman, 199 sophomore, 331 junior, 572 senior, 35 graduate, and 329 limited students. Broken down by instructional divisions, the figures show that the Applied Arts Division, with 513, has the largest student enrollment. Not far behind are the Engineering Division, with 440, the Agriculture Division, with 401, and the Applied Sciences Division, with 264 students.

DEAN OF ENGINEERING REASSIGNED

Harold P. Hayes, dean of engineering at Cal Poly's San Luis Obispo Campus since 1952, has been reassigned to full-time teaching duties as a member of the faculty of the campus Mechanical Engineering Department effective in September. Announcement of the administrative change came last week from Dr. Dale W. Andrews, vice president in charge of the San Luis Obispo Campus.

Since April, Hayes has been on special assignment for the purpose of evaluating accreditation reports, developing proposals for an over-all study and evaluation of the college's engineering program, and other planning tasks necessary to the future improvement of the San Luis Obispo Campus' engineering program.

Dr. John B. Hirt, who has been serving as temporary administrator of the Engineering Division during Dean Hayes' special assignment, will continue in that assignment, according to Vice President Andrews.

In the interim, plans are being developed for selection and appointment of a new dean of engineering, Dr. Andrews said. Selection of a major dean requires consultation with the faculty and approval of the Chancellor of the California State Colleges, Dr. Glenn S. Dumke. Dr. Andrews added that prior to establishment of the selection procedure, he will consult with the Executive Committee of the Faculty-Staff Council and with heads of Engineering Division departments.

Dean Hayes served as head of the Mechanical Engineering Department at University of Santa Clara from 1946 to 1951. He took over administration of the San Luis Obispo Campus Engineering Division in 1952 from Charles E. Knott, the college's first Engineering Division head, who retired in 1959 after serving the college 38 years as an administrator and teacher.
Accreditation of the San Luis Obispo Campus' Architecture and Architectural Engineering Department was announced last week. With the accreditation, the architecture department joins some 60 other schools of architecture across the nation which have been approved by the board.

Most immediate effect of the accreditation, according to Vice President Dale W. Andrews, who made the announcement, is a reduction of the term of experience required of graduates of the department before they may take the test required of architects for professional licensing by the State of California. Vice President Andrews said that, in contrast with the five years of professional experience required of Cal Poly graduates in the past, accreditation will reduce the period of experience required before the examination to but three years.

One of but five schools of architecture in California, Cal Poly's architecture department is among the largest such schools in the nation. Since graduating its first students in 1950, it has grown to the point that it now expects a student body of over 800 for the Fall Quarter. The department's programs, originally limited to the Bachelor of Science Degree with special options in either design or structure, were expanded in 1963. They now include both the five-year Bachelor of Architecture Degree and the BS in Architectural Engineering.

George Hasslein, a member of the campus faculty since 1949, has been head of the department since 1951 and heads a faculty which now includes 30 members.

C. Milton Hill, Auto Shop, joined the Cal Poly staff as a mechanic last month. A veteran of 25 years in the auto and equipment sales and maintenance field, he has lived in San Luis Obispo since 1958. Prior to that time he lived and worked in the Pasadena-Arcadia area.
