SAC pushes bus system subsidy plan

by Jorie SANCHEZ

Formal approval of criteria for a priority budgeting system and a proposed All-suburbs of the San Luis Obispo Bus System was given Wednesday night by the Student Affairs Council.

The priority budgeting system would establish a set of guidelines for determining money allocations to All-suburbs groups. Final action on six criteria for the system was delayed for three weeks in order to allow for student input from the school councils.

The six criteria endorsed by SAC, in order of importance, are: active participation, educational benefit, national recognition, financial stability, and community benefit.

Debate on the issue focused on the need for a money allocation. The proposed budgeting system, Jack Spencer, representative from Business and Social Sciences, pointed out the arbitrary nature of priorities in voting on the objections to the proposal.

John Kuhns, vice-president of the All-suburbs, defended the proposal.

"It's got to be arbitrary," he said while speaking of the plan. "Sooner or later we're going to have to make the hard decision of how much money we are going to give them (the budget groups).

SAC endorsement of the priority budgeting criteria was unanimous.

Approval of a $3,500 All-suburbs subsidy of the San Luis Obispo Bus System was also unanimous. The subsidy, proposed by All-suburbs President John Holley last week, was denied to the extent of making a student fare of 10 cents on the bus system which is scheduled to begin operations April 1.

The move was prompted by the refusal of the Bus System to allow fare reductions for special interest groups—like Cal Poly Student Alliance—where the one-way fare would be 30 cents.

Under the Holley proposal, the student would pay a fare of 10 cents when he boards the bus.

I'm compelled to respond to Judy Nagle's letter of February 1st, with specific reference to the ROTC issue. In one fell swoop, she has impugned the quality of the University, the Military Science Department, and its faculty and staff. Most importantly, she has attacked any number of students who, by their very presence, are trying to do something about the problem.

I believe that even the wife of a one-quarter-experience instructor might concede that such a sweeping charge would run headlong into the many Poly students who have been subjected to the same experience. If, in fact, they have not been exposed to either print or any visible activity at the source of the data she would need. Should Mrs. Nagle be interested in documenting her case after the fact, I can suggest the following steps as a start:

Having condemned our students by drawing inference as not being interested in quality education, she is entitled to establish a comprehensive, logical rebuttal. It is not too much to expect her to certify their impression on the ROTC program. In an attempt that in the process she would run heading into the major Poly students who have graduated with honor and later distinguished themselves in careers ranging the professions, industry, and the military.

Having listed our quarter's record of grades issued and departmental and compared it to a CRUC average (nineteen campuses), she might also attempt a closer comparative analysis with respect to the range of deviations from that average, with particular attention to correlation within class level, course unit groupings, and subject matter. It might even emerge in that analysis that students tend to do better than average in courses they take of their own volition, as compared to mandatory courses. Not only is each military science student required to choose, but students voluntarily assume an assignment overlooked by a full quarter's work in pursuing the program in completion. Hardy even maintains he is a better player than his reputation.

Having questioned also the telegrams of men who, as a result, are being threatened, she should survey each group she feels real target. To test the quality and integrity she might also display an active role in self-defense by keeping the forums appropriate for such commeeting. Having adhered to the Department to the Rot in the Academic Senate, and instead of taking a cheap shot in the dark via this "LETTERS" column, she might have anticipated other forums would have required her to present a cogent and substantive case, devoid of emotional and personality issues, and would have provided the accused the opportunity for timely rebuttal.

As in the basic relevance of an instructor's wife raising the question of academic validity, particularly if a wife who, so far as I know, has no fact of the instructor's classroom, I can view Mrs. Nagle's allegations as little more than preposterous and haughty, based upon the fragment of hearsay data, and totally inappropriate. What is the purpose of providing such material as they depict the faculty and the area? She does an outrageous disservice to the University community, to the students for whom the profession is in effect, and not to the Service that has provided her husband with a successful career as an active professional officer.

SLO bus system to get ASI aid...

(continued from page 1) information on the number of deviations greater than that of the 1973 cohort.

Dan Marple is batting at a .383 clip. He is the other half of the best power-hitting duo in the Valley. Dave Fowler. The DH has a .304 average, one home run and five RBIs. The Mustangs play good team defense, and they take the one-run approach to the game. The series possibility of increasing the gain leads to a more realistic alternative to the ASI's financial hurdle. Haley was not enthusiastic about the prospects. "We'll have events that just a few patrons will pay a lot of money for," he said.

He said a more realistic and national approach for the ASI to take would be to seek alternative sources of income. He called on the students to consider the matter and develop some income-making proposals.

Batters to open CCAA season

The Mustang baseball team will open league play today with some of the finest hitting players Poly has seen in years. Leading the list of Mustang hitters is Kent Wilson. The second baseman has gone 10 for 40 and has a total of five home runs. His round-tripper total is among the highest of any Poly hitter and he is expected to lead the team in home runs. The DH has a .304 average, one home run and five RBIs. Marple is batting at a .383 clip. He is the other half of the best power-hitting duo in the Valley. Dave Fowler. The DH has a .304 average, one home run and five RBIs. poly plays good team defense, and they take the one-run approach to the game. The series

The Mustangs will be a real test for Poly, who last year won a close game against the Titans. This year's team is expected to be a strong favorite against the Titans.

Everybody likes some kind of music, and a good component system really increases the pleasure of your favorite records, tapes and radio broadcasts. Now we’ve come up with a way to help you start or improve a component system even if you’re temporarily strapped for cash. On approved credit, we’ll dispense with the usual down payment and delay your monthly payments for up to 180 days. If you come in right away, you can also take advantage of the very special prices on the equipment shown here, and there’s lots more to choose from in our store. Our extended financing terms can be applied to any purchase over $120, so you can take home whatever will be best for your living room. Why wait for an income tax refund? Good sound is as close as your nearby Pacific Stereo store.

**Enjo[y**  It **Now**  No Payments **til June**

Beats A Set Of Speakers at the Same Price

When you buy a stereo system, you want not only the best sound from it, but a set of speakers that are good on the outside, too. And we’ve got them for you. The price is the same for the whole system, including a speaker model that’s priced separately. It’s a deal you can’t afford to miss, and it will look good in any room. The 9900A has a 7-inch woofer and a tweeter that’s a built-in amplifier. Each speaker has a built-in amplifier and a tweeter, and the whole system is priced at $197. The 9900A has a built-in amplifier and a tweeter, and the whole system is priced at $348. The 9900A has a built-in amplifier and a tweeter, and the whole system is priced at $197. The 9900A has a built-in amplifier and a tweeter, and the whole system is priced at $348.

**Our Lowest Price Yet for TEAC Cassette Deck**

The TEAC 130 is a compact unit that is easy to use and has good sound quality. It has a 3-position equalizer, a built-in amplifier, and a microphone input, and it has an output of 10 watts per channel. Each speaker has a built-in amplifier and a tweeter, and the whole system is priced at $197. The 9900A has a built-in amplifier and a tweeter, and the whole system is priced at $348. "The Place To Buy A Music System"
Cager win will cinch CCAA title

by ROBERT DRUMMOND

The smile on basketball coach Ernie Wheeler's face is so big that an extra wide door had to be put in his office so he could leave and enter.

Good is not the word to describe how things have been going for the Mustangs this week--fantastic is. Things are rosy for Wheeler and his hoopsmen and with a break here or there, things may even get rosier. The news is as follows.

-Thanks to Cal State Fullerton permitting UC Riverside last week the Mustangs have clinched at least a spot in the NCAA Tournament. It is the third time in Poly history that a basketball team has had a share of the title.
- Wheeler and his man only have to win one of two games this weekend to bring home an outright CCAA championship for the first time in 15 years.
- The Mustangs have been invited to participate in the Far West Regional Basketball Tournament, a stepping stone to the NCAA Regionals.
- Poly was awarded host honors for the Far West Tourney. The Regionals will be held in the Poly Gymnasium.
- Nominated for 2 Academy Awards including:
  - JOHN HOUSEMAN-BEST SUPPORTING ACTOR
  - MADONNA-BEST ACTRESS

Your toughest professor just caught you in his bedroom with his daughter. He's eroding your final exam right now.

Good luck.

The Mustangs were not only invited but were the first and only team to far to receive a spot for the regional play-offs. This fact is tribute to the fine basketball team Poly came in on the job coach Wheeler has done with the team.

This week's games are the youngest team in the CCAA conference with only two senior players. It was supposed to be a building year for the cagers, a year of getting together and maybe playing 50 percent.

Wheeler and his staff built the team, polished it and fine tuned it. Wheeler's leading a nationally ranked defensive team and a regional contender. The Mustangs bounced back off a poor 1-6 season to win 11 out of 13 games using a giant killing some defense and great team play.

The biggest thing in the world is to do is to run up and down the floor. We have asked more from our players. We've asked them to play defense and that's 80 to 90 percent during. We've asked our people to be team oriented on offense. This team more than any other I've ever associated with has come the closest to achieving the goal of total team play.

The Mustangs will have to tuck in two games against a high pressure, must hoopera but it's going to take natural as breathing to the home crowd. The highlender have to win to be considered for a regional tournament spot. The Mustangs would like to prove to the conference that Poly is a number one team by beating the pre season favorites.

Coach Wheeler would also like to work his way into a high pressure, must hoopera but It's going to take natural as breathing to the home crowd. The highlender have to win to be considered for a regional tournament spot. The Mustangs would like to prove to the conference that Poly is a number one team by beating the pre season favorites.
