In a wintry weather, Mr. Moss related his stirring experiences to his enraptured audience.

**SAC rejects bill to amend bylaws**

by JOB SNYDER

A bill to facilitate amendments to all Bylaws, Bill 74-1, was withdrawn from further consideration Wednesday night by the Student Affairs Council, in its last meeting of the quarter. Bill 74-1 which would have eliminated mandatory student elections for minor and technical changes in the bylaws unless specifically called for by SAC, the Student Executive Cabinet or a student petition, was called over the opposition of Mark Barkey, representative from Human Development and Education, and his sponsor, Ken Haygood from Business and Mathematics.

As a result of this action, changes to the bylaws will still require a student vote and amendments to all Bylaws by this Council will go to a student election on May 9 and 10.

Originally introduced on January 30, Bill 74-1 has been delayed, withdrawn, reintroduced and postponed for the last six weeks. Although the reasons for the bill's withdrawal varied, it was because of general disenchantment with the language of the bill that caused it to be held for further consideration by SAC.

Bill 74-1 represents a project by speech majors Greg Spencer and Chris Staats. The two students described a project they had been working on for a semester, which they called "reparative speech." They believed that the bill was "misunderstood," and they wanted it to be amended and clarified.

**Racer gathers no Moss**

by MARIJ NIEVES

The audience sat looking at and moving with a man—a man who was unconscious for one month and paralyzed for two as the result of an Easter Sunday racing accident 13 years ago.

"The driver must realize that he is competing in one of the most dangerous sports in the world," said Bill Moss. "And he has to accept the rules of the game."

The courage of this British racer was unmistakable to the near-capacity crowd gathered in Chumash Auditorium last Wednesday night. Every fiber of his being seemed to vibrate with the strength and determination that inspired the great racer he once was, and the diversified man he is today.

Winner of ten gold medals for most successful British racer of the past 17 years in his circuit, he now is a writer, a public relations man and a television commentator.

A prime example of his new work came in his recent trip to the Far East, where he covered a new tire without solutions to dormitory problems brainstormed.

Are waterbeds standard equipment in the dorms? Yes, if the residence halls representative to the Interhall Council had their way in the running of the residence hall facility program.

In an all-day brainstorming session, the 8 representatives discussed topics ranging from the ideal dorm facilities, the roles of the residence staff and students in analyzing and suggesting a solution to a major problem in a residence hall.

The majority of the groups felt the ever-present noise pollution warranted the most attention. One solution to the problem was the organization of a dorm with round-the-clock quiet hours.

The most popular exercise was to create a new society in the New World consisting of 7 people, or a new form of the family. The idea was generated by a professor of the famed Institute for Advanced Study.

In their proposal, students were asked to use their lives to make a contribution to mankind.

"The driver must realize that he has driven for Jaguar, H.M., Cooper, Maserati, Vanwall and Mercedes."

He has raced with and against such greats as Dan Gurney, and "his Jody Scheckter will reach the realm of world champions in two years."

"When you're racing against a man, you know how good he is," Moss said. "It isn't just his speed, it's his intelligence as well."

**300 seats left to see Kortk**

A total of 900 tickets remain available for the Saturday night "Interhall Council Committee Chairman Robert Evening." The program will take place Thursday morning. All tickets for the program must be in the Auditorium. The program is sponsored by the Student Affairs Council.

McKinney urged students to purchase their tickets early and bring pillows as protection against the rumbling effects of the hard floor. Doors will open at 7 p.m. and the show will begin at 8 p.m.
Oscar race

Streisand should take prize

(by Rick Goulart)

Streisand should take prize

(continued from page 1)

(continued from page 1)

appears to be the Academy's likely choice as well.

Streisand was nominated for a third Oscar this year, and is the only actress nominated in a three-part stranglehold on the competition. This is a difficult situation for Streisand, who has been competing with other strong players, such as Barbra Streisand and Joanna Woodward, in the past.

At any rate, the Best Actress category this year is the most difficult to predict, as Streisand has her own strong supporting cast and particular style that is hard to explain.

Blonde's Jackson's performance in "A Touch of Class" is probably the first time she can play a supporting role, but running in her role as a sex symbol, the actress played a supporting role. Her portrayal as the straight girl to George Segal's character was as refined and polished as her previous Oscar-winning performances for the Academy.

Although Marlon Brando was nominated for the Academy Awards for his role in "Last Tango in Paris," he is on George C. Scott's list for the Academy's best supporting actor for his role in "The Last Detail." Streisand's nomination for last year's award was a sign of her continued support for the Academy.

The Academy is getting tired of Streisand's"A Star Is Born" performance. Her portrayal as the political candidate in "Cinderella Liberty" was seen as moving, but Streisand's performance in "The Last Detail" was underappreciated by the Academy.

ACADEMY MOTIVES AND THE "SNORKEL" EFFECT

Mustangs meet Sonoma State tonight

For a second-year coach, Erin Wheeler has done OK.

After guiding the Mustangs to a 14-10 record in his first year at the helm at Poly, Wheeler has directed his team to a 17-4 record and the first CCAA championship (outright) in 30 years.

Tonight's game will be the biggest of the season—the first game in the Far Western Regional against Sonoma State. Even though the Mustangs have defeated the number one team once this year (17-4), it won't be an easy time for the Poly team.

The Mustangs have a 17-4 record and are co-champions of the Par Western Conference. Sonoma reached the Regionals by defeating the University of San Diego 60-64. At one time during the season Sonoma had a 14-game win streak.

Gerald Jones
It was the defense that carried the Mustangs through the season. The Poly defense only allowed 51.8 points a game, the lowest average in the league, and the rebound average (11.1) are both ranked third of the last four years.

The Mustangs will oppose the shooting and rebounding efforts of Belander and Tiedeman with their pair of outstanding seniors. Williams holds a 14.4 point average while collecting 9.6 rebounds a game. Williams is shooting 62 percent from the field and 73 percent from the free throw line.

The other senior on Wheeler's team is John Parker. The six-foot three-inch forward scored 13.0 points a game and pulled down 12.1 rebounds a game. At a press luncheon yesterday Wheeler spoke of the importance of his two seniors. The seniors and it was obvious the duo held the leadership position of the team.

Sonoma has five of it's top six players from last year's squad. Rebounding will not be a problem.
